PROCEEDINGS AND DEBATES OF THE 87th CONGRESS, FIRST SESSION

SENATE

THURSDAY, MARCH 16, 1961

The Senate met at 12 o'clock meridian, and was called to order by the Vice President.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Gracious God, our Father, Thou searcher of men's hearts, from whom no secrets are hid, we would turn aside from the feverish ways of the world, knowing that only in Thee can we find the strength to endure.

Amid the draining duties of these demanding days, only by the spiritual resources that are found in Thee may our jaded spirits be refreshed and our souls restored.

In this dear land of our love and prayer, may we close our national ranks in a new unity, as sinister powers without Thee in awe plot to destroy the birthright of our liberty of worship, and of speech, and the sanctity of the individual.

We pledge our hopes, our faith, our lives,
That freedom shall not die;
We pray Thy guidance, strength, and grace,
Almighty God on high.
Amen.

REPORT OF A COMMITTEE SUBMITTED DURING ADJOURNMENT

Under authority of the order of the Senate of March 15, 1961, Mr. BYRD of Virginia, on March 15, 1961, from the Committee on Finance, to which was referred the bill (H.R. 4806) to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes, reported it favorably, with amendments, and submitted a report (No. 69) thereon, which report was printed.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, March 15, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

REPORT ON FEDERAL ASSISTANCE TO STATE AND LOCAL GOVERNMENTS IN MAJOR DISASTERS—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 111)

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with the accompanying report, referred to the Committee on Public Works:

To the Congress of the United States:

I have the honor to transmit herewith a report of activity under authority of Public Law 875, 81st Congress, as amended, and required by section 8 of such law.

Funds which have been appropriated to accomplish the Federal assistance determined eligible under this authority are specifically appropriated to the President for purposes of disaster relief.

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 16, 1961.*

REPORT OF SURGEON GENERAL OF PUBLIC HEALTH SERVICE—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 110)

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with the accompanying report, referred to the Committee on Labor and Public Welfare:

To the Congress of the United States:

Under the provisions of title VII of the Public Health Service Act, as amended by Public Law 835, 84th Congress, and further amended by Public Law 777, 85th Congress, I transmit herewith for the information of the Congress the fifth annual report of the Surgeon General of the Public Health Service summarizing the activities of the health research facilities program.

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 14, 1961.*

AMERICAN AGRICULTURE — MESSAGE FROM THE PRESIDENT (H. DOC. NO. 109)

The VICE PRESIDENT. The Chair lays before the Senate a message from the President of the United States, which has been read in the House; and, without objection, it will be printed in the RECORD, without being read, and will be referred to the Committee on Agriculture and Forestry.

To the Congress of the United States:

In recent times, it has become customary to speak of American agriculture in terms of distress and failure, as a burden on the taxpayers and a depressant on the economy. But this is only one part of the picture. As the provider of our food and fiber, American agriculture is a highly successful and highly efficient industry. In no other country, and at no other time in the history of our own farm economy, have so many people been so well provided with such abundance and variety at such low real cost.

Nor is this bounty confined to our own people. We are today the world's largest exporter of food and fiber. Seventy percent of these exports are sales for dollars, one of the principal bulwarks of our export trade. The other 30 percent is made available under special programs to promote economic development abroad and to relieve hunger and suffering—efforts that are fundamental to our world leadership and security.

In short, our farmers deserve praise, not condemnation; and their efficiency should be a cause for gratitude, not something for which they are penalized. For their very efficiency and productivity lies at the heart of the distress in American agriculture which—while it represents only a part of the picture—constitutes that part to which our efforts must be devoted. The steady and continuing decline in income has been most serious for the 7 million people engaged in farming operations, and substandard conditions on the farms—which are so important to our economy—lead directly to substandard conditions in all segments of the national economy. Farming remains our largest industry—it employs 12 times as many people as work in steel and 9 times as many as in the automobile industry. It employs, in fact, more people than steel, automobiles, public utilities, and the transportation industry combined. The farmer is a consumer as well as a producer, and other economic groups are affected by the continued drop in farm purchasing power. Some $40 billion is spent each year for production goods and services needed on our farms and for the consumer goods used by farm families. Six million people are employed in the manufacture and distribution of the supplies that farmers use. Each year farm families spend from $2.5 to $3.0 billion for new automobiles, trucks, tractors and other farm machinery; and $3.5 billion for fuel, lubricants, and maintenance of motor vehicles and machinery. It is deeply in the interest of all Americans that

our agriculture be not only progressive but prosperous.

Yet as our farm families enter the 1960's, their incomes are lower relative to the rest of our population than at any time since the 1930's. Although there has been a continuous rise in consumer prices during the past 10 years, farm income has steadily declined. Abundant production has filled our bins and warehouses, but 1 out of 10 American households have diets so inadaquate that they fall below two-thirds of the standard nutrition requirements.

These paradoxes are of concern to all of us—the farmer, the taxpayer, and the consumer. They affect the vitality of our Nation, the strength of our most basic industry, agriculture, and the economic health of every community in the land.

Much of the current problem results from four factors:

First. The inability of millions of separate procedures to control either output or price of their products. Acting individually the farmer can neither plan his production to meet modern requirements, and shift away from commodities for which there is limited demand, nor bargain effectively for a fair return.

Second. A technological revolution in agricultural production, which is still underway, that has resulted in generally increased yield from a reduced input of acreage and manpower—so that today each farmer produces the food and fiber necessary for 25 people, while at the turn of the century each farmer produced the food and fiber for only 7 people.

Third. A faulty system of distribution, which allows one-half of the people of the free world to suffer from malnutrition at the very same time our surpluses have reached a point where the availability of adequate storage facilities has become a real problem.

Fourth. The steady and continued increase in farm costs. The average farm requires an investment of $36,000. The farmer's interest costs have increased over 300 percent in the past decade. His equipment costs have increased 75 percent.

The solution lies not so much in severe restrictions upon our talent to produce as upon proper channeling of our abundance into more effective and expanded uses. American agricultural abundance can be forged into both a significant instrument of foreign policy and a weapon against domestic hardship and hunger. It is no less our purpose to insure that the farm family that produced this wealth will have a parity in income and equality in opportunity with urban families—for the family farm should be protected and preserved as a basic American institution.

Our intention is to accomplish these goals while eventually reducing the cost of our programs to the taxpayer. This can be accomplished in part because it is cheaper to use our agricultural products than to store them. Present storage costs total over $500 million a year or $1.4 million every day.

But it must also be our purpose to see that farm products return a fair income because they are fairly priced. No farm program should exploit the consumer. But neither can it subsidize the consumer at the cost of subnormal incomes to the farmer. We cannot tolerate substandard conditions on the farm any more than we can in industry. A fair return is a necessity for labor, capital and management in industry. It is equally necessary for those who produce our food and fiber.

It must be our purpose to provide an agricultural program that will eventually eliminate the vast farm surpluses that overhang the market and overburden the economy; that will permit effective economies of administration; that will recognize the right of the consumer to fair prices; and that will permit the farmer to receive a fair return for his labor. This will be neither simple nor easy. It will require the cooperation and effort of the farmer, government, and the urban dweller. But the alternative is not alone a substandard rural economy—it is a weakened nation.

I. A WIDER RANGE OF TOOLS TO BOOST FARM INCOME

This administration's studies to date on how to meet our responsibilities in agriculture have led us to the following conclusions:

There is no single farm problem, and no single solution. Each commodity requires a somewhat different approach.

Swift and frequent changes in weather, acreage, yield, and international market conditions require Federal programs alert and sensitive to change.

The Secretary of Agriculture is now equipped with broad responsibilities for the maintenance of farm income. In order to fully and effectively meet these responsibilities he has had authority to set and adjust the level of support prices, set the level and terms of loans, prescribe acreage allotments, specify conservation payments, establish marketing agreements and orders, and take other steps to adjust supplies and protect the prices and incomes of farmers. But these powers have not been fully employed in recent years; and neither are they sufficiently flexible for all contingencies.

I am deeply concerned—and I believe the Congress shares that concern, along with most of our consumers, taxpayers, and the farmers themselves—that our farm program is drifting into a chaotic state, piling up surpluses, penalizing efficiency, rewarding inertia and noncompliance, and constantly being torn and weakened by disputes and conflicting pressures. This is not a situation that can be ended by any one sweeping act of magic. It will require diligent study, hard work, imaginative initiative, and sound, constructive leadership. But I believe that the decline in farm income and the drift in farm policy can both be gradually reversed by the program I recommend.

This will require that the Secretary of Agriculture make full and effective use of all the responsibilities now reposed in him; and that the Congress establish guidelines to enable the administration to exercise responsible leadership in consultation with those farmers most concerned in establishing sound programs for each commodity for which they are needed.

A generation ago, Congress enacted the Reciprocal Trade Agreements Act to place in the executive branch the authority for a tariff-by-tariff approach that could be more effectively and equitably handled there instead of in the Halls of Congress. The Reorganization Act similarly shifted the initiative in that complex field to the executive branch. Now agriculture needs a commodity-by-commodity approach, fitting each program to the pertinent problems, initiated by the Secretary of Agriculture under Presidential direction, subject to the approval of the farmers voting in referendums and to final review by the Congress.

The authority Congress has previously granted to the Secretary for the management of farm supply and the stabilization of farm income requires additional adjustment. A variety of gaps must be filled before all necessary administrative tools are available for every commodity. I am therefore asking the Congress to enact legislation to be submitted shortly and to be known as the Agricultural Enabling Amendments Act of 1961, covering the following matters:

1. The Agricultural Marketing Agreement Act of 1937, which now authorizes marketing orders for milk, certain fruits and vegetables, tobacco, soybeans, and some specialized crops, should be amended to permit marketing orders to be used for a wider range of commodities, to make it more flexible in dealing with commodities for which a national or area program may be devised, and to permit, subject to the approval of producers and acceptance of the Congress as noted below, the establishment of quotas and allotments for individual producers. This will enable the valuable tool of the marketing order to be extended and combined with effective production control where the latter is essential.

2. The Agricultural Adjustment Act of 1938 should be amended to permit supply adjustment through marketing quotas for any agricultural commodity for which quotas might be most effective in achieving our goals and subject to affirmative approval by producers and acceptance of the Congress as indicated below. Quotas should be authorized either in quantitative terms—pounds, bushels, or bales—or in terms of production for individual farm acreage allotments. This will insure effective supply adjustment where this is indicated under proper safeguards. Such adjustment in turn is our best assurance against excessive costs to the taxpayers.

3. The Agricultural Act of 1949 should be modified to permit, subject to similar producer approval and congressional acceptance, the method of supporting producer income that is most appropriate to the competitive and international position of the commodity, the nature of the supply adjustment needed, and economy to the taxpayer. There should be authorization of compensatory payments as well as commodity loans, commodity purchases, diversion programs,

incentive payments, and export payments as circumstances require. All of these measures, properly safeguarded as to use, have proven their value in practice and are essential if the programs are to be adjusted to needs of individual commodities. As a part of payment programs the Secretary of Agriculture should be authorized to make payments in kind in cases where producers prefer such payments and where the Secretary determines that the goal of reduction of available stocks makes such payments feasible.

4. The Soil Conservation and Domestic Allotment Act of 1936 should be amended to provide for the establishment of national farmer advisory committees for every commodity or group of related commodities for which a new supply adjustment program is planned. Members of the committees would be elected by the producers of the commodities involved or their appropriate representatives. In consultation with the Secretary of Agriculture, they would be charged with the responsibility for considering and recommending individual commodity programs. To make it possible for farmers to participate in the work and consultation necessary for the development and implementation of sound proposals, the bill should authorize the payment of expenses for the members of these farmer committees.

In order to insure effective farmer participation in the administration of farm programs on the local level, the Secretary of Agriculture is being directed to revitalize the county and local farmer committee system and to recommend such amendments as may be necessary to safeguard such farmer participation.

5. Programs formulated in accordance with the enabling legislation here proposed and involving controls over production and marketing should not go into effect until approved by a majority of two-thirds of the producers voting under regularly authorized voting procedures and there should be legislation to this end. Such voting will be after full opportunity for debate and discussion and will insure that the producers of no commodity will be asked to accept programs to which they have not given strong affirmative approval.

6. All comprehensive programs prepared under existing and requested authority will be duly submitted to the Congress of the United States not less than 60 days before taking effect. If within the 60-day period the program is rejected by either House of the Congress, the program will not go into effect. Thus no agricultural program will be adopted if it is regarded adversely by a majority of either House of the Congress.

Agricultural programs must always involve an effort to take the best of the available alternatives. Our task, building on past experience and present authority, is to find a simple and rapid accommodation to changing circumstances which is both effective and consistent with our democratic traditions. I believe that the present proposals will go a long way toward achieving these goals.

II. EXPANDING THE USE OF OUR FARM ABUNDANCE

A. To improve distribution and nutrition at home:

We have already taken a number of steps toward greater utilization of our agricultural abundance at home as well as abroad. I have directed the Secretary of Agriculture to increase both the quantity and quality of our surplus food distribution to the needy, and under this program the amount of food going to each needy family has already been doubled. In addition, pilot food stamp programs are being launched in eight areas to provide emergency aid where the distress is particularly acute. These pilot plans will furnish operating experience necessary for our determination of the most effective kind of food allotment program.

To improve further our system of distribution I recommend:

1. An expansion of the school lunch program, with the increase going to those schools providing a high proportion of free lunches because of the high level of unemployment in their localities, and with a change in the allocation formula to include, in addition to school age population and per capita income, the number of children who actually receive school lunches. In this way the best possible nutrition will be made available to every schoolchild, regardless of the economic condition of his family or his local school district.

2. Extension and improvement of the special school milk program. Existing authorization for this program expires June 30. No lapse should be permitted.

B. To improve nutrition among needy peoples abroad:

We have barely begun to explore the ways in which our abundance can advance the cause of peace and freedom around the world, and contribute to the well-being and stability of undeveloped nations whose peoples eye our storage stockpiles with hungry dissatisfaction. I have already dispatched a series of missions to such areas to ascertain how we can best use our food in a helpful fashion. In addition, I ask the Congress:

1. As previously requested, to authorize an additional $2 billion for this calendar year under title I of the Agricultural Trade Development and Assistance Act of 1954, which permits the sale for local currencies of our surplus agricultural products. The need for this legislation is urgent, for the funds now available under this title are virtually exhausted. Until Congress acts we will be unable to process new requests now coming in from friendly governments.

2. To extend and expand the Agricultural Trade Development and Assistance Act of 1954 for a period of 5 years. Unless there is some assurance of a continuing program we can neither make the advance plans best suited to an effective instrument of foreign policy nor gage its long-term effect upon our domestic program. Title I sales should be authorized at a higher level; and our contributions of food and fiber to voluntary agencies such as CARE for use abroad should be liberalized.

C. Improved research:

We should not only continue our research activities directed toward better production and lower costs, but we must expand research into marketing, nutrition and especially utilization. Today approximately two-thirds of our agricultural research is directed toward improved production and only one-third toward utilization. Yet these small expenditures have resulted in the past in developing such items as frozen orange juice, potato flakes, and other foods which have vastly increased food demand and made possible the use of an estimated 500 million pounds of additional animal fats in livestock feed, an additional 250 million pounds of additional animal fats in the manufacture of plastics, and an additional 800,000 bales of cotton for washable cotton fabrics. The proportion of our effort directed at food and fiber utilization should be increased.

In addition, I am directing the Secretary of Agriculture to survey the nutritional needs of our Nation and to formulate plans for helping achieve optimum nutrition goals for all Americans. The Secretary and the Food for Peace Director have already initiated a study of the food and fiber needs of other free countries. With completion of these studies we will be in a position to press forward vigorously to eliminate malnutrition and starvation as a common experience.

D. Expanded exports:

I am directing the Secretary of Agriculture and all other appropriate departments and agencies of the Government to intensify our efforts to expand dollar sales of agricultural products. The Foreign Agricultural Service's assignment of market promotion specialists and agricultural attachés to critical areas will be encouraged. This will strengthen our oversea programs of trade fair exhibits and trade centers, improve information services and market news to the U.S. trade, and supply us with vitally needed information about agricultural developments abroad and the competition our products face in world markets.

In our progress toward a trade liberalization program, there has been a marked lag in convincing other nations to reduce barriers on agricultural products. Especially at this time, it is important that we redouble our efforts to gain access for more of our agricultural products to the markets of foreign countries.

III. ENCOURAGEMENT OF COOPERATIVES

One of the methods by which farmers can increase their bargaining power and thus remedy to some extent their weakness in the marketplace is through the effective operation of their own cooperatives.

To this end I recommend legislation to reaffirm and protect the right of farmers to act together through their cooperatives in the processing and marketing of their products, the purchasing of supplies, and the furnishing of necessary services. This legislation should specifically permit farmers' cooperatives to purchase, acquire, and build processing plants and related facilities and to

merge with other cooperatives so long as such activities do not tend to create a monopoly or substantially lessen competition.

IV. LOW-INCOME FARMS

In those areas where farms are predominantly in the lowest income group, entire rural communities have suffered severe economic damage. The small businesses are liquidating, the community facilities are deteriorating, and community institutions are weakened. These present a special problem.

The area redevelopment bill now under consideration by the Congress is needed by farmers as urgently as it is needed in cities and towns. I reiterate my urgent recommendation for the speedy enactment of this bill, and thus enhance the resources available to the Secretary of Agriculture as he mobilizes all the services available to him, such as FHA, REA, Forest and Extension Services, to assist in the development of better levels of living, better income opportunities, and better communities in our rural depressed areas.

V. FARM CREDIT AND REA

One of the features of modern agriculture that poses an increasing problem to farmers, especially during periods of low income, is the need for increased capital investment, accompanied by the high cost of credit.

I am directing the Secretary of Agriculture to liberalize and extend the lending operations of the Farm Home Administration so that any needy farmer can obtain loans for operating capital and for farm home improvements at low cost, and I recommend that the present legislation be amended to permit farm improvement loans to be secured either by mortgages or by other acceptable forms of security.

I have further directed the Secretary of Agriculture to initiate two measures that will encourage the storage of grain on the farm and strengthen economic activity in farming areas:

(a) Modifying present farm credit regulations to permit farmers to borrow up to 95 percent (instead of the present 80 percent limit) of the cost of materials for building farm storage facilities and equipment; and

(b) Guaranteeing that farmers will be able to earn 2 full years' storage payments for continuing to store 1960 crop wheat, corn and grain sorghum, and at least 1 year's storage payments for continuing to store other 1960 crops.

The loans are for 5 years at an interest rate of 4 percent. The effect of this directive will be to increase the demand for steel, wood, and other building materials, to procure the additional farm storage needed for 1960 crops, and to place an estimated $40 million in credit funds in the rural economy in the months ahead.

I have also directed that the Rural Electrification Act be administered in accordance with the original intent and purpose of that program, which has done so much to advance agriculture throughout the Nation. Over 95 percent of our farms now have electricity. But much remains to be done. There are constantly increasing demands for additional power. Only one-third of our farms have modern telephone installations. The cooperatives which so successfully brought light and power to the farm can make an enormous contribution to the continued development of our rural communities.

VI. FOREST RESOURCES

One of our most important natural resources, and one of our most neglected, is our forest land.

We need to give special emphasis to the improvement of the 256 million acres of small, privately owned farm woodlands and other small forests. This is an important sector of our agricultural economy in which the rate of progress and production is far from satisfactory. Yet here is a crop which is not in surplus and to which many farmers should turn, for their benefit and the Nation's. If our grandchildren are to have only the same continuous supply of timber products as we now have, growth of timber on these farm woodlots and other small holdings will have to be doubled within the next 40 years. To insure adequate forest resources in the future by sound, effective programs relating to privately owned woodlands as well as our national forests, the following administrative and legislative measures are needed:

1. Rejuvenate the Forest Service's long-range program for the development and improvement of our national forests—a program already returning substantial revenues to the Treasury and designed eventually to return $500 million a year. Accompanying measures were requested in my earlier messages on resources.

2. Accelerate, through a larger Federal grant, the present Federal-State cooperative assistance program to farm and small forest owners for the application of scientific forestry techniques.

3. Expand tree planting funds, in order to make productive 40 million acres that will not restock naturally within a reasonable time, and to increase the timber stand on another 100 million acres.

4. Increase protection against losses caused by fire, forest insects, and tree diseases. The Federal Government's share of the burden in preventing and controlling forest fires has not been met, even though the States contribute the greater share.

5. Emphasize our incentive cost-sharing programs with owners for tree planting, timber stand improvement, and certain other practices under the agricultural conservation program.

6. Expand forestry research, too long neglected.

7. Encourage the establishment of management and marketing forest cooperatives.

VII. SOIL AND WATER CONSERVATION

We have so taken soil conservation for granted in this generation that we forget it is a task which is barely underway. By June 30, 1960, the Soil Conservation Service had helped 1,301,450 farmers and ranchers to complete basic conservation plans and an additional 500,000 were being assisted. But this represents only 27 percent of all farms and ranches in soil conservation districts. Nearly three-fourths of this important job remains to be done.

I am requesting the Congress to provide the funds necessary to accelerate this program for permanent soil conservation practices and to increase our efforts for small watersheds as well. These smaller projects, now being planned and developed, may well hold the key to our future water and soil requirements at a time of rapidly growing population.

CONCLUSION

The measures I have recommended are not directed solely to the purpose of aiding the farmer. Nor are they simple prescriptions for Federal assistance to a harried segment of our population. Rather they are directed toward broad goals of achieving agricultural production geared to meet needs for food and fiber at home and in the free world under programs that will enable the farmers of this Nation to earn a fair income.

We cannot expect to solve the farm problem in a day or in a year, or perhaps even in this administration. But we can and must adopt a new approach based on a clear recognition of the goals we seek, a realistic appraisal of the problems involved, and a firm determination to solve these problems and attain these goals.

The bills I have suggested will be debated and discussed in terms of general administration policies and powers. Various portions will undoubtedly be challenged as restrictive upon the farmer or inconsistent with complete freedom in the market. But I am convinced that the objectives of these programs will, when accomplished, provide for a reasonable balance between supply and demand. They will eliminate the hardship and suffering which inadequate returns force upon so many of our farm families; they will reduce our surpluses to manageable proportions; they will relieve the taxpayer of the unnecessary drain upon the Federal budget; they will spur our national economy, and they will assure the consumer of stable price levels.

Responsibility must be accompanied by the authority to accomplish these goals. If we move forward along the lines I have recommended, the entire Nation will benefit. The farmer can join the city dweller in the march toward economic health.

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 16, 1961.*

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed, without amendment, the bill (S. 451) to authorize the distribution of copies of the CONGRESSIONAL RECORD to former Members of Congress requesting such copies.

The message also announced that the House had agreed to the following concurrent resolutions of the Senate:

S. Con. Res. 7. Concurrent resolution to print as a Senate document a compilation of studies of U.S. foreign policy; and

S. Con. Res. 15. Concurrent resolution to print as a Senate document, with additional copies, "A Report on U.S. Foreign Operations," submitted by Senator ALLEN J. ELLENDER.

The message further announced that the House had passed a joint resolution (H.J. Res. 176) to provide for the reappointment of Dr. Jerome C. Hunsaker as Citizen Regent of the Board of Regents of the Smithsonian Institution, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the following concurrent resolutions, in which it requested the concurrence of the Senate:

H. Con. Res. 51. Concurrent resolution to print as a House document the publication "Facts on Communism—Volume II, the Soviet Union, From Lenin to Khrushchev," and to provide for the printing of additional copies;

H. Con. Res. 81. Concurrent resolution to provide for the printing of a House document; and

H. Con. Res. 142. Concurrent resolution authorizing the printing of additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics."

HOUSE JOINT RESOLUTION REFERRED

The joint resolution (H.J. Res. 176) to provide for the reappointment of Dr. Jerome C. Hunsaker as Citizen Regent of the Board of Regents of the Smithsonian Institution, was read twice by its title and referred to the Committee on Rules and Administration.

HOUSE CONCURRENT RESOLUTIONS REFERRED

The concurrent resolution (H. Con. Res. 51) to print as a House document the publication "Facts on Communism—Volume II, the Soviet Union, From Lenin to Khrushchev," and to provide for the printing of additional copies, was referred to the Committee on Rules and Administration, as follows:

Resolved by the House of Representatives (the Senate concurring), That the publication entitled "Facts on Communism—Volume II, the Soviet Union, From Lenin to Khrushchev" prepared by the Committee on Un-American Activities, House of Representatives, Eighty-Sixth Congress, second session, be printed as a House document; and that there be printed fifty thousand additional copies of said document of which fifteen thousand shall be for the use of said committee and thirty-five thousand copies to be prorated to the Members of the House of Representatives for a period of ninety days after which time the unused balance shall revert to the Committee on Un-American Activities.

The concurrent resolution (H. Con. Res. 81) to provide for the printing of a House document, was referred to the Committee on Rules and Administration, as follows:

Resolved by the House of Representatives (the Senate concurring), That the brochure entitled "How Our Laws Are Made", by Doctor Charles J. Zinn, law revision counsel of the House of Representatives Committee on the Judiciary, as set out in House Document 156 of the Eighty-sixth Congress, be printed as a House document, with emendations by the author and with a foreword by Honorable Edwin E. Willis; and that there be printed one hundred and thirty-two thousand additional copies to be prorated to the Members of the House of Representatives for a period of ninety days after which the unused balance shall revert to the Committee on the Judiciary.

The concurrent resolution (H. Con. Res. 142) authorizing the printing of additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics," was referred to the Committee on Rules and Administration, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed for the use of the Committee on Un-American Activities one hundred thousand additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics", Eighty-sixth Congress, second session.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETING DURING SENATE SESSION

Upon request of Mr. MANSFIELD, and by unanimous consent, the Subcommittee on Internal Security of the Committee on the Judiciary was authorized to meet during the session of the Senate today.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business, to consider the nominations on the calendar.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGE REFERRED

The VICE PRESIDENT laid before the Senate a message from the President of the United States submitting the nomination of Thomas D'Alesandro, Jr., of Maryland, to be a member of the Renegotiation Board, which was referred to the Committee on Finance.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. MANSFIELD, from the Committee on Rules and Administration:

James L. Harrison, of the District of Columbia, to be Public Printer.

By Mr. HILL, from the Committee on Labor and Public Welfare:

Dr. Worth Bagley Daniels, of the District of Columbia, to be a member of the Board of Regents of the National Library of Medicine, Public Health Service.

The VICE PRESIDENT. If there be no further reports of committees, the nominations on the calendar will be stated.

RENEGOTIATION BOARD

The Chief Clerk read the nomination of Herschel C. Loveless, of Iowa, to be a member of the Renegotiation Board.

Mr. MUSKIE. Mr. President, I rise in support of a man who needs no support. He is more than capable of standing on his own fine record of public service.

The President has submitted to us the nomination of the Honorable Herschel C. Loveless, former Governor of Iowa, to be a member of the Renegotiation Board. Membership on this Board carries with it the tremendous responsibility of protecting the interests of the United States in contracts with private firms. The members of the Board must be vigilant in their actions, while maintaining a fair position in relation to the companies involved.

Herschel Loveless' record as Governor of his State has been marked by a dedication to the public interest, an abiding fairness, and a rigid adherence to the highest standards of Government service. I welcome this nomination, and I commend the President on his selection.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

DEPARTMENT OF AGRICULTURE

The Chief Clerk read the nomination of Charles S. Murphy, of Maryland, to be Under Secretary of Agriculture.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of James T. Ralph, of California, to be an Assistant Secretary of Agriculture.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

FEDERAL TRADE COMMISSION

The Chief Clerk read the nomination of Paul Rand Dixon, of Tennessee, to be a Federal Trade Commissioner for the unexpired term of 7 years from September 26, 1960.

Mr. KEFAUVER. Mr. President, I speak in sincere and hearty support of the nomination of Paul Rand Dixon for the chairmanship of the Federal Trade Commission.

I know of no one with a more wide and substantial background in antitrust law. In his work with me as chief counsel of the Senate Antitrust and Monopoly Subcommittee, Mr. Dixon demonstrated this knowledge time and time again. His integrity and ability are of the highest, and these characteristics, coupled with devotion to fairness and to the principles of free enterprise, upon which our Nation are founded, make his nomination, in my opinion, one of the finest which our new administration has made.

It is with the greatest confidence in his many outstanding qualities and with the knowledge of these qualifications

from personal association that I recommend without hesitation the unanimous confirmation of his nomination by the Senate of the United States.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

U.S. ATTORNEYS

The Chief Clerk proceeded to read sundry nominations of U.S. attorneys.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations of U.S. attorneys be considered en bloc.

The VICE PRESIDENT. Without objection, these nominations will be considered en bloc; and, without objection, they are confirmed en bloc.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The VICE PRESIDENT. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

BIRTHDAY CONGRATULATIONS TO SENATOR MANSFIELD

Mr. AIKEN. Mr. President, I wish to take just a minute to refer to a significant date in history.

Of course, as all of us know, tomorrow will be the 17th of March, and is celebrated by the Irish as St. Patrick's Day. But at this time I wish to point out how fortunate that a day earlier has not been chosen as St. Patrick's Day, because he would have had difficulty, if not insurmountable competition, in finding a place in history, had he been eulogized on the 16th of March, instead of the 17th of March.

At this time I think I should inform the Senate that the competition would come from no one less than our own "St. Michael," the senior Senator from Montana [Mr. MANSFIELD], the majority leader of the Senate. I wish to congratulate him on having survived another year. I hope I shall be able to congratulate him, at the end of this session, on having survived this year in his new and not always easy position, as the Vice President well knows.

Certainly, all of us are very glad that after having lost the majority leader of last year—although I do not know that I use advisedly the word "lost"—we are fortunate enough to have the Senator from Montana take his seat.

Again I say St. Patrick was fortunate, too, because he receives more publicity for having encomiums paid to him a day later. [Laughter.]

Mr. DIRKSEN. Mr. President, I think the distinguished Senator from Vermont does indeed advisedly use the term "St. Michael," because nothing short of a tribute which is coextensive with the space age would account for the fact that the distinguished majority leader somehow got himself into the United States Navy at age 14. If that is not a significant achievement, I never saw one in this day and age.

Today, I wish to join in the observance of Senator MANSFIELD'S birth anniversary. He is by all odds one of the most gracious and one of the most kindly men I have ever encountered; and it is already manifest how that dissolving charm and that persuasive force have made a great and a significant impact upon the operations of this great deliberative body.

May he live long, and may his years be many, and all of them as rich and as fruitful as the years which already have gone by.

So I felicitate him on his natal day.

The VICE PRESIDENT. The Chair would like to associate himself with the very fine tributes which have been paid to the Senator from Montana by the Senator from Vermont [Mr. AIKEN] and the minority leader [Mr. DIRKSEN].

In the 30 years the Chair has served in Washington—this year will be his 30th anniversary—the Chair has known a number of good men and a number of great men; but the Chair thinks the distinguished majority leader of this body, MIKE MANSFIELD, is one of the good, great men of this century.

Mr. METCALF. Mr. President, I, too, wish to associate myself with the remarks made by my colleagues in regard to our distinguished majority leader, MIKE MANSFIELD. It gives me a great deal of vicarious satisfaction to be a Montanan and to hear the Members of this body speak such praise about Montana's first and most distinguished citizen.

I know that all of Montana joins me in wishing the senior Senator from Montana, our distinguished majority leader, a very happy birthday and many more successful birthdays such as the one he is having today; and I take great pride in joining my colleagues in the Senate in wishing him success in the years ahead.

Mr. HUMPHREY. Mr. President, I would not wish to miss this happy and joyful opportunity to pay my respects to the senior Senator from Montana, MIKE MANSFIELD, our majority leader, on the occasion of his birthday.

This remarkable man has most unique qualities. He is always young in spirit, always vital and vigorous in mind, and always very purposeful in his efforts.

Since the Senator from Montana is a very modest man, I do not suppose he is going to share with us all of the many happy experiences of his birthday, but permit me to say to him, without becoming a messenger boy for Western Union, "Happy birthday, Senator."

Mr. WILEY. Mr. President, it was my privilege to write a letter to the distinguished majority leader congratulating him upon the anniversary of his birth.

I have heard the remarks this morning, and I wish to join in all the fine things said about the majority leader. I think he and his wife make a wonderful team. There is no better in the Senate. I say this, first, because they are genuinely friendly people. Second, they have a potentiality for good. Wherever they go, they do not create friction but they create a condition of harmony.

The work in the Senate done by the majority leader is truly marvelous, in the sense that he gets things done. I join with his many friends and the friends of his wife in congratulating both of them upon the happy fact that the two of them entered into such a happy union.

Mrs. NEUBERGER. Mr. President, I join my fellow Senators in congratulating the majority leader on his birthday anniversary today. However, I hope this is not carried to its ultimate conclusion. I will accept in advance the congratulations of my colleagues in the Senate on any birthday anniversaries I may have during the next 6 years.

Mr. LAUSCHE. Mr. President although the majority leader is not in the Chamber, I would feel it amiss if I were not to extend felicitations to the majority leader on his birthday anniversary. I have been enriched by my association with him. He has spiritual qualities which are overpowering. His mind is extraordinarily keen, and his views can never be challenged from the standpoint of not being sincere. I can only say to him that I have become stronger from the moral standpoint and from the spiritual and educational standpoints through my association with him.

Mr. JAVITS. Mr. President, I wish to join in felicitating MIKE MANSFIELD on his birthday. He has been my very good friend. He and I served together on the House Foreign Affairs Committee, and he has been a most valued colleague in the Senate. One of the best things that can be said of him is that he is one of the fairest human beings who ever lived. One need never call to his attention what would be fair to one; he thinks of it first. I enjoy very much congratulating him and wishing a happy birthday to him and his family.

Mr. YOUNG of North Dakota. I join in congratulating the majority leader on his birthday. Senator MANSFIELD is one of the most liked and ablest Members whom I have ever served with in the Senate, and that service goes back for 16 years. His judgment, particularly on international matters, has won for him the admiration and respect of millions of people everywhere. He is very well liked in my State of North Dakota.

Mr. KEATING. Mr. President, I had intended to devote my 3 minutes to another subject, but I certainly wish to join in these tributes to our distinguished majority leader. His fairness to the Members of the minority and his continuous courtesy in all of our dealings are deeply appreciated.

We had a predecessor, who now occupies the chair, with whom we enjoyed most cordial relations, who was always very kind and considerate of the views and wishes of the minority. He must look to his laurels now, because we have as majority leader a man who had much of his training with the present Vice President. The present majority leader may even exceed the Vice President, if that were possible, in his dealings with

those of us with whom he might from time to time find himself in disagreement on issues, but for whom he has unfailingly shown great kindness. I wish him well.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

SUPPLEMENTAL REPORT OF SECRETARY OF AGRICULTURE ON 1960 SOIL BANK CONSERVATION RESERVE PROGRAM

A letter from the Secretary of Agriculture, transmitting, pursuant to law, a supplemental report on the 1960 soil bank conservation reserve program, dated March 1961, enlarging the preliminary report of January 13, 1961 (with an accompanying report); to the Committee on Agriculture and Forestry.

REPORT ON INSTALLATIONS AND FACILITIES REQUIRED FOR ADVANCED RESEARCH PROJECTS

A letter from the Deputy Secretary of Defense, reporting, pursuant to law, a report on the establishment and development of installations and facilities required for advanced research projects, covering the period June 30, 1960, to December 31, 1960; to the Committee on Armed Services.

REPORT ON ACTIVITIES OF, EXPENDITURES BY, AND DONATIONS TO LIGNITE RESEARCH LABORATORY, GRAND FORKS, N. DAK.

A letter from the Assistant Secretary of the Interior, reporting, pursuant to law, on the activities of, expenditures by, and donations to the Lignite Research Laboratory, Grand Forks, N. Dak., for the calendar year 1960; to the Committee on Interior and Insular Affairs.

FINAL REPORT OF BOSTON NATIONAL HISTORIC SITES COMMISSION

A letter from the Secretary of the Interior, transmitting, pursuant to law, the final report of the Boston National Historic Sites Commission (with an accompanying report); to the Committee on Interior and Insular Affairs.

SUSPENSION OF DEPORTATION OF A CERTAIN ALIEN

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, a copy of the order suspending deportation in the case of Yee Houy, together with a statement of the facts and pertinent provisions of law pertaining to the alien, and the reason for ordering such suspension (with accompanying papers); to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A joint resolution of the Legislature of the State of Nevada; to the Committee on Banking and Currency:

"SENATE JOINT RESOLUTION 2

Joint resolution endorsing the action of the 50th session of the legislature memorializing the Congress and the President of the United States to cause to be issued silver coins commemorating the centennial of the admission of the State of Nevada into the Union

"Whereas by act of Congress Nevada was admitted to the Union October 31, 1864; and

"Whereas during the year 1964, the people of the State of Nevada expect to celebrate, with creditable pageantry and commemoration, the 100th anniversary of the admission of the State of Nevada into the Union; and

"Whereas Nevada was one of the richest and most famous silver-producing areas of all time; and

"Whereas the revenues resulting from such silver production aided materially in maintaining the integrity of the Union and in the great industrial expansion of the entire country; and

"Whereas Nevada is known as the Silver State; and

"Whereas Congress has many times previously authorized the issuance by the U.S. Treasury of commemorative coins for other States; and

"Whereas the members of the 50th session of the Legislature of the State of Nevada adopted a resolution memorializing the Congress of the United States to enact such legislation, and the President of the United States to take such action as necessary to issue commemorative silver coins commemorating the 100th anniversary of the admission of the State of Nevada into the Union: Now, therefore, be it

"*Resolved by the Senate and Assembly of the State of Nevada, jointly,* That the Legislature of the State of Nevada endorses the action of the 50th session of the legislature memorializing to the Congress and the President of the United States to take such action as may be necessary to issue commemorative silver coins commemorating the 100th anniversary of the admission of the State of Nevada into the Union; and be it further

"*Resolved,* That such coins be delivered to the Nevada Centennial Commission upon payment therefor, and that such commission be, and it hereby is, authorized to sell and distribute such coins; and be it further

"*Resolved,* That certified copies of this resolution be prepared and transmitted forthwith by the legislative counsel to the President and Vice President of the United States, the President pro tempore of the Senate, the Speaker of the House of Representatives, and each Senator and the Representative from the State of Nevada in the Congress of the United States.

"Passed by the assembly February 7, 1961.

"CHESTER S. CHRISTIANSEN,
"Speaker of the Assembly.
"NATHAN T. HURST,
"Chief Clerk of the Assembly.

"Passed by the senate January 31, 1961.

"REX BELL,
"President of the Senate.
"LEOLA H. ARMSTRONG,
"Secretary of the Senate.
"GRANT SAWYER,
"Governor of the State of Nevada."

Resolutions of the General Court of the Commonwealth of Massachusetts; to the Committee on Finance:

"RESOLUTION MEMORIALIZING CONGRESS ON THE QUESTIONS OF FEDERAL QUOTAS ON IMPORTS OF RESIDUAL FUEL OIL AND END-USE CONTROL OF THE VARIOUS FUELS SERVING THE COMMONWEALTH

"Whereas the current Federal quotas on the imports of residual fuel oil discriminate greatly against the New England area, including the Commonwealth; and

"Whereas such restriction on fuel oil imports poses an economic hardship on both the consumers of fuel oil in the Commonwealth and on the industrial community, already being responsible for higher fuel oil costs in the New England area; and

"Whereas a continuation of the current trend to limit fuel oil imports further augurs even higher fuel oil prices; and

"Whereas any study of the various fuels used in Massachusetts markets which has as its objective the promotion of the end-use control of such fuels would be contrary to the basic economic law of supply and demand and not in consonance with the operation of a free competitive economy, thereby causing higher prices to consumers of such fuels: Therefore, be it

"*Resolved,* That the General Court of Massachusetts hereby requests the Members of the U.S. Congress from the Commonwealth to use their prestige and influence to terminate said quotas on the imports of residual fuel oil; and be it further

"*Resolved,* That the General Court of Massachusetts hereby requests the Massachusetts congressional delegation to make its voice heard against any attempt to promote the end-use control of the various fuels used in the Commonwealth; and be it further

"*Resolved,* That copies of these resolutions be forwarded by the Secretary of the Commonwealth to each Member of the U.S. Congress serving from Massachusetts.

"Adopted by the senate, February 28, 1961.

"IRVING N. HAYDEN,
"Clerk.

Adopted by the house of representatives in concurrence, March 3, 1961.

"LAWRENCE R. GROVE,
"Clerk.

"Attest:

"KEVIN H. WHITE,
"Secretary of the Commonwealth."

A resolution adopted by the Common Council of the City of Buffalo, N.Y., favoring the enactment of House bill 3647, to repeal the 10 percent excise tax on automobiles; to the Committee on Finance.

A copy of a bill (S. 105) enacted by the Legislature of the State of Idaho, ratifying the Columbia Interstate Compact, relating to the division, apportionment and use of the waters of the Columbia River system, entered into by the States of Idaho, Washington, Oregon, Montana, Wyoming, Nevada, and Utah; to the Committee on Interior and Insular Affairs.

A resolution adopted by the Ohio Society, Daughters of the American Revolution, protesting against the ratification of the treaty proposing the establishment of the Organization for Economic Cooperation and Development (OECD); ordered to lie on the table.

JOINT RESOLUTION OF WISCONSIN LEGISLATURE—LETTER

Mr. WILEY. Mr. President, I received today a letter from Charles A. O'Neill, executive secretary of the Society of St. Vincent De Paul of Milwaukee. With the letter he enclosed a joint resolution passed by the Senate of the State of Wisconsin. I ask unanimous consent that the letter be printed in the RECORD and that the resolution be printed in the RECORD following it, and referred to the appropriate committee.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter presented by Mr. WILEY is as follows:

SOCIETY OF ST. VINCENT DE PAUL,
Milwaukee, Wis., March 14, 1961.

Hon. ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: Our friend, Con Eklund, very kindly sent me a clipping from the March 9 issue of the CONGRESSIONAL RECORD. I note, with pleasure, your excellent remarks regarding aid to dependent children. I understand that many counties in Wisconsin have adopted resolutions on this matter similar to the ones you cite from Milwaukee, Kenosha, Longlade, and Vilas. Others include: Chippewa, Iron, Pepin, and Wood. Enclosed herewith please find a copy of

Joint Resolution 39, so kindly forwarded to me by one of its authors, Senator Jerris Leonard.

I wondered, Senator WILEY, if you could sponsor an amendment to the "jobless bill" to accomplish the purposes set forth in the resolution.

With many thanks for your constant cooperation and wonderful service to the Nation, I remain,

Sincerely,

CHARLES A. O'NEILL,
Executive Secretary.

The joint resolution presented by Mr. WILEY was referred to the Committee on Labor and Public Welfare, as follows:

JOINT RESOLUTION 39

Joint resolution memorializing Congress to enact legislation permitting localities to demand an accounting from recipients of cash payments under the aid to dependent children categorical aid program administered by the Federal Department of Health, Education and Welfare, and also permitting distribution of such aid in commodity or voucher form in appropriate cases

Whereas a news item appearing in the Milwaukee Journal on Sunday, October 16, 1960, reported the fact that in August of this year 10,571 Wisconsin families with 27,660 children received financial help through the aid to dependent children program, which is partially financed by contributions from the Federal Government under the laws relating to aid to dependent children categorical aid program administered by the Federal Department of Health, Education, and Welfare; and

Whereas, the Federal Government contributes funds for such aid to dependent children program, which is commonly known both as "mothers' aid" and as "State aid," only upon the condition that such aid be disbursed in cash payments, and that no accounting be demanded of individual recipients thereof as to how such cash is spent; and

Whereas the 1959 annual report of the Milwaukee County Department of Public Welfare has disclosed that in that year said department disbursed over $5,500,000 in aid to dependent children payments, of which the Federal Government contributed 48.28 percent and the State government contributed 33.05 percent; and

Whereas the same annual welfare report revealed that in December of that year 2,888 women in Milwaukee County were receiving cash payments for themselves and their children under the aid to dependent children program, and that of such women 32 percent were divorcees, 24.2 percent were unmarried mothers, and 16.7 percent were wives abandoned by their husbands (or a total of 72.9 percent), which figures tend to show that the vast majority of aid recipients under this assistance program are women in rather unfortunate circumstances; and

Whereas another recent news item in the daily press on the subject of such aid has indicated that according to records in the office of the clerk of Milwaukee County circuit court, about one-third of the women and their children involved in the 10,000 current support and alimony cases on file in that office are getting public assistance (from which it can be assumed that most of these women are receiving aid to dependent children); and

Whereas it would be beneficial to the public interest to permit local authorities to exercise such discretion and control in cases where the recipients of such aid either manage their money unwisely, or conduct themselves improperly, or care for their children inadequately; Now, therefore, be it

Resolved by the senate (the assembly concurring), That the Wisconsin Legislature respectfully request the Congress of the United States to consider and enact legislation in 1961 amending the laws relating to aid to dependent children categorical aid program administered by the Federal Department of Health, Education, and Welfare to grant discretionary authority to local governing bodies and public welfare directors to enable them to demand an accounting from recipients of cash payments under the aid to dependent children program, and also to enable them to distribute such aid in the form of commodities or vouchers for the same in lieu of direct cash payments, as such local governing bodies of public welfare directors may deem appropriate in individual cases; and be it further

Resolved, That authenticated copies of this resolution be transmitted to the Wisconsin Members of the Congress of the United States; and be it further

Resolved, That such Wisconsin Members of Congress be requested to take joint action to insure that this resolution be spread upon the CONGRESSIONAL RECORD for the purpose of making known the contents thereof to all Members of the Congress of the United States.

RESOLUTION OF THE MEDICAL SOCIETY OF THE COUNTY OF CHEMUNG, N.Y.

Mr. KEATING. Mr. President, I ask unanimous consent to have printed in the RECORD a copy of a resolution of the Medical Society of the County of Chemung submitted to me by Mr. F. H. Clark, executive secretary of the society.

This resolution urges making self-employed physicians eligible for social security benefits. This has long been a controversial aspect of the social security system. In the event that this matter will come before the Congress again this year, I want to have the Chemung County Medical Society position clearly recorded in order that it will receive the attention which it deserves when this matter is before the appropriate committees.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

A RESOLUTION BINDING STATE SOCIETY MEMBERS OF THE AMA HOUSE OF DELEGATES TO VOTE FOR SOCIAL SECURITY COVERAGE AT AMA MEETINGS

Whereas results of polls by State medical societies and independent organizations clearly demonstrate that a substantial majority of the Nation's self-employed physicians desire to be included under the social security program; and

Whereas members of the house of delegates of the AMA have continued to oppose social security coverage at AMA annual and clinical meetings despite the overwhelming evidence that a majority of the medical profession wants it; and

Whereas Congress has been reluctant to enact a law to include physicians under social security in view of the house of delegates' opposition to such legislation; and

Whereas unless the house of delegates changes its attitude and begins to reflect the real wishes of the majority of physicians on this issue, physicians and their families will continue to be the only professional group in the Nation that is deprived of the protection and benefits of the social security program: Therefore be it

Resolved, That the Chemung County Medical Society hereby instructs its delegates to the New York State Society annual meeting to introduce a resolution in that body, making it binding on all elected members of the AMA house of delegates from our State to vote for social security coverage at the national AMA meetings.

IMPORTATION OF RUSSIAN CRABMEAT—RESOLUTION AND TELEGRAMS

Mr. GRUENING. Mr. President, the people of Alaska were very much distressed last week at the announcement in the press that it was likely that the 10-year-old ban on the importation of Russian crabmeat would be lifted. As a result of my protest, the President has very kindly suspended this order, which was to have been issued at noon last Saturday, and the entire matter is now under review.

In this connection, I have received many telegrams of protest, and also a resolution adopted by the Legislature of the State of Alaska protesting the lifting of the ban.

Mr. President, I ask unanimous consent that the resolution and telegrams be printed at this point in the RECORD.

There being no objection, the resolution and telegrams were ordered to be printed in the RECORD, as follows:

SENATE RESOLUTION 22

Be it resolved by the senate in second legislature (first session assembled):

Whereas it has been reliably reported that the United States is considering the lifting of the ban on the importation of crabmeat from the Soviet Union; and

Whereas Alaska king crab is the outstanding and only example of a new development in the Alaska fisheries which otherwise have been sadly depleted largely due to Federal mismanagement while Alaska was a territory and now requires gigantic and costly efforts to rebuild; and

Whereas this fishery depletion has created a grave unemployment situation all along Alaska's coast where the population's livelihood has been and is wholly dependent on the fisheries; and

Whereas the development of the king crab fishery is the only happy exception in this otherwise dark picture and if it is now to face the competition of imported Russian crab, produced by cheap if not slave labor, effects in Alaska will be disastrous; and

Whereas the situation is further aggravated by the fact that the Russians have been fishing extensively in the Bering Sea and have given indications of extending their fishing farther along the Alaskan coast; be it

Resolved by the senate in second legislature (first session assembled), That any proposal for the lifting of the ban on the importation of Russian crabmeat is protested and that it is respectfully requested that the State of Alaska be consulted before any action is taken by the U.S. Government; and be it further

Resolved, That copies of this resolution be sent to the Honorable John F. Kennedy, President of the United States; the Honorable Dean Rusk, Secretary of State; the Honorable C. Douglas Dillon, Secretary of the Treasury; the Honorable Luther H. Hodges, Secretary of Commerce; and the Members of the Alaska delegation in Congress.

JUNEAU, ALASKA, *March 11, 1961.*

Senator ERNEST GRUENING,
Senate Office Building,
Washington, D.C.:

Strong resolution re crab today adopted unanimously by State senate. Full text telegraphed to President Kennedy. Copies reso-

lution being airmailed each of you. Strong protest also sent President by myself with request he confer with delegation.

WILLIAM A. EGAN,
Governor of Alaska.

KODIAK, ALASKA, *March 11, 1961.*

Senator ERNEST GRUENING,
Senate Office Building,
Washington, D.C.:

Following wires sent today to Secretaries of State and Commerce quote work received indicating lifting of ban on imports of Russian produced king crab. We as one of the major producers of domestic king crab strongly protest this action. The economy of all king crab producing areas as well as investment in plants, facilities, boats, gear, etc., would be jeopardized by this type of competition utilizing cheap labor as well as methods of catching crab denied American fishermen. Strongly urge reconsideration.

Respectfully,

KING CRAB, INC.,
R. J. SPRINGHILL.

KODIAK, ALASKA, *March 12, 1961.*

Hon. Senator GRUENING,
Senate Office Building,
Washington, D.C.:

The local post urges you to vigorously oppose the lifting of the ban on importation of Russian crabmeat.

CARL RODLI,
Adjutant, American Legion Post No. 17.

KODIAK, ALASKA, *March 12, 1961.*

Senator ERNEST GRUENING,
Washington, D.C.:

Our 600 members emphatically protest lifting of any ban of Russian crab imports to the United States.

UNITED FISHERMAN'S MARKETING ASSOCIATION, INC.

SEATTLE, WASH., *March 15, 1961.*

Hon. ERNEST GRUENING,
U.S. Senate,
Washington, D.S.:

As a major producer of Alaskan king crabmeat we urgently request your effort to prevent lifting of existing embargo on any import of Russian seafood products, particularly king crabmeat.

Alaskan and Washington State economic health would be seriously impaired were embargo to be lifted due to violent spread of raw product and labor costs in favor of Russians.

Our industry resents Russian method of fishery which destroys U.S. coastal fishery preservation. Further, U.S. industry feels entirely capable of supplying U.S. quality king crabmeat needs in an orderly, dignified and profitable manner.

We repeat, your utmost efforts are needed to prevent this action. May we request your reply as to action taken?

Respectfully,

PAN ALASKA FISHERIES, INC.,
W. A. RITTER, *President.*

KODIAK, ALASKA, *March 12, 1961.*

Hon. ERNEST GRUENING,
Senator of State of Alaska,
Washington, D.C.:

The following wire was sent to Dean Rusk and Mr. Hodges:

"Kodiak Area Chamber of Commerce implores reconsideration of recent action by State Department lifting ban of Russian imports of king crab. Southwestern Alaska cannot compete with Government-subsidized Russian crab industry and is dependent upon this industry for its livelihood. Such subsidized competition endorsed by the State Department would ruin the economy of this area affecting thousands of people."

BOB JOHNSON,
President, Kodiak Area Chamber of Commerce.

KODIAK, ALASKA, *March 12, 1961.*

Senator GRUENING,
Washington, D.C.:

Vigorously protest lifting of the ban on import of Russian crab.

Precinct Chairman PATRICIA CANNON.

PORT WAKEFIELD, ALASKA.

ERNEST GRUENING,
U.S. Senate,
Washington, D.C.:

Your continued concern for the problems of the Alaska king crab industry and your request that the administration delay permission to import crabmeat from the U.S.S.R. is deeply appreciated by Howard and myself and also I am sure by the thousands of other Alaskans so dependent on this fishery. We are airmailing more detailed comments.

LOWELL WAKEFIELD.

REPORT OF A COMMITTEE

The following reports of a committee were submitted:

By Mr. ELLENDER, from the Committee on Agriculture and Forestry, with an amendment:

S. 1028. A bill to amend the transitional provisions of the act approved August 7, 1959, entitled "Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959"; (Rept. No. 74).

By Mr. HOLLAND, from the Committee on Agriculture and Forestry, without amendment:

H.R. 1822. An act to adjust the amount of funds available for farm operating loans made pursuant to section 21(b) of the Bankhead-Jones Farm Tenant Act, as amended; (Rept. No. 73).

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. METCALF:

S. 1362. A bill to designate the Lincoln Air Force Base at Lincoln, Nebr., as George W. Norris Air Force Base; to the Committee on Armed Services.

S. 1363. A bill to amend the Small Business Act to provide that the program under which Government contracts are set aside for small-business concerns shall not apply in the case of contracts for maintenance, repair, or construction; to the Committee on Banking and Currency.

S. 1364. A bill to provide for the establishment of cooperative outdoor recreation research centers; to the Committee on Labor and Public Welfare.

By Mr. HUMPHREY:

S. 1365. A bill to incorporate the Indoor Sports' Club, Inc.; to the Committee on the Judiciary.

(See the remarks of Mr. HUMPHREY when he introduced the above bill, which appear under a separate heading.)

By Mr. KEATING:

S. 1366. A bill to amend title II of the Social Security Act so as to relax the severity of existing provisions with respect to deductions from benefits on account of earnings; to the Committee on Finance.

(See the remarks of Mr. KEATING when he introduced the above bill, which appear under a separate heading.)

By Mr. KUCHEL:

S. 1367. A bill to add certain public lands in California to the Pala Indian Reservation, the Pauma Indian Reservation, and the Cleveland National Forest, and for other purposes; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. KUCHEL when he introduced the above bill, which appear under a separate heading.)

By Mr. YARBOROUGH:

S. 1368. A bill to amend the Shipping Act, 1916, to provide for licensing independent ocean freight forwarders, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. YARBOROUGH (for himself and Mr. METCALF):

S. 1369. A bill to extend the operation of the National Wool Act of 1954, as amended; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. YARBOROUGH when he introduced the above bill, which appear under a separate heading.)

By Mr HARTKE:

S. 1370. A bill to amend the Internal Revenue Code of 1954, as amended; to the Committee on Finance.

(See the remarks of Mr. HARTKE when he introduced the above bill, which appear under a separate heading.)

By Mr. MAGNUSON (by request):

S. 1371. A bill to amend subsection (e) of section 307 of the Communications Act of 1934, as amended, to permit the Commission to renew a station license in the safety and special radio services more than 30 days prior to expiration of the original license; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. SPARKMAN (for himself and Mr. HILL):

S. 1372. A bill to authorize the temporary release and reapportionment of pooled acreage allotments; to the Committee on Agriculture and Forestry.

RESOLUTIONS

PRINTING OF ADDITIONAL COPIES OF SYMPOSIUM ENTITLED "LEGAL ASPECTS OF SPACE EXPLORATION"

Mr. KERR submitted the following resolution (S. Res. 108), which was referred to the Committee on Rules and Administration:

Resolved, That the symposium entitled "Legal Aspects of Space Exploration," prepared for the use of the Committee on Aeronautical and Space Sciences, United States Senate, by the Legislative Reference Service, Library of Congress, shall be printed with illustrations as a Senate document. There shall be printed eight hundred forty additional copies of such Senate document which shall be for the use of the Senate Committee on Aeronautical and Space Sciences.

UNIFICATION OF IRELAND

Mr. JAVITS (for himself, Mr. KEATING, Mr. KUCHEL, and Mr. BUSH) submitted a resolution (S. Res. 109) expressing the sense of the Senate that the people of all Ireland should have an opportunity to express their will for union by an election under the auspices of a United Nations Commission, which was referred to the Committee on Foreign Relations.

(See the above resolution, printed in full, when submitted by Mr. JAVITS, which appears under a separate heading.)

INCORPORATION OF INDOOR SPORTS' CLUB, INC.

Mr. HUMPHREY. Mr. President, there is a dramatic story of individual

courage being written every day in every corner of this Nation by thousands who are leading productive and satisfying lives despite physical handicaps. Many thousands of these men and women are not only personally independent but are supporting families and have as well extraordinary records of community service.

The physically handicapped seek opportunity to prove themselves on their own abilities. Industry after industry across the Nation has testified with open admiration of the contributions of physically handicapped employees to the production and the morale of their organizations.

The Indoor Sports' Club is an example of the determination and ability of the physically handicapped to help themselves despite seemingly overwhelming odds. The club is an international club for the physically handicapped which was founded in 1930 in California as a nonprofit, cooperative organization to create educational, economic, and social opportunities for its members.

The Indoor Sports' Club now has grown into an organization of more than 3,000 members in the United States, Canada, and Great Britain. The club works through all civic, religious, social, and fraternal organizations to bring about a better understanding and acceptance of the abilities and the needs of the physically handicapped.

Working together, with limited resources, using their ingenuity to overcome all sorts of handicaps, the Indoor Sports' Club is an excellent example of the dramatic change in the situation of the physically handicapped—largely through their own determination—during the past few years.

Mr. President, because of the very real contribution of the Indoor Sports' Club to the present and future of our Nation, I introduce for appropriate reference a bill to federally charter the Indoor Sports' Club.

A companion measure, H.R. 347, has been offered in the House by the gentleman from California, Representative DOYLE.

I ask unanimous consent that a brief résumé on this club's background, purpose, activities, and qualifications for membership entitled "Meet the Indoor Sports," be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. METCALF in the chair). The bill will be received and appropriately referred; and, without objection, the résumé will be printed in the RECORD.

The bill (S. 1365) to incorporate the Indoor Sports' Club, Inc., introduced by Mr. HUMPHREY, was received, read twice by its title, and referred to the Committee on the Judiciary.

The résumé presented by Mr. HUMPHREY is as follows:

MEET THE INDOOR SPORTS—AN INTERNATIONAL CLUB FOR THE PHYSICALLY HANDICAPPED

Founded in California in 1930 as a nonprofit organization and incorporated in the State of California in 1936, the Indoor Sports, Club started primarily as a small local organization for the seriously physically handicapped. Within the past 8 years it has grown into a club of more than 3,000 members in all sections of the United States, Canada, and Great Britain. Its purpose is to encourage and provide opportunities for an active social and business life for the physically disabled. It believes in cooperation between all civic, religious, social, and fraternal organizations to bring about a better understanding and acceptance of the seriously physically handicapped by the able bodied.

It pledges to support all legislation which gives the disabled better opportunities for adequate rehabilitation and employment and at the same time supports programs which would raise the present submarginal welfare benefits now generally given to the forgotten minority, those citizens whose total and permanent disabilities are of such a serious nature that they cannot now, and never will be, employable. It actively encourages a greater number of disabled to become gainfully employed citizens, taking part in all phases of community life. It has shown to the heads of the Nation's businesses that physically handicapped persons make better than average employees and can be productive, taxpaying citizens if given a fair opportunity.

Membership is composed of all seriously disabled persons of any age and of all types of disabilities: Illness, war and accident victims, blind, disease, congenital handicaps, etc. Their main purpose is to prove that the physically handicapped, through association, can achieve happiness and a full and useful life, even after seemingly insurmountable tragedy has struck.

In the recent past, most so-called shut-ins were only folks who were shut out, because either they themselves or their families do not realize that practically all of the social and business activities of the able bodied are open to them. The scope and importance of the club, based upon "ability, not disability," has given its thousands of members a new start. They do not say for charity, only an opportunity to prove themselves. Besides helping each other, they volunteer for community services in many ways.

The club's individual member's greatest desire is to be treated as a person, not as a poor, dear cripple. Many are no longer content to sit on the sidelines, accepting outmoded labels such as shut-ins, unfortunates, cripples. Carrying forward this program is the club's twofold purpose: (1) To prove that physically handicapped persons are fully capable of leading a productive and full life; (2) to educate the public that the disabled can, if given a fair chance, compete with others toward a goal of economic self-sufficiency.

HOW CHAPTERS OPERATE

Each individual chapter of the club is a self-governing unit, both financially and in determining its own social activities. Working under the framework of bylaws approved by the district and national organizations, the number of members in different chapters varies, from 15 to 20 in smaller groups up to 150 and more.

The various chapters elect their own officers, hold meetings, plan social activities, promote jobs for handicapped, and take part in community life. The Indoor Sports' Club is really a way of life for its members, for they do care what happens to others. The comradeship they offer each other has paid off in many ways.

The success of the Indoor Sports' Club is due mainly to the untiring efforts of national, district, and chapter officers and other members, all of whom give their services without monetary compensations. In many cases, this proves to be a full-time job. The club has no paid employees, rents no offices (the homes of members serve for this purpose). Nonetheless, the club is a project for disabled the country over, a project which is becoming more and more important with each passing year.

MEMBERSHIP QUALIFICATIONS

Membership in the Indoor Sports' Club, Inc., and the chapters thereof shall be confined to physically disabled persons who have been so disabled for at least 6 months.

The term "physically disabled person" shall be defined as persons who—

1. Are confined to bed or wheelchair the majority of the time or require the use of a mechanical aid.
2. Require the assistance of at least one other person to get about.
3. Have lost, or lost the use of, a limb or the major part thereof.
4. Have a severe visible physical disability to the extent that they feel out of place in an able-bodied world.

PROPOSAL TO MODIFY THE SOCIAL SECURITY EARNINGS LIMITATION

Mr. KEATING. Mr. President, several weeks ago I introduced a bill in the Senate (S. 12) to eliminate the so-called social security earnings limitation. I fully believe that this should be done. As long as I have been in Congress I have urged that such action be taken. It is my deep conviction that persons over 65 should be encouraged to continue to do useful work. They certainly should not be penalized for doing so.

A distinguished constituent of mine, Mr. Dwight S. Sargent, personnel director of Consolidated Edison Co. of New York, has done some very important research on the effect of the earnings limit upon incentives for older workers to continue work. Mr. Sargent played an active part in last year's White House Conference on Aging, at which time he urged that we permit and, in fact, urge older people to take care of themselves as long as they are able to do so and as long as they want to do so. Mr. Sargent recently submitted a proposal to me which would further modify the earnings test. While not as expensive as the complete elimination of this test, it would hopefully encourage more older workers to continue working.

Last year, several changes were made in the social security earnings limitation which would benefit persons over 65 who continue to work. However, that legislation did not go far enough.

The new law establishes the so-called two-for-one plan. For every $2 earned between $1,200 and $1,500, the individual involved would lose only $1 in social security benefits.

Over $1,500, he would lose $1 in benefits for every $1 in additional earnings. Thus, in the new law, there still is little if any real incentive to earn over $1,500.

Mr. Sargent's proposal is fairly simple. He would extend the "two for one" principle up to $2,400. For income over $2,400, the beneficiary would lose $1 in benefits for every $1 in additional earnings.

Mr. President, I introduce for appropriate reference a bill along the lines just described, which would provide for the deduction of $1 in social security benefits for every $2 in earnings over $1,200 and up to $2,400 for persons over 65 years of age and under 72 years of age.

I urge that this proposal be given the careful and serious consideration which it deserves. Although I still strongly

favor the complete repeal of the social security earnings test, I recognize that this bill may be the next and most logical step which we should take in seeking to avoid having the social security earnings test serve as a deterrent to persons over 65 who are willing and able to continue working.

Mr. President, in order to make this proposal clear, I ask unanimous consent that the proposed bill and a table illustrating the effect of present law be printed at this point in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and table will be printed in the RECORD.

The bill (S. 1366) to amend title II of the Social Security Act so as to relax the severity of existing provisions with respect to deductions from benefits on account of earnings, introduced by Mr. KEATING, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (3) of section 203(f) of the Social Security Act is amended by striking out "$300" wherever it appears and inserting in lieu thereof "$1,200."

(b) The amendments made by subsection (a) shall be effective, in the case of any individual, with respect to taxable years of such individual ending after the month in which this Act is enacted.

The table presented by Mr. KEATING is as follows:

EXAMPLES OF THE EFFECT EARNINGS HAVE ON SOCIAL SECURITY BENEFITS AND TOTAL INCOME UNDER THE PRESENT AND PROPOSED SECURITY EARNINGS TEST PROVISION [1]

Present earnings test law

For the first $300 of earnings above $1,200, $1 of social security is given up for each $2 of earnings. Above this $1,500 figure, $1 of social security is given up for each $1 of earnings.

Annual earnings	Social security received	Total income
0	$2,214	$2,214
$1,200	2,214	3,414
$1,500	2,064	3,564
$2,000	1,564	3,564
$3,564	0	3,564

PROPOSED EARNINGS TEST LAW

For the first $1,200 of earnings above $1,200 $1 of social security is given up for each $2 of earnings. Above this $2,400 figure, $1 of social security is given up for each $1 earnings.

Annual earnings	Social security received	Total income
0	$2,214	$2,214
$1,200	2,214	3,414
$1,500	2,064	3,564
$2,000	1,814	3,814
$2,400	1,614	4,014
$3,000	1,014	4,014
$3,500	514	4,014
$4,014	0	4,014

[1] Assume man and wife are both age 65 and eligible for maximum social security benefit.

CONSOLIDATION OF INDIAN AND NATIONAL FOREST LANDS IN CALIFORNIA

Mr. KUCHEL. Mr. President, I introduce, for appropriate reference, a bill to add certain public lands in California to the Pala Indian Reservation, the Pauma Indian Reservation, and the Cleveland National Forest. This was recommended by the last administration and is concurred in by the present one.

Mr. President, I ask unanimous consent that as a part of my remarks the letter from former Assistant Secretary of the Interior Abbott, of January 5, 1961, be printed in the RECORD at the conclusion of my remarks. This provides an explanation of how the proposed bill would straighten out the existing land pattern and clarify, consolidate, and better provide for the administration of the two reservations and the Cleveland National Forest.

On March 3, Secretary of the Interior Stewart Udall, on behalf of the present administration, wrote the chairman of the Senate Committee on Interior and Insular Affairs that his staff had completed a review of the legislation submitted by the outgoing administration and that "we concur in the comments made by the prior administration" with respect to the bill I now introduce and other measures.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 1367) to add certain public lands in California to the Pala Indian Reservation, the Pauma Indian Reservation, and the Cleveland National Forest, and for other purposes, introduced by Mr. KUCHEL, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., January 5, 1961.

Hon. RICHARD M. NIXON,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft of a proposed bill to add certain public lands in California to the Pala Indian Reservation, the Pauma Indian Reservation, and the Cleveland National Forest, and for other purposes.

We suggest that the bill be referred to the appropriate committee for consideration, and we recommend that it be enacted.

Secretarial Order dated April 8, 1903, directed the Commissioner of the General Land Office as follows: "* * * that all unoccupied public lands in the south half of Township 9 South, Range 1 West, S.B.M., California, be withdrawn from entry and settlement temporarily until the same can be formally set aside for said (Mission) Indians if found necessary so to do." The acreage totaled 9,270.82 acres.

Of this land, 8,262.71 acres lie within the exterior boundaries of the Cleveland (San Jacinto) National Forest. By the terms of the Presidential Proclamation dated February 14, 1907, this land is excepted from the national forest as long as the Secretarial Order of April 8, 1903, remains in effect. Upon revocation of the Secretarial Order, the land will become a part of the national forest. This Department intends to revoke the order as soon as the proposed legislation is enacted.

In 1954, the 1,008.11 acres that are located outside the Cleveland National Forest were examined in detail for the purpose of determining their proper disposition. Our recommendations relate to these 1,008.11 acres and also to a 40-acre tract in sec. 6, T. 10 S., R. 1 W., San Bernardino meridian, which is presently vacant public domain.

The 1,008.11 acres (all in T. 9 S.) are located in San Diego County, between the towns of Pala and Pauma Valley. In general, the land is rough, rocky, and hilly, and lies on the southwestern slope of Palomar Mountain. The 543.20 acres in section 19 are mostly steep, rocky, and brush covered, but they have some grazing value. The 80 acres in section 30 are crossed by a truck trail and would provide some building sites. The 125.35 acres in section 31 are composed of three separate tracts; one is on a steep hillside, but the other two are crossed by a State highway and have considerable acreage of good level ground which can be used for agricultural and homesite purposes. The 259.56 acres in section 32 have about 4 acres in the southern tip which are relatively flat and have been used by an adjoining landowner for agricultural purposes.

The 40 acres of vacant public domain in T. 10 S are immediately adjacent to the Pala Indian Reservation. The proposed legislation will add 708.55 of these 1,048.11 acres to the Pala Indian Reservation, 136.53 acres to the Pauma Indian Reservation, and 203.03 acres to the Cleveland National Forest. In addition, the proposed legislation provides for the Indians to continue their customary use of the 8,262.71 acres that are now within the exterior boundaries of the Cleveland National Forest, and the 203.03 acres that are added to the forest, subject to such regulations as may be mutually determined by the Secretary of Agriculture and the Secretary of the Interior.

The land in the south half of T. 9 S., lying both within and outside the exterior boundaries of the Cleveland National Forest, has been used over a long period of time by many Indian families. They visit and camp in the area, mostly in the fall, to gather acorns, hunt deer, cut posts, and just to enjoy the out-of-doors. Some Indians have grazed livestock in the area. The right to continue their customary use of the area is important to the Indians. The Department of Agriculture is not able to give the Indians exclusive use privileges without enabling legislation, and a provision for that purpose has been included in the bill.

The land proposed to be added to the two Indian reservations is either adjacent to or in close proximity to the present land of the Indians and can be used advantageously by them. The land proposed to be added to the national forest is adjacent to present forest lands and would serve to straighten the exterior boundaries thereof.

The small tract of land (5 acres or less) which is proposed for allotment to a Santa Ysabel Indian has been occupied by her since 1945. She also uses a house and several sheds that were constructed on the land by the county highway department.

The Bureau of the Budget on December 30, 1960, advised that there is no objection to the submission of this proposed legislation to the Congress.

Sincerely yours,

GEORGE W. ABBOTT,
Assistant Secretary of the Interior.

EXTENSION OF NATIONAL WOOL ACT OF 1954, AS AMENDED

Mr. YARBOROUGH. Mr. President, I introduce, for appropriate reference, a bill to extend the operation of the National Wool Act of 1954, as amended.

Mr. President, the bill would run for a period of 4 years. It has been extended before for a period of 3 years. There are a number of bills pending—and I am the coauthor of one of them—to extend the National Wool Act for 3 years.

The program has been tested so well and has been so successful that I see no reason why we should keep on with temporary extensions of the act. It should be made a part of permanent legislation. If the time ever came that it did not work, it could be amended or repealed.

The National Wool Act, which uses tariff receipts on imported wool as incentive payments to American producers to boost national wool production, has proved one of the most workable agricultural programs ever legislated. This is one agricultural program which has worked. It has worked well, and it is successful.

Texas ranchers particularly have needed this program during the past few years to help rebuild their flocks after severe 7-year droughts covering the early 1950's forced heavy cutbacks of sheep population. That was the period from 1950 to 1957. The most severe drought in our history forced heavy cutbacks in the sheep population in my State, which is the largest producer of wool in the Union.

Because Texas has been for many years the leading wool producing State, and because the Nation's wool production had failed to meet the national need, this special tariff financed incentive program was formed as both an aid to agricultural economic growth and as a security measure.

Under this program, national wool production has increased almost annually until it reached a 14-year peak of 266 million pounds in 1960. Texas wool production last year climbed to 51,980,000 pounds, which was 19.5 percent of the national crop.

Texas sheep ranchers received a total of $32,227,200 for their 1960 crop, which included $22,351,000 at the market place and $9,876,000 in incentive payments collected through the wool import tariffs under the National Wool Act.

This program has been highly successful. It has resulted not only in strengthening the ranching economy of Texas and the Nation, but it has also been a vital factor in permitting our ranchers to increase production. At the last count, in 1960, Texas had a sheep population of 6,074,000 head, the greatest number in 8 years, with an estimated total value of $87,727,000. It is obvious the National Wool Act of 1954 should be made permanent legislation.

I point out that this legislation does not prevent the importation of foreign wool. We produce only a fragment of our national need. The act, on the other hand, has helped to prevent the utter dissemination of our flocks and has helped to keep some wool production in our country.

The Presiding Officer, the Senator from Montana [Mr. METCALF] is a cosponsor of the bill, and I am introducing it on behalf of the junior Senator from Montana and myself. I ask unanimous consent that the bill may lie on the table until Tuesday of next week, so that other Senators may cosponsor it if they wish.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk, as requested by the Senator from Texas.

The bill (S. 1369) to extend the operation of the National Wool Act of 1954, as amended, introduced by Mr. YARBOROUGH (for himself and Mr. METCALF), was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

AMENDMENT OF INTERNAL REVENUE CODE OF 1954, AS AMENDED

Mr. HARTKE. Mr. President, during the 2d session of the 86th Congress, I introduced S. 3765, to amend the Internal Revenue Code of 1954 so as to authorize any railroad, subject to part I of the Interstate Commerce Act, in computing its reasonable allowance for depreciation, provided by the code, to elect, under regulations prescribed by the Secretary of the Treasury or his delegate, first, to treat any property other than rolling stock acquired on or after January 1, 1959, as having a maximum useful life of 15 years, and second, to treat any property other than rolling stock acquired before January 1, 1959, as having a remaining useful life of 20 years, and rolling stock as having a remaining useful life of 15 years.

My action in introducing this bill was in harmony with a recommendation made by the Committee on Interstate and Foreign Commerce in its report No. 1647, June 3, 1958, page 25, wherein it said:

> As it is now, extremely long service lives, ranging in some cases from 50 to 100 years, are assigned to depreciable railway property of the railroads. These long lives attributed to railroad property for tax purposes are wholly unrealistic and constitute a severe handicap.

It is now generally recognized that there is great need for more realistic treatment of depreciable property for tax purposes. In the railroad industry, this need is particularly acute. Its low rate of return has precluded equity financing for capital improvements. To augment funds derived from meager earnings and from depreciation charges, the railroads have resorted to the sale of equipment trust obligations. Not too long ago, funds from this source could be procured at a cost of from 2 to 3½ percent. Today, however, even the most prosperous roads are required to pay from 4 to 5 percent, and others between 5 and 6 percent. For an industry earning only 2.13 percent on its net investment, these rates for money for investment in new equipment are very real deterrents.

Relatively little free cash is available from present depreciation rates, due to the unusually long lives of railroad depreciable property. Lives up to 35 years have been used generally in respect of rolling stock and lives of 50 to 100 years on other depreciable properties. The average overall rate for depreciable property is but little more than 2.64 percent. The average rate for equipment is about 3.65 percent. It is thus obvious that this meager flow of free cash is inadequate in the light of obsolescence by reason of advances in technology. Inflation and slow recovery of investment leave no room in our depreciation rate for any reflection of this factor. Present depreciation policy is neither equitable nor realistic and does not contribute to the necessary modernization of the railroad plant.

Accordingly, I introduce, for appropriate reference, a bill identical with S. 3765, except that its coverage is extended to private owners of rolling stock used or intended for use in the transportation by railroads, subject to Part I of the Interstate Commerce Act, of persons or property. It is to be noted also that the provisions of this bill apply with respect to elections made from and after January 1, 1961.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1370) to amend the Internal Revenue Code of 1954, as amended, introduced by Mr. HARTKE, was received, read twice by its title, and referred to the Committee on Finance.

AMENDMENT OF SECTION 307 OF COMMUNICATIONS ACT OF 1934, AS AMENDED

Mr. MAGNUSON. Mr. President, by request of the Federal Communications Commission, I introduce for appropriate reference, a bill to amend subsection (e) of section 307 of the Communications Act of 1934, as amended, to permit the Commission to renew a station license in the safety and special radio services more than 30 days prior to expiration of the original license. I ask unanimous consent to have printed in the RECORD a letter from the Chairman of the Commission requesting the proposed legislation, together with an explanation of the bill.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the letter and explanation will be printed in the RECORD.

The bill (S. 1371) to amend subsection (e) of section 307 of the Communications Act of 1934, as amended, to permit the Commission to renew a station license in the safety and special radio services more than 30 days prior to expiration of the original license, introduced by Mr. MAGNUSON, by request, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter and explanation presented by Mr. MAGNUSON are as follows:

FEDERAL COMMUNICATIONS COMMISSION,
Washington, D.C., March 8, 1961.

The VICE PRESIDENT,
U.S. Senate,
Washington, D.C.

DEAR MR. VICE PRESIDENT: The Commisison has adopted as a part of its legislative program for the 87th Congress, a proposal to amend the Communications Act of 1934 to authorize the Federal Communications Com-

mission to limit the prohibition against renewing existing station licenses more than 30 days prior to the expiration of the original license to the broadcast and common carrier services. As a consequence, if this proposal were adopted, the Commission could then grant renewals of station licenses in the field of safety and special radio services more than 30 days prior to the expiration of the original license. The Communications Act currently provides that no renewal of an existing station license shall be granted more than 30 days prior to the expiration of the original license (47 U.S.C. 307(e)).

The Commission's draft bill to accomplish the foregoing objective was submitted to the Bureau of the Budget for its consideration. We have now been advised by the Budget Bureau that, from the standpoint of the administration's program, there would be no objection to the presentation of the draft bill to the Congress for its consideration.

Accordingly, there are enclosed six copies of our draft bill on this subject and six copies of an explanatory statement with reference thereto.

The consideration by the Senate of the proposed amendment to the Communications Act of 1934 would be greatly appreciated. The Commission would be most happy to furnish any additional information which may be desired by the Senate or by the committee to which this proposal is referred.

Sincerely yours,

NEWTON N. MINOW,
Chairman.

EXPLANATION OF PROPOSED AMENDMENT TO SUBSECTION (e) OF SECTION 307 OF THE COMMUNICATIONS ACT OF 1934, AS AMENDED, TO PERMIT THE COMMISSION TO RENEW A STATION LICENSE IN THE SAFETY AND SPECIAL RADIO SERVICES MORE THAN 30 DAYS PRIOR TO EXPIRATION OF THE ORIGINAL LICENSE

The Commission recommends that section 307(e) of our act be amended so that the 30-day restriction on renewal of licenses would be deleted so far as the safety and special radio services are concerned (47 U.S.C. 307(e)). Language for the suggested amendment is attached hereto.

Section 307(e) now prohibits the granting of any renewal license more than 30 days prior to the expiration of the original license. This 30-day restriction creates an obstacle to the Commission's constant effort to timely process the ever-increasing number of applications for authorization in the various safety and special radio services.[1]

In many cases, a needless duplication of effort could be avoided if an application for license modification could also be treated as a renewal application. Since no renewal can be granted more than 30 days prior to the expiration of the original license under the law as now written, the Commission, in those cases where it is considering an application for the modification of a license which has an expiration date occurring more than 30 days later, must act solely on the modification notwithstanding that the same license will thereafter come up for renewal. Such a practice seems inefficient and needlessly burdensome, especially when, as in all of these safety and special radio type cases, applications for license modification contain all information needed for renewal consideration. Also, such licenses are not mutually exclusive so the rights of others are not prejudiced by a grant.

The magnitude of the problem may be illustrated by examining some statistics in the amateur radio service which is just one of the numerous safety and special radio services. During the fiscal year 1959, 10,500 modified licenses were issued. Eventually, each of these 10,500 licenses must be processed again on renewal, even though all the information necessary for renewal was at hand when the modifications were granted.

Amendment of section 307(e), as recommended herein, would permit the Commission to consider such applications for modification as applications for modification and renewal. Accordingly, the Commission could then issue such modified licenses for a regular license term, thus eliminating most of the duplicate effort. A similar reduction of workload in relation to the over-all application processing activities in this area would be a great advantage to the public and the Commission, without any reduction in the Commission's current fulfillment of its public interest obligations.

The 30-day limit also causes burdensome and needless repetition in processing renewal applications which are prematurely received by the Commission. In the fiscal year 1959, for example, approximately one-half of the 15,000 renewal applications received in the amateur radio service were submitted prematurely and had to be sorted and set aside until ripe for processing. An amended section 307(e) would eliminate this problem.

Moreover, it would appear that the restriction in section 307(e) is more appropriately applied exclusively to applications for broadcast licenses and common carrier services. Since these applications are often granted on a comparative basis, and the nature of the service offered affects a major segment of the population in the area proposed to be served, the 30-day limit would seem to have a useful purpose. On the other hand, the private, noncompetitive nature of the safety and special radio services would seem to make such a 30-day limit unnecessary.

[1] During the fiscal year 1959, the Commission received 250,000 applications for stations in the safety and special radio services.

UNIFICATION OF IRELAND

Mr. JAVITS. Mr. President, on behalf of myself, the Senator from Connecticut [Mr. BUSH], my colleague, the junior Senator from New York [Mr. KEATING], and the Senator from California [Mr. KUCHEL], I submit a resolution (S. Res. 109) expressing the sense of the Senate that the people of all Ireland should have an opportunity to express their will for union by an election under the auspices of a United Nations Commission.

This is a resolution I have sponsored for many years, and is particularly appropriate in view of the observance of St. Patrick's Day tomorrow. I believe the resolution expresses the feeling of many Americans on this subject. What better way is there to solve the problem than by giving all the people of Ireland an opportunity to choose their own form of government. Plebiscites held in the past under League of Nations or United Nations auspices have been successful in peacefully solving international disputes. The doctrine of self-determination is a basic free world tenet. It is time we applied it to the Irish unification problem.

The PRESIDING OFFICER. The resolution will be received and appropriately referred.

The resolution (S. Res. 109) was referred to the Committee on Foreign Relations, as follows:

Resolved, That it is the sense of the Senate of the United States that the maintenance of international peace and security requires settlement of the question of the unification of Ireland and that the people of all Ireland, including the people of Eire and the people of Northern Ireland, should have a free opportunity to express their will for union and that this be attained by an election of the people of all Ireland under the auspices of a United Nations Commission for Ireland, to be designated by the General Assembly pursuant to articles 11 and 35 of the charter, which shall establish the terms and conditions of such election.

PROTECTION OF HAWAIIAN NENE GOOSE—ADDITIONAL COSPONSOR OF BILL

Mr. LONG of Hawaii. Mr. President, on February 20, 1961, I introduced S. 997 for the protection of the Hawaiian Nene Goose. In my remarks on page 2345 of the RECORD, I explained that my colleague, Senator FONG, was a cosponsor of the legislation. By error, however, Senator FONG's name was omitted from the printing of the bill. I ask unanimous consent that his name be added to the bill at its next printing.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL AID TO EDUCATION—ADDITIONAL COSPONSOR OF BILL

Mr. LONG of Hawaii. Mr. President, I am confident that this is the year in which the Nation will meet one of the greatest challenges of our times—the need for better educational opportunities. President Kennedy has laid out a forward-looking program which, in general, I wholeheartedly support. One major part of the President's program, aid to higher education, is embodied in the bill (S. 1241) to authorize assistance to public and other nonprofit institutions of higher education in financing the construction, rehabilitation, or improvement of needed academic and related facilities, and to authorize scholarships for undergraduate study in such institutions, introduced on March 7 by the distinguished senior Senator from Alabama [Mr. HILL].

I ask unanimous consent that I may join Senator HILL as a cosponsor of S. 1241 and that at the next printing of that bill, my name may be added to it.

The PRESIDING OFFICER. Without objection, it is so ordered.

ELIMINATION OF CATEGORY "WHEAT UNFIT FOR HUMAN CONSUMPTION" FOR CERTAIN PURPOSES—AMENDMENT OF FEDERAL SEED ACT, RELATING TO SCREENINGS OF SEED—ADDITIONAL COSPONSOR OF BILLS

Mr. YOUNG of North Dakota. Mr. President, I ask unanimous consent that on any future prints of S. 1313 and S. 1314 that the name of the Senator from South Dakota [Mr. CASE] be added as a cosponsor. Through a mistake on my part his name was not originally added.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICE OF HEARING ON NOMINATION OF RICHARD J. MURPHY TO BE ASSISTANT POSTMASTER GENERAL, BUREAU OF PERSONNEL

Mr. JOHNSTON. Mr. President, on behalf of the Committee on Post Office

and Civil Service, I desire to give notice that a public hearing has been scheduled for Friday, March 17, 1961, at 11 a.m., in room 6202 New Senate Office Building on the nomination of Richard J. Murphy to be Assistant Postmaster General, Bureau of Personnel.

Persons wishing to be heard on the nomination may make arrangements to do so by calling CApitol 4-3121, extension 5451.

Following the public hearing the committee will meet in executive session to consider the nomination of Mr. Murphy and that of Ralph W. Nicholson to be Assistant Postmaster General, Bureau of Finance, on which hearings were held at an earlier date.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. HRUSKA:

Article entitled "The Congress Will Respond," written by Senator KARL E. MUNDT, of South Dakota, and published in the Kiwanis magazine for February 1961.

VOLUNTARY WEATHER OBSERVERS

Mr. CARLSON. Mr. President, I wish to pay tribute to the 12,000 voluntary weather observers who make and record weather observations for the U.S. Weather Bureau every day of the year. This is a voluntary and cooperative work which means much to the everyday life of the American citizen.

Most of these observers serve without pay. Therefore, it can be stated that it is truly a dedicated service in the interest of our people.

Dr. F. W. Reichelderfer, Chief of the Weather Bureau, U.S. Department of Commerce, recently published a history of the work of the voluntary cooperative weather observers. This cooperative weather observer service has an interesting historical background, in that it goes back to the very beginning of the Nation's history.

The very first weather observations known to have been made in the New World were those of Rev. John Camanius Holm, a Swedish chaplain in the Swedes' Fort Colony, near what is now Wilmington, Del. It is stated that Reverend Holm made daily observations, without any instruments of any kind, during 1644 and 1645, over 300 years ago.

The chronology following the beginning of this work constitutes, in reality, a progressive improvement in weather reporting and weather studies that is in keeping with the growth and development of our Nation.

In the early days, men such as Benjamin Franklin, Thomas Jefferson, and James Madison were voluntary cooperative weather observers.

While I am paying tribute to the cooperative weather observers of the U.S. Weather Bureau, I also wish to pay tribute to the Chief of the Bureau, its personnel in Washington, and those stationed in every section of the Nation.

Weather plays an important part in the operations of our agricultural economy and our industrial economy. The operations of both are planned largely on the advice and information from the Weather Bureau. In this day of radio, television, and the press, the weather has come ever closer to the individual citizen. Hardly anyone makes a move without consulting the weather man. Those of us who depend on air transportation, particularly in the great Middle Western areas, depend solely on information we get through the Federal Aviation Agency and the Weather Bureau.

Dr. Reichelderfer, Chief of the Bureau, recently paid a very fine tribute to the members of the Weather Bureau cooperative service, which is as follows:

To you, the voluntary cooperative observers, the Weather Bureau owes its sincere thanks. You have devoted yourselves unselfishly to the task of observing the weather at your home towns daily throughout the years.

In contrast to the many quickly perishable things in our lives, weather data gain in value with every observation that is added to the record. A long series of them determines the climate. Without the efforts of the cooperative observers our knowledge of the many climates of the United States would be very incomplete indeed.

For agriculture, business, and commerce the intimate knowledge of climate is essential. Your records enable us to provide an effective climatological service to the Nation—in fact, one of the finest in the world. Your data also serve many phases of weather research.

The publication of "The Cooperative Weather Observer," which places into the public record some of your accomplishments, gives me a welcome opportunity to commend all of you for your splendid public service.

During the past many years a large number of our Kansas citizens have participated as cooperative weather observers. In Dr. Reichelderfer's report he gives the background and information regarding these observers; and I ask unanimous consent that this information be made a part of these remarks.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

Ashland, Kans.: Mr. M. G. Stevenson of Ashland holds the unique distinction of receiving his 25-year length of service emblem at the age of 96. Mr. Stevenson, still active as a funeral director, has kept the weather records at Ashland since March 1933, with a prior service of 2 years from 1925 to 1927.

Burlington, Kans.: Mrs. Mabel Hunt recently completed 30 years as cooperative observer at Burlington. She was hospitalized at the time Mr. A. D. Robb, State climatologist for Kansas, made the award of her 30-year pin. She arranged for an assistant to maintain the record while she was hospitalized. Her mind was on the continuity of the record, so when the assistant also became hospitalized, Mrs. Hunt requested a nurse to call another neighbor who then took the rainfall measurements and the nurse phoned the amounts to the proper Weather Bureau River District Office. Mrs. Hunt's father, Mr. O. E. Sanford, had maintained the station from August 31, 1909, until his death in 1928 at which time Mrs. Hunt became the observer.

Mrs. Hunt died in November 1958. Almost 50 years of excellent weather records were compiled by this father and daughter.

Council Grove, Kans.: Mrs. A. H. Prater continued the observations begun by her husband in 1916. He suffered a stroke in 1920 and from then until his death in 1945 she took the observations and he recorded the data on the forms. Mrs. Prater continued the observations until May 1956. About the only missing observations during the whole time occurred when the Neosho River occasionally overspread the lower side of the yard where the instruments were located.

Leoti, Kans.: Mrs. L. E. Gorsuch, observer at Leoti since September 1912, reported that the first 3 days of record for August 1923 were lost when the house was blown away in a tornado at 5 p.m., August 4. In spite of this the regular 6 p.m. observation on the 4th was taken and recorded as usual.

Lincoln, Kans.: Rockwell N. Greene, observer at Lincoln since December 1955, became familiar with weather observations during the time that his father, Rockwell W. Greene, served. The senior Mr. Greene was observer from April 1912 until near the end of 1955.

Oberlin, Kans.: Mr. Edwin W. Coldren, observer at Oberlin since November 1919, reports the following incident at his station:

"On June 19, 1930 between the hours of 10:30 p.m. and one-half hour after midnight, Oberlin experienced an extra heavy thunderstorm of rain. At that time Oberlin did not have drainage facilities as it now does, also the rain gage was located across Hall Street from my residence, on a vacant lot not much higher than the street level. The downpour caused water from the storm to flow over the dike at the street west of my home to the depth of 2 feet or more; and the vacant lot on which the rain gage was located was covered to a depth of nearly 3 feet.

"The wooden support of the rain gage was loosened by the strong current and the gage and support were carried two blocks toward the center of town, where I found both gage and support the next morning. The rainfall amount was ascertained by averaging the amount shown by unofficial gages (three of them). That accounts for the 3.01 record I reported. Many of the basements of the town were filled with water."

Ulysses, Kans.: Mrs. H. F. McCall of Ulysses succeeded her husband (who had served 1 year) in April 1917, and except for 2 months has observed the weather at Ulysses ever since.

She recalls one time in the "dirty thirties" when she went out in the afternoon to take the observation, and also to feed her white chickens. It was so dusty this day that although she could see the hens and hear the baby chicks she could not see the chicks and had to be very careful not to step on them.

Wakeeney, Kans.: Judge A. S. Peacock, observer at Wakeeney from August 1905 to March 1944 asked "Is the making of these records considered worthwhile?" Then he went on to say (Monthly Weather Review, vol. 63, November 1935, p. 315): "It would seem so; these records are frequently used in the trial of cases in various courts. It would further seem so if we may judge by the number of inquiries for weather facts. Within the past 10,957 days we have answered at least that many questions concerning the weather. And that would be a rather low average—only one question per day.

Mr. CARLSON. Dr. Reichelderfer also mentioned the known observers, living and dead, who served 50 or more years as of the close of 1959.

In Kansas, we have had a number of people who have rendered this outstanding service for 50 years or more; and I ask unanimous consent to include as a

part of these remarks their names and information concerning them.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

Alton, Kans.: Hugh A. Storer, cooperative observer at Alton, Kans., was born in 1889, and has lived his entire life on the farm homesteaded by his father. He has served as cooperative weather observer since March 1908. He has also served 24 years on the local school board, was secretary-treasurer of the Osborne County Farmers Union Cooperative for 18 years, served in the Kansas Legislature from 1937 to 1945, and was county commissioner for the third district from 1953 to 1957.

Healy, Kans., Jennison family: Observations at Healy have been taken by the Jennisons since 1901. Observers have been H. S. Jennison; the father, and C. M. Jennison, Miss Dorothea Jennison, and the present observer, Robert H. Jennison.

McPherson, Kans.: Mr. Edward F. Haberlein took observations at McPherson from October 1890 to May 1920 and his son, Edward M., from then until October 1955, 65 years. The McPherson record is very complete. Typical of the care given to the observations and equipment is the use of one instrument shelter at this location for over 50 years.

Norton 8 SSE, Kans.: Three generations of the Sieffel family have kept weather records at Norton 8 SSE from August 1903. They are H. A. Sieffel, Sim Sieffel, and the present observer, Cale A. Sieffel. Records made by the Sieffels have all been good, consistent, and creditable.

Oswego and Parsons, Kans.: James M. Currigan was cooperative observer at Oswego from January 1899 to October 1917 and then again at Parsons from January 1925 to April 1939. At that time his son, Francis M. Currigan, took over the observations and has continued them until the present. This is a family record of some 52 years.

Toronto, Kans.: Mr. Malcolm A. Webb took observations for 54 years at Toronto, from February 1900 to June 1954, with only rarely a missing day in his records.

Mr. CARLSON. One of the families with an outstanding record of service in this field is the Adams-Davis family; and I ask unanimous consent to include in the RECORD information concerning this family.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

Adams-Davis family: The following is taken from a letter from Mrs. Ellen Adams Davis, cooperative observer at McIntosh 4 NW, N. Mex.

"My father, D. M. Adams, began as a voluntary observer at Troy, Ohio, soon after the Civil War, under the War Department and Signal Service Corps. Calls were made for volunteers and father responded. He furnished his own rain gage and thermometer. The former made of copper by a tin smith using the ratio of the funnel 10 times the diameter of the tube. The thermometer was tested in melting ice for accuracy. The Government furnished envelopes with Government stamps affixed and probably the report blanks. In 1881 he moved to Indiana (Miami) and again took up the reporting. Not long after, the Government furnished him a fine thermometer and rain gage. In 1884 he again moved, this time to Kansas (Cowley County), again secured the appointment. The copper gage was again used and a locally purchased thermometer, reporting to Topeka. In February of 1886 (the year I was born) the family moved to Sumner County, Kans., and soon the State furnished him with Government instruments. The following is of my own recollection. I can just remember the homemade gage. The thermometer was placed outside of a north window so as to be seen from indoors. Was read three times daily—early a.m., about 2 p.m., and at bedtime in order to get the 3 readings daily. About 1900 he received the self registering. About that time I began as his assistant if he couldn't attend the instruments himself for any reason. He continued up to the time of his demise in February of 1920 when my younger brother Lewis took over. (I was before that married and living here in New Mexico.)

"He continued until in August of 1922 when he moved to Estancia, N. Mex., and received the appointment for Estancia. He continued until the first of 1928, in the meantime moving a few miles to near McIntosh. He returned to Kansas in early 1928 and had the instruments turned over to me. It has been a pleasure for me to continue from there and hope I may for some time to come when my son will probably take over. Thus the span of years since my father began, up to now, has been at least 90 years.

"Nothing unusual has occurred during my term in office. Once during father's in Ohio he was called into court to determine if there had been a frost on a certain date, and in 1910 he was contacted by a representative of the A.T. and S.F. R.R. in regard to his highest recorded amount of rainfall in 24 hours in connection with an unusual flood in Wellington, Kans., caused by a 14 inch rain, which was stopped by a railroad fill, causing loss of life and property damage."

Mr. CARLSON. I also ask unanimous consent to have printed in the RECORD the names and addresses of those presently serving in Kansas, with 25 to 50 years of service.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

KANSAS

Ashland: Myron G. Stevenson, March 1933.
Centralia: A. E. Myers, August 1932.
Florence: Ralph W. Smith, October 1925.
Hudson: Clyde E. Durham, August 1922.
Junction City No. 2: Leslie W. Sargent, April 1925.
Leoti: L. E. Gorsuch, September 1912.
McFarland: C. H. Forinash, December 1927.
Oberlin: E. W. Coldren, November 1919.
Overbrook 2 WSW: Floyd C. Butel, July 1925.
Sedgwick: Ernest Koch, March 1934.
Tribune 1 W: Thomas B. Stinson, April 1924.
Ulysses: Mrs. H. F. McCall, April 1917.
Worden: Walter Schwarz, October 1932.

WITHDRAWAL OF UNION OF SOUTH AFRICA FROM BRITISH COMMONWEALTH

Mr. JAVITS. Mr. President, I deeply believe Americans will salute the courage of the 10 heads of government of the British Commonwealth of Nations while they view with regret the withdrawal of the Union of South Africa from the Commonwealth. For the other Commonwealth prime ministers have rendered to us all an historic service and have tremendously aided the cause of freedom by their determination not to yield—even at the cost of South Africa's withdrawal—on the fundamental issue of equality and freedom posed for all the world by the South African Government's stubborn adherence to the practice of apartheid.

History will record this courageous devotion of the other Commonwealth nations to the principle of equality of the races. It is a moment of crisis for the Commonwealth, a moment when I hope the U.S. Government will assure the other Commonwealth members—India, Pakistan, Ceylon, Ghana, Malaya, Nigeria, Cyprus, Canada, Australia, and New Zealand—of our backing and support. The moral cement which binds the Commonwealth together on this issue is also the moral cement essential to bind the free world together.

And it is the integration of the free world morally, as well as economically, politically, and culturally, that will bring about ultimately the decisive victory of freedom over all forms of totalitarianism, of which communism is the current manifestation.

Nations like individuals have their faults and inconsistencies, and it would be difficult for any nation or group of nations to marshal evidence of a wholly consistent record of obedience to the high principles of equality before the law. But when morality is demonstrated in an hour of great and historic trial, it has a historic validity and establishes the character of nations. It is in this perspective that we must judge and highly approve the action of our colleagues, the other Commonwealth nations, in the struggle for freedom.

PRESIDENT KENNEDY'S FARM MESSAGE

Mr. HUMPHREY. Mr. President, I wish to thank the President of the United States for his splendid message to the Congress today known as the farm message. It has crystallized the thinking, hopes, and goals of the Nation's farmers into one, clear call for action. It is sensible, practical, and responsible. It will improve farm income, and sharply reduce Government farm expenditures.

His program represents the best ideas and the most realistic proposals of those who have studied and worked on agricultural affairs for the past decade. I am pleased that the President's program incorporates the basic proposals of my 1959 bill, the Family Farm Program Development Act, and similar proposals by Representative W. R. POAGE of Texas, in the House of Representatives.

For the first time in years, we have an administration which emphasizes American agriculture as a success story, and not as a burden. The President fully recognizes the blessings and oportunities of our farm abundance, instead of complaining only of the problems of surplus.

The President properly recognizes that we need a variety of tools to restore economic health to the Nation's farmers and to utilize our food and fiber fully for domestic and international needs. He has broken away from the approach that there is a single farm problem, and the unrealistic quest for a magic, single answer.

He has recognized that the variety of answers to the problems of various agricultural commodity producers can best come from the administration's working with national farmer advisory committees for each commodity.

The farm message reveals that we have a President who pursues a policy

to insure the farm family a parity of income and equality of opportunity with urban families—a policy to protect and preserve the family farm as a basic American institution. The President has emphasized the important role of our farm cooperatives and urged their strengthening.

Above all, the President recognizes that the strength and economic health of the United States cannot be secure unless economic health is restored to American agriculture. He sees agriculture as a vital and integral part of our entire economy and society, not as a separate problem to be endured.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. SYMINGTON. I should like to associate myself with the remarks just made by the able Senator from Minnesota, one of the foremost authorities in this body on the subject of agriculture. I commend him for his laudatory remarks about the farm message of President Kennedy.

At this time I ask unanimous consent to have printed at this point in the RECORD the reply of President Kennedy in yesterday's press conference to a question about agriculture. His answer again proves the President's thorough understanding of the problem. It proves he knows the two major problems. The first is how to get rid of the surpluses; the second, the necessity to give the Secretary of Agriculture the necessary leverage by which to prevent these depressing surpluses from returning.

There being no objection, the question and answer were ordered to be printed in the RECORD, as follows:

FARM BILL

Question. Mr. President, in connection with the farm bill now in conference in Congress, the principal fight seems to be over the section which would allow the Secretary of Agriculture to sell grain into the market to hold the market price. Do you feel that this enforcement feature is an absolute requirement in connection with the bill?

Answer. I am hopeful that the conference will reach a decision which will give the Secretary powers in this area, if not the specific language of title III, at least the language which will protect, provide protection for the bill.

If we don't—if the Secretary lacks the power—this bill isn't going to be successful, and a good many people from the urban areas who voted for the program with title III in it in the House of Representatives have a right, it seems to me, to expect that the Secretary will be given sufficient powers to protect the program from noncompliers who, if they are—who may use the program, if title III is out, for speculative and exploitive purposes.

So that I consider it most important that title III remain in or otherwise some alternate language which will give the Secretary substantial powers provided in title III should be provided by the Congress. Otherwise, we are not going to have any relief.

And I am sorry to see the important agricultural leaders opposing giving us the protection which is required. You cannot have the Federal Government supporting agriculture in important ways unless there is some control over production and if there is some limitation, some provision for cross-compliance. Otherwise, the program will continue to cost a lot of money, the farmers' income will continue to drop, and we will have a gradual deterioration of agriculture in this country.

The program that we suggested and sent to the Hill in my opinion was one that was well balanced, and I am hopeful that a well-balanced program will come out of the consideration of the House.

UNITED STATES EYES SEAWAY PROMOTION

Mr. WILEY. Mr. President, the St. Lawrence Seaway, completed in 1959, offers one of the great opportunities of our time to improve and expand trade and commerce for the United States. Naturally, the Great Lakes region, for which the seaway provides a new economic lifeline, would benefit substantially from an improvement of traffic. These benefits, however, will flow veinlike to a great many other areas of the country.

Now that the seaway is completed, at a substantial investment by the American taxpayer, I believe we have a responsibility for assuring maximum flow of trade and commerce, as well as persons, through the newly developed deep-sea waterway.

Regrettably, an adequate effort, in my judgment, is not now being made to promote such traffic.

However, the Congress, I believe, has a responsibility and obligation to the American people now, and to future generations, to take the necessary steps to assure that the great potential of this improved and expanded waterway may bring its maximum benefits to the country.

I would sincerely hope, therefore, that efforts, now shamefully almost nonexistent, could be greatly expanded for promotional activities for the seaway.

On March 1, the Journal of Commerce published an informative article entitled "United States Eyes Seaway Promotion." The article constructively touches upon a serious challenge in making this economic lifeline more beneficial to the economy of the country. This is particularly essential in these troublesome times of unemployment and economic slowdowns.

I believe the article merits the attention of Congress, and I request unanimous consent to have it published in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNITED STATES EYES SEAWAY PROMOTION

WASHINGTON.—The Kennedy administration is taking a long look at the St. Lawrence Seaway Development Corporation's budget, a move which could lead to an expansion of the agency's virtually nonexistent promotional activities.

Commerce Department officials say the President and the Budget Bureau are studying in particular a recommendation from Great Lakes interests that increased funds be made available to expand the Corporation's traffic development program.

The proposal came from the Great Lakes Commission, a joint State agency with advisory responsibilities on Great Lakes development and programs, which apparently believes that only through promotion at a top level like the agency can the new waterway reach its full potential.

PROGRAM CALLED LIMITED

Marvin Fast, the commission's executive director, in a letter to the President earlier this month, pointed out that the present seaway traffic development program is extremely limited, almost nonexistent.

Noting the statutory requirement that the seaway is to be self-liquidating, Mr. Fast said additional funds for such activities are needed "to permit the Corporation to assist in the achievement of the maximum usage of the seaway's navigation facilities on which self-liquidation depends."

Mr. Fast mentioned as another reason for enlarging the Corporation's traffic developmental program the present efforts to increase U.S. exports as a means of reducing the outflow of U.S. gold.

"The seaway," he said, "was intended to create new exports, commerce which would not move in the foreign trade of the United States without the seaway.

"It therefore would appear especially in the national interest at this time to promote such new trade, and, it follows, to permit the Seaway Corporation to engage in traffic development to a greater degree."

TOLLS WOULD BEAR COST

Cost of the developmental activities, he said, would ultimately be borne not by taxpayers but by users of the seaway paying tolls for its direct benefits.

The present restrictive policy of the Federal Government is based on its view that tax funds should not be used to promote the seaway in competition with other alternative routes, an argument which Mr. Fast feels is fallacious.

The budget submitted by former President Eisenhower for fiscal year 1962, which begins July 1, allotted only $11,000 for seaway promotion, although, it is understood, the Corporation had asked for about $100,000. The latter amount is close to that spent by the Corporation's Canadian entity, the St. Lawrence Seaway Authority.

Lack of promotion by the St. Lawrence Seaway Corporation has long been a touchy issue with Great Lakes and seaway boosters. The Corporation's public relations department originally consisted of a director and secretary, who were allotted $4,000 annually for promotional material and $500 annually for photographs for newspaper and magazine circulation. Since last March, the work has been done by an acting director, whose main promotional effort has been publication of a monthly traffic statistical report.

THE STRUGGLE OF THE PEOPLE OF LITHUANIA

Mr. WILEY. Mr. President, on the 16th day of last month thousands of Americans of Lithuanian descent celebrated a very important day in the history of Lithuania—the 43d anniversary of modern Lithuania's declaration of independence.

In historic times Lithuania long served as a political and cultural center for Eastern Europe. Yet, despite the courageous struggle of the Lithuanian people for self-government they have in recent centuries been under the dominion of the Russian czars.

After the First World War, modern Lithuania finally gained its independence. But this was a short-lived freedom, because the new Russian imperialism, in the form of international communism, soon deprived the Lithuanian people of the right for national existence. In 1940, Lithuania was conquered by Soviet troops. Since that time its people have been deprived of the right for

an independent national and cultural life. In fact, Soviet occupation has been so repressive that the population of Lithuania has dwindled in numbers.

On February 26, 1961, there was held in Kenosha, Wis., a mass meeting of American Lithuanians to commemorate the 43d anniversary of Lithuanian independence. At this meeting, a resolution was adopted asking the people and the Government of the United States to help the unfortunate freedom-loving people of Lithuania. In this resolution it is brought out that while Soviet Russia is accusing the West of imperialism in Africa and Central America it is the Soviets who are the main offenders against self-government and national independence.

I ask unanimous consent that a letter sent to me by the American Lithuanian Council of Kenosha, and the resolution adopted at the Kenosha meeting of February 26, 1961, be printed in the RECORD at this point of my remarks.

There being no objection, the letter and resolution were ordered to be printed in the RECORD, as follows:

AMERICAN LITHUANIAN COUNCIL,
Kenosha, Wis., March 6, 1961.

Hon. ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.

MY DEAR SENATOR: Please accept the enclosed resolution unanimously accepted in Kenosha on February 26, 1961, at a mass meeting of Lithuanians commemorating the 43d anniversary of Lithuania's declaration of independence. The Lithuanian people trustingly entreat you to exert your powerful influence in championing Lithuania's fight for her freedom.

With kindest personal regards, I remain

Very truly yours,

A. MICIUNAS, M.I.C.

RESOLUTION UNANIMOUSLY ADOPTED BY A MEETING OF LITHUANIAN AMERICANS OF KENOSHA, WIS., ON FEBRUARY 26, 1961

Whereas 43 years ago, the Lithuanian nation, through its representatives gathered in Vilnius, the historical capital city of Lithuania, proclaimed the restoration of national and political independence of Lithuania.

Whereas subsequent to this proclamation, a sovereign state of Lithuania, in the form of a democratic republic, has been established, and this independent Republic of Lithuania was recognized by Germany, Soviet Russia, and practically, all important nations of the world, including the United States of America, and was admitted to the full membership in the League of Nations;

Whereas, in 1940, without any provocation on her part, Lithuania was invaded by the Red army and, by direction from Moscow, a hateful Communist regime has been forced upon her people, in flagrant violation of the treaty of peace signed by the two nations and of several other valid treaties between them: Therefore be it

Resolved, That the United States, by its words and actions, continue to give hope to these valiant people that they may again enjoy that freedom which is so close to their hearts; and be it

Resolved, To urge the Government of the United States to use the forum of the United Nations General Assembly at its forthcoming session in March, to expose the hypocrisy and duplicity of the Soviets who loudly condemn colonialism in Asia and Africa and demand complete independence for every nationality of those continents without any conditions and reservations, while at the same time they practice colonialism of the most inhuman kind in the Central and Eastern Europe; and be it

Resolved, To appeal to the President of the United States and to the Secretary of State for help to the unfortunate people of Lithuania and for an active and effective support of their desire to regain freedom; and finally be it

Resolved, That the United States adhere to its position of refusing to recognize the alien rule of Lithuania and other captive nations, for such an agreement would be a defeat far greater than battles in actual war and the loss of at least 100 million persons behind the Iron Curtain who despise communism and who hate their Soviet overlords.

MORE EXAMPLES OF WASTE IN THE DEPARTMENT OF DEFENSE

Mr. SYMINGTON. Mr. President, here is some more of the record, a record that continues to prove that the present obsolete organization of the Department of Defense is wasting annually many billions of dollars of your and my money as taxpayers.

The bad management which is the inevitable result depreciates the tax dollar much more rapidly than any possible inflation; and the people have the right to know this fact.

During the past 2 weeks I presented to the Senate various documented examples of waste and mismanagement in the Defense Department.

Here are additional facts along that line.

A study of the management of electronic supplies and equipment within this Department, completed last year, brings out the fact that lack of centralized control in this area has added heavy unnecessary cost.

This study found that $2½ million of electronic equipment was being repaired at a cost of $680,000. But the same items were in oversupply in other services.

Another case: One service had large surpluses of a certain type of radio. At the same time, however, another service was placing orders for $77 million of the same radio.

And another: An aircraft carrier went to sea with only 78 percent of its requirement of an essential piece of electronic equipment. But a nearby depot of another service had on hand excess quantities of that same equipment.

These are but a very few illustrations of what is going on. As evidence, let the Senate and the taxpayers remember that in the management of 675,000 such electronic type items, the various services handle annually an inventory exceeding $2½ billion.

Six organizations in the Department of Defense act independently in performing the same or similar stock-management functions. The opportunities for further waste of this character, therefore, are obvious.

The General Accounting Office states that unification of policy and management in this area alone would reduce administrative costs $25 million a year.

In another study, 14 cases of contracts that had been entered into by one service, the Navy, were examined and it was found that prices were arrived at without either adequate evaluation, or verification of costs. Due to the failure to examine carefully cost estimates involved in negotiations, millions of dollars of excesses were discovered in these 14 examinations.

As example, in one case, contractor costs were misstated in the amount of $4,419,000.

In another, the contractor included costs not related to the contract. That resulted in excess payment of $2,596,900.

Other contracts in this group showed a total of $5.3 million in excess payments.

In other studies—all issued this year, 1961—individual contracts were examined in some detail. Waste and mismanagement were revealed in each case.

For example, the Air Force negotiated a fixed-price incentive contract with a private contractor. The initial target price was subject to adjustment at the completion of a specified number of engines. Then a firm target price of $23,542,176 was negotiated. This price allowed for a target profit of 10 percent on cost.

Later it was found that the contractor did not use current prices in estimating his costs; and also failed to use the latest available pricing data in estimating the cost of items not yet on order. As a result, the cost estimates were far out of line.

In addition, unless the target price is adjusted, the Government may well incur added heavy cost.

In another Air Force contract, a price of $58,985,520 for aircraft engines was negotiated between that service and a private contractor. This price included excessive estimated costs of $1,480,000.

In another contract for a 5,000-gallon capacity semitrailer, the Army gave the research and development contract to the low bidder. But when it came to the actual purchase of 509 of these vehicles, the service found that it had failed to obtain suitable drawings from the original contractor; therefore was unable to open the quantity order to competitive building. It is estimated that in this case the extra cost to the Government was about $875,000.

In another study it was found that the Navy continued to overstate its requirements for equipment by millions of dollars, this because of deficient procedures for computing needs; also, according to the study, because of an unsatisfactory accounting control of equipment on hand.

In this case, $7½ million of equipment was found held in a reserve status for extended periods. Due to inadequate procedures, this equipment was prevented from being used when needed.

In addition, large quantities of high cost electronic equipment were, in effect, "lost" in the supply system because of inadequate management controls. As a result, the Navy purchased additional material of the same type in the amount of $2,105,640. The study notes that when the "lost" equipment was "found," the excess orders were not canceled.

Another study showed that policies established for short-run fiscal objectives actually resulted in much higher costs.

In 1957 the Department of Defense established as policy that contractors themselves should maintain an investment of 20 percent of the costs incurred for work in process under cost-reimbursement contracts. Previously contractors had been reimbursed for the entire amount of allowable costs on work in process.

This directive was established in an effort to cut down on expenditures in order to comply with current expenditure ceilings. While it afforded the Government temporary relief from the pressure of its obligations, the net result was that the Government incurred increased costs for the additional fees eventually paid the contractors.

In illustration, an examination of 26 contracts showed that this Department of Defense directive had increased cost to the Government by $8,700,000 on those 26 contracts alone.

In summary, here are further illustrations of the vast amount of savings which would accrue to the taxpayers under a sound and proper organization structure in the Defense Department.

Again, I express appreciation to the Comptroller General and his staff for their fine factual studies, which can only help to point the way toward more efficient government.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I wish to make a unanimous-consent request, which I have discussed with the distinguished minority leader, the Senator from Illinois [Mr. DIRKSEN].

I ask unanimous consent that beginning at 3 o'clock the Senate go into executive session to consider Executive C, the Columbia River Treaty, and that a half hour be allocated to consideration of that treaty, 15 minutes to a side. I believe that there will be debate on only one side.

Furthermore, I ask unanimous consent that at 3:30 the Senate consider Executive E, Convention on the Organization for Economic Cooperation and Development, and that an hour be allocated to consideration of that treaty, a half hour to each side.

Mr. JAVITS. Mr. President, reserving the right to object, I wish to be heard on the OECD Convention, and I should like to speak for not less than 10 or 15 minutes. I do not believe 30 minutes to a side is adequate.

Mr. MANSFIELD. How about one hour and a half? There will not be much said on this side of the aisle. The convention was reported unanimously by the committee.

Mr. JAVITS. An hour would be satisfactory to me if the Senator would give me half of it. I did not want to sound hoggish.

Mr. MANSFIELD. We will give the Senator from New York plenty of time. We shall not take much time on this side.

Mr. JAVITS. Whatever the Senator from Montana desires, I wish to make clear my intention to speak for 15 minutes on the convention. If I may have 15 minutes for my side, that is all I ask.

Mr. MANSFIELD. We can conclude in an hour.

Mr. JAVITS. I believe the Senator from Illinois [Mr. DIRKSEN] suggested that other Senators have problems also.

Mr. SPARKMAN. Mr. President, may I ask whether the convention about which the Senator from New York is speaking would be considered first, or second?

Mr. MANSFIELD. The Convention on the Organization for Economic Cooperation and Development would be considered at the conclusion of the consideration of the Columbia River Treaty.

Mr. SPARKMAN. I was thinking about time for a yea-and-nay vote in between.

Mr. LAUSCHE. Mr. President, I should like to talk about the significance of the Columbia River Treaty as it relates to the Chicago River diversion proposal. I wish 15 minutes at the most to speak on that subject.

Mr. MANSFIELD. Mr. President, I wish to change my request in order to accommodate the Senators from New York and Ohio to the extent that at 3 o'clock the Senate begin discussion on the Columbia River Treaty, that discussion to last for 45 minutes. Of that 45 minutes, the Senator from Ohio [Mr. LAUSCHE] will have 15 minutes.

At the conclusion of consideration of the Columbia River Treaty, I ask unanimous consent that an hour and a half be designated to consider the Convention on the Organization for Economic Cooperation and Development, and that the time be equally divided.

The PRESIDING OFFICER. The Chair asks the majority leader to suggest who will control the time.

Mr. MANSFIELD. The majority and minority leaders, or whoever they may designate, will control the time. So far as I am concerned, the Senator from Alabama [Mr. SPARKMAN], the acting chairman of the Committee on Foreign Relations, will control the time on this side.

Mr. JAVITS. Mr. President, is 45 minutes agreeable to my leader?

Mr. DIRKSEN. Yes.

Mr. JAVITS. I thank the Senator.

The PRESIDING OFFICER. Is there objection to the request? The Chair hears none and it is so ordered.

LIGHT OF FREEDOM STILL BURNS FOR BRAVE HUNGARIANS

Mr. YOUNG of Ohio. Mr. President, yesterday, March 15, was the 113th anniversary of the 1848 Hungarian revolution. By all rights, this should have been a day of great rejoicing for the Hungarian people and their friends throughout the world.

Unhappily, it has instead become in this grim period of international anarchy a day of sad contemplation and concern over the plight of freedom-loving people in bondage to a foreign tyranny.

We of the free world can observe this day only with solemnity and the hope that someday freedom will return to a great freedom-loving people now under the iron heel of despotism.

It was in 1848, under the brave leadership of the famed and great Louis Kossuth, that the patriots of Hungary boldly bid for liberation from Austria. They won freedom and independence and Hungarians flourished in an atmosphere of self-determination.

Then, nearly a century later, in 1945, Hungary found its freedom crushed through occupation by the armies of Soviet Russia. Yet, the cruel yoke of communism could not smash the desires and aspirations of the Hungarian people for a free and independent national destiny. In their hearts and in their minds, this hope burned steadily.

In the tragic fall of 1956, the people of Hungary rose against the tyrants who oppressed them, and in sacrifice and blood they testified anew to the human truth that despotism may shackle the body but it cannot enslave the mind.

Once again they demanded freedom and independence and fought with courage and determination for it. Small arms and courageous hearts, however, were not enough against Soviet tanks and artillery.

Although ruthlessly crushed, the patriots of Hungary gave enduring proof that their yearning for freedom remains unquenchable.

As we commemorate an earlier era of Hungarian freedom, we honor the gallant people who have the courage and tenacity to keep burning the light of freedom which once shone brightly throughout their beloved land.

Now enslaved, these brave people have taught us well the price of freedom.

Mr. WILLIAMS of New Jersey. Mr. President, most peoples in Eastern and Central Europe have had to struggle and fight for their freedom during a good part of their modern history. This is true in the case of peoples in the Baltic countries, in Poland and Czechoslovakia, and in the Balkans. This has also been true in the case of the Hungarian people.

These doughty descendants of asiatic migrants had settled in today's Hungary early in the 11th century, and there they had constituted a powerful kingdom during the late Middle Ages. Early in modern times they waged more than one fierce battle against Ottoman Turks, and they played an important role in confining the Turkish advances in Europe to the Balkan peninsula. Late in the 17th century their country was merged with the Austrian Empire, and from then on for more than 200 years they lived in their homeland as restless subjects of the Hapsburg monarchy. Time and again they tried to cast off the Austrian yoke, but all their attempts ended in failure; they simply could not, by themselves alone, take on the then most powerful empire in Europe with much hope of success. But in the year 1848, both the revolutionary temper and the international turn of events seemed to be in their favor, and under favorable circumstances, they succeeded in regain-

ing, for a brief period at least, their freedom.

The revolutionary wave of 1848 which began early in Western Europe, soon spread to all parts of the Continent. In many capitals autocratic and monarchical governments sensed the threat to their existence. In Vienna, where Metternich had ruled with an iron hand for more than three decades, the government was shaken and Metternich himself had gone into hiding. The entire governmental structure in Vienna was tottering. Austrian agents in Budapest were no more sure of their fate, though they clung to their power there. In the meantime, Hungarian leaders were preparing to reap the benefit of these revolutionary movements, and in this they were successful. Early in March they staged a demonstration in Budapest. At the same time they presented a list of their just grievances and demanded freedom and autonomy. The government, weakened and shaky as it was, could not refuse these demands, and so granted freedom and autonomy to the Hungarian people on March 15. That historic event of 113 years ago has become the Hungarian national holiday, their Freedom Day, and as such it has been celebrated during the last 113 years.

Today on the observance of the anniversary of that stirring event we cannot help but recall another equally stirring and historic event in the contemporary history of the Hungarian people, the revolution of October 1956, which these daring, dauntless, and almost defenseless people staged against the most ruthless of their oppressors. Yes, they rose against their Communist totalitarian tyrants, and in defiance of Soviet Russia, regained their freedom, only to lose it again in a few weeks. The Hungarian revolution of 1956 clearly showed that the spirit of March 15, 1848, was very much alive in Hungary. On its 113th anniversary celebration, let us hope that it will continue to live until Hungarians again attain their freedom and independence.

THE CONSUMER NEEDS A VOICE AT THE FEDERAL LEVEL

Mrs. NEUBERGER. Mr. President, it has long been my feeling and experience that the consumers of this Nation often receive too little consideration. One of the reasons for this is that there is no organized voice of the consumer at the Federal level. Sometimes this failure of consideration occurs because a proposed regulation change is made without the proper investigation and public hearing.

I think a case in point is the Department of Agriculture's change in its meat inspection regulations permitting the addition of water to ham.

I am hopeful that the Department soon will announce that this regulation has been corrected.

Rather than detail the specifics in this particular instance, I ask unanimous consent that part of an advertisement wich appeared in the Washington Post, Thursday, March 16, 1961, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CO-OP NEWS LETTER—WATER IN SMOKED HAMS DRAWS CONSUMER FIRE—ADULTERATION HAS USDA'S O.K.

The U.S. Government, through the Food and Drug Administration, recently seized a shipment of Atlantic Ocean water being sold at $3.75 per gallon as a "fountain of youth" and cure-all for an assortment of serious illnesses. The distributor—an Ohio promoter—now faces court action on charges that the labeling made false and misleading therapeutic claims.

But the U.S. Government, through its Agricultural Research Service, has legalized the sale of water as ham and other smoked pork products—and no labeling is required. The cost of this water will, in many instances, make $3.75 a gallon appear like a reasonable figure.

It all came about December 23d of last year when the Agricultural Research Service of the U.S. Department of Agriculture amended its meat inspection regulation to permit the addition of "ten percent added moisture" to smoked hams, smoked pork shoulders, smoked pork shoulder picnics, and smoked pork shoulder butts.

Prior to that time, water used in the curing of these pork products was minimized by proper smoking and drying which removes water and brings these products back to uncured weight. Overpumped hams had to carry the label "imitation ham" if they carried the insignia of Federal inspection.

Under the amended order as it has been interpreted for enforcement, ham may legally weigh about 116 percent of the green or uncured weight, thus in effect permitting a 16 percent addition of water.

Last week, we purchased a watered butt half of ham from a competitor. At its cost of 69 cents a pound, the water in it carried the price tag of $5.52 a gallon (equal to 8 pounds had the ham been big enough to accommodate that much water). This butt actually weighed five and one half pounds, and assuming it contained 10 percent of water, cost its purchaser about 36 cents for slightly over a half pound of water.

In a discussion with Dr. John R. Scott, chief staff officer for labels and standards of identity in the Meat Inspection Division, it was learned that the justification for the amended regulation was mainly based on representations from packers and processors (represented by the American Meat Institute) to the effect that 50 percent of all hams sold were being cured in small processing plants whose products did not cross State lines and therefore did not come under USDA regulation. Since it is possible to inject up to 60 percent of the original weight of pickle (chiefly water) in the ham, processors of products moving into interstate commerce complained that they found themselves at a severe price disadvantage. Dr. Scott also pointed out that unsupervised small plants might be unsanitary, use phosphate and sodium nitrate above the legal tolerance, and, finally, that a lengthy curing process robs the ham of some nutrients (chiefly fat).

But there is no record of an effort made to educate consumers in the advantages of federally inspected smoked meat products and those which are not.

The processors asked the USDA to waive all legal limitations on the injections of water.

The Agricultural Research Service, in response, appointed a task force to review the validity of the requirement for smoked meats from the standpoint of consumer protection and current production and marketing practices.

Fifteen consumer organizations were contacted to submit within 60 days their comments and supporting information in writing. But the release failed to indicate that a change in water content was contemplated or the background of that change, and the consumer groups did not reply both because they failed to realize the significance of the USDA release and because of the time limitation. Consumers' Union, technically best equipped to testify, was not contacted. In this unusual procedure, no public hearings were held. As of now, public disclosures of testimony providing basis for the change was withheld.

The consumer interest was represented solely by testimony from the Packinghouse Workers Union of the CIO and the Meat Cutters' Union who favored the change. Dr. Scott somewhat reluctantly concedes these two groups might have had an inherent interest.

Proper labeling of the watered hams for consumer guidance was apparently not considered on the basis that USDA lacks jurisdiction beyond the packing plant. But the Federal Trade Commission does have jurisdiction for proper labeling at the retailer-to-consumer level.

Pete Caruso, Co-op's meat buyer, views the new regulation with genuine dismay. He says it will be a rare housewife who will be able to detect a watered ham from that reduced to green weight. This means that packers will most likely all water their product to the legal limit to be competitive. Ham prices are already churning and uncertain, with the spread between smoked and fresh hams narrowing, thus even further increasing the cost of watered hams.

Dr. Scott, asked if the question of the watered hams might be reopened, replied that this is possible, if new evidence is supplied. Since no objective evidence from bona fide consumers was received initially, this appears to be easy.

In the meantime, Pete Caruso will endeavor to concentrate his buying on hams containing minimum water as has always been Co-op's policy. Whether this will continue to be possible in the face of market developments remains a question unless the USDA regulation is revised.

THE ARMY CORPS OF ENGINEERS

Mr. LONG of Hawaii. Mr. President, the U.S. Army Corps of Engineers is the world's largest engineering body of importance to every part of our Nation. The Honolulu Star-Bulletin in an editorial of February 25 paid tribute to the great work of the Army Engineers. I ask unanimous consent that the editorial entitled "The Structure of Greatness," be included in the CONGRESSIONAL RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE STRUCTURE OF GREATNESS

The American story could not be told without reciting the history of its engineering genius. National Engineers Week, observed this week, stimulates a remembrance of historic feats in man's conquest over nature and, in particular, the work of an organization whose scope too often is underestimated.

The U.S. Army Corps of Engineers is the largest engineering body in the world, with responsibilities ranging far beyond its military commitments for the Army, the Air Force and, occasionally, the Navy. Its civil works projects deal with river and harbor navigation, flood control and the development of natural resources.

The corps' first Chief, Col. Richard Gridley, fortified the American positions on

Bunker Hill. After the Revolution, it organized and operated the Military Academy at West Point until the Civil War period and for many years this was where all American engineers were trained.

Its interest in roads, waterways and harbors began during the War of 1812, and in 1824 Congress directed the corps to plan a national transportation system that would weld the Nation together.

Army Engineers surveyed the routes for the early railroads, made rivers and streams navigable.

During the 1840's, Army Engineers sent missions out to explore, survey and map the West and to record for the first time the resources it contained.

At the turn of the century the corps' Gen. George W. Goethals was given the job of completing the Panama Canal, and Army Engineers still serve as Governors of the Canal Zone.

Between World War I and II, the Engineers embarked upon a vast water resources development and flood control program in our great river basins.

It was one of the French engineers recruited by George Washington—Maj. Pierre L'Enfant—who laid out the city of Washington, and the Army Engineers built, completed or improved such notable structures as the Capitol dome, the Washington Monument, the Lincoln Memorial, the Library of Congress and Washington National Airport.

In time of war, the Engineers have been in the forefront of the fighting and Gen. Douglas MacArthur, himself a former Army engineer, described World War II as an engineer's war.

The Manhattan project, which developed the atomic bomb, was headed and manned by Army engineers.

In peace as in war, the Corps of Engineers has helped to give the United States the structure of greatness, to help create the mobility which is so much a characteristic of Americans and, in keeping with the 1824 congressional mandate, to "weld the Nation together."

THE FOURTH NATIONAL ASSEMBLY OF CIVIL WAR CENTENNIAL COMMISSIONS

Mr. JAVITS. Mr. President, I wish to commend my colleague, the Senator from New Jersey [Mr. CASE], for his recent action in urging the National Civil War Centennial Commission to seek a change in the site of the meeting of the fourth national assembly of Civil War Centennial Commissions from Charleston, S.C., to a site where segregation does not obtain. I also wish to associate myself with his request to the head of the Commission, Gen. Ulysses S. Grant III in that same respect.

In so acting, the Senator from New Jersey was supporting the decision of the New Jersey Civil War Centennial Commission to withdraw from the assembly because a member of the New Jersey Commission is a Negro who, while attending the assembly, would be faced with South Carolina's segregation laws.

In my own State of New York a centennial commission has not been organized, so we are not participating, and I have not been faced with this problem. However, I wish to applaud the Senator from New Jersey and to support him. I am sure it was difficult for the New Jersey Commission to decide to forgo participation in the assembly which is timed to coincide with the 100th anniversary of the firing on Fort Sumter in Charleston Harbor, for we all know of the tremendous zeal and enthusiasm which Civil War buffs bring to their evocation.

I regret that the National Commission has not made the same difficult decision that the New Jersey Commission has made. While I recognize the historic significance of Fort Sumter in commemorating this centennial, I believe that there are broad underlying issues so much concerned with the outbreak of the Civil War, which dictate against meeting now under conditions which are in my opinion contrary to the principles of equality and freedom which were established a hundred years ago at the cost of so much blood and sacrifice by the brave men on both sides.

NEBRASKA BECOMES 32D STATE TO RATIFY DISTRICT OF COLUMBIA VOTING AMENDMENT

Mr. HRUSKA. Mr. President, it is with pride that I call the attention of the Senate to the fact that Nebraska yesterday became the 32d State to ratify the so-called District of Columbia voting amendment. This is the amendment to our Constitution which would permit residents of the Capital City of Washington to vote for electors for the President and Vice President of the United States.

A resolution of ratification was adopted by Nebraska's unicameral legislature yesterday by an overwhelming vote of 40 to 1. This means that if six additional States follow suit, the residents of the District of Columbia will have the long-merited privilege of casting votes for President and Vice President for the first time since the District was established in 1800.

I hope indeed that the legislatures of the required number of States will soon follow Nebraska's course.

CHANGE IN U.S. POLICY ON COLONIALISM

Mr. MORSE. Mr. President, I ask unanimous consent to have printed at this point in the RECORD an article entitled "U.S. Shifts on Colonialism; Backs U.N. Angola Inquiry," published in the New York Times for today, March 16, 1961.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. SHIFTS ON COLONIALISM; BACKS U.N. ANGOLA INQUIRY

(By Kathleen Teltsch)

UNITED NATIONS, N.Y., March 15.—The United States joined Asian and African states today in opposing Portugal's handling of its West African territory of Angola. A surprise speech by Adlai E. Stevenson, chief U.S. delegate in the Security Council, marked a departure by the Kennedy administration from the Eisenhower administration's policies in past debates on colonialism.

The development tended to overshadow the immediate business at hand—a resolution by Liberia, Ceylon and the United Arab Republic calling for an inquiry into racial disorders that took place in Angola last month.

The resolution was rejected by a vote of 5 in favor, 0 against and 6 abstentions. The United States and the Soviet Union joined the three sponsors in supporting the resolution.

A resolution requires seven affirmative votes for adoption in the Security Council, although a negative vote by any of the five permanent members—the United States, the Soviet Union, Britain, France and China—serves as a veto.

STEVENSON SPEECH HAILED

After the Stevenson speech, a jubilant Liberian delegate hailed it, predicting that it would "reverberate throughout Africa and through the world."

Mr. Stevenson spoke after Britain, Nationalist China, Ecuador and Chile had said they could not support the three-power inquiry thereby insuring its rejection. They argued that it had not been proved that a threat to peace and security existed.

The U.S. delegate, however, took the position that unless remedial measures were taken, more disorders would occur with dangerous consequences.

Citing the former Belgian Congo as an example, Mr. Stevenson declared that the important thing was to insure that similar conditions do not exist for the Angola of tomorrow.

In recent months the United States had come under heavy fire from Asian and African states for its record of voting with the colonial powers on resolutions effecting the new African states.

The peak of anti-U.S. feeling was reached after the Republican administration last December would not support a resolution in the Assembly calling for immediate steps to give independence to non-self-governing territories. The measure was passed without opposing votes but the United States abstained, along with Portugal and other colonial powers and South Africa and the Dominican Republic.

The U.S. decision to differ with its traditional allies Britain and France and to support the African and Asian case on Angola was reported to have been made known to the delegation only a few hours before the Council met today.

At that time the Soviet Union was the only member certain to support the sponsors, while it was clear that Britain and France would take Portugal's view that the Council had no legal basis to intervene in Angola. Portugal regards the territory, with its 4 million people, as an overseas province.

Mr. Stevenson's remarks were made in a Council chamber crowded with African delegates attending as spectators. His audience grew noticeably more attentive as he went along.

He declared that the United States, as a friend of Portugal would be remiss if it did not stress that step-by-step planning in the Portuguese territories must be accelerated for the political, social and economic advancement of all inhabitants toward full self-determination.

"The best course of action for Portugal and the best course of action to promote the interests of the people of Portuguese territories seem to be through cooperation with the United Nations," Mr. Stevenson added.

Turning to the three-power resolution, he appealed to Portugal to work toward the Charter aims of developing self-government in all territories not yet independent, and to assist in the progressive development of free institutions.

Mr. MORSE. Mr. President, the article sets forth the position taken yesterday by the great Adlai Stevenson, who is the head of our delegation in the United Nations Security Council. From the floor of the Senate today, I extend my congratulations and high commendation not only to our Ambassador but also to the State Department and the White House,

because, having served in the United Nations, I know that Adlai Stevenson would not have made the statements he made yesterday if they were in conflict with the position taken by this administration.

Mr. Stevenson took a position yesterday on the so-called Angola or Portuguese question exactly contrary to the position which the United States has been taking in the United Nations. It was a position which, unfortunately, our delegation had to take last year under the direct instructions of the previous administration in the State Department and the previous occupant of the White House.

It is interesting to note that the position in support of the Portuguese in the Security Council was upheld by the United Kingdom, Nationalist China, Ecuador, and Chile. But for once, the United States got on the side of the angels in the United Nations, because Mr. Stevenson made it perfectly clear that the colonial policies of Portugal threatened peace in Africa and threatened peace elsewhere in the world. Stevenson made it clear yesterday that he would not go along with the legal fiction of Portugal that Portugal does not have any colonies; all they have are oversea metropolitan provinces, by its own definition.

It is very easy to show that Portugal has territories within the meaning of sections 73 and 74 of the United Nations Charter, because we put to them once again, as I did in the United Nations last fall, these three questions:

First, do they rule and exercise domination, dominion, control, and subjugation over millions of indigenous people in foreign territories?

The PRESIDING OFFICER. The time of the Senator from Oregon has expired.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the Senator from Oregon may be granted 2 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MORSE. Does Portugal exercise dominion and control over an indigenous population? We took judicial notice that the answer is "Yes."

Second, is that indigenous population a population of high tension in the world? We took judicial notice that the answer is "Yes."

Third, does that high tension threaten the peace of the world, or at least peace in that area of the world in which the indigenous population lives?

We took judicial notice that the answer is "Yes."

The result is that no matter what Portugal administers as territorial policy, she has territories, and the indigenous population in those territories is becoming a threat to the peace of the world.

The clear duty of the United Kingdom, which is the leader, unfortunately, in the world today, is to recognize that a continuation of the colonial policy of Portugal, Spain, the Union of South Africa, Belgium, and France threatens the peace of the world.

I say to the United Kingdom, from the floor of the Senate today, as I said in the United Nations last fall, that the United Kingdom has a duty now, in the maintenance of peace in the world, to change its attitude toward colonialism, and to recognize United Nations jurisdiction over those areas of high tension in the world, so that peace can be maintained.

Mr. President, I thank my God that at long last the United States has taken a position in the United Nations in support of the principle of self-determination, of which we have boasted throughout our glorious history, but on which we have turned our backs in the United Nations during the last 8 years of administration in this country.

Mr. LAUSCHE. Mr. President, I feel certain the Senator from Oregon will agree with me that while we are calling upon the United Kingdom, France, and other nations among our allies to give consideration to the liberation of colonies, it would be a rank travesty if we forgot to call upon the Soviet Union to liberate the captive nations of Europe and the people who live within the borders of the Soviet Union.

Everyone knows there are captive nations in Europe which are subject to the domination of the Soviet Union. Everyone knows that there are people within the boundaries of the Union of Socialist Soviet Republics who are dominated by the Soviet Government. They are an indigenous population; they are subject to exploitation.

The Hungarians, of whom I spoke yesterday, and who yesterday were celebrating their 113th anniversary of independence, also fall in that category.

Moreover, I should say that we would be remiss unless we recognized the fact that the United Kingdom has followed a course under which 16 nations have been given independence since 1945, and that France has given independence to 15 nations.

I join with the Senator from Oregon in the hope that a transition will take place. I am sure the Senator from Oregon, likewise, will agree with me that independence simply cannot be granted. Belgium granted independence to the Congo when more properly a trusteeship should have been established. All these questions must be explored before a course can be followed.

Mr. MORSE. Mr. President, will the Senator from Ohio yield?

Mr. LAUSCHE. I am glad to yield.

Mr. KUCHEL. Mr. President, reserving the right to object—and I shall not object—there has been somewhat of an agreement reached by the leadership on both sides of the aisle that the morning hour will be confined to morning hour business. Having said that, I have no objection.

Mr. MORSE. Mr. President, I desire to tell the distinguished Senator from Ohio that in a speech I made in behalf of my Government at the United Nations last year, I deplored the shocking colonialism of the Soviet Union in Hungary. I put the Soviet Union in the same class with Portugal, France, Spain, the Union of South Africa, and Belgium so far as the domination and subjugation of indigenous people are concerned.

I am proud to report to the Senate, as I did in the official report I filed with the Senate, that as a result of the position we took in my speech in the United Nations against the colonialism of the Soviet Union, with particular reference to Hungary, we received the highest majority vote the United States received on any issue last fall in the United Nations.

In passing, I wish to say this about what my friend said about the gradualism of getting into the matter of independence: No one is proposing that independence be obtained overnight. But we propose that countries be prepared for independence That is why I have urged, in the Foreign Relations Committee, that we increase the number of United Nations trusteeships before independence is granted.

But we cannot excuse the complete failure of the Belgians to prepare the Congolese for independence. The record of Belgium in the Congo is a shocking one; and the record of Belgium in Ruanda-Urundi, which will be the next hotspot in Africa, is a shocking record of failure to live up to responsibilities to indigenous people.

That is why I want the United Nations to exercise close control over areas in Africa to which independence has not been granted.

But I cannot escape recognition of the fact that, as regards colonialism, the policy of the United Kingdom is one which has been favorable to the British exchequer; and those who eventually received their independence received it from the British Crown long after it was due; and the maintenance of the British Crown over them for decades was to the economic advantage of the British Crown.

But after saying that, I pay my high respects for the training of the indigenous populations that the British have followed as a matter of national policy, so that when independence was granted, there would be among the indigenous population, leaders who could take over the administration of government.

France and Belgium, on the other hand, have done an exceedingly poor job in that respect, as have Portugal and the other countries which should proceed to give support to the United States on the issue of United Nations trusteeship for indigenous people, rather than oppose the United States on that issue.

Mr. HUMPHREY. Mr. President, I shall have to request the regular order at this time.

Mr. GRUENING. Mr. President, I dislike to find myself in disagreement with my good friend, the Senator from Oregon [Mr. MORSE], with whose enlightened views on most subjects I agree and which I thoroughly applaud.

But in his recent statement on the United Kingdom, I think he has been a little harsh.

I believe that on the contrary, the United Kingdom has adopted a very enlightened policy toward its former colonies. It has liberated them, given independence to India, Ceylon, Malaya, the West Indies Federation, Nigeria, Ghana, and is in the process of liberating others, after giving them an admirable tutelage in government as a preparation for self-rule.

In that connection, I may say that at the present time Australia, part of the British Commonwealth, is making plans to give independence to Western Samoa.

So the question of colonialism is not so simple.

I may say that once I occupied a uniquely favorable position to become aware of the multiple aspects of colonialism, in that I was the head of the U.S. agency which had supervision of our Federal relations with the then Territories of Alaska and Hawaii, of Puerto Rico, the Virgin Islands, and for a time, the Philippines. Certainly the United States was slow in elevating some of those areas to the status in which they belong.

I am frank to state that the Senator from Oregon was an early champion of the course the United States somewhat belatedly followed. But in this instance, I feel he has been unduly harsh on our good friends, the British. I believe the British have done very well, and have set a fine example to other colonial powers.

As we look throughout the world, I think we can understand why "colonialism" has become a bad word, but colonialism, properly conducted, is very important in training peoples for independence. We see the tragic effects of ending colonialism before the former colonials are ready. The Congo is a striking example, and there are others. I do not see how the United Kingdom can be held responsible for Portugal's continuing colonialism and alleged misdeeds, to which the Senator from Oregon has referred.

Mr. MORSE. Mr. President, will the Senator from Alaska yield?

Mr. GRUENING. I yield.

Mr. MORSE. Does the Senator from Alaska approve of the votes of the United Kingdom cast in the United Nations on the colonialism issue?

Mr. GRUENING. Not all of them, no.

Mr. MORSE. Does the Senator from Alaska approve of any of them? If so, I wish he would name one.

In the United Nations the United Kingdom voted in line with the position which has been taken by Portugal, Belgium, France and the Union of South Africa.

Mr. GRUENING. I think if we set our own house in order, we shall be in a better position to criticize others. For many years we, ourselves, were living in a glass house. We are now getting out of it, and we should forbear to throw stones.

Mr. LAUSCHE. Mr. President, I ask unanimous consent that I be permitted to make a statement on this subject. I cannot remain silent and seemingly give acquiescence to the denunciation which has been made of our allies.

The PRESIDING OFFICER. Let the Chair state that, according to the understanding of the Chair, under the unanimous-consent agreement, statements in the morning hour are limited to 3 minutes. Until morning business is concluded, a Senator who is recognized is entitled to speak for not more than 3 minutes, although subsequently he can be recognized for a second time or for a third time.

At this time the Senator from Ohio is recognized for 3 minutes.

Mr. LAUSCHE. Mr. President, I recognize that when the first shot of the Revolution was fired in our country, it sounded throughout the world as a signal for free people to seek independence; and I recognize the yearning of people.

But I also recognize that our historic friends have been the French, the British, the Belgians, and the Netherlands, and I think they have tried to do a decent job. I certainly cannot put them in the same category with Communist Russia; if I were to attempt to put them in the same category with Communist Russia, I would have to twist my mind and make an artificial grouping. So I cannot stand idly by and not state my position on that matter.

The PRESIDING OFFICER. Is there further morning business?

AMENDMENTS TO THE BACON-DAVIS ACT

Mr. KUCHEL. Mr. President, I am honored to join the distinguished majority whip, the Senator from Minnesota [Mr. HUMPHREY], in introducing legislation (S. 1360) to amend the Davis-Bacon Act.

Almost a third of a century ago, Congress wisely determined that where Federal tax dollars were to be used for construction, the prevailing wages of the area for the same class of labor on similar work in the locality should apply to that construction. Congress by this action sought to prevent cheap labor from being imported, and thus undercutting the employment opportunities available for local citizens.

I have long advocated this approach by the Federal Government and I am glad to recall that I helped, in 1956, to attain the adoption of an amendment to the multibillion-dollar 40,000-mile interstate highway program which applied the Davis-Bacon principle to that construction. In urging that amendment almost 5 years ago, I said that the application of the prevailing wage law meant to the people of my State:

> Our local working people will be given the statutory assurance by the Congress that, in working on a public construction job, they would have the same level of income or salary which they would have if they are working in similar enterprises in that locality. It also means that the local contractor who had local people working for him would not be subject to the hazard that some contractor from another part of the country might underbid him on the basis that he could import cheap labor into that area and could underbid the local contractor, and depress the local economy.

When the Davis-Bacon Act became law in 1931, almost all of our wage-earning population worked solely for wages. As we all know, the tendency, especially in the postwar period, under our collective bargaining system is not merely to negotiate for wage increases but also for such fringe benefits as welfare and pension funds. These funds provide special benefits for hospitalization, sickness, accident, and disability insurance as well as supplementary unemployment compensation, life insurance, and apprenticeship and training programs. This growing trend began during the Second World War when there was a freeze on wages and increases were permitted only for the so-called "fringes." They are now a basic fact of our industrial life agreed upon at the bargaining table.

When these plans began, 10 cents per hour per man as an employer contribution was uncommon. Now, over 15 years later, it is not out of the ordinary for employers to contribute as much as 25 cents per hour per man to these welfare and pension funds. Indeed, in some parts of the construction industry, these payments are now almost 50 cents per hour per man. Thus, a substantial part of employee earnings consist of these benefits, whether employer or employee provided.

In the construction industry alone, there are over 4,800 welfare and pension funds. Most of these are of the welfare variety and almost 2,200 of the 4,800 are based solely on employer contributions. Another one-third of these plans is built up by joint contributions by both employer and employee. Almost 700 are dependent on employee contributions alone. Still others are based on a sharing arrangement with general union funds and employer contributions.

The U.S. Department of Labor estimates that almost 70 percent of the workers in the building and construction industry are covered by negotiated contracts which provide for some welfare and pension benefits. Yet, under the present interpretation of the Davis-Bacon law, these benefits which in most cases come to over one-tenth of a worker's hourly earnings are not considered in determining the prevailing wage. This means that contractors who do not have such programs for their employees can come into an area and, with their cost of labor greatly reduced, successfully underbid already established firms which do provide such benefits. This is unfair and unreasonable. Such a situation was the reason for the original passage of the Davis-Bacon Act. It is the reason why Congress on several occasions has applied the provisions of this worthwhile legislation to succeeding Federal construction programs, such as airports, housing, and highways.

The amendment to the Davis-Bacon Act which I have jointly coauthored would rectify this inequity by requiring the Secretary of Labor to take into account in his determination of the prevailing wage the contractor payments to health and welfare, retirement, and apprenticeship funds. Mr. President, I think it is imperative that this Congress bring the Davis-Bacon provisions into conformity with the practices of modern labor-management relations.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. KUCHEL. I yield to my distinguished colleague and friend.

Mr. HUMPHREY. I consider it a rare privilege to work on the legislation with the Senator from California. We have joined together before in an effort to improve the Bacon-Davis Act. We are

going to do everything we can this time to bring about prompt action by the Congress.

The amendments which we have suggested are amendments which have met with the approval of experts in labor-management relations; and I am confident they will be of benefit to the country.

I thank the Senator from California for his leadership on the other side of the aisle. I only hope I may do as well on this side of the aisle.

CHANNEL ISLANDS A HISTORIC NAME

Mr. KUCHEL. Mr. President, from time to time it is, I support, desirable, and, on occasion, necessary to break with the past and to change practices and habits, in the interest of making progress.

But, as a Californian, I vigorously object to any willy-nilly, off-with-the-old-on-with-the-new concept of discarding honored and long standing names by which areas in our State have been known over many, many generations.

Each State and each nation, all around the globe, take great pride in their heritage. Historical sites are carefully marked. With reverence do they observe the symbols of the past which live on. With pride do they seek to preserve them. Descendants of pioneers, and newcomers too, respect the shrines which tie today with yesterday. It would be, I think, a desecration to change the names by which they have ever been known.

California has done honor to fearless explorers, to the intrepid Spanish priests who trod our soil before the United States was born, and who left behind them the treasured missions which grace our State. We have honored early traders and business entrepreneurs, the discoverers of gold, and many others of other eras.

Across the channel from the beautiful city of Santa Barbara are the equally beautiful Channel Islands. By that name they have been known for centuries.

Now, regrettably some propose to change the name of the Channel Islands. Some now assert that the chain should be renamed for Juan Rodriguez Cabrillo.

Mr. President, they are wrong. A few weeks ago a distinguished Californian, a true lover of our State's history, the publisher of one of our most respected newspapers, a former able U.S. Senator from our State, spoke out against such a tampering with history. Former Senator Thomas M. Storke published, a few weeks ago, in the Santa Barbara News-Press, an editorial in which it was stated:

> The Channel Islands have borne their name since 1603, when Sebastian Vizcaino sailed through the wild passage which he called the Santa Barbara Channel in honor of the saint's day, December 4. There is no good reason now, any more than there was 3 years ago, to abandon more than 350 years of usage to accommodate an individual's whim.

Mr. President, I agree. We ought to devote our time to better things than attempts to change the names by which historic areas in California—or anywhere else, for that matter—for centuries have been known.

THE POSTAL SERVICE

Mr. CARLSON. Mr. President, as the ranking Republican member of the Senate Post Office and Civil Service Committee, I was much interested in the remarks on the postal service made March 7 by my distinguished colleague, the senior Senator from South Carolina [Mr. JOHNSTON], chairman of the Post Office and Civil Service Committee.

I was not only interested, but more than a little surprised, that former Postmaster General Summerfield was accused, in this speech, of throwing tinsel into the eyes of Congress. This, to me, seems a downgrading of Congress, for surely there must be some discerning members of the majority Democratic Party who would not be bedazzled by the tinsel, if tinsel there were.

My distinguished colleague refers also to what he termed a snow job having been perpetrated on Congress and the people by the former Postmaster General. I am wondering if he is not being confused by the record snow which buried so much of the eastern seaboard this past winter. Having been through this, especially the night before the recent inaugural, perhaps he thought that the Postmaster General was in some way to blame.

Of course, Mr. President, we in Kansas are accustomed to some mighty snowstorms, and I believe we can recognize a snow job if we see one. It is my personal belief that the snow job is the one that is being done now.

OBJECTIVES

Mr. President, our friend, the senior Senator from South Carolina, quotes President Eisenhower on the objectives he laid down to the Postmaster General when he assumed office. There were three objectives or goals set up by Mr. Eisenhower to the Postmaster General. I quote them:

> First, give the American people the kind of postal service they must have in a growing economy.
>
> Second, reduce the postal deficit through economies and application of modern management techniques.
>
> Third, persuade the Congress to complete the job of balancing the postal deficit by relieving the Department of subsidy burdens, by reimbursing us for charges for services to other agencies, and by adjusting postal rates to offset postal costs.

Let me call particular attention, Mr. President, to that third point:

> Persuade the Congress to complete the job of balancing the postal deficit by relieving the Department of subsidy burdens, by reimbursing us for charges to other agencies, and by adjusting postal rates to offset postal costs.

Mr. President, postal deficits are not something new. They will not end overnight. Nothing can or will happen unless Congress takes some action. I will be very much interested to see what this Democratic administration will recommend and what action will be taken by the Democratic majority in each House to rectify this longstanding problem.

TREMENDOUS OPERATION

The Post Office Department has a tremendous job. It handles more mail than all of the rest of the world combined.

In 1960, 64 billion pieces of mail flowed through some 41,000 postal facilities servicing practically every home and remote farm in our Nation.

When the Republican administration came into power in 1953, postal employees handled the mail in much the same fashion as when the Department was set up 185 years ago by Benjamin Franklin.

In 1953, the Department was handling 50 billion pieces of mail through its 41,000 postal installations, manned by some 520,000 employees. The total value of transactions amounted to $18 billion a year. The Department was limping along with its old-fashioned methods. Mechanization, as we know it in modern industrial processing plants, had not been applied to mail handling.

MODERNIZATION INSTALLED

Mr. President, my distinguished colleague, the senior Senator from South Carolina, had much to say about Operation Turnkey, an experiment in modern mechanized methods.

Would he, I ask, fail to install experimental modern methods? Would he, instead, keep on with the same old outmoded methods which found mail sorted on sidewalks and in alleys? Or would he try to speed operations by installing more modern methods which, when perfected, would not only give better service but save manpower and expenses?

Knowing him as I do, and working with him on postal problems, I know he is forward looking, and therefore will approve of more modern methods of operation.

As we must experiment with our various rockets and satellites until a perfect system is worked out, so, too, we must experiment with new postal machinery until the operation is a success.

I was much interested to read recently that the postal employees themselves believe in Operation Turnkey and are sure of its success. I may add that, when it is operating perfectly, as it will, this perfection will take place under the present Democratic administration, and they, no doubt, will then take credit for this improvement.

OTHER SUCCESSFUL INNOVATIONS

Mr. President, after 20 years of Democratic administrations, we found, in 1953, the Department's accounting system archaic. Many statements and reports essential to good management did not exist.

Mr. President, under the Eisenhower administration, public accountants were employed in financial operations for the first time. Centralized accounting functions were set up to permit preparation of payrolls, settlement of claims, and similar operations. The accounts are now on an accrual basis and up to date. Employees receive their paychecks on

time and in the right amounts. Payments to transportation companies and other suppliers are on a current basis. There are complete financial reports a few days after the end of each period.

And those are facts that can be verified—not a snow job.

MODERN PERSONNEL SYSTEM INSTALLED

The personnel system when the Republican administration took over was in a mess. Personnel costs currently absorb more than 80 percent of the Post Office Department budget.

In some cases, supervisors were paid less than their workers. There was no system for equating pay with responsibility. With the establishment of a Bureau of Personnel in 1953, it was possible to adopt a classification and compensation system which assured pay commensurate with responsibility.

The Bureau, as it is now constituted, creates employee training programs, safety education, the review of grievance appeals, and is making awards to employees for valuable suggestions for improving the service.

PHYSICAL PROPERTIES

Post offices, by 1953, had become generally too small to handle the mails. Mail had to be loaded and unloaded on sidewalks and other unprotected areas.

To correct these conditions, commercial leasing techniques were adopted. Through the leasing of new post office structures, built and owned by private capital, more than 5,600 new buildings were provided.

Better working conditions were provided and large new structures were designed for mail handling of the future—which will be by machines in one- or two-floor air-conditioned structures located away from the congested city areas, providing ample room for trucks to load and unload without causing, or suffering from, city traffic jams.

There are now electronic sorters on the production line of some post offices. Large conveyor systems are installed in about a dozen large facilities. Cullers are in operation. Some 75 high speed facer cancelers are being installed. The electronic reading and automatic coding of addresses is far advanced.

Mr. President, these are modern innovations which not only speed up postal operations, but save many man-hours of backbreaking work.

Decentralization of management, recommended by the Penrose-Overstreet Commission as long ago as 1909, and again in 1949 by the Hoover Commission, has been completed. This has contributed greatly to the efficient operation of the postal system.

Among other improvements is the airlifting of preferential mail by the Nation's commercial scheduled airlines on a space-available basis. Delivery of 2 billion pieces of mail each year is now advanced from 24 to 48 hours by this means. This, I may point out, was accomplished with no increase in cost to the Post Office Department.

Carrier service has been expanded to accommodate the 9,300,000 families who have made up the suburban growth around our cities, and carrier service was established in 1,000 new communities. In addition, some 900,000 additional business firms now have carrier service.

OTHER NEW SERVICES

Among other new services, there were added to the rural delivery 1,400,000 farm families along the more sparsely settled routes who had not heretofore enjoyed mail delivery to their homes.

Hours of mail window service in the post offices have been tailored to meet local requirements.

Certified mail was established to provide for a certified delivery service for mail of no intrinsic value at less costly rates than had been required for registered mail.

Combination mail now makes it possible to send related messages in the parcel post package.

The process of buying a money order has been made easier and quicker, and a new money order form has substantially reduced the possibility of fraud against our people and against the Government.

Stamp vending machines eliminate waiting lines and supply after-hour service.

Specialized campaigns have been made against mail frauds, thievery, and other offenses against postal laws. Arrests and convictions for these offenses in 1960 were 50 percent more numerous than in 1953.

The Post Office Department sought and obtained stronger laws to cope with the problem of obscenity through the mails, with the result that there were 130 percent more arrests and convictions for this offense in 1960 than in 1953.

During the past 8 years, the Department increased its participation in the activities of the Universal Postal Union, and the Postmaster General was designated as Chairman of the important Consultative Committee on Postal Studies of the Universal Postal Commission. The Department also participated in the activities of the Postal Union of the Americas and Spain. Through all these activities there was an increasing understanding and good will through the interchange of ideas between the postal services of all nations.

DEFICIT: MAJOR TASK

One of the major tasks and major objectives of the Postmaster General was to eliminate the postal deficit.

When the postal service was first established, and for the first 30 years of its operation, the Department enjoyed a 15 percent profit, and, since its beginning through World War II, the average annual loss amounted to less than $30 million.

Since 1946, the average annual loss increased to $556 million.

In 1952, the last fiscal year of the previous Democratic administration, the postal deficit was $720 million. Actions requested by the Post Office Department, which Congress approved, established reimbursement to the Department for free service rendered other Government agencies and removed airline subsidies as an element of postal costs. These actions, together with other major economies, reduced the annual deficit to a low point of $363 million by the end of fiscal year 1955.

Through operating efficiencies, 28 percent more mail was handled, with an increase of only 13 percent in man-hours.

Rates were raised for postal services in those areas where there was administrative authority to do so, producing $300 million in additional revenues annually. In 1958, Congress granted general rate increases to the extent of $600 million annually.

These increases, however, have not kept pace with the increases in costs, such as the pay increases and employee fringe benefits, totaling $900 million annually, and the railroad rate increases of more than $100 million annually.

Those, Mr. President, are the facts, easily verified.

The only "snow" is that of continuing deficits which have snowed under other Postmaster Generals ever since World War II. The only tinsel here is the tarnished tinsel of unfounded criticism.

Mr. President, the distinguished chairman of the Post Office and Civil Service Committee, at the conclusion of his statement on March 7, also stated that he expected to introduce legislation in the near future which would require that all appointments in the Post Office Department to positions, the pay of which is $10,000 or more, be submitted to the U.S. Senate for confirmation.

This would be a violation of what I believe to be the basis of our civil service system and the opening of the old political spoils system.

Our Nation has for years been building a merit system for our Federal employees, and it is essential that it be kept without regard to politics.

I can assure the chairman and our Federal employees, if and when this matter is up for consideration, I shall oppose it with all the vigor at my command.

THE B–70 STATUS REPORT

Mr. GOLDWATER. Mr. President, the President's assurance that he would develop modern weapons came happily to the ears of us who have heard that he might yield to the urgings of those who see no future for the manned aircraft. The B–70 is the only really new weapon now being developed by our country. I refer to it as the only one because of its new concept of design, speed, and carrying capacity. Added to these highly desirable features we add the ultimate one—the human brain. Black boxes, computers, transistors, and guidance systems all have their place, but for the maximum in the use of today's firepower man can best make the determinations which will bring success to the mission.

A lot has been said of the B–70, but I doubt that my colleagues realize the immensity of this project or the amount of planning, man-hours, and money which have gone into it. I have had compiled for me information which I feel will be of interest to my fellow Senators and I ask that this be printed at this point in my remarks.

There being no objection, the information was ordered to be printed in the RECORD, as follows:

SYNOPSIS OF B–70 STATUS REPORT

The B–70 is a mach 3 intercontinental bomber capable of flying four times faster and two times higher than the B–52, which it will replace as the principal U.S. manned air weapon.

The research and development program for the B–70 bomber was commenced in 1955, when study contracts were awarded to North American and Boeing for design of the weapons systems and to International Business Machines for design and development of the bombing-navigation system. A contract was also awarded to General Electric for engine development.

In December 1957, North American was designated the prime contractor for the weapons systems and awarded a development contract. During the next 2 years—up to the time the B–70 program was redirected to a single prototype program—the following program was accomplished:

1. The objectives of the program (a mach 3 bomber force capable of intercontinental missions without refueling) were established, and the effort necessary to achieve them was defined and scheduled.

2. The industry team had been selected and the subcontractors were operating under definitive or letter contracts (for list, please see app. A). Many of the second- and third-tier suppliers had been selected.

3. Conceptual design of the complete weapon system, including airframe, engine, and subsystems, was finished and the mock-up board review had taken place.

4. The major engineering problems affecting the feasibility of the B–70 as a mach 3-cruising intercontinental strategic bomber had been solved to the satisfaction of the Air Force. While more engineering work remained, no inventions were required.

5. Nine test engines had been fabricated and had accumulated more than 1,000 hours of test stand operation.

6. A manufacturing development program for the required steel airframe structures was well advanced. New techniques had been developed in the essential areas of brazing and welding stainless steel, and test panels had been manufactured.

7. New principles had been developed in all the subsystems where required, and applications were in various stages of fabrication and test.

8. Detailed design of the airframe and most subsystems was underway, release of engineering drawings for the airframe had been started, and fabrication of tooling had commenced for the manufacture of test parts and components.

From the beginning of the B–70 design competition to the redirection of the program on December 1, 1959, an accumulative total of $334,800,000 was spent on the B–70. This figure includes funds spent by North American and its subcontractors, by Boeing Airplane Co. during the design competition phase up to December 1957 and by General Electric for development of the engine. It also includes the amount spent by International Business Machines Corp. on development of the bombing-navigation subsystem prior to its being made a subcontractor to North American during the 1958 Air Force fiscal year. Up to that time IBM held a contract directly with the Air Force.

A summary of the annual funding and expenditures under the B–70 program through the 1960 fiscal year is shown in the following table:

B–70 funding and expenditures through 1960 Government fiscal year

[In thousands of dollars]

Government fiscal year	1956	1957	1958	1959	1960	Cumulative total through 1960 fiscal year
Appropriated by Congress or otherwise made available to program	12,500	48,500	70,500	236,300	150,000	517,800
Funded by U.S. Air Force	9,500	29,600	64,200	214,100	183,400	500,800
Expended by contractors	7,900	27,400	41,600	153,700	208,700	[1] 439,300

[1] Cumulative contractors expenditures through Nov. 30, 1959, totaled $334,800,000, including $195,800,000 spent by North American and its subcontractors, $96,700,000 by General Electric, and $42,300,000 by International Business Machines and Boeing under direct contracts with the Air Force.

Thus the development of the B–70 weapon system was well underway and engineering drawing release for the air vehicles was just commencing, when the B–70 program was redirected to a single air vehicle XB–70 program in December 1959. The XB–70 is defined as a complete airframe with all subsystems necessary for flying and airworthiness testing, but without those subsystems necessary for a bombing weapon system. All major air vehicle subsystem programs were reoriented to the XB–70 requirements, and the military subsystems were canceled. However, under an Air Force contract, IBM continued to carry on development of the bombing-navigation system at a reduced rate.

The effort under the redirected (XB–70) program may be summarized as follows:

1. The objective was changed to that of providing (within the greatly reduced funding) a single prototype air vehicle capable of mach 3 cruise, but without those subsystems necessary for a bombing weapon system. The programing and scheduling were revised accordingly, and the first flight date was slipped approximately 1 year.

2. The subcontract team previously built up prior to redirection was substantially changed; some contracts were canceled, while others were narrowed in scope (for details, please see app. B).

3. Developmental effort on the airframe structure continued.

4. Because the military requirement had been deleted, many of the related airframe subsystems and components were greatly reduced in performance and scope and Government-furnished equipment was substituted where feasible. For example, the environmental control system was cut down and altered because it was no longer required to air-condition the military electronic equipment.

5. Development of the engine and the bombing-navigation system continued at reduced levels under direct Air Force contracts with General Electric and IBM.

6. The other military subsystems (defensive and mission and traffic control) were canceled.

7. In September 1960, when the B–70 was reinstated as a full weapon system being developed for operational use, total release of engineering drawings for manufacture of the prototype airframe was approaching completion (date of completion, December 2, 1960).

During the period December 1, 1959, to October 1, 1960, the program contractors spent $145,800,000. This includes the costs of terminating contracts and redirecting the effort on the subcontracts affected.

From the beginning of design competition in the 1956 fiscal year to the reinstatement of the weapon system program, the cumulative expenditures by the contractors on the B–70 program totaled $480,600,000.

Additional funding and expenditures under the B–70 program for the 1961 fiscal year are shown in the following table:

B–70 funding and expenditures through 1961 Government fiscal year

[In thousands of dollars]

Government fiscal year	Cumulative through 1960 fiscal year	1961	Cumulative total through 1961 fiscal year
Appropriated by Congress or otherwise made available to program	517,800	[1] 265,000	782,800
Funded by U.S. Air Force	500,800	[2] 265,000	765,800
Expended by contractors	439,300	[3] 270,500	[4] 709,800

[1] Does not include an additional $100,000,000 earmarked for fighter aircraft which, if not used for that purpose, was to be available for the B–70.

[2] Of the amount funded by the Air Force in 1961, $209,000,000 is to North American and its subcontractors, and the remainder is to associate contractors.

[3] Expenditures by contractors in 1961 will exceed the amount funded by the Air Force in 1961 because of unliquidated commitments made in prior years.

[4] Contractors expenditures for the restricted (XB–70) period Dec. 1, 1959–Oct. 1, 1960, totaled $145,800,000. This amount includes $87,900,000 spent by North American and its subcontractors, $48,100,000 spent by General Electric, and $9,800,000 spent by International Business Machines under direct Air Force contract. Cumulative contractor expenditures from beginning of design competition in the 1956 fiscal year to Oct. 1, 1960, totaled $480,600,000.

On September 13, 1960, the B–70 was reinstated to full weapon system development status when the Air Force ordered North American to proceed with scheduling for the design, development, fabrication, and test of a number of aircraft, including development of the major systems needed for an operational mach 3 bomber. On October 31, additional funds were made available for this reinstated program by the Department of Defense. At the time of reinstatement, the B–70 development program involved the following effort to completion:

1. Manufacture and flight test of one XB–70 test vehicle, minus military subsystems and with GFE in place of most airframe subsystems.

2. Completion of development work on the subsystems (both airframe and military) for the YB–70 (comparable to the full B–70 weapon system).

3. Manufacture and flight test of a number of YB–70's. Subsequently these are to be retrofitted to combat aircraft.

4. Supply of spare parts and service, as required to support the contractor and Air Force flight-test programs.

With the reinstatement of the B–70 program to full weapon system development status, it was decided to return, with few exceptions, to the major subsystem subcontractors chosen before the 1959 redirection. The current subcontractors are listed in appendix C.

Release of engineering drawings for the manufacture of the prototype airframe was completed on December 2, 1960.

On December 9, 1960, a schedule for the reinstated B–70 weapon system program was agreed upon and designated the W–27R schedule. It called for the first flight date of the XB–70 prototype in late 1962, and first flight of the initial YB–70 air vehicle with full military equipment a few months later. Owing to unforeseen technical problems and to necessary and desirable changes in specifications (chiefly in the XB–70 work), the program required a total of $45 million in additional funds. Due to budget limitations the Air Force directed that this

amount be drawn from the YB–70 program. Consequently, a revised W–27R schedule was agreed upon February 23, 1961, holding firm on the XB–70 schedule but slipping the YB–70 first flight date by 4 months.

Contractor expenditures for the remainder of the program (from the 1962 fiscal year through the 1967 fiscal year) are estimated at $1,847 million, according to the revised W–27R schedule dated Febraury 23, 1961. A breakdown of this amount, which covers one XB–70 and a number of YB–70's, is shown in the following table:

Government fiscal year:	*Expenditures plus commitments*
1962	[1] $586,700,000
1963	608,300,000
1964	382,700,000
1965	189,200,000
1966	63,700,000
1967	16,400,000
Total	1,847,000,000

[1] The Eisenhower administration's 1962 budget for the B–70 program is $354,000,000 or $232,700,000 below the estimated expenditures needed to maintain the revised W–27R schedule.

At the end of the Government's 1961 fiscal year, expenditures by contractors under the B–70 program will total $709,800,000. In addition to this amount, unliquidated commitments at the end of the Government's 1961 fiscal year are expected to total $56 million. Total contractor expenditures since the 1956 fiscal year, plus commitments, through the Government's 1961 fiscal year, will amount to $765,800,000, or the same amount funded by the Air Force through the same period.

Cost of the entire program from 1956 to 1967 would then total $2,612,800,000.

This programed effort is based on a plan of equipping Strategic Air Command units with additional operational B–70's, but this phase of the program is not yet scheduled.

APPENDIX A

SUBCONTRACTING PROGRAM AT TIME OF REDIRECTION, DECEMBER 1, 1959

Prior to redirection of the B–70 to a single prototype air vehicle status, major subcontracts had been awarded to the following companies:

Air induction control system: Hamilton Standard Division of United Aircraft Corp. (Connecticut).

Alert pod: Beech Aircraft Corp. (Kansas).

Automatic flight control system: Autonetics Division of North American (California).

Auxiliary gyro platform: Sperry Gyroscope Co. Division of Sperry Rand Corp. (New York).

Bombing-navigation and missile guidance system: Federal Systems division of International Business Machines Corp. (New York).

Central air data system: AiResearch Manufacturing Division of the Garrett Corp. (California).

Defensive system: Westinghouse Electric Corp. (Pennsylvania).

Engine extraction air ducting system: Solar Aircraft Co. (California).

Environmental control system: Hamilton Standard Division of United Aircraft Corp. (Connecticut).

Fuselage, upper intermediate: Lockheed Aircraft Corp. (Georgia).

Horizontal stabilizer: Chance Vought Aircraft, Inc. (Texas).

Landing gear system: Cleveland Pneumatic Industries, Inc. (Ohio).

Mission and traffic control system: Motorola, Inc. (Arizona).

Powerplant instrumentation system: John Oster Manufacturing Co. (Wisconsin).

Radome: Zenith Plastics (California).

Secondary power system: Sundstrand Aviation Division of Sundstrand Machine Tool Co. (Illinois).

Vertical stabilizer: Chance Vought Aircraft, Inc. (Texas).

Wing: Boeing Airplane Co. (Washington).

Of the work conducted in-house at North American's Los Angeles division, a large portion involved assembly, installation, and testing. The manufacture of certain critical air vehicle detail parts also was scheduled within the company's own plants, while other less critical parts were to be subcontracted to other companies. It has been estimated that nearly 10,000 companies would be involved in the complete B–70 program, including companies in all tiers of subcontracting.

APPENDIX B

SUBCONTRACTING PROGRAM UNDER PROTOTYPE XB–70 PROGRAM DECEMBER 1, 1959, TO SEPTEMBER 13, 1960

Redirection of the B–70 to a prototype program required considerable realining of the original subcontracting plan. Reduction in quantity from a number of test and operational vehicles down to a prototype, and simplification of the vehicle from a complete weapon system to a flight-test article, reduced the program to an estimated 12 percent of its former size. Under the prototype plan, the three military subsystems—bombing-navigation, defense, and mission and traffic control—were eliminated.

Upon notice of the redirection, airframe subcontracts with Boeing, Lockheed, and Chance Vought were terminated, and an interdivisional contract with the Columbus division of North American was ended. These steps were taken primarily because the more limited scope of the program, both in number of articles and simplification of subsystems, made it unnecessary to distribute the workload through subcontracting. Moreover, whereas the larger program had permitted the economical use of specialized subcontractor capabilities, the restricted program placed an undue premium on this factor and required a simpler administrative structure.

Certain other critical parts of the program were returned to North American in the interest of economy, and to permit close coordination during the prototype development period.

The effect on the subcontracting structure of redirecting the B–70 weapon system to a prototype air vehicle is outlined as follows:

Subcontracts terminated

Alert pod: Beech.
Bombing-navigation: IBM.
Auxiliary gyro platform: Sperry.
Defensive: Westinghouse.
Mission and traffic control: Motorola.
Central air data system: AiResearch.
Powerplant instrumentation: John Oster.
Radome: Zenith Plastics.
Fuselage, upper intermediate: Lockheed.
Horizontal and vertical stabilizer: Chance Vought.
Wing: Boeing.

Subcontracts redirected to XB–70 requirements

Air induction control: Hamilton Standard.
Automatic flight control: Autonetics.
Engine extraction air ducting: Solar.
Environmental control: Hamilton Standard.
Landing gear: Cleveland Pneumatic.
Secondary power: Sundstrand.

Subsystems deleted (subcontractors not selected)

Programer-comparator.
Takeoff monitor
Trainer-bombing, navigation.
Trainer-defense operator.
Trainer-flight simulator.

SUBCONTRACTING PROGRAM FROM SEPTEMBER 13, 1960

When the program was reinstated it was decided to return for the most part to the major subsystem contractors selected before the 1959 redirection of the weapon system to a prototype air vehicle. This was because of the subcontractors' familiarity with the technical aspects of the weapon system and its subsystem requirements, the communication lines and operating procedures established with them by North American, and, in many instances, the subsystem integration effort that had been established with other subcontractors.

Moreover, considerable effort had been expended on the original selection of subcontractors. By returning, by and large, to the same subcontractors, this earlier work was utilized without adding undue risk to the YB–70 delivery schedule. Furthermore, maximum advantage is taken of the dollars already spent on the subsystem programs, and the industry is saved the additional cost of preparing new bid proposals.

To assure that this was the best course, most of the original subcontractors were surveyed late in 1960 to determine whether or not they still had the capacity and facilities in terms of space, equipment, and personnel, and whether they had maintained their technical position in the industry.

Since reinstatement of the B–70 to a full weapons system development status, major subcontracts have been awarded to the following companies:

Air induction control system: Hamilton Standard Division of United Aircraft Corp. (Windsor Locks, Conn.).

Alert pod: Beech Aircraft Corp. (Wichita, Kans.).

Automatic flight control system: Autonetics Division of North American (Downey, Calif.).

Auxiliary gyro platform: Sperry Gyroscope Co. division of Sperry Rand Corp. (Great Neck, N.Y.).

Bombing-navigation and missile guidance system: Federal Systems Division of International Business Machines Corp. (Owega, N.Y.).

Central air data system: AiResearch Manufacturing Division of the Garrett Corp. (Los Angeles, Calif.).

Defensive system: Westinghouse Electric Corp. (Baltimore, Md.).

Elevons: Rohr Aircraft Corp. (Chula Vista, Calif.).

Engine extraction air ducting system: Solar Aircraft Co. (San Diego, Calif.).

Environmental control system: Hamilton Standard Division of United Aircraft Corp. (Windsor Locks, Conn.).

Fuselage, aft upper: Avco Corp. (Nashville, Tenn.).

Fuselage, upper intermediate: Lockheed Aircraft Corp. (Marietta, Ga.).

Horizontal stabilizer: Chance Vought Aircraft, Inc. (Dallas, Tex.).

Landing gear system: Cleveland Pneumatic Industries, Inc. (Cleveland, Ohio).

Main wing box: Convair Division of General Dynamics Corp. (Fort Worth, Tex.).

Mission and traffic control system: Motorola, Inc. (Phoenix, Ariz.).

Secondary power system: Sundstrand Aviation Division of Sundstrand Machine Tool Co. (Rockford, Ill.).

Vertical stabilizer: Chance Vought Aircraft, Inc. (Dallas, Tex.).

Wing leading edges: Rohr Aircraft Corp. (Chula Vista, Calif.).

Wing box structures: Aeronca Manufacturing Corp. (Middletown, Ohio).

Wing fold actuator: Curtiss-Wright Corp. (Caldwell, N.J.).

General Electric of Evendale, Ohio, is associate contractor on the B–70 program, providing the J–93 engines.

Due to funding restrictions, both existing and proposed, the B–70 faces the possibility

of a schedule slippage totaling 26 months. This possible slippage is divided into two parts—the first (4 months) caused by existing fund limitations in the 1961 fiscal year, and the second (22 months) resulting from a proposed budget reduction in the 1962 fiscal year.

Fiscal year 1961

The revised W–27R schedule dated February 23, 1961, is now in effect. While it holds firm on the XB–70 flight date of late 1962, it slips all elements of the YB–70 schedule by 4 months.

The decision to make this revision was precipitated by a cost increase of approximately $45 million in the program—nearly all of it in the current XB–70 program. Nearly $30 million of this amount is a cost overrun on the 2-year contract beginning August 1, 1959. This overrun is due to unforeseen technical problems involved in developing new materials and components of unprecedented performance for use in extreme and unfamiliar environments, and represents 15.5 percent of the current XB–70 contract value. B–70 contracts preceding the present contract showed either underruns or considerably smaller overruns. Most of the remaining $15 million increase is the result of desirable and necessary engineering changes in the XB–70 specifications or requirements, made by agreement between the Air Force and the contractor.

Due to fiscal restrictions, the Air Force directed that the additional funds required should be drawn from the YB–70 funds. This means a 4-month schedule slippage for the YB–70 aircraft.

Although this new schedule has been put into effect, if the needed funds were made available now to relieve the draft on the YB–70 funds, something less than 3 months of the slippage could be recovered. Funds for this purpose are available in the additional $100 million allowed by Congress for the B–70 program if not used in the fighter program (and they were not so used).

Fiscal year 1962

A far more drastic slippage is implicit in the B–70 budget proposed by the Eisenhower administration for the 1962 fiscal year. This figure is $354 million, or $232,700,000 less than the $586,700,000 expenditures estimated as necessary to maintain the revised W–27R schedule. This means a slippage of 22 additional months. The slippage may be prevented by a 1962 appropriation large enough to support the $586,700,000 expenditures needed to maintain scheduled progress.

According to Air Force testimony before Congress early in 1960, the B–52 will become obsolete, even with all additional improvements, at any time in the mid-1960's, and the B–70 is planned to replace the B–52. Redirection of the B–70 to a single prototype program in the period from December 1959 to September 1960 caused a schedule slippage of approximately 1 year. A 26-month additional delay caused by the funding limitations now facing the B–70 in 1961 and 1962 would create a bomber gap of as much as 3 years.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

ORDER OF BUSINESS

Mr. HUMPHREY. Mr. President, I shall suggest the absence of a quorum, but before I do so, I wish to state that following the quorum call, instead of asking the Chair to lay before the Senate the temporary unemployment compensation measure, the Senator from Ohio [Mr. LAUSCHE] will address himself to one of the treaties. I thought I would let our colleagues know.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACT OF 1961

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 66, H.R. 4806.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 4806) to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill which was reported from the Committee on Finance, with amendments, on page 4, after line 20, to strike out:

REIMBURSEMENT

SEC. 4. The United States shall reimburse any State, with which an agreement has been entered into under section 7 which includes the provisions specified in subsection (a)(2) thereof, for any State unemployment compensation paid by it to an individual with respect to a week of unemployment beginning in the covered period specified in section 6, to the extent that the sum of such payment, plus the State unemployment compensation paid by such State for prior weeks of unemployment in the compensation period and not reimbursed under this section, exceeds 26 times the weekly benefit amount (including allowances for dependents) for total unemployment which was payable to such individual pursuant to State law or title XV in such compensation period.

On page 5, at the beginning of line 13, to change the section number from "5" to "4"; in line 14, after the word "any", to strike out "individual, plus the State unemployment compensation paid to such individual with respect to which any State is entitled to reimbursement under this Act (or would be entitled to such reimbursement but for the fact that such compensation is paid under title XV), shall" and insert "individual shall"; on page 6, line 5, after the word "compensation", to strike out "(and reimbursement of State unemployment compensation)"; after line 15, to strike out:

(1) The term "first compensation period" means—

(A) in the case of any individual whose first claim under this Act is for a week of unemployment before his first reimbursement week, the compensation period in which he last exhausted his rights to State unemployment compensation before making such first claim, or

(B) in the case of any other individual, the compensation period in which his first reimbursement week occurs.

(2) In the case of any individual, the term "first reimbursement week" means the first week with respect to which any State is entitled to reimbursement under section 4 (or would be entitled to such reimbursement but for the fact that the compensation was paid under title XV).

And, in lieu thereof, to insert:

(1) The term "first compensation period" means the compensation period in which an individual last exhausted his rights to State unemployment compensation before making his first claim under this Act.

On page 7, at the beginning of line 11, to strike out "(3)" and insert "(2)"; at the beginning of line 17, to change the section number from "6" to "5"; in line 18, after the word "in", to strike out "sections 3 and 4" and insert "section 3"; in line 24, after the word "section", to strike out "7 or 8" and insert "6 or 7"; on page 8, line 7, after the word "section", to strike out "3, reimbursement was payable under section 4, or reimbursement would have been so payable but for the fact that the unemployment compensation was payable under title XV" and insert "3"; after line 12, to strike out:

SEC. 7. (a) The Secretary is authorized on behalf of the United States to enter into an agreement with a State, or with the agency administering the State law, which shall include the provisions described in paragraphs (1) and (2) or in either of them.

(1) Such State agency will make, as agent of the United States, payments of temporary extended unemployment compensation to the individuals referred to in section 3 on the basis provided in this Act, and will otherwise cooperate with the Secretary and with other State agencies in making payments of temporary extended unemployment compensation under this Act.

(2) The United States will reimburse the State for State unemployment compensation paid under the conditions specified in section 4.

And, in lieu thereof, to insert:

SEC. 6. (a) The Secretary is authorized on behalf of the United States to enter into an agreement with a State, or with the agency administering the State law, under which such State agency will make, as agent of the United States, payments of temporary extended unemployment compensation to the individuals referred to in section 3 on the basis provided in this Act, and will otherwise cooperate with the Secretary and with other State agencies in making payments of temporary extended unemployment compensation under this Act.

On page 9, line 14, after the word "be", to strike out "paid and reimbursement under section 4 shall be made," and insert "paid"; on page 10, after line 10, to insert:

LIMITATION ON PAYMENTS OF COMPENSATION TO INDIVIDUALS ENTITLED TO RETIREMENT BENEFITS

(e) Any such agreement shall provide that temporary extended unemployment compensation payable to an individual with respect to a week shall be reduced by the amount of the following payments received with respect to such week: (1) a primary insurance benefit under title II of the Social Security Act, (2) a retirement annuity (other than a survivor annuity) under the United States Civil Service Retirement Act of 1930, (3) any other retirement system

established by or pursuant to State or Federal law, if the employer contributes to such system, or (4) a retirement pension under a private retirement plan provided, or contributed to, by an employer. A payment for a period other than a week shall be prorated by weeks in accordance with regulations prescribed by the Secretary. Notwithstanding the foregoing provisions of this subsection, no reduction shall be made from the temporary extended unemployment compensation to which any individual is entitled if (1) the entitlement of such individual to any such insurance benefit, pension, annuity, or other retirement benefit is based on disability or (2)(i) such individual is at least 65 years of age and (ii) the benefit to which he is entitled is payable under laws administered by the Veterans' Administration and such pension is based on service performed by such individual.

On page 11, at the beginning of line 14, to change the section number from "8" to "7"; in line 18, after the word "section", to strike out "7" and insert "6"; on page 14, at the beginning of line 7, to strike out "7(d) and 8(c)" and insert "6(d) and 7(c)"; at the beginning of line 15, to change the section number from "10" to "9"; in line 18, after the word "Act", to insert "Such information shall include data (which may be procured on a sampling basis) relating to the personal characteristics, family situation, employment background, and experience under this Act of individuals found to be entitled to temporary extended unemployment compensation."; on page 15, at the beginning of line 3, to change the section number from "11" to "10"; in the same line, after "(a)", to strike out "(1) Except as provided in paragraph (2), there" and insert "There"; after line 15, to strike out:

(2) Any payments to a State pursuant to section 4 shall be by way of reimbursement, and shall be used only for the payment of cash benefits to individuals with respect to their unemployment, exclusive of expenses of administration.

On page 16, line 2, after the word "under", to strike out "paragraphs (1) and (2) of"; in line 6, after the word "account", to strike out "Sums payable to a State under paragraph (2) of subsection (a) shall be paid by transfers from the Federal extended compensation account to the account of such State in the Unemployment Trust Fund."; on page 17, at the beginning of line 22, to change the section number from "12" to "11"; on page 18, at the beginning of line 5, to change the section number from "13" to "12"; in line 17, after the word "and", to strike out "8" and insert "7"; in line 18, after "1961", to strike out "and the reimbursements provided by section 4 of such Act."; at the beginning of line 24, to strike out "and reimbursements."; on page 19, line 2, after the word "and", to strike out "8" and insert "7"; in line 14, after the word "years", to strike out "1963 and 1964)" and insert "1962 and 1963)"; on page 20, after line 5, to strike out:

"(c) (1) The Secretary of the Treasury shall transfer (as of December 31, 1964), from the Federal extended compensation account to the accounts of the States in the Unemployment Trust Fund, the balance in the Federal extended compensation account as of such date. Such balance shall be determined by deducting from the amount in the account on December 31, 1964, the amount of the outstanding advances made to such account pursuant to subsection (a).

"(2) Each State's share of the balance to be transferred under this subsection—

"(A) shall be determined by the Secretary of Labor and certified by him to the Secretary of the Treasury before that date on the basis of reports furnished by the States to the Secretary of Labor before December 1, 1964, and

"(B) shall bear the same ratio to the balance in such account as of December 31, 1964, as (i) the amount of wages subject to contributions under such State's unemployment compensation law during 1962 and 1963 which have been reported to the State before May 1, 1964, bears to (ii) the total of wages subject to contributions under all State unemployment compensation laws during 1962 and 1963 which have been reported to the States before May 1, 1964.

"TERMINATION OF ACCOUNT

"(d) Except as provided by subsection (c), no transfer to or from the Federal extended compensation account shall be made after December 31, 1964."

And, in lieu thereof, to insert:

(c)(1) The Secretary of the Treasury shall transfer (as of December 31, 1963) from the Federal extended compensation account to the State account in the Unemployment Trust Fund of each State an amount equal to the excess, if any, of (A) that portion of the total amount transferred to the Federal extended compensation account pursuant to subsection (b) which the Secretary of the Treasury (after advising and consulting with the Secretary of Labor) determines to be attributable to wages (as defined in section 3306(b) of the Federal Unemployment Tax Act) paid in such State during the calendar years 1961 and 1962 over (B) the amounts used within such State to make the payments of compensation provided by section 3 of the Temporary Extended Unemployment Compensation Act of 1961 (not counting any such amounts paid to individuals who exhausted their unemployment compensation until title XV prior to making their first claims under the Temporary Extended Unemployment Compensation Act of 1961).

(2) If the balance in the Federal extended compensation account is insufficient for the purpose of making the transfers provided for by paragraph (1), then there are authorized to be appropriated to such account such amounts as may be necessary for the purpose of making such transfers, and such amounts shall be treated as advances repayable to the general fund of the Treasury in the manner provided in subsection (a).

On page 22, after line 10, to insert:

REPAYMENT

(d)(1) If, as of December 31, 1963, the amounts used within any State to make payments of compensation provided by section 3 of the Temporary Extended Unemployment Compensation Act of 1961 (not counting any such amounts paid to individuals who exhausted their unemployment compensation under title XV prior to making their first claims under this Act) exceed that portion of the total amount transferred to the Federal extended compensation account pursuant to subsection (b) which the Secretary of the Treasury (after advising and consulting with the Secretary of Labor) determines to be attributable to wages (as defined in section 3306(b) of the Federal Unemployment Tax Act) paid in such State during the calendar years 1961 and 1962, then the total credits allowed under section 3302(c) of the Federal Unemployment Tax Act to taxpayers with respect to wages attributable to such State for the taxable year beginning January 1, 1964, and for each taxable year thereafter, shall be reduced in the same manner as that provided by section 3302(c)(2) of the Federal Unemployment Tax Act for the repayment of advances made under title XII, unless or until the Secretary of the Treasury finds that before November 10 of the taxable year there have been collected by reason of the provisions of this paragraph amounts equal to the amounts so used.

(2) All amounts credited to the employment security administration account attributable to taxes received by reason of the reduced credits provided for in paragraph (1) shall be transferred to the Federal extended compensation account as of the beginning of the month succeeding the month in which the moneys are credited to the employment security administration account. Whenever the aggregate amount of the additional tax transferred to the Federal extended compensation account pursuant to the preceding sentence with respect to wages which are attributable to a State exceeds the sum of the amounts used within such State as described in paragraph (1), there shall be transferred at the earliest practicable date from such account for crediting to the account of such State within the Unemployment Trust Fund an amount equal to such excess.

(3) If, after completion of all transfers provided in this section and after repayment of all advances from the general fund of the Treasury, there remains any balance in Federal extended compensation account, then such balance shall be transferred to the general fund of the Treasury. After the transfer of such balance to the general fund of the Treasury, no further transfers to or from such account shall be made.

On page 24, at the beginning of line 11, to change the section number from "14" to "13"; in line 15, after the word "years", to strike out "1962 and 1963" and insert "1961 and 1962"; in line 24, after the word "years", to strike out "1962 and 1963" and insert "1961 and 1962"; and, at the top of page 25, to insert a new section, as follows:

SEC. 14. Notwithstanding the limitation contained in subparagraph (A) of paragraph (1) of subsection (c) of section 901 of the Social Security Act, the Congress may make available for grants to States under such paragraph (1), for fiscal years ending June 30, 1961, and June 30, 1962, an amount which shall not exceed $425,000,000 for each such fiscal year.

Mr. BYRD of Virginia. Mr. President, citing recent official reports on unemployment, the administration within the past month requested immediate enactment of emergency legislation for a temporary self-supporting extension of unemployment compensation under State and Federal laws.

Complying with this request, the House of Representatives, on March 1, passed H.R. 4806. The Senate Finance Committee has expedited its consideration of the House bill. Committee action could have been taken a day earlier if official information had been supplied more promptly.

As the bill is now before the Senate, it provides the temporary emergency payments precisely to the extent requested by the administration; and the principal committee amendment is designed and calculated to preserve the basic State-Federal concept of the program.

Under the bill as reported by the Finance Committee, the extended benefits would be paid under existing State for-

mulas, but financed exclusively under Federal taxing power. Expert advice to the committee holds that no State legislation would be necessary for participation.

Mr. President, I ask unanimous consent to insert in the RECORD at this point as a part of my remarks a statement by Colin F. Stam, chief of staff of the Joint Committee on Internal Revenue Taxation, which gives his opinion that there will be no necessity for any such action.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
JOINT COMMITTEE ON INTERNAL REVENUE TAXATION, HOUSE OFFICE BUILDING,
Washington, D.C., March 16, 1961.

Hon. HARRY F. BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: You inquired as to whether the Finance Committee amendment to H.R. 4806 would compel State legislatures to act in order to pay the temporary extended benefits to their unemployed workers.

The present bill does not require any action by the State legislature in making a reduction of the 90 percent Federal unemployment tax credit allowable to employers in a State. The benefits under H.R. 4806 are financed solely through the exercise of the Federal taxing power. If tax collections attributable to wages paid in a State in calendar years 1961 and 1962 are less than the amounts advanced to that State for the purpose of paying the temporary extended unemployment compensation authorized by the bill, the reduction in the 90 percent credit against the Federal unemployment tax would become operative after 1963 and would continue to apply until the full amount of such advance has been repaid.

Unlike the 1958 act, this bill does not permit any State to avoid the credit reduction allowable to employers therein by voluntarily repaying advances through transfers from its account in the unemployment trust fund or by an appropriation from its general fund.

Under this bill, no action by State legislatures is required to authorize payment of temporary extended unemployment compensation to exhaustees in any State.

This, I believe, is an important feature of the bill because of the constitutional requirements of the various States, some State constitutions would have to be amended to permit the State to incur debt, and the different period of time in which the State legislatures meet.

Sincerely yours,

COLIN F. STAM,
Chief of Staff.

Mr. BYRD of Virginia. Mr. President, the committee adopted six amendments to the House bill, and as amended the bill was reported by the committee by unanimous vote. The amendment preserving State responsibility in the program, which I have described as the principal amendment, was adopted 11 to 2.

My use of the word "principal" in describing one amendment is not intended to underrate any of the other committee amendments. All of them are important and well considered. I doubt if I personally could support the bill without most of them.

I refer to this one as the principal amendment simply because, without it, under the administration proposal and the House bill, 39 of 50 States would pay into a Federal trust fund more than they could ever get back to pay their unemployed persons. Two States would break even.

In other words, through imposition of a Federal tax, employers in 39 States would be required to contribute to the benefits paid to unemployed in 9 States where, in violation of the program's principles, employers and States are not taking care of their own.

In short, without the Senate Finance Committee amendment, the administration proposal and the House bill provisions would be a long step—and perhaps one which could not be withdrawn or retraced—toward federalization of the financing of this program.

There is every reason to expect that the next proposal, which is scheduled shortly—that is to say, with permanent legislation which will be presented to Congress—would be the federalization of standards in the program. With federalization of financing, federalization of standards would be inevitable. The combination would complete federalization.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD, a State-by-State summary of estimated additional taxes and expenditures under the administration proposal and the House bill.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

ESTIMATED ADDITIONAL TAX COLLECTIONS COMPARED WITH EXPECTED BENEFIT PAYMENTS BY STATES, UNDER H.R. 4806 AS PASSED BY THE HOUSE OF REPRESENTATIVES (SHOWING STATE BALANCES IN THE REGULAR TRUST FUND RESERVES AS OF DECEMBER 31, 1960)

Alabama: The new additional tax collections would total $12.2 million; payments under the administration and House proposals would total $10 million; the excess would be $2.2 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $54 million.)

Alaska: The new additional tax collection would total $1.2 million; payments under the administration and House proposals would total $2.2 million; the deficit would be $1 million. (The State's balance in the regular trust fund reserves was $4.9 million as of December 31, 1960, including advances from Federal unemployment account totaling $3,765,000.)

Arizona: The new additional tax collections would total $5.7 million; payments under the administration and House proposals would total $2.1 million; the excess would be $3.6 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $62.4 million.)

Arkansas: The new additional tax collections would total $5.3 million; payments under the administration and House proposals would total $4.7 million; the excess would be $0.6 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $36.8 million.)

California: The new additional tax collections would total $99.4 million; payments under the administration and House proposals would total $80 million; the excess would be $19.4 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $801.5 million.)

Colorado: The new additional tax collections would total $8.3 million; payments under the administration and House proposals would total $2 million; the excess would be $6.3 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $61.9 million.)

Connecticut: The new additional tax collections would total $18.5 million; payments under the administration and House proposals would total $18.2 million; the excess would be $0.3 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $168.6 million.)

Delaware: The new additional tax collections would total $3.2 million; payments under the administration and House proposals would total $2 million; the excess would be $1.2 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $12 million.)

District of Columbia: The new additional tax collections would total $5.5 million; payments under the administration and House proposals would total $2.2 million; the excess would be $3.3 million. (The D.C. balance in the regular trust fund reserves as of December 31, 1960, was $62.4 million.)

Florida: The new additional tax collections would total $21.4 million; payments under the administration and House proposals would total $9.5 million; the excess would be $11.9 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $102.5 million.)

Georgia: The new additional tax collections would total $16.7 million; payments under the administration and House proposals would total $12 million; the excess would be $4.7 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $144.6 million.)

Hawaii: The new additional tax collections would total $3.1 million; payments under the administration and House proposals would total $0.7 million; the excess would be $2.4 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $25.3 million.)

Idaho: The new additional tax collections would total $2.5 million; payments under the administration and House proposals would total $1.6 million; the excess would be $0.9 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $28.4 million.)

Illinois: The new additional tax collections would total $68.6 million; payments under the administration and House proposals would total $40 million; the excess would be $28.6 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $356 million.)

Indiana: The new additional tax collections would total $28 million; payments under the administration and House proposals would total $26 million; the excess would be $2 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $168.2 million.)

Iowa: The new additional tax collections would total $10.8 million; payments under the administration and House proposals would total $3.5 million; the excess would be $7.3 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $115.5 million.)

Kansas: The new additional tax collections would total $8.5 million; payments under the administration and House proposals would total $3.5 million; the excess would be $5 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $72.1 million.)

Kentucky: The new additional tax collections would total $10.6 million; payments under the administration and House proposals would total $15 million; the deficit would be $4.4 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $104.1 million.)

Louisiana: The new additional tax collections would total $13.1 million; payments under the administration and House proposals would total $12.9 million; the excess would be $0.2 million. (The State's balance

in the regular trust fund reserves as of December 31, 1960, was $121 million.)

Maine: The new additional tax collections would total $4.5 million; payments under the administration and House proposals would total $2 million; the excess would be $2.5 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $28.5 million.)

Maryland: The new additional tax collections would total $15.8 million; payments under the administration and House proposals would total $10 million; the excess would be $5.8 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $67.7 million.)

Massachusetts: The new additional tax collections would total $34.2 million; payments under the administration and House proposals would total $30 million; the excess would be $4.2 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $221.3 million.)

Michigan: The new additional tax collections would total $46.6 million; payments under the administration and House proposals would total $93 million; the deficit would be $46.4 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $220.1 million, including advance from Federal unemployment account of $113 million.)

Minnesota: The new additional tax collections would total $16 million; payments under the administration and House proposals would total $14.4 million; the excess would be $1.6 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $63.8 million.)

Mississippi: The new additional tax collections would total $5.7 million; payments under the administration and House proposals would total $2.2 million; the excess would be $3.5 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $32.7 million.)

Missouri: The new additional tax collections would total $23.6 million; payments under the administration and House proposals would total $11 million; the excess would be $12.6 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $201.7 million.)

Montana: The new additional tax collections would total $2.6 million; payments under the administration and House proposals would total $1.1 million; the excess would be $1.5 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $26.1 million.)

Nebraska: The new additional tax collections would total $5.2 million; payments under the administration and House proposals would total $0.5 million; the excess would be $4.7 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $40.3 million.)

Nevada: The new additional tax collections would total $2 million; and payments under the administration and House proposals would total $2 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $17.7 million.)

New Hampshire: The new additional tax collections would total $3.4 million; payments under the administration and House proposals would total $0.4 million; the excess would be $3 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $24 million.)

New Jersey: The new additional tax collections would total $39.7 million; payments under the administration and House proposals would total $51.2 million; the deficit would be $11.5 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $337.2 million.)

New Mexico: The new additional tax collections would total $3.9 million; payments under the administration and House proposals would total $2.3 million; the excess would be $1.9 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $42.3 million.)

New York: The new additional tax collections would total $119.9 million; payments under the administration and House proposals would total $170 million; the deficit would be $50.1 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $999 million.)

North Carolina: The new additional tax collections would total $19.9 million; payments under the administration and House proposals would total $7.9 million; the excess would be $12 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $186.6 million.)

North Dakota: The new additional tax collections would total $1.6 million; payments under the administration and House proposals would total $0.9 million; the excess would be $0.7 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $7.4 million.)

Ohio: The new additional tax collections would total $62.4 million; payments under the administration and House proposals would total $85 million; the deficit would be $22.6 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $310.5 million.)

Oklahoma: The new additional tax collections would total $8.9 million; payments under the administration and House proposals would total $5.8 million; the excess would be $3.1 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $37 million.)

Oregon: The new additional tax collections would total $9.6 million; payments under the administration and House proposals would total $10.6 million; the deficit would be $1 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $47.5 million.)

Pennsylvania: The new additional tax collections would total $70.7 million; payments under the administration and House proposals would total $82 million; the deficit would be $11.3 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $174.5 million, including advances from Federal unemployment account totaling $102 million.)

Puerto Rico: The new additional tax collections would total $3.2 million; and payments under the administration and House proposals would total $3.2 million.

Rhode Island: The new additional tax collections would total $5.5 million; and payments under the administration and House proposals would total $5.5 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $33 million.)

South Carolina: The new additional tax collections would total $9.1 million; and payments under the administration and House proposals would total $7.3 million; the excess would be $1.8 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $76.5 million.)

South Dakota: The new additional tax collections would total $1.6 million; payments under the administration and House proposals would total $0.2 million. The excess would be $1.4 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $15.2 million.)

Tennessee: The new additional tax collections would total $15 million; payments under the administration and House proposals would total $8 million; the excess would be $7 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $74.5 million.)

Texas: The new additional tax collections would total $42.1 million; payments under the administration and House proposals would total $30 million; the excess would be $12.1 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $249.9 million.)

Utah: The new additional tax collections would total $4.1 million; payments under the administration and House proposals would total $2 million; the excess would be $2.1 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $38 million.)

Vermont: The new additional tax collections would total $1.7 million; payments under the administration and House proposals would total $0.6 million; the excess would be $1.1 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $13.7 million.)

Virginia: The new additional tax collections would total $16.1 million; payments under the administration and House proposals would total $5.5 million; the excess would be $10.6 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $88.6 million.)

Washington: The new additional tax collections would total $15.4 million; payments under the administration and House proposals would total $8.9 million; the excess would be $6.5 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $202.2 million.)

West Virginia: The new additional tax collections would total $8.4 million; payments under the administration and House proposals would total $9.5 million; the deficit would be $1.1 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $35.4 million.)

Wisconsin: The new additional tax collections would total $21.5 million; payments under the administration and House proposals would total $16 million; the excess would be $5.5 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $216.1 million.)

Wyoming: The new additional tax collections would total $1.5 million; payments under the administration and House proposals would total $1.1 million; the excess would be $0.4 million. (The State's balance in the regular trust fund reserves as of December 31, 1960, was $12.4 million.)

Mr. BYRD of Virginia. Mr. President, Members of the Senate will recall that this program was originated in 1935. It was founded on the principle that a combination of special State and Federal taxes on employers in each State would make the program self-supporting within the respective States.

Proceeds from these combined taxes go into accounts for the respective States set up in a trust fund held under Federal custody. States spend out of their respective accounts for payments, over specified periods, to qualified unemployed persons within their borders.

The Senate amendment preserves this fundamental principle of State responsibility; the administration proposal and the House bill, in all probability, would destroy it, after more than 25 years of successful operation in the vast majority of the States.

In summary, with respect to this particular amendment, it merely continues the 25-year-old policy that the cost of the temporarily extended unemployment compensation paid to employees in each State would be borne by employers in such State.

As in the House bill, an additional temporary tax of 0.4 percent is imposed on employers in all States to finance the temporary provisions of the bill; and the proceeds of this temporary additional

tax would go into a special trust fund account.

Under the administration proposal and the House bill, this special account would be established as a common "kitty" to be drawn on by States paying in less than they take out, as well as by States paying in more than they take out.

It would naturally follow that such a federalized account would be a license for deficit States to exercise less care over their expenditures and encourage surplus States to relax the efficiency which has been established in their practices.

On the contrary, the Finance Committee amendment provides that any excess receipts resulting from the new additional Federal tax imposed on employers within a State will be credited to such State's regular account in the trust fund as of December 31, 1963.

On the other hand, the same amendment provides that if the additional taxes do not equal temporary benefit payments in any State, the difference would be paid to the Federal Treasury by employers in such State through reductions in their employment tax credits beginning in 1964.

The Finance Committee amendment would advance the payment of the additional 0.4 percent Federal tax to make it effective for calendar years 1961 and 1962. Under the House bill it would have been applied for calendar years 1962 and 1963.

There were two reasons for this change: It was felt that the additional tax should run concurrently with the additional benefits; and that under the House provisions multiple layers of employment tax credit reductions would be imposed on some employers at the end of this temporary program.

The committee felt that its approach to the financing of the extended payments eliminated the necessity for the House provisions relating to reimbursing States where payments over periods in excess of 26 weeks are already provided by law. For this reason the reimbursement provisions were deleted from the bill.

Under another substantial committee amendment persons qualifying under the bill, who also receive pensions under employer-contributory-retirement plans, would not be permitted to draw the full amount of both benefits. Payments under the bill would be reduced by the amount received under the other plan. But, this would not apply to pensions based on disability or pensions received by veterans 65 years of age or more.

In response to representations in behalf of State administrators, the committee adopted an amendment designed to provide for the development of better information relating to personal characteristics, family situations, employment background, and so forth, with respect to persons qualifying under the bill.

The final amendment temporarily raised the limitation on amounts which may be credited to States for the administration of their respective unemployment compensation systems. The present limit is $350 million; the amendment raises the limit to $425 million for fiscal years ending June 30, 1961, and June 30, 1962.

As in the House bill, the bill before the Senate authorizes temporary advances from the general fund of the Treasury to the unemployment trust fund in order that the additional benefits may be started immediately. These advances, estimated at from more than $800 million to nearly $1 billion, would be repaid generally from the proceeds of the additional tax levied in the bill.

Under the Senate bill the additional benefits provided for persons under State unemployment compensation systems would total $827 million. Extended benefits for Federal employees and ex-servicemen, to be paid for by the Federal Government out of general fund revenue, are estimated to cost $63 million.

In general, the bill would provide extended benefits up to 13 weeks to unemployed workers who have exhausted their rights under the State unemployment compensation programs and under Federal unemployment compensation programs for ex-servicemen and Federal employees.

The weekly benefit amount would be the same as the individual worker was drawing under his State law. These payments would be made only in those States which choose to enter into an agreement with the Secretary of Labor providing for such payments.

The unemployed worker could receive 50 percent of the number of weeks provided under the State program, up to the maximum of 13 weeks, to be paid for with funds raised under the additional temporary Federal tax imposed in the bill. The weekly benefits would be determined by the various existing State formulas.

The temporary additional 0.4 percent Federal tax would be added to the existing 3.1-percent rate which is applied to the first $3,000 paid to each employee. However, employers are allowed to credit against the Federal tax up to 90 percent of the State unemployment taxes they pay.

If the additional 0.4-percent Federal tax is not sufficient to cover the temporary benefits of the bill in any State, the difference would be made up through a reduction in the 90 percent credit provided under existing law commencing in 1964.

The Committee on Finance has recommended that the bill, as amended, be passed, and I hope action by the Senate may be prompt.

Mr. MORTON. Mr. President, will the Senator from Virginia yield?

Mr. BYRD of Virginia. I yield to the Senator from Kentucky.

Mr. MORTON. I enjoyed the chairman's very accurate and informative explanation of the amendments adopted by the Committee on Finance.

As I understand, no unemployed man or woman will receive 1 cent less under the amended Senate version than under the House or administration version.

Mr. BYRD of Virginia. The Senator is correct.

Mr. MORTON. So the end benefits are the same. As I understand, the difference is that the Senate maintains the traditional philosophy of the unemployment insurance program: That is, that the employers of the several States pay for their own unemployed. Is that correct?

Mr. BYRD of Virginia. The Senator is exactly correct.

Mr. MORTON. In the case of my own State, the summary shows that according to the estimates of Kentucky officials $15 million will be expended and $10.6 million will be collected from Kentucky. The employers of my State, then, would make up the difference by having a reduction in the credit which they now get from the present Federal tax over the years.

Mr. BYRD of Virginia. The Senator is correct.

Mr. MORTON. As the economy recovers, as many of us hope and believe it will, the estimates which have been made by the State officials could well be high.

Mr. BYRD of Virginia. I think that is a correct statement.

Mr. MORTON. If a State such as New York, which, according to these figures, would gain some $50 million, elected to pay in whatever excess they had paid out during the 2 years, they could take it from their reserve, which, as I understand, in the case of New York, today is $999 million.

Mr. BYRD of Virginia. The Senator is correct.

Mr. HOLLAND. Mr. President, will the Senator from Virginia yield?

Mr. BYRD of Virginia. I yield.

Mr. HOLLAND. I am interested in two points. One has been covered, I believe, by a question asked by the distinguished Senator from Kentucky. I understood the Senator from Virginia to reply to the Senator from Kentucky that the amended bill, as reported by the Senate committee, will not change in any respect the amount received by any worker.

Mr. BYRD of Virginia. That is correct.

Mr. HOLLAND. But, in addition, I am also interested in the timeliness of the payments. Do I correctly understand that the speed of the payments and the time of the payments will be exactly the same under the reported and amended bill as it would have been under the original bill?

Mr. BYRD of Virginia. Exactly the same. There is a difference in the collection of the taxes. The Senate Finance Committee has voted to speed up the collection of the taxes imposed in the States, in order to put them on a pay-as-you-go basis.

Mr. HOLLAND. I understand that, and I commend the committee for wishing to balance the books in connection with this matter more quickly than would have been done under the House version of the bill.

But the point of my questioning is twofold, and I believe I understand that these two questions have been affirmatively answered by the Senator from Virginia: first, that the periodic amounts

to be received by any unemployed worker under the two versions of the bill are identical; second, that the time of the receipt of those amounts is exactly the same, under either version of the bill.

Mr. BYRD of Virginia. That is exactly correct.

Mr. HOLLAND. I thank the Senator from Virginia.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Virginia yield to me?

Mr. BYRD of Virginia. I yield.

Mr. WILLIAMS of Delaware. First, I wish to join my colleagues in complimenting the chairman of the committee on his presentation of the bill.

Then I wish to ask a question: Is it not true that under the House version of the bill a substantial amount of the money raised in the form of taxes would be used to reimburse the States for what they have already paid out under their own laws, rather than be used for an extension of benefits of the unemployed?

Mr. BYRD of Virginia. Yes.

Mr. LAUSCHE. Mr. President, will the Senator from Virginia yield?

Mr. BYRD of Virginia. I yield.

Mr. LAUSCHE. What was the provision of the House version of the bill concerning the time when the new payroll tax would be imposed; and what is the corresponding provision in the Senate committee version of the bill?

Mr. BYRD of Virginia. The Senate committee version calls for beginning in the present year. The House version of the bill would have the beginning come 1 year later. In other words, the Senate committee version of the bill calls for beginning in the calendar year 1961–62; and the House version of the bill calls for beginning in the calendar year 1962–63.

Mr. LAUSCHE. Why did the Senate committee feel that the tax should be imposed immediately, rather than be delayed for a year?

Mr. BYRD of Virginia. That was in order to put the fund on a pay-as-you-go basis. This money will be paid out of the General Treasury, by grants from the Treasury. We thought it better to pay as we go—to let the collection of the tax be coincidental with the payment of the benefits.

Mr. LAUSCHE. In other words, the House version of the bill would bring about a delay in imposing the tax, would it?

Mr. BYRD of Virginia. Yes.

Mr. LAUSCHE. But the Senate committee version calls for paying now, in the same form as that proposed by the House, but to begin collecting the tax concurrently with the making of the disbursements. Is that correct?

Mr. BYRD of Virginia. Yes. Under the House version of the bill, in 1963 there would still be payment of the tax, but there would not be any benefit to the employees in that year.

The Senate committee undertook to make the two identical—in other words, to have the tax collected, for payment to the employees collected in the same year that they receive the unemployment benefits.

Mr. WILLIAMS of Delaware. Is it not true that under both versions of the bill approximately $1 billion will be paid in benefits between now and June 30, 1962?

However, under the House version of the bill none of the taxes collected in order to pay for the benefits would be collected until 6 months after all the benefits had been paid—or in January, 1963?

By imposing the tax during the calendar year 1961–62, the Senate version of the bill will start these collections coming in next January, so the system will be on a sound financing basis.

Mr. BYRD of Virginia. Yes.

Mr. BUTLER. Mr. President, will the Senator from Virginia yield to me?

Mr. BYRD of Virginia. I yield.

Mr. BUTLER. Will the Senator from Virginia refer to the table of estimated additional tax collections, compared with the expected benefit payments by States; and will he take the State of Maryland as an instance? In the State of Maryland, the employers will pay into the fund $15,800,000. The unemployed workers in Maryland, if Maryland extends the period from 36 weeks to 39 weeks, will receive $10 million.

Under the House version of the bill, where would the other $5,800,000 go?

Mr. BYRD of Virginia. It would then be distributed to the deficit States. For instance, New York State would receive $50 million more than it would have paid in. I think Michigan would receive a similar amount.

Mr. BUTLER. In other words, the net effect would be to federalize the unemployment compensation system; and that would be a departure from the way it was originally created, would it not?

Mr. BYRD of Virginia. Yes. Under the House version of the bill, 39 States would pay more taxes than the amounts they would receive in benefits. For one State, the two would be equal, I believe. Ten States would receive more benefits than the amounts they would pay in taxes.

Mr. BUTLER. For instance, Michigan would pay $46,600,000, but would receive $93 million.

Mr. BYRD of Virginia. Yes.

Mr. BUTLER. So in Maryland the employers would pay approximately $5,800,000 more than the unemployed in Maryland would receive.

Mr. BYRD of Virginia. Yes; and, of course, that would destroy the original concept of the act, which was that the money collected in a State would be used to make payments to the unemployed in that State.

Mr. BUTLER. Yes; this new proposal would federalize the system.

Mr. BYRD of Virginia. Yes.

Mr. WILLIAMS of Delaware. Under the House version of the bill, would not the following situation be possible: The taxes collected from employers operating in a State where unemployment benefits are paid at the rate of $20 a week, would be used to pay benefits of $30 or $40 a week in another State, under that State's laws. Then again, an employer in one State where unemployment compensation is paid, say for 20 weeks under the laws of that State, could, under the House version, be taxed to pay unemployment benefits for 26 weeks in a neighboring State. I refer to the extended benefits or the 50-percent extension in each instance, as provided in the bill before us.

Mr. BYRD of Virginia. I think the Senator from Delaware is correct.

Mr. WILLIAMS of Delaware. And, as the Senator from Maryland pointed out, that would completely break down all of our previously established principles that this is a State fund and is supposed to be administered at the State level, under State law, and financed by payments made by employers in the respective States.

Mr. BYRD of Virginia. Yes. That law has been in operation for 26 years. The basic principle is that the employers and the employees of the State pay the tax, and the money is spent only in that particular State, with the sole exception of four-tenths of 1 percent, which is used to pay the administrative expenses in Washington.

Mr. WILLIAMS of Delaware. And under most State laws there is a so-called experience rating, whereby employers who have a good record of stable employment receive a lower tax rate. But even though a small businessman in Delaware, let us say, had demonstrated that he was one of the most stable sources of employment, the House version of the bill would ignore completely his experience rating because stable employers with such excellent records would be taxed at the Federal level to pay for seasonal employment in other industries and in other States.

For instance, the automobile industry operates rather spasmodically; when new models of automobiles are first coming on the market, the industry operates overtime, but later in the season the employment in that industry drops off. However, all the small businesses in the country would, under the House version of the bill, be taxed in order to pay for such gyrations in employment by a particular industry.

Mr. BYRD of Virginia. That is correct.

Mr. LAUSCHE. I understand that the substance of the House version of the bill embodies a sort of federalization approach to the handling of this matter. Is that correct?

Mr. BYRD of Virginia. Yes. In that sense, the taxes collected in one State could be used to pay the benefits received by the unemployed in another State. The House version of the bill would not federalize the program, so far as the number of weeks of benefits is concerned or so far as the amount paid to the unemployed is concerned; but I think the House version of the bill constitutes a long and a very vital step toward complete federalization of the program.

Mr. LAUSCHE. The Senate committee version of the bill is in conformity with the principle which has been applicable ever since the system was established; is it not?

Mr. BYRD of Virginia. Yes, for 26 years; this is the first time that an effort to change that has been made.

Mr. LAUSCHE. The tabulation shows that Ohio would collect $62.4 million in taxes, but under the House bill will re-

ceive benefits of $85 million. Under the bill as amended by the committee, it would collect $62.4 million and receive benefits of $62.4 million.

Complete federalization, however, as envisioned by the House bill, will produce the opposite effect, making Ohio pay out substantially more than the amount of benefits it will get?

Mr. BYRD of Virginia. That is cert..inly correct.

Mr. LAUSCHE. I thank the Senator very much.

Mr. GORE obtained the floor.

Mr. BURDICK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Tennessee yield for that purpose?

Mr. GORE. I yield for that purpose.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORE. Mr. President, the bill before the Senate was drafted and presented to serve two primary purposes. First, for those who have been unemployed for so long a period that they have exhausted unemployment compensation benefits, the bill provides relief in the form of an extension of their eligibility. Such relief is direly needed to alleviate distress which exists on a widespread basis.

Second, the bill would provide a stimulant for the economy. Sadly, those who cannot buy food go hungry. But it is not the unemployed and their families alone who are adversely affected. The business of the farmer, the trucker, and the grocer suffers, too. They in turn reduce employment, adding to the number of unemployed and thus contributing to a worsening of the situation from which we seek to recover. The program encompassed in the bill is designed to spur the economy to renewed activity and vigor by providing sustenance purchasing power that will quickly go into the spending stream in the amount of approximately $1 billion.

If the committee amendment is adopted, however, neither of the primary purposes of the bill will be achieved.

Let us consider for a moment each of these primary purposes. Unemployment is one of the most fearful predicaments in which the head of a family can find himself in a modern industrial economy. He cannot go back to the family farm temporarily, in most cases. The farm is no longer in operation. He cannot live on his savings beyond the point of their exhaustion. He cannot secure livelihood from welfare agencies, since they are not equipped to care for these millions of unemployed.

Unemployment is truly the evil beast of the recession, and unemployment has been growing ever more critical in recent years, even in years of moderately high economic activity.

The Employment Act of 1946 speaks hopefully of full employment. Recognizing the mobility of the labor force, we knew that there must be at all times some people looking for work. So we began to talk of 2 percent of our people unemployed as being substantially full employment. As the years went on and unemployment seemed more persistent, became more chronic, we began to say that perhaps 3 percent, under present day conditions, was an irreducible minimum. Now, we seem to have lowered our sight another notch. The experts now tell us that 4 percent unemployment is substantially full employment, and perhaps we may have to settle for that, though I am entirely unwilling to do so. Surely, we should strive for a more worthy goal.

One thing is sure—unemployment has steadily worsened during recent years, whether we compare the top or the bottom of each succeeding business cycle. It has been characteristic of the postwar recessions that recovery has seen a larger and harder knot of the unemployd still with us. This was particularly true of the supposed recovery from the 1958 recession. We recovered from that recession with an extremely high unemployment rate still with us. In truth, our recovery actually was still incomplete when the current recession began.

Unemployment must be alleviated. We must find a way to do this on a permanent basis. A full employment economy is required for our own people and for our broader obligations. To this task we must proceed.

In the meantime, however, those who are unemployed now through no fault of their own require emergency, and, we hope, temporary, aid. That is one purpose of the pending bill.

So much for the first and primary consideration for the bill.

The second thing which the bill attempts, and this may in the long run be the more important, is to boost national income and production by injecting purchasing into the spending stream.

I do not wish to become too technical, but it appears to me we should make use of the tools which have been developed for us by our economists in attempting to understand and to correct recessionary conditions.

Unemployment compensation payments are known as transfer payments. When these dollars go into the hands of the unemployed, they will be spent. Hardly any of these dollars will be saved. They are, therefore, high velocity dollars and move into the spending stream at once and in full force. Having been spent almost in their entirety, these dollars then become income to still other persons who receive them in the normal course of our free enterprise business system. A large part of those dollars will, then, in turn, be spent again and again. Under current conditions, it has been estimated that each one of the approximately $1 billion which will be expended in this program will result in about $4 billion being added to the national income.

Now, for maximum relief to the unemployed as well as for maximum boost to the economy, this additional $4 billion of national income must be spread over the country as a whole, benefits distributed according to need. We would not like, nor would it be possible under our economic organization, to have this additional increment of national income confined to New York and Pennsylvania or a few other highly industrialized States. We would want, it seems to me, this benefit to accrue to the Nation as a whole and to be spread over all geographical portions of the country and throughout all economic and social segments of society. In this way—and only in this way—can we provide the maximum benefits both to the unemployed and to the economy.

Mr. President, consideration of this bill has been made necessary by an economic recession. It is true that the effects of the recession are more pronounced in some areas than in others. This fact, however, does not make it a local problem. Indeed, these focal points of distress demonstrate that it is national in character.

Recessions and depressions are phenomena of our modern, capitalistic, money-based economy. Although we have learned a great deal about them, and particularly about how to mitigate their effects on those who suffer most from them, they are likely to be with us for some time to come. The present recession, as is true with respect to all recessions and depressions, is national in scope. Solutions can only be accomplished by national programs, and determined ones at that.

The bill, as passed by the House, undertakes to make funds available to extend the period of eligibility for unemployment compensation benefits provided for by the various State laws. Under the bill, these benefits will be paid from Federal funds, and these Federal funds are to be recovered by a Federal tax. The burden of financing the program is placed squarely on the national economy.

The committee amendment, in practical effect, provides for differing rates of tax in the several States—not initially, but eventually. By the committee amendment, the burden of financing the program is placed upon each State individually.

The committee amendment is grounded on the philosophy that unemployment is a State or local problem and that State A need not be concerned with, and may not be affected by, what happens in State B. If this theory ever had any validity, it has none today when we have such a complex, interdependent economy which knows no State lines.

Mr. DOUGLAS. Mr. President, will the Senator yield for a question?

Mr. GORE. I yield.

Mr. DOUGLAS. I ask the Senator from Tennessee if it is not true that under the amendment presented by the committee the employers of each State would have to bear the full burden of the extra unemployment in the State caused by the recession.

Mr. GORE. The Senator is correct.

Mr. DOUGLAS. The amendment would then require that the employers of Michigan bear the full burden of the high unemployment in the automobile industry in the State of Michigan; is that not correct?

Mr. GORE. The committee amendment frankly requires each State to provide for its own unemployed, thereby fallaciously undertaking, it seems to me, to deal with a recession in our national economy on a State-by-State basis.

Mr. DOUGLAS. Is it not true that unemployment in Michigan is not caused by any failure of the employers in Michigan, but is caused by a decrease in the demand for automobiles in the Nation as a whole?

Mr. GORE. Indeed so. I can think of nothing that would make the employers in the automobile industry in Michigan, as well as the employees of the automobile industry, happier than for the people in Tennessee, Alaska, Oklahoma, Illinois, and Rhode Island to have the purchasing power and the desire to buy some new automobiles. Then profits would accrue and men would be called back to work.

Mr. DOUGLAS. But high unemployment has occurred because demand for automobiles in the rest of the Nation has fallen off; is that not correct?

Mr. GORE. The Senator is correct.

Mr. DOUGLAS. In other words, to put the question in technical language, the fact that the incidence of the recession has been severe, and more severe in certain States than in others, does not mean that the cause of the recession is confined within those States.

Mr. GORE. It does not at all mean that the cause is local. The cause is national.

Mr. DOUGLAS. The same situation exists in the steel industry, in that the increase in unemployment in the steel industry has been caused by a decrease of demand for steel all over the Nation.

Mr. GORE. Yes, indeed. In this recession, as in all recessions, the first heavy unemployment comes in heavy industry. Unless the recessionary conditions are corrected, soon the long and pinching hand of recession may grow into a depression, and it will surely reach Tennessee.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. PASTORE. In other words, what we would be actually saying is that when the United States follows certain policies in reciprocal trade and they are national policies, for example, with respect to textile mills and those policies close down a mill in the State of Rhode Island, thereby putting a thousand people out of work, the reasoning behind the committee amendment is that such condition is the business of nobody except the taxpayers of Rhode Island. Is that not what we would be saying?

Mr. GORE. By the committee amendment; the Senator is correct.

Mr. PASTORE. That is correct. We would be actually saying the people of the country that if unemployment exists in one State, it is the business of no one else but the taxpayers of that particular State.

Mr. GORE. The whole philosophy behind the committee amendment is that each State must care for its own unemployed. Indeed, the distinguished chairman said that the committee amendment would prevent the people of one State from contributing to the unemployed people of another State. If we follow that reasoning, then I wonder what we would do with the medical care bill which the Senate passed last year, reported by the same committee, on which it is my honor to serve, which contained a formula which provides that the Federal Government will pay up to 80 percent of hospital, doctor, and dental bills, and the nursing home care of elderly people in my State and other States not so fortunately situated. If we had tried to establish a principle in the medical care bill that the people of no State shall be taxed for the benefit of the people of another State, then I would say that approximately two-thirds of the States would suffer.

Mr. PASTORE. Mr. President, will the Senator yield further?

Mr. GORE. I yield.

Mr. PASTORE. Will the Senator not admit that it is nothing short of hypocrisy to say to the State that does not need this help, "We will let you collect the tax anyway, but we will fool the American people. We will give the money back to you at some later date." Is that not what is proposed to be done by the amendment? Is it not proposed to collect a tax that is not needed in order to make the bill look like a national policy, when it is not a national policy at all? The hypocrisy of the amendment is that, after the four-tenths of 1 percent is collected, we would place it in a reserve, and we would say to the people of the State, "If you do not need the money, and you do not use it, we will give it back to you." Is that not what the amendment provides?

Mr. GORE. Precisely; it means taxes collected from each State will be credited to the trust fund for each State, and if the trust fund grows beyond the needs of the States, then the States can reduce their own taxes, which in effect means exactly what the Senator has said.

Mr. PASTORE. Naturally. In other words, at some later date the amendment would give a discount that is comparable to the amount of money paid in. I do not care by what name it is called; it has an odor—and not like a rose.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. DOUGLAS. Is it not true that the States which would suffer under the committee amendment tend to be the great industrial and mining States, such as the States of Michigan, Pennsylvania, Ohio, West Virginia, Rhode Island, and California—a whole series of great industrial States? But what the other States in the Union are saying is that, "When hard times hit you through unemployment, we will not come to your help." As the Senator from Tennessee noticed in connection with other bills, when these other States wish to be on the receiving end, they want benefits not only for medical care for the aged but for old-age assistance and for dependent children, and in those cases taxes are paid by the industrial States. The money goes to the other States. In other words, the industrial States are asked to assume the national responsibility for helping conditions in the nonindustrial States, but when the industrial States are in trouble the nonindustrial States say, "You must shift for yourself. We disown you. This is not a national problem." Is that not true?

Mr. GORE. I have the honor to represent, in part, a State which is the beneficiary of programs, which the distinguished senior Senator from Illinois supports, such as Hill-Burton Medical Care, Public Assistance, and National Highway Acts. The formulas in those programs are favorable to my State. I think that we must act here as the U.S. Senate. We are not gathered into 50 compartments. However, by the committee amendment to this bill the dictum would be laid down that the people of one State should not be taxed to alleviate a depressing condition in another State. That is a denial of our entire concept of one Nation.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. PASTORE. I wish the RECORD to show that insofar as my State of Rhode Island is concerned, under the formula suggested even by the committee, we shall have to pay out for the proposed additional obligations perhaps $5.5 million. We shall collect about $5.5 million. I do not think it makes much difference one way or the other. But it is the principle that is involved. We are talking about helping people who are unemployed.

Yesterday we passed a distressed areas bill. A few days before that we passed a feed grains bill. Not too long ago we brought up again the sacred cow of agriculture. The taxpayers in Rhode Island are paying subsidy upon subsidy to support agricultural prices in the United States. Yet if we have 50,000 people out of work in the State of Rhode Island we will be told, "Let your taxpayers take care of them. We know nothing about that."

I say what is sauce for the goose is sauce for the gander. If we are going to pay out agricultural benefits to the State of Virginia for agricultural supports, and if we are going to pay them to the State of Wisconsin for their dairy products, then I say if Rhode Island happens to be a 96 percent manufacturing State, and because we are in a national recession and not a Rhode Island recession alone I hope—at least I hope we are talking about a U.S. recession.

Mr. GORE. Unless we correct the national recession, there may soon be a recession in Rhode Island, and a very serious one.

Mr. PASTORE. If I may continue with the Senator's permission——

Mr. GORE. Of course.

Mr. PASTORE. I submit that if there is one man out of work in the United States who needs a job but who cannot find it, he is a national problem. If there is one aged person in the United States, whether he lives in Tennessee, Rhode Island, Illinois, or Virginia, and he needs hospitalization care, but cannot afford to pay for it, he is a national

problem. People who need old-age pensions are national problems. Social security is a national problem just as national security is a national problem. Unemployment is a national problem. All national problems should be met on a national level. I thank the Senator from Tennessee.

Mr. GORE. I thank the Senator for his contribution, which has been expressed with his usual eloquence.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. CAPEHART. Is it a fact that under either bill, the House version or the Senate committee version, every unemployed person who is entitled to benefits will be paid the same amount regardless of which bill is enacted?

Mr. GORE. No; that is not the case. It depends entirely upon the participation by the States. We passed a similar bill 3 years ago. Only 17 of the States participated. The unemployed people in only 17 States received additional unemployment compensation benefits. I have no way of predicting accurately how many States will participate in this program. But I can judge the future by the past, and my guess is that less than half of the States would participate. Therefore the answer must be "No."

Mr. CAPEHART. Let me word the question a little differently. If the State does participate, then under either bill the unemployed will receive the same. Is that correct?

Mr. GORE. Well, in the first place, the premise is incorrect, because the level of benefits depends upon State legislation. There is no uniformity of standards as to the benefits.

Mr. CAPEHART. Let me word the question another way. Within each State that participates, will not every person who is entitled to benefits be paid exactly the same amount under either the House bill or the Senate committee version?

Mr. GORE. Assuming that each State participates, and assuming that each State has the financial capacity to do so, and assuming that the existing standards of benefits remain the same, then I would say the answer is "Yes."

Mr. CAPEHART. Is not the principle involved in the Senate committee bill the same principle that was involved in the original Unemployment Insurance Act?

Mr. GORE. No.

Mr. CAPEHART. It is not? Was not the principle in the original bill that each State would run its own unemployment insurance program, and that each employer would pay into the fund an amount that would be credited to his account, and if he had a good record the percentage he would pay would go up and down; and the principle involved was that it would be run by each State, and that each State would be credited with what it sent to Washington, with Washington handling the money as a trustee? Furthermore, are we not doing here exactly what was the underlying principle and the underlying purpose of the original act?

Mr. GORE. First let me say that this is a program with which I have had some personal experience. I set up the first organization and put into operation the unemployment compensation program in the State of Tennessee. It was administered by the commissioner of labor, which position I held. So I have some personal knowledge of the purposes of the unemployment compensation program in its inauguration. The unemployment compensation program was then and is now designed to alleviate the unemployment difficulties of people. We know many people are affected even in normal times. What we are following in the pending bill is not that principle. The bill before the Senate was drafted for the purpose of meeting an emergency situation. We have 6 million unemployed people in the country. There is a considerable difference.

Mr. CAPEHART. Is it not a fact that under the House bill New York would collect in taxes nearly a billion dollars, pay to the unemployed $119 million, and receive in benefits $170 million. Is it not a fact that all we are asking in the Senate version is that New York return $50 million? In other words, the State of New York at the moment has $900 million in reserve. It could pay the $119 million that is called for and still have about $750 million remaining. If we are going to pay out $170 million, why should not New York return $50 million from its $900 million reserve? That is the big question involved here.

Mr. GORE. The Senator has asked three questions, not one big question, and not one of them can be answered with a yes or no. I believe that all will require some treatment. To begin with, the answer to the first question is "Yes." According to the estimates furnished the committee, the unemployed in the State of New York will receive more benefits than the employers in the State of New York will be required to pay under the tax levied by this bill. That is the Senator's first question.

Mr. CAPEHART. The additional four-tenths of 1 percent for 2 years.

Mr. GORE. As I recall, the Senator's second question, coupled with the third, was, Why should not New York be required to deal with its employers on a strict State-by-State basis? Why should they not pay the money back? In answer to that question, if we arrive at that conclusion with respect to the State of New York, then how can we avoid arriving at the same conclusion with respect to the State of Oklahoma? How can we avoid arriving at the same conclusion with respect to highways in the Western States?

Our highway program is largely financed by highway user taxes. The bulk of the taxes is paid in the 12 industrial States where the heavy traffic exists, but the very long lines of highways into the open spaces are in other States. Indeed, because of the publicly owned lands, in some instances the cost of the highways is borne 95 percent by the Federal Government.

If we are to arrive at this conclusion, this yardstick, this national policy, this edict contained in the committee amendment, that this proposal must apply separately to Pennsylvania, to Michigan, or to New York, with respect to the unemployed, then I ask the Senator from Indiana—if I may answer his question with a question—why should we not apply the same yardstick, the same measure of equity or inequity, as the case may be, to the other States? Why should we proceed upon the basis that we are a Nation undivided?

Mr. CAPEHART. Let me ask one other question. There is no comparison between what the Senator is talking about and what I am talking about, for the simple reason—and that was the question I was about to ask the Senator—that New York State has $900 million in its fund.

Mr. GORE. The Senator from Indiana has dismissed my question by saying there is no comparison. I ask the Senator if he wishes to apply the formula, or the edict, or the principle that the citizens of no State shall be taxed to alleviate the suffering or the needs of citizens of another State. Does the Senator support that principle?

Mr. CAPEHART. No, I do not support it.

Mr. GORE. Does the Senator support the committee amendment?

Mr. CAPEHART. I support the committee amendment.

Mr. GORE. Then the Senator wishes to support that principle, so far as unemployed persons are concerned.

Mr. CAPEHART. No; I wish to support the principle under which unemployment insurance was established. I will give the Senator that principle.

Mr. GORE. But the Senator——

Mr. CAPEHART. Just a minute.

Mr. GORE. I have the floor. The junior Senator from Tennessee has the floor. I shall yield courteously. The Senator has asked me a pointed question. I wish to bring it to an issue.

The Senator from Indiana says he wishes to support a principle. He has not yet identified it. I will give him an opportunity to identify the principle. However, I submitted to him a question, namely, whether he supported the principle, with respect to the unemployed, that the citizens of no State shall be taxed in order to alleviate the suffering of citizens of another State.

Mr. CAPEHART. I do not believe that is the principle at all, because there have been Federal roads from the beginning of our country's history.

Mr. GORE. Does the Senator from Indiana favor that principle?

Mr. CAPEHART. Yes, I favor it. Of course. The Senator knows that.

Mr. GORE. Then with respect to the suffering of unemployed persons, the Senator wishes each State to look after its own, and no State to help another?

Mr. CAPEHART. Let me say this to the Senator: He does not seem to know it. He is a member of the committee. Under either proposal, the House bill or the Senate committee bill, every unemployed person in any State, under either bill, will be paid exactly the same amount.

Mr. GORE. The Senator is entirely correct when he says I did not know that. I am pleased to inform him that that is not the case.

Mr. WILLIAMS of Delaware. The Department of Labor said that that was the case.

Mr. DOUGLAS. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. DOUGLAS. Is it not true that that would be the case, first, only if all the States accepted the plan; and second, if the benefit systems, so far as duration is concerned, were uniform under the plan?

Mr. GORE. And if each State had sufficient funds to meet its obligations. I answered that earlier.

Mr. GRUENING. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. GRUENING. I wish to commend highly the Senator from Tennessee, who together with the distinguished Senator from Illinois [Mr. DOUGLAS] opposed the vote of the majority of the committee to report the amendment. The amendment proposed by the Committee on Finance to H.R. 4806, to put the payment of extended temporary unemployment compensation on a State-by-State basis, is not only disruptive of the basic concept underlying the unemployment compensation program but is disruptive, as the Senator from Tennessee is so well pointing out, of the basic concept underlying the Union.

Either the United States is one Nation, politically and economically bound together for the attainment of a common purpose, or it is a group of 50 separate entities, each striving for its own advantage, and the devil take the hindmost.

I pay particular tribute to the distinguished Senator from Rhode Island [Mr. PASTORE] for his very eloquent and forceful presentation of this issue.

If we adopt the committee's amendment, we will be adopting a principle of every State for and by itself only. That is not the way it has been in the past, as the distinguished Senator from Tennessee knows, and it is my sincere hope that we will not, through this bill, begin to dissolve the bonds which bind the Union.

It is my hope that we will not permit this bill to loosen those bonds.

It should be axiomatic by now that unemployment—or, for that matter, poverty, disease, and lack of education—in one part of the Nation adversely affects every other part of the Nation. Unemployment is not alone a State and local concern; it is a national concern, as the Senator from Rhode Island has forcefully pointed out. That principle was established more than 35 years ago with the enactment of the original Social Security Act. We affirmed then that the United States is one Nation acting in concert to correct common ills and for the benefit of all.

The committee amendment would end that concerted action. The committee amendment would announce that each State is on its own, to sink or swim by its own efforts—and in many cases, to sink.

Mr. President, together with the Senator from Tennessee [Mr. GORE], the Senator from Rhode Island [Mr. PASTORE], and the Senator from Illinois [Mr. DOUGLAS], I say we cannot look at the Union in that fashion. We cannot judge each bill by what it contains for our own State. We must act on the basis of what is good for the Nation as a whole.

The unemployed of Tennessee, Rhode Island, or Illinois are as much the concern of the people of Alaska as they are the concern of the people of Illinois, Tennessee, or Rhode Island. If the unemployed people of any State continue in that condition, they cannot afford to buy Alaska king crab or Alaska salmon; and putting it on a self-interest basis, those industries of Alaska will suffer. Similarly, the unemployed people of Alaska, if permitted to remain long in that condition, will not be able to purchase the products of the other States. On the basis of self-interest alone, therefore, the committee amendment is bad economics.

Alaska's unemployment rate is abnormally high. Its unemployment rate stood at 22.1 percent for the week ending March 4, 1961. I ask unanimous consent that a table prepared by the Alaska Department of Labor showing comparative unemployment figures be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GRUENING. Mr. President, admittedly, in this instance, the State of Alaska would stand to benefit by the rejection of the Senate committee amendment. But I am opposing the committee amendment for reasons other than that.

I am opposing the Senate committee amendment because it involves a basic matter of principle involved in many of our Federal aid programs—in our programs of Federal aid to education—in our hospital construction program—in our vocational rehabilitation program—and in a host of other programs.

In none of those programs did we incorporate the principle of "to each State in accordance with its economic ability" and not in accordance with its needs.

Because the Senate committee amendment provides that if the additional tax exceeds the amount of temporary benefits in a State, the excess, after repaying the Federal Government, will be credited to such State's unemployment account, it would, in effect, be putting a premium upon the nonpayment of benefits.

I strongly urge my colleagues to reject this amendment as not in keeping with the basic concepts of unity upon which this Government was founded. If we are now to endorse the principle that each State will go its separate way in all matters then we shall ultimately lose the strength which comes from concerted action. Our Nation will then be only as strong as the weakest State. The United States will then have the strength not of 50 but of 1. That we must not permit to happen.

EXHIBIT 1

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. WILLIAMS of Delaware. I think the record should be made clear. In the committee, as the Senator from Tennessee knows, in answer to a question from the chairman, the representative of the Secretary of Labor affirmed the fact that so far as either bill is concerned any unemployed worker who can qualify in any of the 50 States under the House bill is just as easily entitled to the same benefits under the Senate bill.

The difference is only in the method of financing as provided in the two bills. The main question is: Do we want to federalize unemployment insurance, or do we wish to continue it on a State basis? Let us make the record clear. We are not dealing with the question whether Mr. X is entitled to benefits or not. He will get the same benefits under either of the two bills.

Mr. GORE. I heard this question discussed 3 years ago. No unemployed person in the State of Tennessee drew 1 cent——

The PRESIDING OFFICER (Mr. METCALF in the chair). Under the previous unanimous-consent agreement, the Senator from Tennessee will yield the floor.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that at the conclusion of the action of the Senate on the two treaties, the Senator from Tennessee [Mr. GORE] be allowed to resume his speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

The PRESIDING OFFICER. Without objection, the Senate will now proceed to the consideration of executive business, to consider the two treaties.

The Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The two treaties—Executive E and Executive C—are now before the Senate, under the order previously entered.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BURDICK in the Chair). Without objection, it is so ordered.

THE COLUMBIA RIVER TREATY

The PRESIDING OFFICER. Pursuant to the previous unanimous-consent agreement, the Chair lays before the Senate the Columbia River Basin Treaty.

Mr. SPARKMAN. Mr. President, I move that the Senate proceed to the consideration of Executive C, 87th Congress, 1st session, a convention between the United States of America and Canada.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the treaty—Executive C, 87th Congress, 1st session—a treaty between the United States of America and Canada relating to cooperative development of the water resources of the Columbia River Basin, signed at Washington on January 17, 1961, which was read the second time, as follows:

TREATY BETWEEN THE UNITED STATES OF AMERICA, AND CANADA RELATING TO COOPERATIVE DEVELOPMENT OF THE WATER RESOURCES OF THE COLUMBIA RIVER BASIN

The Governments of the United States of America and Canada

Recognizing that their peoples have, for many generations, lived together and cooperated with one another in many aspects of their national enterprises for the greater wealth and happiness of their respective nations, and

Recognizing that the Columbia River basin, as a part of the territory of both countries, contains water resources that are capable of contributing greatly to the economic growth and strength and to the general welfare of the two nations, and

Being desirous of achieving the development of those resources in a manner that will make the largest contribution to the economic progress of both countries and to the welfare of their peoples of which those resources are capable, and

Recognizing that the greatest benefit to each country can be secured by cooperative measures for hydroelectric power generation and flood control, which will make possible other benefits as well,

Have agreed as follows:

ARTICLE I

Interpretation

(1) In the Treaty, the expression

(a) "average critical period load factor" means the average of the monthly load factors during the critical stream flow period;

(b) "base system" means the plants, works and facilities listed in the table in Annex B as enlarged from time to time by the installation of additional generating facilities, together with any other plants, works or facilities which may be constructed

on the main stem of the Columbia River in the United States of America;

(c) "Canadian storage" means the storage provided by Canada under Article II;

(d) "critical stream flow period" means the period, beginning with the initial release of stored water from full reservoir conditions and ending with the reservoirs empty, when the water available from reservoir releases plus the natural stream flow is capable of producing the least amount of hydroelectric power in meeting system load requirements;

(e) "consumptive use" means use of water for domestic, municipal, stock-water, irrigation, mining or industrial purposes but does not include use for the generation of hydroelectric power;

(f) "dam" means a structure to impound water, including facilities for controlling the release of the impounded water;

(g) "entity" means an entity designated by either the United States of America or Canada under Article XIV and includes its lawful successor;

(h) "International Joint Commission" means the Commission established under Article VII of the Boundary Waters Treaty, 1909, or any body designated by the United States of America and Canada to succeed to the functions of the Commission under this Treaty;

(i) "maintenance curtailment" means an interruption or curtailment which the entity responsible therefor considers necessary for purposes of repairs, replacements, installations of equipment, performance of other maintenance work, investigations and inspections;

(j) "monthly load factor" means the ratio of the average load for a month to the integrated maximum load over one hour during that month;

(k) "normal full pool elevation" means the elevation to which water is stored in a reservoir by deliberate impoundment every year, subject to the availability of sufficient flow;

(l) "ratification date" means the day on which the instruments of ratification of the Treaty are exchanged;

(m) "storage" means the space in a reservoir which is usable for impounding water for flood control or for regulating stream flows for hydroelectric power generation;

(n) "Treaty" means this Treaty and its Annexes A and B;

(o) "useful life" means the time between the date of commencement of operation of a dam or facility and the date of its permanent retirement from service by reason of obsolescence or wear and tear which occurs notwithstanding good maintenance practices.

(2) The exercise of any power, or the performance of any duty, under the Treaty does not preclude a subsequent exercise or performance of the power or duty.

ARTICLE II

Development by Canada

(1) Canada shall provide in the Columbia River Basin in Canada 15,500,000 acre-feet of storage usable for improving the flow of the Columbia River.

(2) In order to provide this storage, which in the Treaty is referred to as the Canadian storage, Canada shall construct dams:

(a) on the Columbia River near Mica Creek, British Columbia, with approximately 7,000,000 acre-feet of storage;

(b) near the outlet of Arrow Lakes, British Columbia, with approximately 7,100,000 acre-feet of storage; and

(c) on one or more tributaries of the Kootenay River in British Columbia downstream from the Canada-United States of America boundary with storage equivalent in effect to approximately 1,400,000 acre-feet of storage near Duncan Lake, British Columbia.

(3) Canada shall commence construction of the dams as soon as possible after the ratification date.

ARTICLE III

Development by the United States of America respecting power

(1) The United States of America shall maintain and operate the hydroelectric facilities included in the base system and any additional hydroelectric facilities constructed on the main stem of the Columbia River in the United States of America in a manner that makes the most effective use of the improvement in stream flow resulting from operation of the Canadian storage for hydroelectric power generation in the United States of America power system.

(2) The obligation in paragraph (1) is discharged by reflecting in the determination of downstream power benefits to which Canada is entitled the assumption that the facilities referred to in paragraph (1) were maintained and operated in accordance therewith.

ARTICLE IV

Operation by Canada

(1) For the purpose of increasing hydroelectric power generation in the United States of America and Canada, Canada shall operate the Canadian storage in accordance with Annex A and pursuant to hydroelectric operating plans made thereunder. For the purposes of this obligation an operating plan if it is either the first operating plan or if in the view of either the United States of America or Canada departs substantially from the immediately preceding operating plan must, in order to be effective, be confirmed by an exchange of notes between the United States of America and Canada.

(2) For the purpose of flood control until the expiration of sixty years from the ratification date, Canada shall

(a) operate in accordance with Annex A and pursuant to flood control operating plans made thereunder

(i) 80,000 acre-feet of the Canadian storage described in Article II(2)(a),

(ii) 7,100,000 acre-feet of the Canadian storage described in Article II(2)(b),

(iii) 1,270,000 acre-feet of the Canadian storage described in Article II(2)(c),

provided that the Canadian entity may exchange flood control storage under subparagraph (ii) for flood control storage additional to that under subparagraph (i), at the location described in Article II(2)(a), if the entities agree that the exchange would provide the same effectiveness for control of floods on the Columbia River at the Dalles, Oregon;

(b) operate any additional storage in the Columbia River basin in Canada, when called upon by an entity designated by the United States of America for that purpose, within the limits of existing facilities and as the entity requires to meet flood control needs for the duration of the flood period for which the call is made.

(3) For the purpose of flood control after the expiration of 60 years from the ratification date, and for so long as the flows in the Columbia River in Canada continue to contribute to potential flood hazard in the United States of America, Canada shall, when called upon by an entity designated by the United States of America for that purpose, operate within the limits of existing facilities any storage in the Columbia River basin in Canada as the entity requires to meet flood control needs for the duration of the flood period for which the call is made.

(4) The return to Canada for hydroelectric operation and the compensation to Canada for flood control operation shall be as set out in Articles V and VI.

(5) Any water resource development, in addition to the Canadian storage, constructed in Canada after the ratification date shall not be operated in a way that adversely affects the stream flow control in the Columbia River within Canada so as to reduce the flood control and hydroelectric power benefits which the operation of the Canadian storage in accordance with the operating plans in force from time to time would otherwise produce.

(6) As soon as any Canadian storage becomes operable Canada shall commence operation thereof in accordance with this Article and in any event shall commence full operation of the Canadian storage described in Article II(2)(b) and Article II(2)(c) within five years of the ratification date and shall commence full operation of the balance of the Canadian storage within nine years of the ratification date.

ARTICLE V

Entitlement to downstream power benefits

(1) Canada is entitled to one half the downstream power benefits determined under Article VII.

(2) The United States of America shall deliver to Canada at a point on the Canada-United States of America boundary near Oliver, British Columbia, or at such other place as the entities may agree upon, the downstream power benefits to which Canada is entitled, less

(a) transmission loss,

(b) the portion of the entitlement disposed of under Article VIII(1), and

(c) the energy component described in Article VIII(4).

(3) The entitlement of Canada to downstream power benefits begins for any portion of Canadian storage upon commencement of its operation in accordance with Annex A and pursuant to a hydroelectric operating plan made thereunder.

ARTICLE VI

Payment for flood control

(1) For the flood control provided by Canada under Article IV(2)(a) the United States of America shall pay Canada in United States funds:

(a) 1,200,000 dollars upon the commencement of operation of the storage referred to in subparagraph (a)(i) thereof,

(b) 52,100,000 dollars upon the commencement of operation and the storage referred to in subparagraph (a)(ii) thereof, and

(c) 11,100,000 dollars upon the commencement of operation of the storage referred to in subparagraph (a)(iii) thereof.

(2) If full operation of any storage is not commenced within the time specified in Article IV, the amount set forth in paragraph (1) of this Article with respect to that storage shall be reduced as follows:

(a) under paragraph (1)(a), 4,500 dollars for each month beyond the required time,

(b) under paragraph (1)(b), 192,100 dollars for each month beyond the required time, and

(c) under paragraph (1)(c), 40,800 dollars for each month beyond the required time.

(3) For the flood control provided by Canada under Article IV(2)(b) the United States of America shall pay Canada in United States funds in respect only of each of the first four flood periods for which a call is made 1,875,000 dollars and shall deliver to Canada in respect of each and every call made, electric power equal to the hydroelectric power lost by Canada as a result of operating the storage to meet the flood control need for which the call was made, delivery to be made when the loss of hydroelectric power occurs.

(4) For each flood period for which flood control is provided by Canada under Article IV(3) the United States of America shall pay Canada in United States funds:

(a) the operating cost incurred by Canada in providing the flood control, and

(b) compensation for the economic loss to Canada arising directly from Canada foregoing alternative uses of the storage used to provide the flood control.

(5) Canada may elect to receive in electric power, the whole or any portion of the compensation under paragraph (4)(b) representing loss of hydroelectric power to Canada.

ARTICLE VII

Determination of downstream power benefits

(1) The downstream power benefits shall be the difference in the hydroelectric power capable of being generated in the United States of America with and without the use of Canadian storage, determined in advance, and is referred to in the Treaty as the downstream power benefits.

(2) For the purpose of determining the downstream power benefits:

(a) the principles and procedures set out in Annex B shall be used and followed;

(b) the Canadian storage shall be considered as next added to 13,000,000 acre-feet of the usable storage listed in Column 4 of the table in Annex B;

(c) the hydroelectric facilities included in the base system shall be considered as being operated to make the most effective use for hydroelectric power generation of the improvement in stream flow resulting from operation of the Canadian storage.

(3) The downstream power benefits to which Canada is entitled shall be delivered as follows:

(a) dependable hydroelectric capacity as scheduled by the Canadian entity, and

(b) average annual usable hydroelectric energy in equal amounts each month, or in accordance with a modification agreed upon under paragraph (4).

(4) Modification of the obligation in paragraph (3)(b) may be agreed upon by the entities.

ARTICLE VIII

Disposal of entitlement to downstream power benefits

(1) With the authorization of the United States of America and Canada evidenced by exchange of notes, portions of the downstream power benefits to which Canada is entitled may be disposed of within the United States of America. The respective general conditions and limits within which the entities may arrange initial disposals shall be set out in an exchange of notes to be made as soon as possible after the ratification date.

(2) The entities may arrange and carry out exchanges of dependable hydroelectric capacity and average annual usable hydroelectric energy to which Canada is entitled for average annual usable hydroelectric energy and dependable hydroelectric capacity respectively.

(3) Energy to which Canada is entitled may not be used in the United States of America except in accordance with paragraphs (1) and (2).

(4) The bypassing at dams on the main stem of the Columbia River in the United States of America of an amount of water which could produce usable energy equal to the energy component of the downstream power benefits to which Canada is entitled but not delivered to Canada under Article V or disposed of in accordance with paragraphs (1) and (2) at the time the energy component was not so delivered or disposed of, is conclusive evidence that such energy component was not used in the United States of America and that the entitlement of Canada to such energy component is satisfied.

ARTICLE IX

Variation of entitlement to downstream power benefits

(1) If the United States of America considers with respect to any hydroelectric power project planned on the main stem of the Columbia River between Priest Rapids Dam and McNary Dam that the increase in entitlement of Canada to downstream power benefits resulting from the operation of the project would produce a result which would not justify the United States of America in incurring the costs of construction and operation of the project, the United States of America and Canada at the request of the United States of America shall consider modification of the increase in entitlement.

(2) An agreement reached for the purposes of this Article shall be evidenced by an exchange of notes.

ARTICLE X

East-West standby transmission

(1) The United States of America shall provide in accordance with good engineering practice east-west standby transmission service adequate to safeguard the transmission from Oliver, British Columbia, to Vancouver, British Columbia, of the downstream power benefits to which Canada is entitled and to improve system stability of the east-west circuits in British Columbia.

(2) In consideration of the standby transmission service, Canada shall pay the United States of America in Canadian funds the equivalent of 1.50 United States dollars a year for each kilowatt of dependable hydroelectric capacity included in the downstream power benefits to which Canada is entitled.

(3) When a mutually satisfactory electrical coordination arrangement is entered into between the entities and confirmed by exchange of notes between the United States of America and Canada the obligation of Canada in paragraph (2) ceases.

ARTICLE XI

Use of improved stream flow

(1) Improvement in stream flow in one country brought about by operation of storage constructed under the treaty in the other country shall not be used directly or indirectly for hydroelectric power purposes except:

(a) in the case of use within the United States of America with the prior approval of the U.S. entity, and

(b) in the case of use within Canada with the prior approval of the authority in Canada having jurisdiction.

(2) The approval required by this article shall not be given except upon such conditions, consistent with the Treaty, as the entity or authority considers appropriate.

ARTICLE XII

Kootenai River development

(1) The United States of America for a period of 5 years from the ratification date, has the option to commence construction of a dam on the Kootenai River near Libby, Montana, to provide storage to meet flood control and other purposes in the United States of America. The storage reservoir of the dam shall not raise the level of the Kootenai River at the Canada-United States of America boundary above an elevation consistent with a normal full pool elevation at the dam of 2,459 feet, United States Coast and Geodetic Survey datum, 1929 General Adjustment, 1947 International Supplemental Adjustment.

(2) All benefits which occur in either country from the construction and operation of the storage accrue to the country in which the benefits occur.

(3) The United States of America shall exercise its option by written notice to Canada and shall submit with the notice a schedule of construction which shall include provision for commencement of construction, whether by way of railroad relocation work or otherwise, within 5 years of the ratification date.

(4) If the United States of America exercises its option, Canada in consideration of the benefits accruing to it under paragraph (2) shall prepare and make available for flooding the land in Canada necessary for the storage reservoir of the dam within a period consistent with the construction schedule.

(5) If a variation in the operation of the storage is considered by Canada to be of advantage to it the United States of America shall, upon request, consult with Canada. If the United States of America determines that the variation would not be to its disadvantage it shall vary the operation accordingly.

(6) The operation of the storage by the United States of America shall be consistent with any order of approval which may be in force from time to time relating to the levels of Kootenay Lake made by the International Joint Commission under the Boundary Waters Treaty, 1909.

(7) Any obligation of Canada under this Article ceases if the United States of America, having exercised the option, does not commence construction of the dam in accordance with the construction schedule.

(8) If the United States of America exercises the option it shall commence full operation of the storage within seven years of the date fixed in the construction schedule for commencement of construction.

(9) If Canada considers that any portion of the land referred to in paragraph (4) is no longer needed for the purpose of this Article the United States of America and Canada, at the request of Canada, shall consider modification of the obligation of Canada in paragraph (4).

(10) If the Treaty is terminated before the end of the useful life of the dam Canada shall for the remainder of the useful life of the dam continue to make available for the storage reservoir of the dam any portion of the land made available under paragraph (4) that is not required by Canada for purposes of diversion of the Kootenay River under Article XIII.

ARTICLE XIII

Diversions

(1) Except as provided in this Article neither the United States of America nor Canada shall, without the consent of the other evidenced by an exchange of notes, divert for any use, other than a consumptive use, any water from its natural channel in a way that alters the flow of any water as it crosses the Canada-United States of America boundary within the Columbia River basin.

(2) Canada has the right, after the expiration of twenty years from the ratification date, to divert not more than 1,500,000 acre-feet of water a year from the Kootenay River in the vicinity of Canal Flats, British Columbia, to the headwaters of the Columbia River, provided that the diversion does not reduce the flow of the Kootenay River immediately downstream from the point of diversion below the lesser of 200 cubic feet per second or the natural flow.

(3) Canada has the right, exercisable at any time during the period commencing sixty years after the ratification date and expiring one hundred years after the ratification date, to divert to the headwaters of the Columbia River any water which, in its natural channel, would flow in the Kootenay River across the Canada-United States of America boundary, provided that the diversion does not reduce the flow of the Kootenay River at the Canada-United States of America boundary near Newgate, British Columbia, below the lesser of 2,500 cubic feet per second or the natural flow.

(4) During the last twenty years of the period within which Canada may exercise the right to divert described in paragraph (3) the limitation on diversion is the lesser of 1,000 cubic feet per second or the natural flow.

(5) Canada has the right:

(a) if the United States of America does not exercise the option in Article XII(1), or

(b) if it is determined that the United States of America, having exercised the option, did not commence construction of the dam referred to in Article XII in accordance therewith or that the United States of America is in breach of the obligation in that Article to commence full operation of the storage,

to divert to the headwaters of the Columbia River any water which, in its natural channel, would flow in the Kootenay River across the Canada-United States of America boundary, provided that the diversion does not reduce the flow of the Kootenay River at the Canada-United States of America boundary near Newgate, British Columbia, below the lesser of 1,000 cubic feet per second or the natural flow.

(6) If a variation in the use of the water diverted under paragraph (2) is considered by the United States of America to be of advantage to it Canada shall, upon request, consult with the United States of America. If Canada determines that the variation would not be to its disadvantage it shall vary the use accordingly.

ARTICLE XIV

Arrangements for implementation

(1) The United States of America and Canada shall each, as soon as possible after the ratification date, designate entities and when so designated the entities are empowered and charged with the duty to formulate and carry out the operating arrangements necessary to implement the Treaty. Either the United States of America or Canada may designate one or more entities. If more than one is designated the powers and duties conferred upon the entities by the Treaty shall be allocated among them in the designation.

(2) In addition to the powers and duties dealt with specifically elsewhere in the Treaty the powers and duties of the entities include:

(a) coordination of plans and exchange of information relating to facilities to be used in producing and obtaining the benefits contemplated by the Treaty,

(b) calculation of and arrangements for delivery of hydroelectric power to which Canada is entitled for providing flood control,

(c) calculation of the amounts payable to the United States of America for standby transmission services,

(d) consultation on requests for variations made pursuant to Articles XII(5) and XIII (6),

(e) the establishment and operation of a hydrometeorological system as required by Annex A,

(f) assisting and cooperating with the Permanent Engineering Board in the discharge of its functions,

(g) periodic calculation of accounts,

(h) preparation of the hydroelectric operating plans and the flood control operating plans for the Canadian storage together with determination of the downstream power benefits to which Canada is entitled,

(i) preparation of proposals to implement Article VIII and carrying out any disposal authorized or exchange provided for therein,

(j) making appropriate arrangements for delivery to Canada of the downstream power benefits to which Canada is entitled including such matters as load factors for delivery, times and points of delivery, and calculation of transmission loss.

(k) preparation and implementation of detailed operating plans that may produce results more advantageous to both countries than those that would arise from operation under the plans referred to in Annexes A and B.

(3) The entities are authorized to make maintenance curtailments. Except in case of emergency, the entity responsible for a maintenance curtailment shall give notice to the corresponding United States or Canadian entity of the curtailment, including the reason therefor and the probable duration thereof and shall both schedule the curtailment with a view to minimizing its impact and exercise due diligence to resume full operation.

(4) The United States of America and Canada may by an exchange of notes empower or charge the entities with any other matter coming within the scope of the Treaty.

ARTICLE XV

Permanent Engineering Board

(1) A Permanent Engineering Board is established consisting of four members, two to be appointed by Canada and two by the United States of America. The initial appointments shall be made within three months of the ratification date.

(2) The Permanent Engineering Board shall:

(a) assemble records of the flows of the Columbia River and the Kootenay River at the Canada-United States of America boundary;

(b) report to the United States of America and Canada whenever there is substantial deviation from the hydroelectric and flood control operating plans and if appropriate include in the report recommendations for remedial action and compensatory adjustments;

(c) assist in reconciling differences concerning technical or operational matters that may arise between the entities;

(d) make periodic inspections and require reports as necessary from the entities with a view to ensuring that the objectives of the Treaty are being met;

(e) make reports to the United States of America and Canada at least once a year of the results being achieved under the Treaty and make special reports concerning any matter which it considers should be brought to their attention;

(f) investigate and report with respect to any other matter coming within the scope of the Treaty at the request of either the United States of America or Canada.

(3) Reports of the Permanent Engineering Board made in the course of the performance of its functions under this Article shall be prima facie evidence of the facts therein contained and shall be accepted unless rebutted by other evidence.

(4) The Permanent Engineering Board shall comply with directions, relating to its administration and procedures, agreed upon by the United States of America and Canada as evidenced by an exchange of notes.

ARTICLE XVI

Settlement of differences

(1) Differences arising under the Treaty which the United States of America and Canada cannot resolve may be referred by either to the International Joint Commission for decision.

(2) If the International Joint Commission does not render a decision within three months of the referral or within such other period as may be agreed upon by the United States of America and Canada, either may then submit the difference to arbitration by written notice to the other.

(3) Arbitration shall be by a tribunal composed of a member appointed by Canada, a member appointed by the United States of America and a member appointed jointly by the United States of America and Canada who shall be Chairman. If within six weeks of the delivery of a notice under paragraph (2) either the United States of America or Canada has failed to appoint its member, or they are unable to agree upon the member who is to be Chairman, either the United States of America or Canada may request the President of the International Court of Justice to appoint the member or members. The decision of a majority of the members of an arbitration tribunal shall be the decision of the tribunal.

(4) The United States of America and Canada shall accept as definitive and binding and shall carry out any decision of the International Joint Commission or an arbitration tribunal.

(5) Provision for the administrative support of a tribunal and for remuneration and expenses of its members shall be as agreed in an exchange of notes between the United States of America and Canada.

(6) The United States of America and Canada may agree by an exchange of notes on alternative procedures for settling differences arising under the Treaty including reference of any difference to the International Court of Justice for decision.

ARTICLE XVII

Restoration of Pretreaty legal status

(1) Nothing in this Treaty and no action taken or foregone pursuant to its provisions shall be deemed, after its termination or expiration, to have abrogated or modified any of the rights or obligations of the United States of America or Canada under then existing international law, with respect to the uses of the water resources of the Columbia River basin.

(2) Upon termination of this Treaty, the Boundary Waters Treaty, 1909, shall, if it has not been terminated, apply to the Columbia River basin, except insofar as the provisions of that Treaty may be inconsistent with any provision of this Treaty which continues in effect.

(3) Upon termination of this Treaty, if the Boundary Waters Treaty, 1909, has been terminated in accordance with Article XIV of that Treaty, the provisions of Article II of that Treaty shall continue to apply to the waters of the Columbia River basin.

(4) If upon the termination of this Treaty Article II of the Boundary Waters Treaty, 1909, continues in force by virtue of paragraph (3) of this Article the effect of Article II of that Treaty with respect to the Columbia River basin may be terminated by either the United States of America or Canada delivering to the other one year's written notice to that effect; provided however that the notice may be given only after the termination of this Treaty.

(5) If, prior to the termination of this Treaty, Canada undertakes works usable for and relating to a diversion of water from the Columbia River basin, other than works authorized by or undertaken for the purpose of exercising a right under Article XIII or any other provision of this Treaty, paragraph (3) of this Article shall cease to apply one year after delivery by either the United States of America or Canada to the other of written notice to that effect.

ARTICLE XVIII

Liability for damage

(1) The United States of America and Canada shall be liable to the other and shall make appropriate compensation to the other in respect of any act, failure to act, omission or delay amounting to a breach of the Treaty or of any of its provisions other than an act, failure to act, omission or delay occurring by reason of war, strike, major calamity, act of God, uncontrollable force or maintenance curtailment.

(2) Except as provided in paragraph (1) neither the United States of America nor Canada shall be liable to the other or to any person in respect of any injury, damage or loss occurring in the territory of the other caused by any act, failure to act, omission or delay under the Treaty whether the injury, damage or loss results from negligence or otherwise.

(3) The United States of America and Canada, each to the extent possible within its territory, shall exercise due diligence to remove the cause of and to mitigate the

effect of any injury, damage or loss occurring in the territory of the other as a result of any act, failure to act, omission or delay under the Treaty.

(4) Failure to commence operation as required under Articles IV and XII is not a breach of the Treaty and does not result in the loss of rights under the Treaty if the failure results from a delay that is not wilful or reasonably avoidable.

(5) The compensation payable under paragraph (1):

(a) in respect of a breach by Canada of the obligation to commence full operation of a storage, shall be forfeiture of entitlement to downstream power benefits resulting from the operation of that storage, after operation commences, for a period equal to the period between the day of commencement of operation and the day when commencement should have occurred;

(b) in respect of any other breach by either the United States of America or Canada, causing loss of power benefits, shall not exceed the actual loss in revenue from the sale of hydroelectric power.

ARTICLE XIX

Period of Treaty

(1) The Treaty shall come into force on the ratification date.

(2) Either the United States of America or Canada may terminate the Treaty other than Article XIII (except paragraph (1) thereof), Article XVII and this Article at any time after the Treaty has been in force for sixty years if it has delivered at least ten years written notice to the other of its intention to terminate the Treaty.

(3) If the Treaty is terminated before the end of the useful life of a dam built under Article XII then, notwithstanding termination, Article XII remains in force until the end of the useful life of the dam.

(4) If the Treaty is terminated before the end of the useful life of the facilities providing the storage described in Article IV(3) and if the conditions described therein exist then, notwithstanding termination, Articles IV(3) and VI (4) and (5) remain in force until either the end of the useful life of those facilities or until those conditions cease to exist, whichever is the first to occur.

ARTICLE XX

Ratification

The instruments of ratification of the Treaty shall be exchanged by the United States of America and Canada at Ottawa, Canada.

ARTICLE XXI

Registration with the United Nations

In conformity with Article 102 of the Charter of the United Nations, the Treaty shall be registered by Canada with the Secretariat of the United Nations.

This Treaty has been done in duplicate copies in the English language.

In Witness Whereof the undersigned, duly authorized by their respective Governments, have signed this Treaty at Washington, District of Columbia, United States of America, this 17th day of January, 1961.

For the United States of America:

DWIGHT D. EISENHOWER
President
of the United States of America

CHRISTIAN A. HERTER
Secretary of State

ELMER F. BENNETT
Under Secretary of the Interior

For Canada:

JOHN G. DIEFENBAKER
Prime Minister of Canada

E. D. FULTON
Minister of Justice

A. D. P. HEENEY
Ambassador Extraordinary and Plenipotentiary of Canada to the United States of America

ANNEX A—PRINCIPLES OF OPERATION

GENERAL

1. The Canadian storage provided under Article II will be operated in accordance with the procedures described herein.

2. A hydrometeorological system, including snow courses, precipitation stations and streamflow gauges will be established and operated, as mutually agreed by the entities and in consultation with the Permanent Engineering Board, for use in establishing data for detailed programming of flood control and power operations. Hydrometeorological information will be made available to the entities in both countries for immediate and continuing use in flood control and power operations.

3. Sufficient discharge capacity at each dam to afford the desired regulation for power and flood control will be provided through outlet works and turbine installations as mutually agreed by the entities. The discharge capacity provided for flood control operations will be large enough to pass inflow plus sufficient storage releases during the evacuation period to provide the storage space required. The discharge capacity will be evaluated on the basis of full use of any conduits provided for that purpose plus one half the hydraulic capacity of the turbine installation at the time of commencement of the operation of storage under the Treaty.

4. The outflows will be in accordance with storage reservation diagrams and associated criteria established for flood control purposes and with reservoir-balance relationships established for power operations. Unless otherwise agreed by the entities the average weekly outflows shall not be less than 3,000 cubic feet per second at the dam described in Article II(2)(a), not less than 5,000 cubic feet per second at the dam described in Article II(2)(b) and not less than 1,000 cubic feet per second at the dam described in Article II(2)(c). These minimum average weekly releases may be scheduled by the Canadian entity as required for power or other purposes.

FLOOD CONTROL

5. For flood control operation, the United States entity will submit flood control operating plans which may consist of or include flood control storage reservation diagrams and associated criteria for each of the dams. The Canadian entity will operate in accordance with these diagrams or any variation which the entities agree will not derogate from the desired aim of the flood control plan. The use of these diagrams will be based on data obtained in accordance with paragraph 2. The diagrams will consist of relationships specifying the flood control storage reservations required at indicated times of the year for volumes of forecast runoff. After consultation with the Canadian entity the United States entity may from time to time as conditions warrant adjust these storage reservation diagrams within the general limitations of flood control operation. Evacuation of the storages listed hereunder will be guided by the flood control storage reservation diagrams and refill will be as requested by the United States entity after consultation with the Canadian entity. The general limitations of flood control operation are as follows:

(a) The dam described in Article II(2)(a): The reservoir will be evacuated to provide up to 80,000 acre-feet of storage, if required, for flood control use by May 1 of each year.

(b) The dam described in Article II(2)(b): The reservoir will be evacuated to provide up to 7,100,000 acre-feet of storage, if required, for flood control use by May 1 of each year.

(c) The dam described in Article II(2)(c): The reservoir will be evacuated to provide up to 700,000 acre-feet of storage, if required, for flood control use by April 1 of each year and up to 1,270,000 acre-feet of storage, if required, for flood control use by May 1 of each year.

(d) The Canadian entity may exchange flood control storage provided in the reservoir referred to in subparagraph (b) for additional storage provided in the reservoir referred to in subparagraph (a) if the entities agree that the exchange would provide the same effectiveness for control of floods on the Columbia River at The Dalles, Oregon.

POWER

6. For power generating purposes the 15,500,000 acre-feet of Canadian storage will be operated in accordance with operating plans designed to achieve optimum power generation downstream in the United States of America until such time as power generating facilities are installed at the site referred to in paragraph 5(a) or at sites in Canada downstream therefrom.

7. After at-site power is developed at the site referred to in paragraph 5(a) or power generating facilities are placed in operation in Canada downstream from that site, the storage operation will be changed so as to be operated in accordance with operating plans designed to achieve optimum power generation at-site in Canada and downstream in the United States of America and Canada, including consideration of any agreed electrical coordination between the two countries. Any reduction in the downstream power benefits in the United States of America resulting from that change in operation of the Canadian storage shall not exceed in any one year the reduction in downstream power benefits in the United States of America which would result from reducing by 500,000 acre-feet the Canadian storage operated to achieve optimum power generation in the United States of America and shall not exceed at any time during the period of the Treaty the reduction in downstream power benefits in the United States of America which would result from similarly reducing the Canadian storage by 3,000,000 acre-feet.

8. After at-site power is developed at the site referred to in paragraph 5(a) or power generating facilities are placed in operation in Canada downstream from that site, storage may be operated to achieve optimum generation of power in the United States of America alone if mutually agreed by the entities in which event the United States of America shall supply power to Canada to offset any reduction in Canadian generation which would be created as a result of such operation as compared to operation to achieve optimum power generation at-site in Canada and downstream in the United States of America and Canada. Similarly, the storage may be operated to achieve optimum generation of power in Canada alone if mutually agreed by the entities in which event Canada shall supply power to the United States of America to offset any reduction in the United States generation which would be created as a result of such operation as compared to operation to achieve optimum power generation at-site in Canada and downstream in the United States of America and Canada.

9. Before the first storage becomes operative, the entities will agree on operating plans and the resulting downstream power benefits for each year until the total of 15,500,000 acre-feet of storage in Canada becomes operative. In addition, commencing five years before the total of 15,500,000 acre-feet of storage is expected to become operative, the entities will agree annually on operating plans and the resulting downstream power benefits for the sixth succeeding year of operation thereafter. This procedure will continue during the life of the

Treaty, providing to both the entities, in advance, an assured plan of operation of the Canadian storage and a determination of the resulting downstream power benefits for the next succeeding five years.

ANNEX B—DETERMINATION OF DOWNSTREAM POWER BENEFITS

1. The downstream power benefits in the United States of America attributable to operation in accordance with Annex A of the storage provided by Canada under Article II will be determined in advance and will be the estimated increase in dependable hydroelectric capacity in kilowatts for agreed critical stream flow periods and the increase in average annual usable hydroelectric energy output in kilowatt hours on the basis of an agreed period of stream flow record.

2. The dependable hydroelectric capacity to be credited to Canadian storage will be the difference between the average rates of generation in kilowatts during the appropriate critical stream flow periods for the United States of America base system, consisting of the projects listed in the table, with and without the addition of the Canadian storage, divided by the estimated average critical period load factor. The capacity credit shall not exceed the difference between the capability of the base system without Canadian storage and the maximum feasible capability of the base system with Canadian storage, to supply firm load during the critical stream flow periods.

3. The increase in the average annual usable hydroelectric energy will be determined by first computing the difference between the available hydroelectric energy at the United States base system with and without Canadian storage. The entities will then agree upon the part of available energy which is usable with and without Canadian storage, and the difference thus agreed will be the increase in average annual usable hydroelectric energy. Determination of the part of the energy which is usable will include consideration of existing and scheduled transmission facilities and the existence of markets capable of using the energy on a contractual basis similar to the then existing contracts. The part of the available energy which is considered usable shall be the sum of:

(a) the firm energy,

(b) the energy which can be used for thermal power displacement in the Pacific Northwest Area as defined in Paragraph 7, and

(c) the amount of the remaining portion of the available energy which is agreed by the entities to be usable and which shall not exceed in any event 40% of that remainder.

4. An initial determination of the estimated downstream power benefits in the United States of America from Canadian storage added to the United States base system will be made before any of the Canadian storage becomes operative. This determination will include estimates of the downstream power benefits for each year until the total of 15,500,000 acre-feet of Canadian storage becomes operative.

5. Commencing five years before the total of 15,500,000 acre-feet of storage is expected to become operative, estimates of downstream power benefits will be calculated annually for the sixth succeeding year on the basis of the assured plan of operation for that year.

6. The critical stream flow period and the details of the assured plan of operation will be agreed upon by the entities at each determination. Unless otherwise agreed upon by the entities, the determination of the downstream power benefits shall be based upon stream flows for the twenty year period beginning with July 1928 as contained in the report entitled Modified Flows at Selected Power Sites—Columbia River Basin, dated June 1957. No retroactive adjustment in downstream power benefits will be made at any time during the period of the Treaty. No reduction in the downstream power benefits credited to Canadian storage will be made as a result of the load estimate in the United States of America, for the year for which the determination is made, being less than the load estimate for the preceding year.

7. In computing the increase in dependable hydroelectric capacity and the increase in average annual hydroelectric energy, the procedure shall be in accordance with the three steps described below and shall encompass the loads of the Pacific Northwest Area. The Pacific Northwest Area, for purposes of these determinations, shall be Oregon, Washington, Idaho and Montana west of the Continental Divide but shall exclude areas served on the ratification date by the California Oregon Power Company and Utah Power and Light Company.

STEP I

The system for the period covered by the estimate will consist of the Canadian storage, the United States base system, any thermal installation operated in coordination with the base system, and additional hydroelectric projects which will provide storage releases usable by the base system or which will use storage releases that are usable by the base system. The installations included in this system will be those required, with allowance for adequate reserves, to meet the forecast power load to be served by this system in the United States of America, including the estimated flow of power at points of inter-connection with adjacent areas, subject to paragraph 3, plus the portion of the entitlement of Canada that is expected to be used in Canada. The capability of this system to supply this load will be determined on the basis that the system will be operated in accordance with the established operating procedures of each of the projects involved.

STEP II

A determination of the energy capability will be made using the same thermal installation as in step I, the United States base system with the same installed capacity as in step I and Canadian storage.

STEP III

A similar determination of the energy capability will be made using the same thermal installation as in step I, and the United States base system with the same installed capacity as in step I.

8. The downstream power benefits to be credited to Canadian storage will be the differences between the determinations in step II and step III in dependable hydroelectric capacity and in average annual usable hydroelectric energy, made in accordance with paragraphs 2 and 3.

ANNEX B.—*Table—Base system*

Project	Stream	Stream mile above mouth	Usable storage, acre-feet	Normal elevation		Gross head, feet	Initial installation		Estimated ultimate installation	
				Pool, feet	Tailwater, feet		Number of units	Plant kilowatts (nameplate)	Number of units	Plant kilowatts (nameplate)
Hungry Horse	South Fork Flathead	5	[1] 3,161,000	3,560	3,083	477	4	285,000	4	285,000
Kerr	Flathead	73	1,219,000	2,893	2,706	187	3	168,000	3	168,000
Thompson Falls	Clark Fork	209	Pondage	2,396	2,336	60	6	30,000	8	65,000
Noxon Rapids	do	170	Pondage	2,331	2,179	152	4	336,000	5	420,000
Cabinet Gorge	do	150	Pondage	2,175	2,078	97	4	200,000	6	300,000
Albeni Falls	Pend Oreille	90	1,155,000	2,062	2,034	28	3	42,600	3	42,600
Box Canyon	do	34	Pondage	2,031	1,989	42	4	60,000	4	60,000
Grand Coulee	Columbia	597	[1] 5,232,000	[1] [3] 1,290	947	343	18	1,944,000	34	3,672,000
Chief Joseph	do	546	Pondage	946	775	171	16	1,024,000	27	1,728,000
Wells [2]	do	516	Pondage	775	707	68	6	400,000	10	666,700
Rocky Reach	do	474	Pondage	707	614	93	7	711,550	11	1,118,150
Rock Island	do	453	Pondage	[3] 608	570	38	10	212,100	10	212,100
Wanapum	do	415	Pondage	570	486	84	10	831,250	16	1,330,000
Priest Rapids	do	397	Pondage	486	406	80	10	788,500	16	1,261,600
Brownlee	Snake	285	974,000	2,077	1,805	272	4	360,400	6	540,600
Oxbow	do	273	Pondage	1,805	1,683	122	4	190,000	5	237,500
Ice Harbor	do	10	Pondage	440	343	97	3	270,000	6	540,000
McNary	Columbia	292	Pondage	340	265	75	14	980,000	20	1,400,000
John Day	do	216	Pondage	265	161	104	8	1,080,000	20	2,700,000
The Dalles	do	192	Pondage	160	74	86	[4] 16	1,119,000	[3] 24	1,743,000
Bonneville	do	145	Pondage	74	15	59	10	518,400	16	890,400
Kootenay Lake	Kootenay	16	673,000	1,745						
Chelan	Chelan	0	676,000	1,010	707	303	2	48,000	4	96,000
Coeur d'Alene Lake	Coeur d'Alene	102	223,000	2,128						
Total, 24 projects			[1] 13,313,000			3,128	166	11,598,800	258	19,476,650

[1] In determining the base system capabilities with and without Canadian storage the Hungry Horse reservoir storage will be limited to 3,008,000 acre-feet (normal full pool elevation of 3,560 feet) and the Grand Coulee project will not include the effect of adding flashboards, limiting the storage to 5,072,000 acre-feet (normal full pool elevation of 1,288 feet). The total usable storage of the base system as so adjusted will be 13,000,000 acre-feet.

[2] With flashboards.

[3] The Wells project is not presently under construction; when this project or any other project on the main stem of the Columbia River is completed, they will be integral components of the base system.

[4] Includes 2 13,500 kilowatt units for fish attraction water.

The PRESIDING OFFICER. Under the agreement, the debate is limited to 45 minutes, the time to be controlled by the majority leader and the minority leader.

Mr. SPARKMAN. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator from Alabama is recognized for 10 minutes.

Mr. SPARKMAN. Mr. President, it is an honor and a pleasure for me to speak for the Committee on Foreign Relations in recommending that the Senate give its approval to the Columbia River Treaty. This treaty is designated as Executive C, 87th Congress, 1st session.

The treaty was signed on January 17, 1961, and was sent to the Senate on the same day. Public hearings were held on March 8, 1961. During the hearings a number of Senators testified in support of this treaty; and detailed presentations were made by the Secretary of the Interior, Stewart Udall; by the Deputy Assistant Secretary of State, Ivan B. White; and by the Chief of the Army Corps of Engineers, Lt. Gen. Emerson C. Itschner. In addition, a number of private witnesses appeared in favor of the treaty. Communications received by the committee have been uniformly favorable. In light of that background, the committee voted unanimously, on March 14, to recommend the treaty favorably to the Senate.

Mr. President, I know that several Senators from States of the Northwest will wish to speak on the merits of the treaty; and, therefore, I shall confine my remarks to a brief summary of its main features. There is available in Executive C, in the hearing record, and in the committee report an abundance of information.

Perhaps the best way for the Senators to grasp the significance of the treaty is to look at the map which is to be found at the front of the hearing record and at the beginning of the committee report. One can see on that map what a vast area the Columbia River basin covers. The river drains and area touching six States of the United States and the Province of British Columbia, in Canada. This is a total area of 259,000 square miles, of which all but 15 percent is in the United States.

Senators can also readily obtain, from examining the map, the basic concept of the treaty. Three large storage dams will be built in Canada. These dams will double the present storage capacity for regulating the flow of the main part of the Columbia River. This increased storage capacity will be used for two primary purposes: for controlling floods, and for increased generation of electric power. The treaty also makes possible the construction, in Montana, of the great Libby Dam. Canadian consent for this construction is necessary, because the dam would cause water to back into Canada a distance of 42 miles.

The new electric power which will result from the new Canadian storage and Libby Dam are expected to result in the addition of nearly 2 billion kilowatts of power for the benefit of the people of Canada and the people of the United States. This power will be generated at very low cost—about half the cost of the power now being generated at Bonneville Dam, in Oregon.

The installation built under this treaty will make it possible to eliminate major floods on the lower Columbia River. The fact that the last major flood on the Columbia cost at least 34 lives and $100 million worth of property damage gives one some idea of the tremendous benefits to be derived from finally taming the Columbia River.

Mr. President, Senators will naturally ask how these great benefits under the Columbia River Treaty will be paid for. Canada is undertaking to build the new storage dams, at an estimated cost of $345 million. The United States is going to pay Canada, for flood-control benefits, sums, depending on the amount of flood-control service rendered, which will not exceed $72 million. The new electrical power generated in the United States as a result of the new Canadian storage will be shared 50–50 with Canada. In addition to these direct costs there will be some expense to the United States for additional power generation and transmission facilities, in order to take advantage of the increased flow of water. It is estimated that over the next 10 years this cost will approximate $150 million. I am not including in this estimate the cost of Libby Dam, which has been authorized by the Congress since 1950. Looking ahead beyond the next decade, it is also likely that further power generation facilities may be added along the river, in projects which have an estimated cost of $268 million.

Is this treaty with Canada, which the Senate is being asked to approve, a good bargain? President Eisenhower and Prime Minister Diefenbaker have said it is. They signed the treaty. Secretary of the Interior Udall, General Itschner of the Corps of Engineers, and Deputy Assistant Secretary of State White, speaking for the Kennedy administration, have testified in glowing terms on the benefits of the treaty, and have urged prompt ratification.

Mr. President, I have been stressing benefits of the treaty largely in economic terms. From the point of view of our relations with Canada, the treaty is also a great step forward. Without the cooperation of Canada, it is completely certain that the best use of the Columbia River resources could not be made. Independent development of the river would be much more costly, and it would be sure to lead to trouble. This treaty reflects hard negotiations and mutual concessions. It is the view of the Committee on Foreign Relations that its implementation will inevitably draw Canada and the United States closer together. I am sure that is what we all want.

Mr. LAUSCHE. Mr. President, I ask unanimous consent that I may proceed out of order and have my remarks printed in the RECORD as a part of the general debate on the Columbia River Treaty.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio? The Chair hears none, and it is so ordered.

Mr. LAUSCHE. Mr. President, I support the treaty which is pending before the Senate this afternoon for action by the Senate. I think its drafting and its ultimate consummation will establish a milestone in the course governments ought to follow in an effort to develop common water basins.

The United States and Canada have had two common watersheds which have been under discussion, at some times with views which have been conflicting. One is the Columbia River basin, which has its beginning in Canada, flows into the United States, and finally empties into the Pacific Ocean. The other is the Great Lakes water basin, which drains a great area of land not only in Canada but also in the United States.

Based upon the similarity of the issues involved dealing with the disputes which existed with regard to the development of the Columbia River basin and of the Great Lakes basin, I wish to point out to my colleagues the lesson to be learned from the treaty now under consideration.

For about 20 years Canada had been talking about diverting the waters out of the Columbia River into the Fraser River. If that had been done, the water flow of the Columbia River in the United States would have been reduced to the point that there would have been damage to U.S. hydroelectric generation and a lowering of the amount of water available for irrigation.

Senators and Representatives from the Northwest viewed this ostensible threat by Canada as a great danger to the economies of Washington, of Oregon, and of Idaho, and of Montana especially, and they were gravely concerned that Canada might take unilateral action to divert those waters.

While the people of the Northwest were apprehensive about this threat, the people living in Ohio, in Pennsylvania, in New York, and in Indiana were concerned, as were the people of Canada, about the threat of the United States to divert waters out of the Great Lakes, through the Chicago Sanitation Canal, into the Mississippi River, and finally into the Gulf of Mexico.

I have served in the Senate 4 years. Each year there have been presented to this body bills to authorize Chicago to divert waters out of the Great Lakes and to lower the flow of water in the St. Lawrence and in four of the Great Lakes. The facts pertaining to the Great Lakes basin and those pertaining to the Columbia River basin are substantially similar. In each instance a diversion was intended. In the Columbia River basin, the diversion was to be to the Fraser River. In the Great Lakes basin, the diversion was to be to Chicago.

The diversion threatened was the cause of apprehension on the one hand to the United States, and on the other hand to Canada in respect to the Great Lakes basin.

Canada with the United States negotiated a settlement, and that negotiation was in progress for some time.

At this time I wish to give credit to the Senators from Oregon [Mr. MORSE and Mrs. NEUBERGER], the Senators from

Idaho [Mr. DWORSHAK and Mr. CHURCH], and the Senators from Washington [Mr. MAGNUSON and Mr. JACKSON], and the Senators from Montana [Mr. MANSFIELD and Mr. MURRAY], for their contributions toward a solution of the problem in the Columbia River basin, achieved bilaterally by Canada and the United States.

While bilateral cooperation was in progress in the Northwest, in the Great Lakes basin, Illinois was asking for a diversion of waters not on a bilateral basis of consent but on the basis that the United States on its own, disregarding the claims and the rights of Canada, would proceed to lower the waters in that basin.

The facts and the principles involved were nearly identical, but in one basin a solution was found through negotiation and a proposed treaty. In the Great Lakes basin the United States was urged to take one-sided action, disregarding the wishes of Canada completely about what should or should not be done.

There is no question that if the waters of the Great Lakes are diverted by Chicago, the level of the lakes below Chicago will be lowered and the navigation capacity of the lakes and the St. Lawrence River will be affected. In addition, the ability to generate hydroelectric power will be seriously impaired.

In spite of those facts, each session there has been submitted to the Congress a bill requesting the United States to take the unpardonable, indefensible, unilateral action of taking water which partly belongs to Canada.

In the hearing before the Committee on Foreign Relations with regard to the Columbia River Basin Treaty, as I pointed out earlier today, testimony was given by the Honorable Stewart L. Udall, Secretary of the Interior. I should like to quote from the Secretary's testimony and to make comments upon it.

The Secretary recited a number of things which were good, achieved through the treaty, and he said:

It will remove the potential of diversion of the upper Columbia River into the Fraser River which could have resulted in disastrous power losses in the United States estimated by the Corps of Engineers to be in excess of $50 million annually. * * *

I then asked Secretary Udall this question—

Canada contemplated diverting the upper Columbia River into the Fraser River; is that a correct understanding?

Secretary Udall replied—

At one time, Senator, studies were made, and this was something which was discussed and was contemplated.

We were talking about diverting the waters of the Columbia, and it is simple to see that anyone living in the United States in proximity to the Columbia River would have to become greatly distressed to know that the flow of water into the Columbia was to be lowered by a unilateral act up in Canada.

Continuing to read from page 11 of the transcript of the hearing—

Senator LAUSCHE. If that had been done, would it have seriously affected interests in the United States, especially those that were to be served by the Columbia River in the United States?

Secretary UDALL. Yes. It would have had a very heavy impact naturally because it would have meant interruption——

Senator LAUSCHE. Was there grave concern on the part of our Government that Canada might have taken that action and thus affected the normal flows of water in the Columbia River basin to the extent that the economy of the United States would be adversely impaired?

Secretary UDALL. That is correct, Senator.

As I have already stated, the same situation prevails in the Great Lakes basin.

Mr. Udall further went on to answer—

Well, this treaty, this agreement, I think, certainly bears out the point you make, that we finally have resolved this dispute by entering into an agreement on it rather than by unilateral action which might have resulted in a case, perhaps, which would have gone to court in international law.

Senator LAUSCHE. That is, our Government, if Canada had impounded waters that would have resulted in an adverse effect upon our right to use the normal flow of the Columbia River, would have challenged that right from a legal standpoint.

Secretary UDALL. Well, I daresay that this may have been the result, Senator. I cannot say for certain.

I direct attention now to the testimony of Mr. White, in which he proceeds in much the same manner to describe great achievements through the treaty, and especially to point out that by bilateral action, instead of unilateral action, the problem had been solved. Mr. White is the Deputy Assistant to the Secretary of State. I said to Mr. White—

Mr. White, in the second to the last paragraph of your prepared statement is contained this declaration:

"Finally, one of the most important objectives of the U.S. delegation was to remove the possibility, no matter how remote, that Canada, in the absence of an agreement for cooperative development of the Columbia River, might decide to divert the waters of the Columbia River into the Fraser River basin which empties into the sea at Vancouver. This objective has been achieved for at least the next 60 years"—

Which is the life of the treaty. Continuing to read from the transcript of the hearing, I asked Mr. White—

How long has that subject of diverting the waters of the Columbia into the Fraser River been under discussion?

Mr. WHITE. I do not know the exact period, but I think in one form or another it has been under discussion for more than a decade in Canada.

I asked a further question:

Now then, if the waters had been diverted out of the Columbia into the Fraser, it would have had a serious impact upon the irrigation and hydroelectric general projects that were built in our country?

Mr. WHITE. Yes, sir.

Subsequently, in my further examination of Mr. White, we entered into a discussion of what the international law was on this subject. He said he could not answer such questions, but his legal adviser, Mr. Kearney, would answer questions of that type which I put to him. These are the questions which I asked.

This treaty may be declared to confirm the opinion of some that there are legal rights of a neighboring country in the waters of an adjoining country and that, therefore, changes in flow, either lifting or lowering them, constitute a violation of a legal right, and can only be achieved legally through a treaty.

Mr. KEARNEY. Yes, sir. I think, Senator, that this treaty will be considered as adding to that body of law.

However, I would make this footnote: This treaty is a rather unusual situation because we do have the 1909 Boundary Waters Treaty with Canada, which sets up certain legal rules between our two countries and, therefore, we are in a somewhat different situation than two countries where there are no rules whatsoever.

However, I would say that the trend in international law is strongly toward the establishment of the principle that an upstream riparian state cannot deal with the waters within its borders which cross its boundary to a downstream riparian state in such a way as to seriously impair the rights or interests of the downstream riparian state.

Then followed a further question by me—

Now, Mr. White, do you feel that this treaty, in effect, declares what the principle of our Government is with respect to the use of waters that are in a common basin between our Government and Canada?

Mr. WHITE. Well, sir, as I stated, in this negotiation under our terms of reference we dealt solely with the question of the Columbia River basin.

I will defer to Mr. Kearney as to the extent to which that may constitute a precedent for other watersheds.

Senator LAUSCHE. Yes. But you thought this was one of your most important objectives; that is, to reach an understanding which, for at least 60 years, will prevent Canada from diverting the waters——

The answer of Mr. White was:

That is correct.

To conclude, there is pending in Congress another bill to approve unilaterally the diversion of waters out of Lake Michigan through the State of Illinois, into the Mississippi, and down to the Gulf Stream.

When that measure comes to the floor, if it does, and especially when it comes before the committee, I ask that the Columbia River Treaty be kept in mind. The effect of the Columbia River Treaty is to declare that one country cannot take the waters out of a common basin beginning in another country and divert them to the damage of the neighboring country.

Similarly, I say that Congress would be committing a serious and grave wrong against Canada and against international law if we attempted unilaterally to divert waters out of the Great Lakes basin for the benefit of Chicago and to the detriment of Canada, New York, Pennsylvania, Ohio, Indiana, and partly, Illinois below Chicago.

Mr. President, on Wednesday, March 8, the members of the Committee on Foreign Relations conducted a hearing with respect to the United States-Canada Columbia River Treaty. At the presentation of the evidence concerning the treaty there appeared the Honorable Stewart L. Udall, Secretary of the In-

terior, and Mr. Ivan B. White, Deputy Assistant Secretary of State for European Affairs, among others.

These witnesses testified about the great accomplishments to be derived as a result of the agreement reached as to how the Columbia River basin should be developed. I concur with the enthusiasm which these men manifested about the propriety and the goodness of the treaty.

However, each of the men in his testimony pointed out that one of the great achievements was that it was a treaty, dealing with a common waterway basin lying in adjoining nations, the United States and the Dominion of Canada, an agreement reached amicably as to how the river should be developed.

Involved in the Columbia River watershed was the threat of the possibility that Canada would divert the Columbia River from its normal channels into the Fraser River, thus impeding the flow of water into the United States, and harmfully affecting the generation of electricity and irrigation projects in the United States.

Claim for credit was made by these men, as they pointed out that a diversion and an impoundment of water in Canada might have affected prejudicially the interests of the United States, and that the problem was amicably worked out on a bilateral basis.

I questioned both of these men as to whether the goodness of what was achieved did not exemplify the need for bilateral action with respect to the Great Lakes basin, on the same principle that was applied to the Columbia River basin.

Mr. President, beginning on page 10 and ending on page 13 of the printed hearings appear questions and answers which were respectively propounded by me and answered by Secretary Udall. Beginning on page 36 and ending on page 39 of the printed hearings appear questions propounded by me and answers by Mr. White and his legal adviser, Mr. Richard D. Kearney.

Mr. President, I ask unanimous consent that the questions and answers referred to be printed in the RECORD, to reflect the fact that it would be an irreparable wrong if the United States, by unilateral action, should attempt to divert the waters out of Lake Michigan into the Chicago Sanitation Canal, thus harmfully affecting the generation of electricity in the Great Lakes basin.

There being no objection, the excerpts from the testimony were ordered to be printed in the RECORD, as follows:

Senator LAUSCHE. I am now looking at page 7 of your prepared statement, at the paragraph marked 5:

"It will remove the potential of diversion of the upper Columbia River into the Fraser River which could have resulted in disastrous power losses in the United States estimated by the Corps of Engineers to be in excess of $50 million annually. * * *"

Canada contemplated diverting the upper Columbia River into the Fraser River; is that a correct understanding?

Secretary UDALL. At one time, Senator, studies were made, and this was something which was discussed and was contemplated. I do not think it ever reached the point where a project was offered.

Senator LAUSCHE. It was a subject under discussion?

Secretary UDALL. Yes.

Senator LAUSCHE. If that had been done, would it have seriously affected interests in the United States, especially those that were to be served by the Columbia River in the United States?

Secretary UDALL. Yes. It would have had a very heavy impact naturally because it would have meant interruption——

Senator LAUSCHE. Was there grave concern on the part of our Government that Canada might have taken that action and thus affected the normal flows of water in the Columbia River basin to the extent that the economy of the United States would be adversely impaired?

Secretary UDALL. That is correct, Senator.

Senator LAUSCHE. Am I correct in understanding that our Government took the position that under international law Canada had no legal right either to increase or decrease the flow of the Columbia River by artificial obstacles, thus leaving an adverse impact on the economy served by the river?

Secretary UDALL. Well, this, Senator, is a question you might want to renew with Mr. White of the State Department.

It is my understanding that that is substantially the position that is taken, but I am not personally familiar with this aspect of it.

LAKE MICHIGAN WATER DIVERSION BILL

Senator LAUSCHE. But in any event, with respect to diversion of the waters out of the Great Lakes basin, through the Chicago Sanitation Canal, Canada argued that we had no legal right internationally to divert waters so that they would adversely impair the efficiency of producing hydroelectric energy or the economy of running ships on the Great Lakes; am I correct in that?

Secretary UDALL. Well, I believe you are, Senator. But I think what you are trying to point out is that these two are reciprocating positions, and that the Canadians took a similar position, perhaps, to what we had taken.

Senator LAUSCHE. That is exactly what I am trying to establish. Then, is it correct that our Government finally concluded that the only way that you can begin affecting the flows of water in a basin that serves two countries is by agreement?

Secretary UDALL. Well, this treaty, this agreement, I think, certainly bears out the point you make, that we finally have resolved this dispute by entering into an agreement on it rather than by unilateral action which might have resulted in a case, perhaps, which would have gone to court in international law.

Senator LAUSCHE. That is, our Government, if Canada had impounded waters that would have resulted in an adverse effect upon our right to use the normal flow of the Columbia River, would have challenged that right from a legal standpoint.

Secretary UDALL. Well, I daresay that this may have been the result, Senator. I cannot say for certain.

Senator LAUSCHE. Well, to say the least, the economic interests in our Northwest States were deeply concerned about any action that would be taken to impair the flow of that river.

Secretary UDALL. This certainly is very true.

Senator LAUSCHE. And out of it all there came this treaty under which there was agreement as to a certain development up in the Canadian area?

Secretary UDALL. Yes.

Senator LAUSCHE. Is that correct?

Secretary UDALL. Yes, that is quite right.

Senator LAUSCHE. In conjunction with the agreement that was reached, was the Great Lakes issue discussed?

Secretary UDALL. I think the correct answer would be, "No," Senator. You might want to ask Mr. White about it. But, as far as I know, it was not.

Senator LAUSCHE. Did any of the members of the State Department participate in the discussions relating to the drafting of this treaty?

Secretary UDALL. Oh, yes.

Senator LAUSCHE. Is the State Department representative here today?

Secretary UDALL. Yes, sir. The next witness will represent the State Department.

TREATY APPROACH TO DEVELOPMENT OF WATER RESOURCES

Senator LAUSCHE. Well, let me just ask one summarizing question.

Mr. Udall, you at least came to the conclusion that, inasmuch as international relations were vitally concerned, the solution of the problem such as was presented by these conflicting claims to the right to use the waters in the Columbia River, was by a common understanding which finally culminated in a treaty for the development of the river?

Secretary UDALL. That is quite right; and I think this is a very statesmanlike solution for both countries.

Senator LAUSCHE. You feel that is the way in which to handle it, rather than on the basis of unilateral action, completely disregarding the wishes of the other nation?

Secretary UDALL. Well, I think all of us who have participated, and the Senators who previously testified, they regard this as a very good solution.

Senator LAUSCHE. You understand that I am trying right now to find out what the principle is—whether this is being done on an ad hoc basis or whether there is a principle which will be uniformly applied.

Secretary UDALL. I think you make a very excellent record on that.

Senator LAUSCHE. Well, is it going to be a principle that will be applicable to similar situations?

Secretary UDALL. Senator, you would want to pursue that with the State Department people. I think the principle we have established here is a good principle of international relations and I would think wherever possible we ought to seek solutions of this kind.

Senator LAUSCHE. At least if there comes the question as to whether the political influence of Illinois or the political influence of Ohio is greater, it would be better to adhere to a principle that is founded in moral concepts.

Secretary UDALL. Well, I think this is a very sound principle, Senator.

Senator LAUSCHE. Well, I will be looking forward with great interest to see whether, when the next question comes before us, we will deal with it on principle or on the basis of what seems to be the expedient thing politically.

Senator MANSFIELD. Mr. Chairman, would the Senator yield there?

Senator LAUSCHE. Yes.

Senator MANSFIELD. I think that the Senator has raised a very important point which, at least in part, I believe has been adhered to, because, you will recall, the last time the Chicago water diversion matter was before the Senate it was referred to the Foreign Relations Committee. In other words, it was recognized as an international matter or a matter of international concern.

Senator LAUSCHE. I think that is the course that ought to be followed. I think this is an excellent arrangement, and it is obvious that in the Indus River development, through an understanding between Pakistan and India, the use of that common basin supplying both nations will be used by agreement and not by defiant unilateral action.

* * * * *

Senator LAUSCHE. Mr. White, in the second to the last paragraph of your prepared statement is contained this declaration:

"Finally, one of the most important objectives of the U.S. delegation was to remove the possibility, no matter how remote, that Canada, in the absence of an agreement for cooperative development of the Columbia River, might decide to divert the waters of the Columbia River into the Fraser River Basin which empties into the sea at Vancouver. This objective has been achieved for at least the next 60 years."

Mr. WHITE. That is right.

Senator LAUSCHE. How long has that subject of diverting the waters of the Columbia into the Fraser River been under discussion?

Mr. WHITE. I do not know the exact period, but I think in one form or another it has been under discussion for more than a decade in Canada.

Senator LAUSCHE. Yes, sir.

Now then, if the waters had been diverted out of the Columbia into the Fraser, it would have had a serious impact upon the irrigation and hydroelectric general projects that were built in our country?

Mr. WHITE. Yes, sir.

Senator LAUSCHE. It probably would have had a destructive impact.

Mr. WHITE. Well, it would have reduced the flow of the Columbia going down through the dams on the main stem of the Columbia in the United States. The actual amount of the reduction in hydroelectric production would depend on how much was diverted.

That gets into an engineering question, and General Itschner can comment in detail on that. But certainly it would greatly reduce the hydroelectric power production on the main stem of Columbia.

Senator LAUSCHE. After the proposal was recently made to divert the waters out of the Great Lakes, did this subject of diverting into the Fraser River become accentuated?

Mr. WHITE. It became related in the public discussion; yes, sir.

Senator LAUSCHE. And the relationship was that if the United States had the authority to lower the waters of the Great Lakes Basin, Canada would have the right to lower the flow of the waters in the Columbia River Basin.

Mr. WHITE. That view may have been advanced.

I believe the State Department's view, as expressed to the Congress over the past several years, was to the effect that a diversion might tend to set a precedent or act as a stimulus for Canada to do the same thing in the case of the Columbia.

Senator LAUSCHE. And were you very apprehensive about the development of that situation and, therefore, you feel that one of the most important objectives in the consummation of this treaty is to insure that, for at least 60 years, Canada will not be able to divert the waters out of the Columbia River?

Mr. WHITE. Yes, sir.

Senator LAUSCHE. Was there, in your negotiations, any discussion of the relationship of the Great Lakes Basin compared with the Columbia River?

Mr. WHITE. No, sir. There was not.

By mutual tacit understanding, we avoided discussion of any other transboundary water problems, which would include the problem of the Chicago diversion, the problem of the St. John River, the problem of the Yukon.

Our terms of reference confined us strictly to the question of joint development of the Columbia River Basin.

Senator LAUSCHE. Well, in your mind there undoubtedly existed the thought that if the United States had the authority to, or did, divert out of the Great Lakes Basin, correspondingly Canada would be justified both legally and morally to divert the Columbia into the Fraser.

Mr. WHITE. I would not put it that they would be justified. I would put it that it would have served as a stimulus for their giving more active consideration to diversion out of the Columbia River Basin.

LAKE MICHIGAN WATER DIVERSION BILLS

Senator LAUSCHE. Now, with regard to the Chicago water diversion bills, the State Department and the Foreign Relations Department of Canada have protested vigorously.

Mr. WHITE. They certainly have. The Minister of External Affairs consistently has taken a very strong position against the various Chicago diversion bills which have been before the Congress. There is quite a long record of that.

The position of the State Department in previous years has been one of opposition to Chicago diversion.

Senator LAUSCHE. Are you able to speak of what the view of the State Department is now?

Mr. WHITE. I am not, sir. I do not believe——

Senator LAUSCHE. For how many years has the State Department been opposed to the diversion of the Great Lakes waters on the basis that it did have a direct relationship to our association with Canada?

Mr. WHITE. Well, sir, I have with me Richard Kearney, who is our assistant legal adviser, and who has been working more directly and for a longer period of time than I have on the Chicago diversion matter, and if I may, I would like to defer to him.

Senator LAUSCHE. All right.

Mr. KEARNEY. To my recollection, Senator, I would say that at least in the past 4 to 5 years the Canadians have sent a protest to us regarding the bills for increasing the diversion at Chicago, and that the Department has, in general, supported the Canadian opposition on the ground that this would exacerbate our relationships with the Canadians.

Senator LAUSCHE. Yes; and the Canadian Government took the position that the diversion at Chicago would have lowered the level and thus impaired the navigational efficiency and the hydroelectric generation capacity.

Mr. KEARNEY. That is correct, Senator.

Senator LAUSCHE. Did the Canadian Government take the position that both from the standpoint of international law and a previously existing treaty the U.S. Government did not have the legal right to take any action that would adversely affect the quantity of water available for navigation and the generation of electricity?

Mr. KEARNEY. The Canadian Government in, you might call it, the legal brief which it prepared, based a considerable degree of opposition to the diversion on the ground that the reduction in the generation of hydroelectricity at the Niagara plants would not be in accordance with the Niagara Treaty provisions.

Objection was also made on the ground that the arrangements with respect to the St. Lawrence Seaway, which we have with Canada, would be adversely affected by any increased diversion at Chicago.

They did not specifically rely on the general language of the Boundary Waters Treaty of 1909. That is because the Boundary Waters Treaty of 1909 contains a specific exclusion of existing diversion.

However, to my recollection—and I have not looked at this paper for approximately a year, so I may be wrong—they did refer to the provisions on navigation in the Boundary Waters Treaty. I would have to check that, but that is my general recollection at the moment.

INTERNATIONAL LAW INVOLVED

Senator LAUSCHE. What is your own understanding of the international law governing the right of one country to affect the flow of waters in a manner that has an adverse impact on the natural flow in the adjoining country?

Mr. KEARNEY. Well, this is a branch of international law which is currently in the process of evolution. It is very active at the moment, and this treaty, for example, is going to be one of the major points of development for international law in this respect.

Senator LAUSCHE. All right. Let me stop you at this point.

This treaty may be declared to confirm the opinion of some that there are legal rights of a neighboring country in the waters of an adjoining country and that, therefore, changes in flow, either lifting or lowering them, constitute a violation of a legal right, and can only be achieved legally through a treaty.

Mr. KEARNEY. Yes, sir. I think, Senator, that this treaty will be considered as adding to that body of law.

However, I would make this footnote: This treaty is a rather unusual situation because we do have the 1909 Boundary Waters Treaty with Canada, which sets up certain legal rules between our two countries and, therefore, we are in a somewhat different situation than two countries where there are no rules whatsoever.

However, I would say that the trend in international law is strongly toward the establishment of the principle that an upstream riparian state cannot deal with the waters within its borders which cross its boundary to a downstream riparian state in such a way as to seriously impair the rights or interests of the downstream riparian state.

That, I think, is the developing international law on the point.

Senator LAUSCHE. All right.

Now, Mr. White, do you feel that this treaty, in effect, declares what the principle of our Government is with respect to the use of waters that are in a common basin between our Government and Canada?

Mr. WHITE. Well, sir, as I stated, in this negotiation under our terms of reference we dealt solely with the question of the Columbia River Basin.

I will defer to Mr. Kearney as to the extent to which that may constitute a precedent for other watersheds.

POTENTIAL DIVERSION OF COLUMBIA RIVER INTO FRASER RIVER

Senator LAUSCHE. Yes. But you thought this was one of your most important objectives; that is, to reach an understanding which, for at least 60 years, will prevent Canada from diverting the waters of the Columbia River into the waters of the Fraser River Basin.

Mr. WHITE. That is right. To those of us who have lived in the Northwest, the possibility of diversion was something, a shadow always over the whole question of the development of the Columbia.

Senator LAUSCHE. Well, if that was a shadow to you in the Northwest, would it not likewise be a shadow to the Canadians in the Great Lakes basin to think that the United States unilaterally was going to divert the waters?

Mr. WHITE. Sir, they have made it clear to us that they regard it as more than a shadow.

Senator LAUSCHE. Then there is similarity in the facts and in the principle that ought to be applied.

Mr. WHITE. There is similarity.

Senator LAUSCHE. All right. That is all.

Mr. MANSFIELD. Mr. President, will the Senator from Alabama yield me 2 minutes?

Mr. SPARKMAN. I yield 2 minutes to the Senator from Montana.

Mr. MANSFIELD. Mr. President, the Columbia River Basin Treaty represents the successful completion of many years of careful planning and negotiation between Canada and the United States, and the beginning of a highly important cooperative effort by our two countries in using and developing our joint natural resources.

Historic circumstances left the Columbia River under the control of two countries. This division of authority could have led to practices by one country which would have been against the interests of the other. For many years, for example, there has been talk in Canada of diverting water from the Columbia River into a Canadian river. If this diversion should have occurred, the results would have been seriously damaging to power production and other water uses in the United States.

Separate development by Canada and the United States of the Columbia River would also have resulted in a duplication of facilities, as well as inefficiency resulting from an unnecessary proliferation of facilities. Each country would have been forced to construct its own dams and reservoirs, of a size and on a scale less efficient than would be possible if both countries agreed on constructing a single set of facilities.

Fortunately, both the United States and Canada recognized the benefits for each country of solving the problem together.

Those who have labored so long and diligently to develop this concrete expression of the mutual benefits of joint action are to be congratulated for a job very well done. The agreement which they have designed is in many ways a model for river basin development between neighboring countries. Along with the Indus River Basin Treaty concluded recently between India and Pakistan, the Columbia River Basin Treaty can serve as a prototype for other similar agreements, and thereby help to promote world peace and progress through international riparian cooperation.

The Columbia River Basin Treaty is also a further demonstration of the excellent relationships which exist between the United States and Canada. We need only consider the conflict which a problem of this nature has often produced in countries in other parts of the world to appreciate what a good neighbor we have to the north. It signifies the fact not only that the United States and Canada share the same continent, but that our two countries share a great destiny as well, and can serve our separate interests only by serving our common interests.

As the Senate knows, the treaty was unanimously reported by the Foreign Relations Committee. There was no opposition expressed in the hearings, and the committee received no written communications opposing the treaty. I think this is a sign of the overwhelming support for the treaty which exists, not just in the Northwest, but throughout the Nation.

I should like to point out, Mr. President, that this is a very unusual situation, which, in fact, may be almost unique. We are accustomed to hearing about the conflict between public and private power, or between the interests of one region of the country as opposed to other regions.

The remarkable thing about the treaty is the lack of this kind of conflict.

There is no public power-private power conflict, because the treaty is in the interest of all parties concerned, including private power utilities.

There is no regional conflict, because it is widely recognized that the development of the Northwest through the Columbia River Treaty will be in the interest of the country as a whole. The entire Nation will benefit from the increased economic opportunity and growth of purchasing power which will result from full utilization of the Columbia River.

Besides its other benefits, the treaty will be highly beneficial in preventing costly floods. In the last 100 years there have been 13 major floods on the Columbia River. These floods cannot be prevented under a piecemeal approach to river development. They can be prevented only if there is general planning of the type provided by the treaty.

Prevention of floods on the Columbia River will save lives, prevent property damage, and reduce the senseless waste of natural resources.

When all storage dams contemplated by the treaty are completed, there will be no more major floods on the Columbia River. That, in itself, will be a historic achievement.

The State of Montana, Mr. President, has a particular interest, along with the State of Idaho, in the provision in the treaty concerning the construction of Libby Dam. This project which was authorized by the Senate in 1950, seeks to bring under control a river which is a part of the Columbia River system, and which, like the Columbia River, flows through both the United States and Canada. This is the Kootenai in northern Montana, a river which is responsible each year for severe flood damages in Idaho. The Libby Dam project will substantially eliminate floods on the Kootenai River. It will also provide large quantities of hydroelectric power, both at-site and downstream.

I am gratified that, after years of planning, another step has been taken toward the construction of this very important project. In northwestern Montana, where the project will be constructed, there is a chronic state of unemployment and underemployment, which will be alleviated, if not cured, by Libby Dam. Under the criteria of the depressed areas bill, this area may not qualify as a depressed area. But I can assure the Senate that it is a depressed area, and that it will remain a depressed area, despite the best efforts of the good people of that region, until the Libby Dam opens new economic opportunities.

I also want to express my appreciation for the request submitted to the Congress this week by President Kennedy for $350,000 in supplemental appropriations to resume planning for the construction of Libby Dam. Under the Columbia River Treaty, the United States has 5 years to begin construction of Libby Dam. This reason, together with the great need for the project, makes it important for planning funds to be appropriated as soon as possible so that the necessary work may be initiated this year. It is estimated that it will take 3 years before actual construction can begin, and this does not allow much time for resumption and completion of the planning requested by the President.

It is my hope, Mr. President, that this vital treaty will soon be ratified by Canada. Both our countries stand to gain greater benefits from the treaty than either could obtain separately. This is the meaning of the concept of interdependence, and it is the reason for favorable action by the Senate in completing the American part of this historic common effort.

Mr. President, I should like to ask the distinguished acting chairman of the Foreign Relations Committee a question, if I may. On page 6 of the report covering the hearings on the Columbia River Treaty, my distinguished colleague, the Senator from Montana [Mr. METCALF] makes the following statement:

> I have very little to add to what my colleagues have said, except Senator MANSFIELD and I insist on an at-site power allocation for Montana similar to the Hungry Horse formula.

It is the understanding of the senior Senator from Montana that, insofar as Libby Dam is concerned, if it is built, every effort will be made to see to it that, as in the Hungry Horse project, we will achieve a proportionate share of power from that dam to Montana for the use of the State of Montana. Is that correct?

Mr. SPARKMAN. The Senator is correct in his understanding.

Mr. MANSFIELD. I thank the Senator.

Mr. SPARKMAN. Mr. President, I yield to the junior Senator from Montana [Mr. METCALF] such time as he may desire.

The PRESIDING OFFICER. The Senator from Montana.

Mr. METCALF. Mr. President, I thank the Senator for yielding to me at this time. The treaty before the Senate is a very important one to the State of Montana.

I think the Senator from Ohio [Mr. LAUSCHE] made some very appropriate remarks, and he mentioned the Senators who were responsible for the accomplishment of the treaty. My predecessor, Senator Murray, had much to do with it; and the man who probably had done more than anybody else in the Senate of the United States to bring about the accomplishment of the treaty is the majority leader [Mr. MANSFIELD].

Mr. President, this treaty is an accomplishment of international comity and international friendship. I am not in complete agreement with the remarks of the Senator from Ohio when he said that international law is quite clear that, on riparian rights, the rights of the two nations are so involved that one nation cannot interfere with

the flow of the stream into another nation.

I investigated this matter a few years ago, when my colleague from Montana [Mr. MANSFIELD] and I were sponsoring legislation to provide for the building of a low level Libby Dam. I came to the conclusion that perhaps Canada did have the right to shut off the flow of the Columbia River.

What I want to point out at this time, and I wish to compliment the committee and the Senators who have worked for the treaty, and compliment those who negotiated it, is that, despite the international legal situation, we have accomplished a treaty in which certain benefits have been given to Canada and in which we have accepted certain benefits from Canada. We have arrived at a system of negotiations whereby we have before us a good treaty, a sound treaty. We have given away some of the power that we in Montana felt should come to Montana and the United States. At the same time, Canada has given away perhaps an international right to divert the flow of the river. So this treaty is in the finest traditions of relationships with our neighboring countries.

We have given Canada substantial power downstream. We have made substantial concessions. At the same time, we have received substantial concessions from Canada which will result in the development both of the resources of the State of Montana and the entire Northwest and of the resources of British Columbia and Canada.

I compliment and thank the committee for bringing before the Senate this treaty and suggesting its ratification.

Mr. SPARKMAN. Mr. President, before he yields the floor, will the Senator yield?

Mr. METCALF. I yield.

Mr. SPARKMAN. The Senator referred to the possible diversion of waters. It may be that not all Senators would understand what is meant by that statement. Is it not true that the Columbia and the Fraser Rivers, in their upper stretches, are very near each other, and that, by means of a very short tunnel, the Columbia could be diverted into the Fraser River?

Mr. METCALF. That is correct. It is what the Senator from Ohio was referring to. At the same time, a water diversion could have been made just across the border of Montana in the so-called canal flats area and could have been diverted into the Kootenai River, so that Libby Dam no longer would have been feasible. It is our hope that, with respect to the diversion of other rivers which rise in America and flow into Canada, or which rise in Canada and flow into the United States, we shall adopt this kind of international and negotiated approach, rather than rely on international water law as laid down by previous decisions.

Mr. SPARKMAN. I believe it was the feeling of every member of the Foreign Relations Committee that the first treaty had been one of the most fairly negotiated, give-and-take treaties that has ever come to their attention.

Mr. METCALF. I appreciate that statement.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. METCALF. I yield.

Mr. LAUSCHE. I take it that the Senator will agree with the statement which is contained in the report, which I shall paraphrase somewhat. In the questioning of several witnesses, there was pointed out the similarity of the principle in the protest by the United States against diversion by Canada of water from the Columbia River and the Fraser River and the Canadian protest against the diversion of Lake Michigan water by the city of Chicago into the Mississippi River. The principle of diversion is substantially identical.

Mr. METCALF. I am not sure whether the principle is identical, but I am convinced that the principle of international comity and equity as laid down by the treaty should be the principle that we follow in all our relations with our neighbors either on the northern or the southern border of the United States.

Mr. LAUSCHE. In the questioning, the legal counsel for the State Department stated that the treaty adds strength to the claims made by many persons that riparian rights do exist in States and nations. I do not know whether the Senator has read the transcript of the hearing.

Mr. METCALF. I have read the transcript, and I, of course, listened with interest to the discussion which the Senator from Ohio engaged in earlier today. In the first place, I am not sure whether the statement about riparian rights applies to the Western States where we do not have riparian rights on the rivers. In the second place, I would like to have western water law apply to all our rivers, whether they rise in Canada or in the United States, which means first come, first served—first in right, first in equity. So that if we had a right on a river, whether it was downstream in Canada or upstream in the United States, we would have fixed our right as a matter of international law.

I am not sure that is the present situation, but I believe it should be the situation, and as a matter of comity and equity the treaty will carry out the desired principle.

Mr. LAUSCHE. I should like to read from the statement of Mr. Kearney, assistant legal adviser for the Department of State:

> I would say that the trend in international law is strongly toward the establishment of the principle that an upstream riparian state cannot deal with the waters within its borders which cross its boundary to a downstream riparian state in such a way as to seriously impair the rights or interests of the downstream riparian state.

That is the view stated by the counsel. He subsequently said the treaty lent great strength to a latent belief that there are legal rights as between adjacent States which cannot be violated.

Mr. METCALF. I am not sure what is meant by "riparian rights" as they would apply to western rivers, but I hope that as they apply to other rivers flowing out of the States of Washington, Idaho, and Montana north into Canada, the principle laid down by the proposed treaty will be followed and that upstream rights in the United States and in Canada will not be violated.

Mr. LAUSCHE. I thank the Senator.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. METCALF. I yield.

Mr. SPARKMAN. I should like to make a statement, though I do not wish to engage in an argument.

I would seriously question that there exist riparian rights as between nations. I think the question of sovereignty would control.

If I may be permitted to reply to the Senator from Ohio, when the question of diversion of water from the Great Lakes is considered, we have a treaty with Canada in that regard. Therefore, we rely in both instances on treaties.

Mr. METCALF. I agree with the Senator from Alabama. I seriously question the theory propounded by the counsel of the Department, that there are riparian rights. I believe, in equity and comity, nations should carry out the provisions of a right analogous to the western water law, so that they will not interfere with each other, and this is what would be done under the terms of the treaty.

Mr. SPARKMAN. We should do it, as is proposed, by way of treaty.

Mr. METCALF. That is why I praise those who negotiated the treaty.

Mr. LAUSCHE. Mr. President, I should like to supplement what the Senator from Alabama has said. We have a treaty with Canada which deals with the Great Lakes Basin. To that extent the treaty applies, and, in my opinion, would prohibit diversion of water without an agreement.

I have taken a position one step beyond, that there is international law which affects riparian rights. There may be disagreement, but the trend is in that direction, as the counsel stated.

Mr. METCALF. I thank the Senator.

Mr. SPARKMAN. Mr. President, I yield to the junior Senator from Oregon [Mrs. NEUBERGER] such time as she may wish, within our time limitation.

Mrs. NEUBERGER. Mr. President, I shall be very brief. I wish to congratulate the Senators who held the hearings with respect to the treaty.

I was delighted, when I read the hearings, to find the references to my late husband and to the part he played in regard to the treaty. The people in the Northwest greatly appreciate it.

Mr. CAPEHART. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CAPEHART. How much time remains for each side?

The PRESIDING OFFICER. The proponents have 3 minutes remaining and the opponents have 20 minutes.

Mr. SPARKMAN. Mr. President, I yield to the junior Senator from Idaho [Mr. CHURCH] such time as he may wish to use from the time remaining.

Mr. CHURCH. Mr. President, the treaty which the Senate is now consider-

ing is part of a grand design for the development of one of the great water resources of the world. Forty percent of the potential hydroelectric development in the United States is to be found in the vast Columbia River system. When it is considered that the development of this resource requires the coordinated efforts of two countries, and of governmental agencies at all levels in each, as well as of both private and public power-producing entities, both the difficulty and the significance of the planning effort which now approaches its culmination are dramatically apparent.

The treaty itself is not without controversial features. Moreover, not every problem connected with the development of this vast water resource will be solved by its ratification. Yet I think it is appropriate at this point to take note of the giant strides which the treaty will, for the first time, make possible.

One of the great projects which has been necessarily held in abeyance pending conclusion of this treaty with our friends in Canada is the Libby Dam on the Kootenai River in Montana. The treaty authorizes its construction within a period of 5 years from the exchange of ratifications. Since the Congress of the United States has already authorized the project, and since Canada, under the treaty, assumes the obligation of furnishing and preparing that portion of the reservoir area which lies within its borders, the way will not be open for construction of the Libby Dam as rapidly as technical and financial considerations permit.

While I do not wish to take a parochial approach to a project which has immense value for the whole river basin, I cannot refrain from emphasizing to the committee the very special significance which it carries for my own State of Idaho.

Downstream from the Libby Dam site lies the Kootenai Valley of Idaho's far northern panhandle. It contains nearly 50,000 acres of valuable farmland, comprising some of the most productive agricultural acres to be found anywhere in the world. These acres lie along the flood plain of the Kootenai River. Year after year, the land has been ravaged by the river's raging waters. Prolonged and expensive efforts to contain these floodwaters by local works have proved unavailing. No one who has not experienced the anger and frustration which comes to a farming community confronted almost annually with a hazard of this proportion can appreciate the relief and gratitude with which the citizens of this valley now look forward to the time when the river will be their friend and peaceful companion rather than their brutal adversary.

In dollars and cents, the annual flood damages in this valley alone have sometimes approached the $2 million mark. They are calculated to average annually about $850,000. Although the flood control benefits of the Libby Dam will be even greater in the lower reaches of the Columbia River, downstream from The Dalles, they will nowhere be as dramatically apparent or as welcome as in the Kootenai Valley.

Realization of the long dream to tame this river has significance which reaches far beyond the Kootenai Valley and the great Columbia River Basin. It will demonstrate again that man is not powerless to control his environment. Wherever nature's destructive forces are harnessed to yield abundance—and especially when this good result is accomplished as a climax and reward for many years of patient effort and constructive planning—man's prospects brighten. For this reason, I am dedicated to the approval of the treaty and to the full realization of the benefits it will make possible.

Mr. President, if there is one Senator who deserves special recognition beyond anyone else, it is our late and great colleague, former Senator Neuberger of Oregon, whose writings alerted all in the Northwest and many throughout the country to the importance of coming to an accord with Canada which would provide for the beneficial development of the Columbia River Basin in such a way that both countries could profit from the waters of the river. That great effort is now being successfully culminated. So I think it appropriate at this time for the Senate to remember the very special service rendered by former Senator Neuberger to his State and to his country, in helping to bring this treaty to fruition.

The PRESIDING OFFICER. The time of the proponents has expired.

Mr. CAPEHART. Mr. President, in our consideration of the Columbia River treaty, it has occurred to me that appropriate recognition should be given to the consistent and valued efforts devoted to the successful negotiations by our former Secretary of the Interior and former Governor of the State of Oregon, the late Douglas McKay.

I am sure that no Member of this body would wish to omit from the record of these proceedings the fine work done by Secretary McKay during the 2 years he served as Chairman of the U.S. section of the Joint Commission. He served in that capacity from midsummer of 1957 until his death in August 1959.

It is now recognized that it was due in great measure to Governor McKay's efforts that agreement was finally reached in the two sections of the Joint Commission, and a fair, workable plan hammered out and presented to the diplomatic bodies of the two countries.

I am honored to have this opportunity to publicly recognize the outstanding value of Governor McKay's efforts to his country and particularly the Pacific Northwest.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield.

Mr. MANSFIELD. I wish to join in what the Senator from Indiana has said. Former Secretary McKay, while he headed the Department of the Interior, was always a stanch advocate of the Libby Dam, and I know he did everything in his power to try to bring about a successful conclusion to the negotiations with regard to the differences between Canada and the United States.

In all fairness, I wish to say that the negotiations culminating in the present treaty started under the preceding Republican administration and Secretary Seaton, of the Department of the Interior; Deputy Assistant Secretary White, of the Department of State; Under Secretary Bennett, of the Department of the Interior; General Itschner; and others made great contributions toward the culmination of this particular treaty.

Mr. CAPEHART. Mr. President, I yield 5 minutes to the able Senator from Idaho [Mr. DWORSHAK].

Mr. DWORSHAK. Mr. President, I was present in the White House on January 17 when the treaty currently before the Senate was signed by President Eisenhower and the Canadian Prime Minister, John D. Diefenbaker. That signing was the culmination of many years of negotiations by representatives of the Canadian Government and the United States to set up a program which would provide equitable distribution of the potential power which could be generated in the Columbia River Basin.

I was very happy to hear the distinguished majority leader comment that during the 8 years of the Eisenhower administration many of the officials charged with the direct responsibility of negotiating the treaty had persisted in their efforts, although they had on many occasions encountered many obstacles which delayed final consummation of the treaty negotiations. I particularly want to mention the work which was done by former Governor Len Jordan of Idaho, who recently served for about 2 years as Chairman of U.S. section of the International Joint Commission, attending many conferences to deal with this treaty.

Mr. President, recently the Christian Science Monitor published an article, from which I quote the following paragraph.

> The huge international Columbia River power scheme is in danger of long delay or collapse, the Canadian Government supposes, as a result of events in the British Columbia capital of Victoria.

I certainly hope that it will be possible to overcome some of the objections which apparently are causing some delay in the Province of British Columbia in the consideration and approval of this treaty. Over many years Canada and the United States have reflected willingness to cooperate to the highest degree, and comity has characterized all of our relations. I hope that it will be possible to work out a satisfactory arrangement for both countries involved in the treaty, and particularly in the Northwest, where it means so much to us to have the development of the Columbia River Basin expedited.

I wish to recall President Eisenhower's statement at the White House Conference when the treaty was signed on January 17 that he was very happy to be able to sign the treaty before he left the White House. He indicated that for several years he had been utilizing fully the influence and the authority of the

Presidency to have the treaty successfully negotiated and signed by both Canada and the United States.

Mr. President, I know that Senators from States in the Columbia River Basin have already called attention to the importance of the terms of the treaty affecting the future development of our great potential power resources in that basin. But I think we should emphasize more than ever that at a time when there is turmoil and dissention throughout the world, and the United States finds it difficult at times to maintain its prestige in the face of upheavals in many areas, we can point with pride to the successful result of negotiating this treaty.

At times we hear unverified reports that there is growing sentiment among some Canadian people that the United States is not willing to cooperate as it should in stimulating the development of Canada economically, industrially, and in a business sense. I do hope that the treaty will be the basis of developments in the future which will continue to emphasize that Canada and the United States are demonstrating in an impressive manner that they can cooperate in promoting the mutual welfare and security of our two great countries.

Mr. WILEY. Mr. President, there is pending before the Senate at this time the United States-Canada Columbia River Treaty. Prompt ratification of this treaty is vital in achieving optimum development of the water resources of the Columbia River Basin as a whole from which both the United States and Canada will receive benefits materially larger than either could obtain independently. We will secure a large block of very low-cost power, substantial flood control benefits and many benefits to irrigation, pollution abatement, and other water uses.

Canada will also receive a large block of power at low cost as well as flood control and other benefits resulting from the storage.

The benefits to the United States under the treaty may be summarized as follows:

First. It will bring about the degree of flood control over the next 10 years which has been a primary goal of the Corps of Engineers for the past several decades.

Second. It will increase and stabilize the flows of the Columbia River, thus improving the water supply for irrigation, municipal and industrial uses, navigation, recreation, and pollution abatement.

Third. It will provide over 2 million kilowatts of new salable firm power at a lower cost than by any other means.

Fourth. It will provide low-cost power in Canada by this development of the upper Columbia.

Fifth. It will remove the potential of diversion of the upper Columbia River into the Fraser River which could have resulted in disastrous power losses in the United States estimated by the Corps of Engineers to be in excess of $50 million annually even before the addition of Priest Rapids, Wanapum, and Rocky Reach Dams to the main stem of the Columbia.

Sixth. It will enable the use at an early time of capacity which is now available on the Federal system, thereby increasing the revenues of the Bonneville Power Administration and maintaining the present rate.

Seventh. Finally, it will demonstrate to the entire world the mutual benefits which can be achieved through cooperation between two countries of the free world.

Mr. President, this treaty represents a unique sharing of benefits. In the field of international relations, I believe the action taken by the United States and Canada in this instance will be an inducement to come to grips with many of the difficulties which nature presents us, so that other nations can learn from this exemplary action.

Mr. President, in the instant case, serious concern was felt in the United States that Canada might divert the waters of the Columbia River, thus adversely affecting the economics of the Northwestern States.

The approach of this treaty represents a change in the traditional attitude of national states toward the solution of problems with their neighbors. Unilateral action on this matter of diversion could have the most severe consequences to the United States. Thus, bilateral cooperation as an integral part in treaty negotiations of this type has been accepted.

And above all else, Mr. President, this treaty between the United States and Canada is but another example of the close links that bind our two peoples. We have our differences, and we are vigorously individualistic, but we have learned the great lesson of the ages, that we can be independent and cooperate with our neighbors to achieve desirable ends. This is the fruit of sympathetic understanding of each other's problems. This is the compensation of trust and good will.

Mr. President, I think it is a fine tribute to former President Eisenhower, that this treaty was one of his last official acts. It was a significant capstone to leadership of this Nation, under the former administration.

Mr. SPARKMAN. Mr. President, I yield back the remainder of our time.

Mr. CAPEHART. Mr. President, we yield back the remainder of our time.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the convention will be considered as having passed through its various parliamentary stages up to the point of consideration of the resolution of ratification, which will be read for the information of the Senate.

The legislative clerk read as follows:

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the treaty between the United States of America and Canada concerning the cooperative development of the water resources of the Columbia River Basin, signed at Washington, January 17, 1961 (Executive C, 87th Cong., 1st sess.).

Mr. MANSFIELD. Mr. President, I ask for the yeas and nays on the adoption of the resolution of ratification.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is: Will the Senate advise and consent to the resolution of ratification of the Columbia River Treaty, Executive C, 87th Congress, 1st session? On this question, the yeas and nays have been ordered; and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from Alaska [Mr. BARTLETT], the Senator from Arkansas [Mr. FULBRIGHT], and the Senator from Utah [Mr. Moss] are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ] is absent because of illness.

I further announce that the Senator from Texas [Mr. BLAKLEY] and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska [Mr. BARTLETT], the Senator from Texas [Mr. BLAKLEY], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Arkansas [Mr. FULBRIGHT], and the Senator from Rhode Island [Mr. PELL] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Colorado [Mr. ALLOTT] is absent because of death in his family.

The Senator from Vermont [Mr. PROUTY] is absent by leave of the Senate because of illness.

The Senator from Massachusetts [Mr. SALTONSTALL] is necessarily absent, and, if present and voting, would vote "yea."

The yeas and nays resulted—yeas 90, nays 1, as follows:

[Ex. No. 1]

NOT VOTING—9

Allott	Chavez	Pell
Bartlett	Fulbright	Prouty
Blakley	Moss	Saltonstall

The PRESIDING OFFICER. On this vote, the yeas are 90, the nays, 1; two-thirds of the Senators present having voted in the affirmative, the resolution of ratification is agreed to.

Mr. MANSFIELD. Mr. President, I move that the President be notified of the action just taken by the Senate.

The PRESIDING OFFICER. Without objection, the President will be immediately notified.

ORGANIZATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Executive E, 87th Congress, 1st session, the Convention on the Organization for Economic Cooperation and Development.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the convention—Executive E, 87th Congress, 1st session—a Convention on the Organization for Economic Cooperation and Development, together with two protocols relating thereto, signed at Paris on December 14, 1960, which was read the second time, as follows:

CONVENTION ON THE ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT

The Governments of the Republic of Austria, the Kingdom of Belgium, Canada, the Kingdom of Denmark, the French Republic, the Federal Republic of Germany, the Kingdom of Greece, the Republic of Iceland, Ireland, the Italian Republic, the Grand Duchy of Luxembourg, the Kingdom of the Netherlands, the Kingdom of Norway, the Portuguese Republic, Spain, the Kingdom of Sweden, the Swiss Confederation, the Turkish Republic, the United Kingdom of Great Britain and Northern Ireland, and the United States of America;

Considering that economic strength and prosperity are essential for the attainment of the purposes of the United Nations, the preservation of individual liberty and the increase of general well-being;

Believing that they can further these aims most effectively by strengthening the tradition of co-operation which has evolved among them;

Recognising that the economic recovery and progress of Europe to which their participation in the Organisation for European Economic Co-operation has made a major contribution, have opened new perspectives for strengthening that tradition and applying it to new tasks and broader objectives;

Convinced that broader co-operation will make a vital contribution to peaceful and harmonious relations among the peoples of the world;

Recognising the increasing interdependence of their economies;

Determined by consultation and co-operation to use more effectively their capacities and potentialities so as to promote the highest sustainable growth of their economies and improve the economic and social well-being of their peoples;

Believing that the economically more advanced nations should co-operate in assisting to the best of their ability the countries in process of economic development;

Recognising that the further expansion of world trade is one of the most important factors favouring the economic development of countries and the improvement of international economic relations; and

Determined to pursue these purposes in a manner consistent with their obligations in other international organisations or institutions in which they participate or under agreements to which they are a party;

Have therefore agreed on the following provisions for the reconstitution of the Organisation for European Economic Co-operation as the Organisation for Economic Co-operation and Development:

ARTICLE 1

The aims of the Organisation for Economic Co-operation and Development (hereinafter called the "Organisation") shall be to promote policies designed:

(a) to achieve the highest sustainable economic growth and employment and a rising standard of living in Member countries, while maintaining financial stability, and thus to contribute to the development of the world economy;

(b) to contribute to sound economic expansion in Member as well as non-member countries in the process of economic development; and

(c) to contribute to the expansion of world trade on a multilateral, non-discriminatory basis in accordance with international obligations.

ARTICLE 2

In the pursuit of these aims, the Members agree that they will, both individually and jointly:

(a) promote the efficient use of their economic resources;

(b) in the scientific and technological field, promote the development of their resources, encourage research and promote vocational training;

(c) pursue policies designed to achieve economic growth and internal and external financial stability and to avoid developments which might endanger their economies or those of other countries;

(d) pursue their efforts to reduce or abolish obstacles to the exchange of goods and services and current payments and maintain and extend the liberalisation of capital movements; and

(e) contribute to the economic development of both Member and non-member countries in the process of economic development by appropriate means and, in particular, by the flow of capital to those countries, having regard to the importance to their economies of receiving technical assistance and of securing expanding export markets.

ARTICLE 3

With a view to achieving the aims set out in Article 1 and to fulfilling the undertakings contained in Article 2, the Members agree that they will:

(a) keep each other informed and furnish the Organization with the information necessary for the accomplishment of its tasks;

(b) consult together on a continuing basis, carry out studies and participate in agreed projects; and

(c) cooperate closely and where appropriate take co-ordinated action.

ARTICLE 4

The Contracting Parties to this Convention shall be Members of the Organisation.

ARTICLE 5

In order to achieve its aims, the Organisation may:

(a) take decisions which, except as otherwise provided, shall be binding on all the Members;

(b) make recommendations to Members; and

(c) enter into agreement with Members, non-member States and international organisations.

ARTICLE 6

1. Unless the Organisation otherwise agrees unanimously for special cases, decisions shall be taken and recommendations shall be made by mutual agreement of all the Members.

2. Each Member shall have one vote. If a Member abstains from voting on a decision or recommendation, such abstention shall not invalidate the decision or recommendation, which shall be applicable to the other Members but not to the abstaining Member.

3. No decision shall be binding on any Member until it has complied with the requirements of its own constitutional procedures. The other Members may agree that such a decision shall apply provisionally to them.

ARTICLE 7

A Council composed of all the Members shall be the body from which all acts of the Organisation derive. The Council may meet in sessions of Ministers or of Permanent Representatives.

ARTICLE 8

The Council shall designate each year a Chairman, who shall preside at its ministerial sessions, and two Vice-Chairmen. The Chairman may be designated to serve one additional consecutive term.

ARTICLE 9

The Council may establish an Executive Committee and such subsidiary bodies as may be required for the achievement of the aims of the Organisation.

ARTICLE 10

1. A Secretary-General responsible to the Council shall be appointed by the Council for a term of five years. He shall be assisted by one or more Deputy Secretaries-General or Assistant Secretaries-General appointed by the Council on the recommendation of the Secretary-General.

2. The Secretary-General shall serve as Chairman of the Council meeting at sessions of Permanent Representatives. He shall assist the Council in all appropriate ways and may submit proposals to the Council or to any other body of the Organisation.

ARTICLE 11

1. The Secretary-General shall appoint such staff as the Organisation may require in accordance with plans of organisation approved by the Council. Staff regulations shall be subject to approval by the Council.

2. Having regard to the international character of the Organisation, the Secretary-General, the Deputy or Assistant Secretaries-General and the staff shall neither seek nor receive instructions from any of the Members or from any Government or authority external to the Organisation.

ARTICLE 12

Upon such terms and conditions as the Council may determine, the Organisation may:

(a) address communications to non-member States or organisations;

(b) establish and maintain relations with non-member States or organisations; and

(c) invite non-member Governments or organisations to participate in activities of the Organisation.

ARTICLE 13

Representation in the Organisation of the European Communities established by the Treaties of Paris and Rome of 18th April, 1951, and 25th March, 1957, shall be as defined in Supplementary Protocol No. 1 to this Convention.

ARTICLE 14

1. This convention shall be ratified or accepted by the Signatories in accordance with their respective constitutional requirements.

2. Instruments of ratification or acceptance shall be deposited with the Government of the French Republic, hereby designated as depositary Government.

3. This Convention shall come into force:

(a) before 30th September, 1961, upon the deposit of instruments of ratification or acceptance by all the Signatories; or

(b) on 30th September, 1961, if by that date fifteen Signatories or more have deposited such instruments as regards those Signatories; and thereafter as regards any other Signatory upon the deposit of its instrument of ratification or acceptance;

(c) after 30th September, 1961, but not later than two years from the signature of this Convention, upon the deposit of such instruments by fifteen Signatories, as regards those Signatories; and thereafter as regards any other Signatory upon the deposit of its instrument of ratification or acceptance.

4. Any Signatory which has not deposited its instrument of ratification or acceptance when the Convention comes into force may take part in the activities of the Organisation upon conditions to be determined by agreement between the Organisation and such Signatory.

ARTICLE 15

When this Convention comes into force the reconstitution of the Organisation for European Economic Co-operation shall take effect, and its aims, organs, powers and name shall thereupon be as provided herein. The legal personality possessed by the Organisation for European Economic Co-operation shall continue in the Organisation, but decisions, recommendations and resolutions of the Organisation for European Economic Co-operation shall require approval of the Council to be effective after the coming into force of this Convention.

ARTICLE 16

The Council may decide to invite any Government prepared to assume the obligations of membership to accede to this Convention. Such decisions shall be unanimous provided that for any particular case the Council may unanimously decide to permit abstention, in which case, notwithstanding the provisions of Article 6, the decision shall be applicable to all the Members. Accession shall take effect upon the deposit of an instrument of accession with the depositary Government.

ARTICLE 17

Any Contracting Party may terminate the application of this Convention to itself by giving twelve months' notice to that effect to the depositary Government.

ARTICLE 18

The Headquarters of the Organisation shall be in Paris, unless the Council agrees otherwise.

ARTICLE 19

The legal capacity of the Organisation and the privileges, exemptions, and immunities of the Organisation, its officials and representatives to it of the Members shall be as provided in Supplementary Protocol No. 2 to this Convention.

ARTICLE 20

1. Each year, in accordance with Financial Regulations adopted by the Council, the Secretary-General shall present to the Council for approval an annual budget, accounts, and such subsidiary budgets as the Council shall request.

2. General expenses of the Organisation, as agreed by the Council, shall be apportioned in accordance with a scale to be decided upon by the Council. Other expenditure shall be financed on such basis as the Council may decide.

ARTICLE 21

Upon the receipt of any instrument of ratification, acceptance or accession, or of any notice of termination, the depositary Government shall give notice thereof to all the Contracting Parties and to the Secretary-General of the Organisation.

IN WITNESS WHEREOF, the undersigned Plenipotentiaries, duly empowered, have appended their signatures to this Convention.

DONE in Paris, this fourteenth day of December, Nineteen Hundred and Sixty, in the English and French languages, both texts being equally authentic, in a single copy which shall be deposited with the depositary Government, by whom certified copies will be communicated to all the Signatories.

SUPPLEMENTARY PROTOCOL NO. 2 TO THE CONVENTION ON THE ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

The signatories of the Convention on the Organisation for Economic Co-operation and Development (hereinafter called the "Organisation");

Have agreed as follows:

The Organisation shall have legal capacity and the Organisation, its officials, and representatives to it of the Members shall be entitled ot privileges, exemptions, and immunities as follows:

(a) in the territory of the Contracting Parties to the Convention for European Economic Co-operation of 16th April, 1948, the legal capacity, privileges, exemptions, and immunities provided for in Supplementary Protocol No. 1 to that Convention;

(b) in Canada, the legal capacity, privileges, exemptions, and immunities provided for in any agreement or arrangement on legal capacity, privileges, exemptions, and immunities entered into between the Government of Canada and the Organisation;

(c) in the United States, the legal capacity, privileges, exemptions, and immunities under the International Organisation Immunities Act provided for in Executive Order No. 10133 of 27th June, 1950; and

(d) elsewhere, the legal capacity, privileges, exemptions, and immunities provided for in any agreement or arrangement on legal capacity, privileges, exemptions, and immunities entered into between the Government concerned and the Organisation.

IN WITNESS WHEREOF, the undersigned Plenipotentiaries, duly empowered, have appended their signatures to this Protocol.

DONE in Paris, this fourteenth day of December, Nineteen Hundred and Sixty, in the English and French languages, both texts being equally authentic, in a single copy which shall be deposited with the Government of the French Republic, by whom certified copies will be communicated to all the Signatories.

Mr. SPARKMAN. Mr. President, first let me inquire whether my understanding is correct that a unanimous-consent agreement has been entered into providing for a limitation of debate of one hour and a half, 45 minutes to a side?

The PRESIDING OFFICER. The Senator is correct.

Mr. SPARKMAN. Mr. President, I yield myself 10 minutes.

The convention before the Senate, if approved, will become an instrument of unsurpassed importance to the entire non-Communist world. The Organization for Economic Cooperation and Development—OECD—amounts to an historic recognition of the kind of world that has emerged from two world wars. It is a deeply divided and disturbed world.

The United States and the countries of Western Europe are bound together by similar institutions, interdependent economies, and an epochal challenge that faces them all quite impartially. Tied to this challenge is the breakdown and disappearance in many parts of the world—Asia, Africa, Latin America—of an old order, which has yielded up new and sovereign countries. The politically awakening peoples of these countries are committed to progress. All that can be safely said about them is that they will undergo profound change.

The OECD reflects the deep division and the swift changes that have transformed the world since the end of the last war. It is an acknowledgment of both the problems and opportunities that lie before its members.

The Organization will serve two major purposes. First, it will strengthen the economies of member countries by providing a forum in which economic problems can be reviewed and the resources of all of them can be brought to bear on these problems. Second, the OECD, through its Development Assistance Committee, will provide a means by which the burden of development assistance can be divided more equitably.

The need for the OECD has achieved bipartisan recognition. It is the product of an American initiative, first advanced by President Eisenhower in the fall of 1959. The proposal grew from a recognition that the 18 nation Organization for European Economic Cooperation—OEEC—had obviously achieved its goal of restoring Western Europe to economic health; that the economic problems and needs of today can best be served by a new organization in which the United States and Canada are participants.

In December 1959 the heads of government of the United States, France, Germany, and the United Kingdom, meeting in Paris, recommended an intensive study of the means by which they could deal with these problems and needs in a multilateral context. The result was a series of ministerial meetings, study groups, and reports. The product of this intensive 1-year effort is the convention now before the Senate.

It was signed in Paris on December 13 by the representatives of the 20 member governments. It was transmitted to the Senate on January 17 by President Eisenhower, and has been vigorously endorsed by President Kennedy. The Committee on Foreign Relations held a series of four hearings—two public and two executive. And the committee members, after fully satisfying themselves that nothing in the convention could affect in any way the division of authority between the Executive, the Congress, and the 50 States, reported the treaty favorably by a vote of 16 to 0.

The committee report concludes that the OECD will enable its members "to look above the crises of today to problems that lie ahead; to dispose of many problems in a systematic, orderly fashion, thus avoiding the harsh urgency that so often distorts bilateral efforts to solve problems that become critical overnight."

Just a few weeks ago the ranking officials of the Foreign Office of the Federal Republic of Germany visited Washington. On February 17, their delegation received an aide memoire from the new administration which is likely to become an historic document. A fragment of this aide memoire reads as follows:

> We are on the eve of creating a new phase in the history of the North Atlantic alliance. We have new tasks; and the recovery of Western Europe in the 1950's has given us new resources. Together the resources which we dispose are much larger than those we could command in the immediate postwar years and they are better distributed among us.
>
> To deal with these new tasks we must begin by recognizing that we are interdependent in all we do; and that our common burdens must be shared in a way that our peoples will recognize as fair.
>
> The economic questions now under discussion between the United States and Germany are not bilateral questions. The deficit of the United States arises wholly from its commitments and actions in the common defense of the free world. Without these freely assumed obligations the United States would now be running a heavy surplus in its balance of payments. These matters therefore must be approached in terms of a rebuilding of the alliance and in terms of the principles which should govern the effort over coming months and years.

Mr. President, the OECD is destined to become the instrument through which the burdens described in this aide memoire can be properly divided. It will allow needs to be measured against the capacities of the members to meet them. And it will permit the West, by mobilizing its vast economic, technological, and scientific resources, to cope more effectively with this swiftly changing and deeply challenging world.

Mr. President, I yield 10 minutes to the distinguished Senator from South Carolina.

Mr. THURMOND. Mr. President, it is difficult to conceive how any American citizen could quarrel with either of the three goals of the Organization for Economic Cooperation and Development stated in article 1 of the convention under consideration.

Within the concept of the first goal lies the ultimate solution to the maintenance of the economy of the free world which is essential to our eventual victory over communism. It also serves to emphasize the more specific purpose of providing at least a partial solution to the crisis brought about by the outflow of gold from the United States.

Within the scope of the second stated purpose of the Organization for Economic Cooperation and Development is included the goal of more active participation by our fellow nations in the free world in assisting the economic progress of undeveloped and underdeveloped nations.

Despite the numerous and undoubtedly well-intentioned efforts by this country and others, we have fallen far short of truly reciprocal and nondiscriminatory trade, the latter being the third stated goal of OECD. As an example, there are 22 countries which impose substantial restrictions on American textile products, and I ask unanimous consent that a list of countries and the amount of American textiles we exported to them in the first half of 1959 and the first half of 1960 be printed at this point in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

[In square yards]

	January–June 1959	January–June 1960
Ecuador	1,300,662	2,978,777
Bolivia	35,928	1,017,660
Mexico	381,646	562,609
Cuba	24,045,367	3,018,832
Colombia	393,313	290,506
Venezuela	9,780,379	6,220,530
Chile	174,216	432,315
Paraguay	43,302	66,770
Uruguay	17,897	8,850
Argentina	154,403	237,040
Iceland	566,853	388,104
Greece	190,365	210,910
West Germany	514,726	456,218
Syria	93,998	39,724
Iran	1,504,124	384,040
Vietnam	83,843	239,782
Indonesia	46,250	46,355
Philippines	18,264,643	18,848,733
Cambodia	4,221	129,110
French Morocco	1,272,276	1,491,816
Belgian Congo	1,973,736	1,477,535
Rhodesia	278,649	910,204

Mr. THURMOND. Mr. President, 52 other nations have raised insurmountable barriers against imports of American cotton textiles, and I ask unanimous consent that a list of these countries be printed at this point in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Countries whose purchases of American cotton piece goods are negligible or nonexistent: Aden, Afghanistan, Albania, Algeria, Azores, Angola, Bahrein, Borneo, Bulgaria, Burma, Canary Islands, Communist China, Cyprus, Czechoslovakia, Dahomey, Ethiopia, Egypt, French Equatorial Africa, French Guiana, Formosa, Ghana, Hungary, India, Ivory Coast, Japan, Jordan, Korea, Kuwait, Laos, Libya, Madagascar, Mali Federation, Mauritius, Martinique, Mozambique, Nigeria, Okinawa, Oman, Pakistan, Poland, Portugal, Rumania, Saudi Arabia, Somaliland, Spain, Sudan, Tanganyika, Tunisia, Turkey, U.S.S.R., Yugoslavia, and Zanzibar.

Mr. THURMOND. Mr. President, the barriers against this particular American product graphically illustrate the lack of reciprocity in our trade program and the urgent need for achieving further reciprocity in the form of relaxation of restrictions against U.S. exports.

As laudable as are the goals of the Organization, proposed to be joined by the United States by the ratification of the convention, I cannot support ratification. If, as is urged upon us by the State Department and others who support the ratification of the convention, it would vest no real substantive power in the organization to which membership for the United States is proposed, then there is no real reason to believe that these goals might not just as well be obtained through independently and individually negotiated agreements.

I realize full well that the Foreign Relations Committee, which unanimously recommended ratification of this convention, neither believes nor intends that the convention empowers the Organization for Economic Cooperation and Development to bind the United States on decisions with regard to our international trade, or on questions of foreign aid, or on matters affecting our domestic economy. I realize also that the Foreign Relations Committee has gone to great lengths to explore this problem with State Department representatives, both in the hearings and among themselves. It is my sincere hope that the conclusion which they have reached is justified by future events, should the convention be ratified.

I, personally, however, am not satisfied that the interpretive language incorporated in the resolution of ratification proposed by the committee satisfactorily alleviates the inherent dangers of this convention.

I thoroughly concur in the opinion expressed in the memorandum submitted by the legal adviser of the State Department to the committee, to the effect that the ratification of this convention will give the Executive no additional powers in substantive matters. No on denies, however, that this organization would provide the means through which the Executive could implement whatever Executive powers he has in the field of foreign relations, for the aims and purposes of the Organization, however laudable, are most generally and broadly stated.

Going one step beyond the issue of whether Executive powers in substantive matters would be increased by ratification of this convention, we arrive at the issue which I consider to be most basic and most fundamental to the question of ratification of this convention. I refer, of course, to the definition of Executive powers in substantive matters, particularly with regard to the questions of foreign trade and foreign aid, and in addition, with regard to the power of the Executive to enter into agreements which affect and influence our domestic economy. In this context, I refer to Executive powers which may be exercised without the concurrence of Congress. It is obvious to me, from a study of previous Executive actions, and specifically, Executive agreements entered into, that my conception of the scope of the Executive's powers in substantive matters is considerably at odds with previous Executive determinations with regard thereto.

Mr. President, let me say at this point that my difference with the Executive determinations of the bounds of Executive authority pertains to no particular administration; and certainly we have had no opportunity to judge the present administration's concept of Executive powers in the field of foreign relations, foreign trade, or foreign aid.

Mr. President, I have no way of knowing what the judgment of other Senators and Members of the House of Representatives is, or might be in the future, as to the extensiveness of Executive power in substantive matters that come within the scope of the language included in article 1 of this convention. I realize that it is quite possible, and even probable, that a majority—perhaps even a constitutional majority—would concur in most cases in the Executive's judgment of his own power. There remains the probability that in a specific case arising from the actions of the Organization for Economic Cooperation and Development, a constitutional majority of the Senate might well not concur in the Executive's estimate of his own power; and there is a possibility that on some particular point, every Member of the Senate and every Member of the House of Representatives might emphatically disagree with the Executive's conclusion on this point, for the Congress is traditionally quite jealous of its own powers.

The PRESIDING OFFICER (Mr. HICKEY in the chair). The time yielded to the Senator from South Carolina has expired.

Mr. SPARKMAN. Mr. President, I yield 2 additional minutes to the distinguished Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 2 more minutes.

Mr. THURMOND. I thank the Senator very much.

Mr. President, in the event of such a disagreement as I have envisaged, however, unless it were an instance in which appropriations were necessary for implementation, the Congress would be at a major disadvantage, if not altogether powerless—from a practical standpoint, to contest the excess by the Executive. Certainly the burden of an affirmative course would be very substantial. I must confess that, for a number of years, I have been quite unimpressed with interpretations of our Constitution and of the balance of powers between the Executive and the Congress, reached by our State Department, irrespective of the political party then holding sway in the executive branch. As an illustration of the credibility deserved by State Department judgments on our constitutional system, even within its own realm of foreign relations, I would call to the attention of the Senate a statement from the memorandum of the legal adviser to the State Department, printed as appendix 5 to the report of the Committee on Foreign Relations on this convention. This memorandum states in part—and I quote from page 21 of the report:

In this connection it should also be pointed out that treaties, like laws, are subordinate to the Constitution. They cannot violate the Constitution.

If, over the years, it had been Executive policy to adhere to the principle of that statement, I doubt seriously whether there would ever have been created an issue such as that which revolved—and I hope it still revolves—around the Bricker amendment. I would also imagine, judging from their decisions, that the members of the U.S. Supreme Court, past and present, living and dead, would find more than a little inconsistency in that opinion. Would that it were the prevailing rule under our constitutional system.

For these reasons, Mr. President, the ends so nobly stated as the aims for the Organization for Economic Cooperation and Development do not, in my opinion, justify the means; and I shall, therefore, vote against ratification.

Mr. ROBERTSON. Mr. President, will the Senator from Alabama yield for a question?

Mr. SPARKMAN. I yield.

Mr. ROBERTSON. I have received letters urging opposition to this treaty, on the ground that the treaty will take from the President and from the Congress constitutional rights with respect to tariffs. What decision was made by the Foreign Relations Committee when it passed on that issue and unanimously reported the treaty?

Mr. SPARKMAN. That question was thoroughly threshed out in the committee. We were assured by the legal representatives of the State Department that that matter was not affected by the treaty; and by referring to pages 18 to 21 of the committee's report, the Senator from Virginia will find legal opinion dealing in great detail with this matter.

However, we did not rest with that; we decided we would write a declaration in connection with the resolution ratifying the treaty. It may be found on page 13 of the committee's report; and I shall now read it—although quite hurriedly—to the Senate, if I may:

RESOLUTION OF RATIFICATION

Having regard to and in reliance on the statement in the letter of January 16, 1961, from Secretary of State Herter to President Eisenhower and transmitted by him to the Senate on January 17, 1961, that "the U.S. representative will not have any additional powers in substantive matters to bind the United States after the convention enters into force than now exist in the Executive, but that any act of the Organization outside the power of the Executive will require action by Congress or the Senate, as the case may be, before the United States can be bound," and having regard to and in reliance on the testimony of Secretary of the Treasury Dillon and Under Secretary of State Ball in behalf of the administration, and having regard to and in reliance on the Opinion of the Legal Adviser of the Department of State dated March 6, 1961, and quoted in the committee report on this convention:

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention on the Organization for Economic Cooperation and Development, together with two protocols relating thereto, signed at Paris on December 14, 1960, by representatives of the United States of America, Canada, and the 18 member countries of the Organization for European Economic Cooperation (Executive E, 87th Congress, 1st session), with the interpretation and explanation of the intent of the Senate, that nothing in the convention, or the advice and consent of the Senate to the ratification thereof, confers any power on the Executive to bind the United States in substantive matters beyond what the Executive now has, or to bind the United States without compliance with applicable procedures imposed by domestic law, or confers any power on the Congress to take action in fields previously beyond the authority of Congress, or limits Congress in the exercise of any power it now has.

Mr. ROBERTSON. Is the effect of the language which has just been read by the Senator that the treaty neither adds to nor takes away from existing powers of the President and of Congress?

Mr. SPARKMAN. Exactly. I do not believe it could have been stated in stronger language.

Mr. ROBERTSON. Then the constitutional rights of the Congress and of the President are protected. Is that correct?

Mr. SPARKMAN. They remain the same.

Mr. SYMINGTON. Mr. President, will the Senator yield 2 minutes to me?

Mr. SPARKMAN. I yield 2 minutes to the distinguished Senator from Missouri.

Mr. SYMINGTON. Mr. President, as a member of the Foreign Relations Committee, I heard the testimony and studied the material relating to the OECD, and believe that membership of our country in this Organization will be in the national interest.

Two factors underscore the benefits to the United States.

First, membership in the OECD will enable the country to be a participant in, and not a recipient of, some of the decisions of the major European economic groupings, the Inner Six and the Outer Seven.

We often tend to ignore the fact that, in the past decade, the European nations have grown to a position of great economic strength, with the power to have significant influence on the American economy.

The recent drain on our gold supply underscores that fact.

American participation in an established forum for exchange of views and information with the economic powers of Western Europe, as provided in the OECD, will give us greater influence in the economic affairs of the trading blocs.

Beneficial solutions to mutual trade problems can be sought. The United States will, when our own interests are involved, not merely be on the receiving end of European decisions.

A second factor in the interests of our country is the role of the OECD in providing assistance to the underdeveloped countries.

For many years the United States has borne the major share of technical and economic assistance to the less fortunate countries of the world, and the need for such assistance will continue in the years ahead. No one nation will be able to provide all the funds.

The multilateral assistance program planned for initiation under OECD would lighten the relative burden of the United States. This program would make available a larger and more effective pool of capital funds for the developing, newly emerging nations of Africa, Asia, and South America.

In addition, adequate safeguards to maintain the relative powers of the President and the Congress have been built into this treaty, as has been pointed out by the able Senator from Alabama, and as reported in its final form by the Foreign Relations Committee.

Ratification of this treaty by the Senate will serve the long run interests of our country because it will bring all the nations of the world closer to the goal of a more prosperous and more peaceful world.

Mr. ERVIN. Mr. President, will the Senator from Alabama yield for a question?

Mr. SPARKMAN. Mr. President, I yield myself 2 minutes for that purpose.

Mr. ERVIN. Referring to the testimony taken before the Foreign Relations Committee and the study of the proposed resolution of ratification, am I correct in stating that the ratification of the convention by the Senate will not enable the Organization to impose any obligation upon the United States other than the obligation to study the problems?

Mr. SPARKMAN. Other than the obligations that are carried within the treaty itself. Of course, this country would have a representative at the meetings. But insofar as imposing any obligations or limitations or restrictions are concerned, nothing could be done beyond what can be done now.

Mr. ERVIN. I thank the Senator.

Mr. JAVITS. Mr. President——

Mr. SPARKMAN. I yield to the Senator from New York.

Mr. JAVITS. I have arranged for time to be yielded from this side of the aisle. Will the Senator from Iowa [Mr. HICKENLOOPER] yield me about 3 minutes in order to ask two or three questions?

Mr. HICKENLOOPER. Yes. I yield the Senator from New York such time as he may require.

Mr. JAVITS. If I may address these questions to the Senator from Alabama [Mr. SPARKMAN], who is handling the bill, in the first place, it is clear, is it not, from the deliberations of the committee, as a part of the legislative history, that what is recorded in the resolution of ratification as an interpretation or declaration is not a reservation?

Mr. SPARKMAN. It is not a reservation. It is termed by the State Department experts as a declaration. What it does is declare our understanding of its application to us internally. It has no effect on other countries.

Mr. JAVITS. I wish the Senator to confirm this statement, because I think it is very important from the standpoint of the operation of the treaty. It will not interefere with the right of other members of the Organization, under article 6, to take a decision if we abstain and to go through with that decision insofar as it affects them?

Mr. SPARKMAN. The Senator is correct.

Mr. JAVITS. Now I ask my final question. I am looking for the majority leader, who was present a moment ago. As I understand, the question of whether or not there should be an ambassador to the OECD, in view of the importance of the Organization, of the same type and nature as the Ambassador to NATO, whom we have already appointed, is a question which has not yet been decided. I ask now whether the committee has expressed any view or has any view upon that question, in view of the fact that the OEEC, to which the OECD will be the successor, is an organization in which we had a minister who served subordinate to and as a part of the staff of the

Ambassador to NATO. If we are to make the OECD a powerful organization, in terms of the ultimate effect, in order that our representative may be able to agree on what is being talked about, I feel there should be an ambassador of equal rank to Mr. Finletter. I should like to know whether the committee has given thought to that question.

Mr. SPARKMAN. If the Senator will refer to page 45 of the hearings, near the bottom of the page, he will see that subject was discussed. We were told by witnesses from the State Department that it had not been definitely decided whether or not there would be one.

I may say to the Senator from New York that OECD is an enlargement of OEEC, and it seems to me it might very well call for an ambassador. It would be my hope that one would be appointed.

Mr. JAVITS. I thank the Senator from Alabama, and I thank the Senator from Iowa for yielding me time.

Mr. HICKENLOOPER. Mr. President, the very clear statement with regard to the treaty made by the Senator from Alabama, who is handling the treaty on behalf of the Committee on Foreign Relations, needs no amplification by me. It is an excellent statement, both concise and expressive.

Mr. President, as a member of the Foreign Relations Committee who is very interested in the treaty, and was during its committee consideration, I wish to say that certain questions were raised, as has been pointed out heretofore, about what the treaty would do by way of enlarging, diminishing, extending, or altering powers which may be held by the President or by the Congress, and what effect the treaty may have on the actions of our representative or of the President in connection with the OECD, in regard to the internal legal situation in this country. That is a matter of very serious concern.

I shall declare for the record my opinion. If there is any disagreement on the part of any member of the Committee on Foreign Relations, I shall be glad to hear it.

In my opinion, I do not believe a single member of the Committee on Foreign Relations of the Senate would have voted in favor of the treaty if he had thought the treaty, as finally reported to the Senate with its interpretation and understandings, contained any provision which would in any way enlarge or alter the powers of the President of the United States over those which he already possesses, or would in any way alter, enlarge, or diminish the powers of the Congress of the United States, or make any change in the constitutional powers of the executive or of the legislative branches. I do not believe any member of the committee would have voted for the treaty if such were involved.

Mr. President, in the hearings, both open and executive, conducted by the committee, and in the discussions of the committee, Senators thoroughly canvassed that situation.

The basis upon which the treaty was submitted to the Senate by the committee I believe is contained in the report of the committee to this body in connection with the treaty. I think it is very important for the RECORD that a portion of the report be printed, so I ask unanimous consent that it be printed in the RECORD at this point in connection with my remarks.

There being no objection, the portion of the report was ordered to be printed in the RECORD, as follows:

Since the end of World War II, vast changes have swiftly transformed relations between the non-Communist industrial nations, as well as relations between these powers and the less developed but politically awakened areas of the world. The Organization for Economic Cooperation and Development (OECD) reflects these changes, and has been designed to cope with those that can determine economic stability and growth.

Structurally, the OECD consists of the 18 European members that comprised the OEEC (Organization for European Economic Cooperation), plus the United States and Canada. The OEEC was established in 1948 to help Europe recover from the war. It recommended allocations of Marshall plan aid to member countries, established the European Payments Union, and liberalized intra-European trade. The OECD amounts to a recognition that the objective of the predecessor organization has been attained, and has given way to another and equally urgent set of problems that can be adequately dealt with only by a remodeled organization, in which the United States and Canada are participants.

The OECD has two broad purposes. One is to promote economic stability and the orderly growth of the economies of member countries. The other is to devise more effective methods of assisting the less developed countries, and for arranging to distribute the aid burden more equitably. Thus, on the one hand, the OECD reflects the growing interdependence of the economies of its member countries. And, on the other, it acknowledges the urgent need to narrow the gap between the rich and the poor countries, yet in a form that will not tax the economic vitality of any one of its members.

The OECD concept—the need for such an institution—has been widely discussed here and abroad in recent years. In the fall of 1959, behind an American initiative, these discussions assumed an official character. Next, in December 1959, the heads of Government of the United States, France, Germany, and the United Kingdom, meeting in Paris, publicly recommended an intensive study of methods of promoting consultations on major economic problems. This was followed by a ministerial meeting of January 14, 1960, in which representatives of the 18 OEEC countries and the United States and Canada adopted a resolution establishing a group of 4 experts to determine means by which the 20 nations could improve their cooperation on economic problems and development assistance.

On April 7, 1960, the Group of Four published its report, which proposed that the OEEC be reconstituted as the OECD. On May 25, senior officials of the 20 nations presented their governments' views on the Group of Four report and established a working party to draw up a draft convention remodeling the OEEC and to begin reviewing the OEEC acts.

On July 23, a ministerial conference reviewed the status of the project and established a preparatory committee to complete the transformation of the OEEC into the OECD. The committee's report was adopted at the Paris ministerial meeting of December 13, 1960, and the convention with related protocols was signed the next day by the representatives of the 20 governments.

SUBSTANCE OF THE CONVENTION

The OECD Convention consists of 21 articles and 2 related protocols. The aims of the Organization, as well as the methods and provisions for achieving these aims, are set forth in articles 1–6. A comparison of these six articles with the OEEC Convention reveals the following: The objectives of the OECD are broader than those of the OEEC. But the obligations are fewer and considerably less demanding. The OECD Charter provides for consultation and voluntary cooperation. The OEEC embodied rules and obligations to which each of its members was bound. Although preoccupied at the start with the distribution of Marshall plan funds, the OEEC became generally concerned with intra-European trade and payments problems. For example, the OEEC countries developed a code of liberalization, which removed quantitative restrictions on member imports within a system of reciprocal commitments. As a concession to the United States, the OEEC's Code of Trade Liberalization has been discarded in its entirety. For some members, this was a major—and painful—concession.

Many of OEEC's other codes and obligations have also been allowed to lapse. None of those that will be carried over will apply to the United States. However, the United States has agreed to certain recommendations of the OEEC. The terms of these recommendations do not obligate the United States, or other members, to courses of action. Appendix No. 1 to this report is a memorandum of understanding which formally commits the 18 OEEC members to vote in the OECD Council for adoption of those OEEC acts that have been recommended by the preparatory committee. However, the United States and Canada are not similarly bound. Under paragraph 2 of this memorandum, the United States and Canada shall be released from the commitment to vote in the OECD Council for adoption of any acts in this category if appropriate notification is given no later than 10 days after the deposit of either country's instrument of ratification. The act then becomes applicable to all the other members, but not to an abstainee.

The OECD's basic purposes—to promote orderly economic growth within its 20 member community, and to assist more effectively the less developed countries—is embodied in article 1. Under article 2, the members agree to pursue these aims by promoting the development and most efficient use of their economic, scientific, and technological resources.

They also agree, under article 2 (c), to "pursue policies designed to achieve economic growth and internal and external stability and to avoid developments which might endanger their economies or those of other countries."

This language clearly reflects the rapid and sweeping postwar changes that have inspired the creation of the OECD. It acknowledges the growing and relentless interdependence of the economies of the member countries. These economies have together become an elaborate skein, the threads of which are the payments balances and economic policies of the member countries (and others, like Japan). The process of reaction and adjustment between them is a constant rhythm. Ideally, this process should also provide equilibrium, just as the free gold standard was once supposed to provide automatic equilibrium. Unfortunately, the tangled skein of

international economics lacks the element that would assure stability, or automatic equilibrium. The OECD, through its Economic Policy Committee, will provide advice and recommendations designed to protect each member from economic disequilibrium.

The Secretary of the Treasury, Mr. Dillon, in testifying before the Committee on Foreign Relations, illustrated the need for the OECD mechanism with this reference to the U.S. balance of payments difficulties of 1960:

"During the first half of 1960 our balance of payments deficit on an annual basis was $2.9 billion—down markedly from the level of $3.8 billion in 1959. Last spring our Federal Reserve discount rate was at 4 percent, the German Bundesbank rate was 4 percent, and the Bank of England rate was 5 percent. In other words, all those rates were close together. Then, as business began to slow in the United States, our Federal Reserve began to ease credit and reduced its rate first to 3½ percent, and later to 3 percent. Meanwhile, the German Bundesbank, with its eye on the domestic boom in Germany, and with the objective of controlling inflation at home, increased its discount rate to 5 percent in June. The Bank of England promptly followed suit and upped its rate to 6 percent.

"These actions brought about a sharp imbalance in short-term interest rates. The results were bad for all concerned. A flood of short-term funds left New York seeking the higher return in Frankfurt and London. This sharply increased our balance-of-payments deficit from an annual rate of $2.9 billion in the first 6 months to a rate of $4.7 billion in the second 6 months. This sudden and sharp increase shook confidence in the dollar and the result was a substantial increase in the outflow of gold. This, in turn, brought on the speculative outbreak in the private gold market in London last October when for a day or two gold sold at $40 an ounce.

"Meanwhile the large inflow of American funds frustrated the efforts of the German authorities to tighten up on investment in Germany. When this became clear, the German and British authorities both cut back their discount rates, the flow of short-term capital slowed and confidence was gradually restored.

"The lesson to be learned by all this is that in these days of convertible currencies there must be close cooperation and coordination between our financial and monetary authorities and those of the major industrialized countries of Western Europe. This is now recognized on all sides. The OECD is the forum in which this coordination can be worked out and through which we can avoid similar episodes in the future. As such, it is a vitally important element in our drive to right our payments deficit without infringing on the actions that must be taken to reinvigorate our economy here at home."

Development Assistance Committee: Under article 2(e), the OECD members have agreed to meet their development assistance responsibilities by providing capital and technical assistance to the less developed countries, as well as helping them to secure and expand export markets. The OECD instrument for this activity will be its Development Assistance Committee, successor to the development assistance group, which operated throughout 1960 on an interim basis. Appendix No. 2 to this report is a breakdown of official assistance provided by the OECD members and Japan to less developed countries. It should be noted that the French figures include assistance to Algeria, which in the past has been regarded by French governments as part of Metropolitan France.

The Development Assistance Committee (DAC) initially will consist of nine OECD members—Belgium, Canada, France, Germany, Italy, the Netherlands, Portugal, the United Kingdom, and the United States—and also Japan. The DAC will not of itself be an operating, or burden sharing, agency. Instead it will review aid programs, recommend levels and kinds of aid, as well as more efficient and equitable aid programing. It will be a clearinghouse for information concerning the needs of the less developed areas and a forum in which the capacities of the major industrialized nations of the West, along with Japan, can be measured against these needs. The DAC will thus enable nations which are meeting their responsibilities in this area to encourage laggard nations to assume their share of the burden.

Trade provisions: Articles 1(c) and 2(d) provide that the OECD members will "pursue their efforts" to expand world trade "on a multilateral, non-discriminatory basis in accordance with international obligations"; also to try to "reduce or abolish obstacles to the exchange of goods and services * * *." The OECD's concern will be the broad outlines of trade policy, not tariff negotiations, or trade rules. These matters are the concern of the GATT (General Agreement on Tariffs and Trade) of which all OECD members, excepting Iceland, are contracting parties. Congress has never approved the GATT, and approval of the OECD will not constitute approval of the GATT. Articles 1(c) and 2(d) do not obligate members to take any actions which they otherwise would not take. These articles do mean that the OECD, as an extension of its function of providing economic stability, will become a consultative forum in which members can deal with general trade problems of concern to some or all of them.

As an example, Western Europe has divided into two trade blocs. Leaving aside the unproductive competition inherent in such a division, other problems appear. On January 1, 1961, the Common Market "Six" scaled down its internal tariffs on industrial items and some agricultural goods. The effect of these first adjustments has created some discrimination against imports from countries outside the "Six." Obviously, the United States and others must encourage the "Six" and the "Seven" (European Free Trade Association) countries to adjust their general trade policies in a way that will avoid further discrimination against those who are members of neither bloc. The OECD will be a forum for such discussions, as well as for the larger question of ending the trade division in Europe in a manner that will protect every country's interests. The problem affects the rich and poor alike.

In Africa, those countries which formerly were French colonies have the privilege of association with the "Six." This means that they can—and do—sell their goods in a preferred market. It also means that neighboring African States—Nigeria, for example, which in 1959 sold 35 percent of its exports to the "Six"—must compete for this market against a rising tariff wall. Appendix No. 3 to this report contains two tables, (a) and (b), which show respectively the importance of OECD countries as a market for the less developed countries; and the proportion of export earnings of selected less developed countries derived from their primary products.

In article 2(d), one of the two trade provisions, the members also agree to try to "maintain and extend the liberalization of capital movements." At present, only Belgium-Luxembourg, Canada, the United States, and Germany, among the members, permit the unrestricted flow of capital from their countries. This is another example of a problem that can be discussed within the broad, multilateral framework of the OECD.

Other provisions: In article 3 the members agree (a), to "keep each other informed"; (b) to "consult together on a continuing basis"; and (c) to "cooperate closely and where appropriate take coordinated action."

The language "where appropriate" makes article 3(c) permissive rather than mandatory. Furthermore, article 6(3) provides that: "No decision shall be binding on any member until it has complied with the requirements of its own constitutional procedures. The other members may agree that such a decision shall apply provisionally to them."

Articles 7–14 are concerned with organization and procedural matters. Subsidiary bodies, such as the Economic Policy Committee and the DAC, would be established under the authority of article 9.

Article 15 concerns the status of OEEC acts that might be carried over. It provides that "* * * decisions, recommendations, and resolutions of the Organization for European Economic Cooperation shall require approval of the Council to be effective after the coming into force of this convention." Under article 6, each member shall have one vote on the Council, and "decisions shall be taken and recommendations shall be made by mutual agreement of all the members."

Article 17 allows any member to terminate membership in the convention by giving 12 months' notice of that intention to the depositary government.

Articles 18–21 cover the location of the OECD headquarters (Paris); budgetary procedure; and notification responsibilities of the depositary government.

Protocols: There are two supplementary protocols to the convention. The first gives the members of the European Economic Community the option of acting individually within the OECD, or jointly through one of their commissions, such as the High Authority of the Coal and Steel Community, or the European Atomic Energy Community. The second protocol covers the privileges, exemptions, and immunities of OECD officials and representatives.

COMMITTEE ACTION

The convention, with related protocols, was transmitted to the Senate by President Eisenhower on January 17, 1961. On February 14 and 15, the Committee on Foreign Relations examined the convention in public session. Witnesses from the executive branch, representing President Kennedy, were heard on February 14. They were the Secretary of the Treasury and the Under Secretary of State for Economic Affairs. On February 15, the committee heard testimony from all other persons who had asked to appear.

The Chairman, Mr. FULBRIGHT, asked whether article 6(1) endowed the individual members with a veto power over the decisions and recommendations of the OECD Council. Under Secretary Ball, answering in the affirmative, said, "A nation which opposes a particular proposal has the option either of voting against it, in which case the proposal is killed, or of abstaining, in which case the proposal does not apply to that country."

The chairman, in referring to Secretary Dillon's comment on the relationship between discount rates and capital outflows, asked whether the OECD's authority would "affect the power of the Federal Reserve Board to alter our discount rates." Secretary Dillon said "No". Senator MORSE carried the question a step further and asked whether the jurisdiction of the Federal Reserve Board might be enlarged by the creation of the OECD. Secretary Dillon replied, "* * * this convention will not in any way, shape, or form enlarge the authorities of the Executive

or of the Federal Reserve or any other organization in the U.S. Government to take actions which are not already provided for * * * under act of Congress."

OECD and GATT: Senator SPARKMAN asked whether this organization would, or could, perform any of the functions that had been contemplated for the ITO (International Trade Organization), or whether the OECD bears any relationship to the GATT.

Secretary Dillon said that there is no connection whatsoever. He added that during the OECD discussions some of the countries objected to the elimination of the code of trade liberalization, because they felt they drew a measure of protection from these trade rules. However, the American position was accepted at the July OECD ministerial meeting. It was stated then by Secretary Dillon as follows:

"In the U.S. Constitution it is * * * specified that foreign trade is within the competence of the Congress of the United States and not within the competence of the Executive. All the actions which the Executive takes in this field and has taken over the past years in the form of trade agreements and so forth have been taken on this specific authority which has been voted by the Congress of the United States through the original Trade Agreements Act and its various extensions, the last of which occurred in 1958. It is impossible for the United States to agree to anything which would infringe this competence of the Congress.

"One thing to which this happens to apply is the question of detailed and fixed procedures and rules which have to be approved by the Congress as part of our joining, working with, any new organization. We have suggested three times in the last 10 years to our Congress, once under the Democratic administration, and twice under the administration of President Eisenhower, that rules and procedures which had been worked out by experts, and which would help the functioning of the GATT, be specifically approved by the Congress. Three times the Congress has refused to do that, allowing us to continue to operate within the framework of the GATT, but saying that as a Congress they would not approve any specific rules which might have the effect of binding or making it more difficult for them to operate with freedom in the field of trade in the future. It is very clear that this same consideration applies to this convention. Any attempt to tie in rules of trade, rules of procedure that are fixed and definite, would not be acceptable to our Congress and that is the reason why the U.S. representatives have continually objected to such rules and regulations.

"It is not a question of substance, the substance of whether we wish to talk about things or do not wish to, but it is a very important question of procedure and the prerogative of our Congress, which we are bound to uphold. It would be no use for us to reach an agreement around this table that we know would not be acceptable to our Congress, and would be doing a disservice to all of us sitting here. That is why I have dwelt on this problem."

Senator AIKEN also sought a more precise understanding of the intent of articles 1(c) and 2(d), the trade provisions. And the following exchange occurred between him and Secretaries Dillon and Ball:

"Senator AIKEN. The Senator from Alabama asked what the relationship of OECD would be to GATT, and you said there would be no relationship whatsoever.

"But reading this pledge to pursue efforts to reduce or abolish obstacles to the exchange of goods and services and current payments, makes one wonder whether OECD intends to operate parallel to GATT. What is the purpose there?

"Secretary DILLON. Well, in the field of capital flow and money, the GATT does not operate, and in that field I think that OECD would operate.

"We have always had a completely free regime for the flow of our capital and investments overseas; since the war, certainly, and probably for quite some time before that, the European countries have not.

"Now that their currencies are becoming convertible, it is in our interest to press for a greater freedom of these capital flows so that European funds will come to the United States for investment with greater ease than is presently the case. This would be a forum through which this objective would be sought, and that is what I think is referred to here when they talk about current payments and liberalization of capital movements.

"Senator AIKEN. But GATT and OECD would perform parallel functions as they relate to removal of trade barriers.

"Secretary DILLON. Well, that is the specific policy of the GATT, and in OECD it is not its specific policy.

"However, the countries agree that they will pursue their efforts individually, that is, to reduce and abolish obstacles.

"Now, by obstacles to the exchange of goods, we do not mean tariffs.

"What is really meant there are discriminatory provisions such as the chairman was talking about, which we have a few of in the agricultural field, and of which the European countries have many more.

"This is a pledge to work toward reducing or abolishing these, but how quickly results will be achieved I do not know, and certainly this organization is not the primary form in which this will be discussed.

"Mr. BALL. Senator, I might add that this organization will not be an organization that makes trade rules or that enforces trade rules or that modifies existing trade rules.

"There is a very clear distinction between what is contemplated here and the operations of the GATT in Geneva.

"Senator AIKEN. It would simply make findings and, on the basis of those findings, make recommendations to its members or just release its findings?

"Mr. BALL. The major interest of the United States in this, as Secretary Dillon has said, is in relation to the resolution of the existing problems between the Six and Seven Our concern there is to see that in the consideration of this problem the interests of the United States are represented."

The chairman pursued this matter further and raised with the two executive branch witnesses some comments of the opposition to the OECD:

"The CHAIRMAN. Since I asked you my question about the opposition, I have sent for, and have received, this statement which is apparently the principal statement of the opposition to this treaty. I think it would be well for the record if you would comment on it.

"First the ITO and OTC (Organization for Trade Cooperation) are described and how they were defeated by the Congress. Then the statement says 'They both also sought to use the sanctity of an international agreement as a means of making permanently supreme the economic outlook of people then in the executive branch of the Government and especially in the State Department.'

"Do you think this is a true characterization of this agreement?

"Secretary DILLON. Not at all, Mr. Chairman.

"The other two agreements did provide a mechanism for establishing trade rules and, as such, they would have much more explicitly recognized the GATT.

"The executive branch, at that time, felt that this was advisable because it was thought that the GATT was a useful instrument to prevent discrimination.

"But the OECD has nothing whatsoever to do with trade rules at all. We have made that very clear. We would be glad to repeat it again. It does not reflect the philosophy of any particular group.

"It is a broad, bipartisan measure that is in the national interest, and it simply recognizes the new facts of this era of convertibility, that we have to have a forum for the interchange of economic information, and where we can develop closer coordination and exchange views on methods and means by which each of our countries is successful in pursuing the objectives, its own objectives, of greater economic growth.

"The CHAIRMAN. The statement says:

" 'While Congress has the constitutional authority and responsibility to regulate our foreign commerce, it could no longer do so without encountering and, perhaps running afoul, of provisions of the international agreement.'

"Do you think that is true?

"Secretary DILLON. No, sir.

"The CHAIRMAN. It says: 'Ratification of the agreement would, therefore, transfer some of the most meaningful aspects of the enumerated congressional powers into the hands of the Executive without bothering about a constitutional amendment. Surrender by Congress in this matter would mean breaking faith with the electorate and, in fact, betrayal of its trust.'

"Would you think it is a true statement?

"Secretary DILLON. It would not transfer one single thing from the Congress to the Executive.

"The CHAIRMAN. It states: 'How would this come about? It would come about through an authorization of membership in an international organization having aims which could not be carried out without entrenching upon the functions of Congress.'

"Mr. BALL. As has been pointed out repeatedly here, Mr. Chairman, the decisions of this Organization can only be carried out through the constitutional processes of the United States. It does not add, it does not detract one bit from the powers of Congress. It does not expand the powers of the Executive.

"Secretary DILLON. That was the very reason that that language was specifically written into the charter in subparagraph 3 of article 6, so that there could be no misunderstanding on this subject. We were afraid that otherwise some people would misinterpret this thing. But with that language in there there can be no misunderstanding.

"The CHAIRMAN. So it is very clear that any specific agreement must return to the Congress and follow the usual procedure. None is authorized in advance by this agreement?

"Secretary DILLON. That is correct."

Senator SPARKMAN suggested that a memorandum outlining the history of the GATT "from the standpoint of its consideration by Congress," along with some background on its activities, would be helpful to the committee. The Legislative Reference Service of the Library of Congress was asked to prepare such a memorandum. It appears on page 102 of the printed hearings.

Functions of DAC: Senator SPARKMAN was interested in whether the DAC would be an operating agency, and, if so, would there be any overlapping of its functions with those of other multilateral organizations, such as the International Bank for Reconstruction and Development (IBRD).

His question produced the following exchange:

"Mr. BALL. I would like to point out a distinction here which, I think, could be the

subject of some confusion. This is not going to be an operating agency in the area of foreign assistance. The OECD will provide a forum in which the problem of foreign assistance can be freely discussed among the nations which have the resources to contribute to that effort.

"Senator SPARKMAN. Is that true of the OECD and the DAC, both?

"Mr. BALL. Yes. The DAC is simply a committee established under the OECD in which the problems of assistance are going to be discussed, and in which the effort will be made to mobilize the greatest amount of effort and resources for the purpose. But it is not contemplated that this will be an agency which administers aid.

"Secretary DILLON. Senator, I might say that in the meetings that we had last year of this Development Assistance Group, which is the predecessor organization, the World Bank and some of the U.N. agencies participated as observers, and they worked very closely with this group.

"This group might lead to closer coordination of national efforts, but, as Secretary Ball says, it has nothing to do with operations and therefore would not interfere with these other agencies at all."

Secretary Dillon added to the committee's understanding of the purpose and function of the DAC with this observation:

"We found when we started to discuss this last year in the earlier meetings of the Development Assistance Group, which will be the predecessor of this committee, that there was not even agreement on the definition of what was foreign aid. Some countries were calling foreign aid ordinary exports, which they financed on a 2- or 3-year basis, and so there was a good deal of discussion on that. We are now discussing what is aid and what is simply ordinary exports that one is financing. Statistics are being gathered, and it will become clear whether one or more of the big industrialized countries is not doing what it is obviously supposed to be doing. For any country not carrying a fair share of the burden, there will be moral pressure on that country to do better.

"Now, certainly no one could expect the United States to do any more since we have been carrying the bulk of the load from the beginning with help from particularly the French and the British.

"So, therefore, the effect of this committee will be, from our point of view, since we are already doing what we should, to throw the spotlight on those who have not yet met their full responsibilities. In that way it is a very important financial tool and very helpful to the United States in seeing that the program is better shared."

Relationship to NATO: The chairman asked whether the OECD might have the effect of downgrading the importance of NATO. The opinion of the executive branch witnesses is that the two organizations will perform complementary functions. Senator MORSE pursued the matter further, and drew this comment from Secretary Dillon:

"I would like to say one thing about this. One field in which the OECD will be active, which is the responsibility of the Development Assistance Committee, is the coordination and discussion of policy for development assistance to underdeveloped countries throughout the world, many of which are neutral countries. This is a function which simply could not be carried out successfully by NATO, because NATO is looked upon as a military alliance, and a strong partisan of one side—our side—in the cold war.

"So these neutral countries of Asia and Africa would not feel comfortable if their aid was being coordinated by that sort of an organization. They have made that very clear. So that is the great advantage of having the OECD, which does not have that connotation and which does have all the neutral countries of Europe as members.

"Senator MORSE. Mr. Secretary, I could not agree with you more. That is why I pursue this matter a moment longer. Secretary Ball pointed out that Sweden and Switzerland will be members of OECD. They are not members of NATO."

Legal interpretation: Several committee members were especially interested in having a precise understanding of articles 5 and 6. Specifically, they were concerned with what, if anything, distinguishes the decisions of 5(a) from the recommendations of 5(b); also whether article 6(3) clearly and adequately protects the balance between the legislative and executive branches of the Government. In response to a committee request, the Legal Adviser to the Department of State prepared a memorandum addressed to these specific questions. It appears as Appendix 4 to this report. Under article 5(a), the Organization may "take decisions which, except as otherwise provided, shall be binding on all the members." The Legal Adviser says: "Thus, by the very terms of a decision, it may be restricted in its obligatory application to only certain of the members of the Organization."

Under 5(b), the Organization may "make recommendations to members * * *." The Legal Adviser says: "Recommendations may recommend a course of action by members, or study of a matter, or adherence to an international agreement drafted in an OECD committee, etc. For example, the OECD will normally deal with substantive problems such as economic policy and assistance to the less-developed countries by exchanging information and by informal discussions. To the extent that additional action were necessary, this would normally be taken by the OECD Council in the form of a recommendation to member governments. Thus, the OECD Council might follow a discussion of assistance to the less-developed countries by a recommendation to member governments that they increase the length of credits extended to the less-developed countries. In such cases, the member governments would not be legally bound by the recommendations, but they would endeavor to carry out the recomendations."

The Legal Adviser says that articles 1 and 2 are "void of any grant of power to the Executive, and the power, in any particular case, of the U.S. Executive to bind the United States must be sought and found in an independent source outside the [OECD] Convention."

His conclusion is that "paragraph 3 of article 6 allows for full compliance with U.S. constitutional procedure and the division of functions between the Executive and the Congress."

Other questions: Senator AIKEN asked about the anticipated size of the OECD staff and the cost of maintaining the Organization. The following exchange occurred between him and Secretary Dillon:

"Senator AIKEN. Mr. Secretary, how large an organization do you expect this to be in terms of personnel?

"Secretary DILLON. We have a feeling that this will be smaller than the present OEEC Organization because this Organization had a very considerable number of personnel engaged in certain functions which would probably not be continued.

"I think that the total effort in Paris will be several hundred.

"The figures, I think, on the OEEC now are somewhere under 1,000 people working in that Organization.

"Senator AIKEN. It may be 1,000. What was the estimated cost of maintaining the Organization a year?

"Secretary DILLON. Well, the OEEC's costs were approximately $4 million, so we thought that our share would be about $1 million, if we had the same assessment as our assessment in NATO, which is roughly 25 percent.

"Senator AIKEN. 25 percent.

"Secretary DILLON. We might have a smaller assessment here because this is a larger organization somewhat. In NATO our assessment is 24.2 percent. Here there are the few extra smaller countries, so it might be possible that we could negotiate something between 20 and 25 percent, which, I think, would be fair."

Senator MORSE asked whether consideration was given to inviting Japan to be a full-fledged member of the OECD. Secretary Dillon replied that the United States "would like to see that happen." However, the European countries, while agreeing to Japanese participation in the DAC, opposed a general membership for Japan. Secretary Dillon observed that this feeling might change and at some later date Japan could be invited into full OECD membership.

The chairman and Senator MORSE indicated that their further questions would be submitted in written form. The contents of their correspondence can be found in the appendix to the record of the OECD hearings. Among other things, their questions dealt with the balance of payments problems; discriminations against U.S. products; restrictions against capital movements in and out of the OECD countries; the U.S. tariff position and the benefit to the United States of GATT participation; examples of decisions that might be made by the OECD Council in regard to the aims set forth in article 1.

Among those who asked to bring their views on the OECD before the committee were three Members of Congress, Senator JACOB K. JAVITS, of New York; Representative W. J. BRYAN DORN, of South Carolina; and Representative JAMES C. DAVIS of Georgia. Senator JAVITS supports the convention. Congressmen DORN and DAVIS oppose it on the grounds that it could, in their view, expand the authority of the executive branch to regulate foreign commerce. They were followed by seven public witnesses, six of whom oppose the convention for reasons similar to those expressed by Congressmen DORN and DAVIS. The committee received over 600 communications concerning the OECD. There was an approximately even division between those who were for, and those who were against the convention.

Further committee action: On March 1, the committee met in executive session to hear further testimony from Secretaries Dillon and Ball. Senator LONG questioned the language of article 2(d), and the following explanation was offered by Secretary Dillon:

"What this means—the English text was construed by the people who drafted the language, and by those who signed it, to mean that they would pursue their efforts to reduce or abolish obstacles and to maintain and extend the liberalization of capital movements.

"In other words, the 'maintain and extend the liberalization of capital movements' follows after 'pursue their efforts to,' and therefore the agreement is to pursue efforts to maintain and extend the liberalization of capital movements. No flat commitment is made to maintain and extend them; in the French text, which is equally valid, that is made very clear, because the word 'to' is in there in the French text.

"There is a word 'to' before 'maintain.'"

The question arose again when Senator GORE asked this question of Secretary Ball

and the legal adviser to the Department of State, Mr. Chayes:

"If by this treaty we specifically agree to maintain and extend the liberation of capital movements, would a statutory enactment contrary to such liberalization of capital movement be in conflict with the treaty?"

Mr. Chayes responded and the following exchange ensued:

"Mr. CHAYES. Well, Senator, your hypothetical case depends upon reading article 2(d) as an absolute engagement to maintain and extend the liberalization of capital movements.

"I think the Secretary has already said that the article is to be construed as an engagement merely to pursue efforts to maintain and extend the liberalization of capital movement.

"Senator GORE. May I ask a question right there? Suppose that instead of the Secretary's interpretation, the Court should hold that, in fact, this is an agreement to maintain and extend the liberalization of capital movements; what would then be the confrontation?

"Mr. CHAYES. Well, with deference, Senator, I cannot conceive a court so holding in view of the fact that the French and English text have equal status, and any ambiguity that appears in the English text is fully clarified by the French text."

Senator GORE was specifically concerned with the meaning of the term "current payments" and the phrase "liberalization of capital movements" as they appear in article 2(d). The Department of the Treasury, in order to define these terms precisely, offered a memorandum that appears in the appendix of the printed hearings.

Several members sought further assurance that none of the provisions of the convention could endow the President with authority that he does not already have; these members also sought further clarification of the constitutional guarantees contained in article 6(3). The legal adviser, Mr. Chayes, responded with a memorandum dated March 6, which appears in appendix 5 to this report.

The committee met again in executive session on March 6. Under Secretary Ball and the legal adviser, Mr. Chayes, were present. Some members were interested in U.S. policies regarding most-favored-nation treatment. Upon request, the Department of State submitted one memorandum explaining American policy on this subject, and another which set forth provisions of the GATT that allow contracting parties to adopt discriminatory policies under certain circumstances. These memorandums may be found on page 245 of the hearings.

Senator WILLIAMS observed that the President's authority under the Trade Agreements Act is discretionary. He asked whether a decision by the OECD Council might compel the President to act within the scope of his authority, thus depriving him of his option not to act. This produced the following exchange between the Senator, Under Secretary Ball, and Mr. Chayes:

"Mr. BALL. No; he could not bind himself to do anything unless he has the power to do. I do not quite understand how this could possibly occur—do you, Mr. Chayes?

"Mr. CHAYES. Well, I do not think he could even bind himself to waive his discretion in the case of a subsequent escape clause proceeding since he does not have, I do not think, constitutional power to waive that subsequent discretion.

"Mr. BALL. You see, he has to make a finding.

"Senator WILLIAMS. That is right.

"Mr. BALL. We cannot waive his power to make the finding. He has to make the finding to comply with the statute. Otherwise he has no power.

* * * * *

"Mr. CHAYES. I do not know just what the terms of our arrangements in GATT are. But it is perfectly clear that in the case of any agreement in GATT, or any other agreement under the Trade Agreements Act—and notice when we are talking about the hypothetical case of an agreement under this convention, it is only an agreement carried out within the terms of the authority delegated by the Trade Agreements Act—no such agreement can be made until the President's discretion has been exercised in accordance with all the terms and conditions of the act."

Senator HICKENLOOPER asked whether any provision of the convention could give the President tariff-making authority and prevent the Congress from taking back that authority.

Under Secretary Ball and Mr. Chayes replied that this would not be possible.

The committee feels that in giving its advice and consent the Senate must emphasize, as an inherent part thereof, that it accepts and relies upon the assurances of the executive branch of the Government that nothing in the convention enlarges, diminishes, or alters the powers of the President or the Congress in respect to any substantive actions taken or that may be taken by the Organization for Economic Cooperation and Development and that a clear expression of such interpretation and understanding should be incorporated as an integral part of such advice and consent. The committee felt that the resolution of ratification should contain the relevant assurances that had been offered by Secretary of State Herter, Secretary of the Treasury Dillon, Under Secretary Ball, and the legal adviser of the Department of State. Secretary Herter's statement appears in his letter of January 16 to President Eisenhower, which can be found on page 2 of the message from the President transmitting the convention to the Senate (Ex. E, 87th Cong., 1st sess.). Statements of the other deponents may be found in this report and appendixes thereto. The full text of the resolution of ratification itself follows:

"RESOLUTION OF RATIFICATION

"Having regard to and in reliance on the statement in the letter of January 16, 1961, from Secretary of State Herter to President Eisenhower and transmitted by him to the Senate on January 17, 1961, that 'the U.S. representative will not have any additional powers in substantive matters to bind the United States after the convention enters into force than now exist in the Executive, but that any act of the Organization outside the power of the Executive will require action by Congress or the Senate, as the case may be, before the United States can be bound,' and having regard to and in reliance on the testimony of Secretary of the Treasury Dillon and Under Secretary of State Ball in behalf of the administration, and having regard to and in reliance on the opinion of the legal adviser of the Department of State dated March 6, 1961, and quoted in the committee report on this convention:

"Resolved (Two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention on the Organization for Economic Cooperation and Development, together with two protocols relating thereto, signed at Paris on December 14, 1960, by representatives of the United States of America, Canada, and the 18 member countries of the Organization for European Economic Cooperation (Executive E, 87th Congress, 1st session), with the interpretation and explanation of the intent of the Senate that nothing in the convention, or the advice and consent of the Senate to the ratification thereof, confers any power on the Executive to bind the United States in substantive matters beyond what the Executive now has, or to bind the United States without compliance with applicable procedures imposed by domestic law, or confers any power on the Congress to take action in fields previously beyond the authority of Congress, or limits Congress in the exercise of any power it now has."

CONCLUSION

The Committee on Foreign Relations believes that the OECD member countries are undergoing the gravest test of their collective history. To prevail will depend, as much as anything else, on their ability to promote stability and growth within their delicately balanced, interdependent economies. Yet even this will not be enough, if the product of this growth is not in sufficient measure devoted to programs that will encourage the development of less favored peoples in a way that is consonant with their best purposes. If the energies and resources of the aspirant and newly independent peoples were turned to uncongenial purposes, the consequences for Western civilization would ultimately be decisive.

This thesis is understood by the leaders of both the Soviet Union and the United States, and apparently by a majority of the people of the United States. It is also understood by some, but by no means all, of the leaders of West Europe. Many of them do not yet understand either the moral imperatives or the cold logic of foreign assistance. And what is true of these leaders can be safely said to apply, as well, to their constituents.

In that light, the OECD will be an educational forum. Terms can be defined. Foreign aid itself is a term that badly needs definition. To some, exports financed with short term, high interest credits, are foreign aid, and sums for this purpose are cited, not as investment, but as evidence of good faith. To others, funds invested in a colony fall within the definition of foreign aid. The American experience with foreign aid must be brought to bear upon the consciousness of other capital exporting countries. Bilateral talks, even if conducted at the White House level, are no substitute for the education that can be spread throughout the OECD membership by joint exposure to the same information, to the philosophy and the logic that have motivated American foreign aid from the beginning.

If Europeans have not developed a keen appreciation for foreign aid, it is also true that Americans have been laggard in acknowledging the economic interdependence of the Atlantic Basin countries. The truth is that the West can no longer tolerate economic disequilibrium. Too much depends on the vigor of its interdependent economy, greater by far than the sum of the individual parts.

More important than the collective GNP ($775.5 billion) of the OECD members are the scientific and technical resources upon which it is built. With the OECD, these resources can be mobilized and directed toward productive purposes. For the first time, a group of countries with common interests, beset by common problems, will be free to discuss their goals and problems within an organization designed for precisely that purpose.

This is a time of sweeping political, social, and technological change. History is being shaped within a swirl of events that often develop with bewildering speed. The committee believes that the OECD will enable its members to see these events in a broader and, hence, more relevant perspective. It

will enable them to look above the crises of today to problems that lie ahead; to dispose of many problems in a systematic, orderly fashion, thus avoiding the harsh urgency that so often distorts bilateral efforts to solve problems that become critical overnight. The committee, therefore (by a vote of 16 to 0), recommends that the Senate give its advice and consent to the ratification of the pending treaty.

APPENDIX 1

MEMORANDUM OF UNDERSTANDING ON THE APPLICATION OF ARTICLE 15 OF THE CONVENTION ON THE ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

Article 15 of the Convention on the Organisation for Economic Co-operation and Development (hereinafter called the "Convention") provides that decisions, recommendations and resolutions (hereinafter called "acts") of the Organisation for European Economic Co-operation shall require approval of the Council of the Organisation for Economic Co-operation and Development (hereinafter called the "Council") to be effective after the coming into force of the Convention.

Pursuant to a Resolution adopted at the Ministerial Meeting of 22nd–23rd July, 1960, a Preparatory Committee has been established and instructed to carry further the review of the acts of the Organisation for European Economic Co-operation, to determine which acts should be recommended to the Council for approval, and to recommend, where necessary, the modifications required in order to adjust these acts to the functions of the Organisation for Economic Co-operation and Development.

At the said Ministerial Meeting it was agreed that there should be the maximum possible degree of certainty as regards approval by the Council of acts of the Organisation for European Economic Co-operation in accordance with the recommendations of the Preparatory Committee; it was also agreed that Canada and the United States, not being Members of the Organisation for European Economic Co-operation, should have a certain latitude with respect to the said recommendations.

Therefore the Signatories of the Convention have agreed as follows:

1. The representatives of the Signatories on the Council shall vote for approval of acts of the Organisation for European Economic Co-operation in accordance with the recommendations of the Preparatory Committee, except as otherwise provided hereinafter.

2. Any Signatory which has not been a Member of the Organisation for European Economic Co-operation shall be released from the commitment set out in paragraph 1 with respect to any recommendation or part thereof of the Preparatory Committee which it specifies in a notice to the Preparatory Committee no later than ten days after the deposit of its instrument of ratification or acceptance of the Convention.

3. If any Signatory gives notice pursuant to paragraph 2, any other Signatory, if in its view such notice changes the situation in regard to the recommendation or part thereof in question in an important respect, shall have the right to request, within fourteen days of such notice, that the Preparatory Committee reconsider such recommendation or part thereof.

4. (a) If a Signatory gives notice pursuant to paragraph 2 and no request is made pursuant to paragraph 3, or, if such a request having been made, the reconsideration by the Preparatory Committee does not result in any modification of the recommendation or part thereof in question, the representative on the Council of the Signatory which has given notice shall abstain from voting on the act or part thereof to which the recommendation or part thereof in question pertains.

(b) If the reconsideration by the Preparatory Committee provided for in paragraph 3 results in a modified recommendation or part thereof, the representative on the Council of the Signatory which has given notice may abstain from voting on the act or part thereof to which the modified recommendation or part thereof pertains.

(c) Abstention by a Signatory pursuant to subparagraph (a) or (b) of this paragraph with respect to any act or part thereof shall not invalidate the approval of that act or part which shall be applicable to the other Signatories but not to the abstaining Signatory.

5. The provisions of this memorandum relating to actions to be taken before the voting in the Council shall come into force upon its signature; the provisions relating to the voting in the Council shall come into force for each Signatory upon the coming into force of the Convention as regards that Signatory.

In witness whereof, the undersigned have appended their signatures to this memorandum.

Done in Paris, this fourteenth day of December, Nineteen Hundred and Sixty, in the English and French languages, both texts being equally authentic, in a single copy which shall be deposited with the Government of the French Republic, by whom certified copies will be communicated to all the Signatories.

APPENDIX 2

Official assistance to the less developed countries by OECD countries and Japan

[Dollars in millions]

	1956	1957	1958	1959	1956–59

Aid as percent of GNP	0.06	0.05	0.74	0.14	0.25

NOTES

1. GNP figures are at current market prices. The figures for 1959 are estimated.
2. Both the GNP and aid figures have been converted to dollars at current exchange rates.
3. Aid figures are based primarily on actual expenditures. For all the countries they include: (a) net official grants, (b) gross official bilateral loans of 5 years or over, (c) official contributions and subscriptions to international organizations paid during the period (i.e., net IBRD subscriptions, IFC capital contributions, contributions to the EEC Development Fund, net contributions to United Nations technical assistance and relief agencies). For the United States, the increase in U.S. holdings of local currencies derived from Public Law 480, title I sales is included to reflect the transfer of resources. For Japan, the yearly breakdown on gross official bilateral loans of 5 years or over is estimated. Reparations payments have not been included.
4. This definition of assistance has not been accepted by the countries involved and has no international standing.

APPENDIX 4

DEPARTMENT OF STATE,
February 27, 1961.

Hon. J. W. FULBRIGHT,
Chairman, Committee on Foreign Relations, U.S. Senate.

DEAR MR. CHAIRMAN: In the course of the hearings on the Convention on the Organization for Economic Cooperation and Development on Wednesday, February 15, 1961, before the Foreign Relations Committee a request was made for a memorandum setting forth the legal analysis of article 5 and article 6.

I attach such a memorandum and hope it will be helpful to your committee in the consideration of the convention. I wish to point out that the Department of Justice has been consulted in the preparation of this memorandum.

Sincerely yours,

ABRAM CHAYES,
The Legal Adviser.

MEMORANDUM

Article 5 of the Convention on the Organization of Economic Cooperation and Development reads as follows:

"In order to achieve its aims, the Organization may:

"(a) take decisions which, except as otherwise provided, shall be binding on all the members;

"(b) make recommendations to members; and

"(c) enter into agreements with members, nonmember States and international organizations."

Article 6 reads as follows:

"1. Unless the Organization otherwise agrees unanimously for special cases, decisions shall be taken and recommendations shall be made by mutual agreement of all the members.

"2. Each member shall have one vote. If a member abstains from voting on a decision or recommendation, such abstention shall not invalidate the decision or recommendation, which shall be applicable to the other members but not to the abstaining member.

"3. No decision shall be binding on any member until it has complied with the requirements of its own constitutional procedures. The other members may agree that such a decision shall apply provisionally to them."

It appears that the discussion in the committee which gave rise to the request for the present memorandum concerned in the main article 5 and article 6, paragraph 3.

Under article 5(a) the Organization may act by taking decisions. Such decisions are binding on all the members, except as otherwise provided. Thus, by the very terms of a decision, it may be restricted in its obligatory application to only certain of the members of the Organization.

Under article 5(b) the Organization may act by making recommendations. As the term signifies, these are not of an obligatory nature, but a member would be expected to endeavor to carry out such a recommendation, unless the member abstained from voting for it. Recommendations may recommend a course of action by members, or study of a matter, or adherence to an international agreement drafted in an OECD committee, etc. For example, the OECD will normally deal with substantive problems such as economic policy and assistance to the less-developed countries by exchanging information and by informal discussions. To the extent that additional action were necessary, this would normally be taken by the OECD Council in the form of a recommendation to member governments. Thus, the OECD Council might follow a discussion of assistance to the less-developed countries by a recommendation to member governments that they increase the length of the credits extended to the less-developed countries. In such cases, the member governments would not be legally bound by the recommendations, but they would endeavor to carry out the recommendations.

Under article 5(c) the Organization may enter into agreements with members, nonmembers, or international organizations. One such type of agreement is referred to in supplementary protocol No. 2, namely, an agreement by the Organization with Canada or a nonmember government regarding the legal capacity and privileges and immunities of the Organization on the territory of Canada or such nonmember government. Also

the Organization might enter into an agreement with another international organization, such as the International Monetary Fund, for participation of representatives of the IMF as observers in certain committees of the OECD.

The question was raised in the hearings before the committee whether the statement of the aims of the Organization in article 1 and the agreement in elaboration of such aims in article 2 could be construed assuming Senate ratification, to confer power upon the executive branch of the U.S. Government acting through its representative on the Council of the Organization, to bind the United States by participating in a decision of the Organization within the fields described in articles 1 and 2 which define the substantive scope of the Organization. As stated in the letter of January 16, 1961 of the Secretary of State to the President, which the President enclosed with his message to the Senate of January 17, 1961, and as reiterated by Government spokesmen at the hearings, it is not considered that by the convention the Executive will have any additional powers in substantive matters that now exist in the Executive. In short, articles 1 and 2 set forth the general agreement between the member nations and limit the proper scope of activities of the Organization; these articles are void of any grant of power to the Executive, and the power, in any particular case, of the U.S. Executive to bind the United States must be sought and found in an independent source outside the convention.

With this as background, consideration may now be given to article 6, paragraph 3. This important paragraph states that no decision shall be binding on a member until it has complied with the requirements of its own constitutional procedures.

Thus, if a decision were proposed to the Council for the establishment of a committee of representatives of member governments to study the promotion of tourism, the executive branch would consider it had power to agree to such a decision. Similarly, if a decision were proposed to the Council for the establishment of a fund for the period of a year, contributed to by all members, to encourage tourism in member countries, the U.S. executive would consider it had power to agree to such a decision, if the U.S. Congress had authorized and appropriated funds for the promotion of tourism to the United States. If no such congressional authorization and appropriation existed, the executive branch through its representative would either veto the decision, or abstain (thus permitting the decision to become binding as to other member countries) or approve, subject to compliance with U.S. constitutional procedures. In this last event, appropriate U.S. congressional action would have to be taken before the decision could be binding on the United States. Similarly, a decision might be proposed to the Council involving an international agreement of a type which would require Senate advice and consent under U.S. treaty procedure. In this case, again the U.S. representative could veto, abstain, or approve subject to compliance with U.S. constitutional procedures. In this last event, Senate advice and consent would need to be given before the decision could be binding on the United States. In conclusion, it is our view that paragraph 3 of article 6 allows for full compliance with U.S. constitutional procedures and the division of functions between the Executive and the Congress.

It may be noted that it is expected that most of the decisions taken by the OECD Council which will be binding on member governments will not pertain to substantive matters but will pertain to administrative matters, such as the establishment of committees and working parties. For example, the OECD Council will have to take decisions to establish the appropriate subsidiary bodies of the OECD. Council decisions will also be taken concerning the terms of reference of these committees. Later Council decisions will be taken covering the activities of these committees.

APPENDIX 5

MARCH 6, 1961.

OPINION OF THE LEGAL ADVISER

The Legal Adviser of the State Department is of the opinion that nothing in the Convention on the Organization for Economic Cooperation and Development confers any power on the Executive to bind the United States in substantive matters beyond what the Executive now has, or on the Congress to take action in fields previously beyond the authority of Congress. Conversely, nothing in the convention diminishes the power of the Executive or Congress in these respects.

The attached memorandum sets forth the reasoning underlying this opinion.

ABRAM CHAYES,
The Legal Adviser.

MEMORANDUM

1. There is nothing in the convention which expands or enlarges the power of the Executive in substantive matters.

Article 1 states the aims of the Organization and article 2 sets forth the general agreement of the members in elaboration of these aims. Then article 5 states that the Organization may take decisions and article 6 describes the process by which these decisions be taken. This process provides two safeguards for the United States. In the first place no decision may be imposed on it without its consent. Secondly, that consent must be given in compliance with the requirements of U.S. constitutional procedures before the decision becomes binding upon us.

The argument has been intimated that since the Organization under article 5 is authorized to take decisions and since the executive branch will be representing the United States in the Organization, the convention will operate to give the Executive power to agree on decisions in the substantive fields covered by articles 1 and 2. This argument is based on the erroneous assumption that the convention in any way concerns itself with the distribution of powers within the United States or any other member state. Properly viewed, articles 1 and 2 merely set forth a general agreement between the member nations on broad lines of public policy and define the area of concern of the Organization. Under article 5 the Organization may take decisions, but the convention is silent as to the process by which a member nation, within its own internal system, arrives at the point where it may cast an effective vote in favor of a particular decision. Articles 1 and 2 are void of any grant of power to the Executive. Thus, the power of the United States to cast a favorable vote and bind the United States in any particular case must be sought in a source outside the convention.

Paragraph 3 of article 6 was urged upon the other countries by the United States. The United States in the negotiations emphasized that under our constitutional system certain matters were in the purview of Congress and that the agreement of the United States to Council decisions on such matters even after the ratification of the convention would remain subject to further action by the Congress before being binding on the United States. Paragraph 3 of article 6 would have been unnecessary and meaningless if the mere ratification of the convention served to clothe the Executive with powers to take action in the fields covered by articles 1 and 2.

It may be pointed out that the view that the convention does not enlarge the power of the Executive in substantive matters (1) was stated in the letter of January 16, 1961, of Secretary of State Herter to President Eisenhower which he enclosed with his message to the Senate of January 17, 1961 (2) was repeated several times by Secretary Dillon and Under Secretary Ball at the hearings before the Foreign Relations Committee, and (3) was developed in some detail in a memorandum of the Legal Adviser of the State Department concurred in by the Department of Justice and enclosed with a letter of February 27, 1961, from the Legal Adviser to the chairman of the Foreign Relations Committee.

2. There is nothing in the convention which expands or enlarges the power of the Congress to take action in fields previously beyond the authority of the Congress.

The argument appears to have been made that the provisions of articles 1 and 2 may in some way serve as the source of authority for Congress to legislate in the future in fields which are reserved to the States by the 10th amendment. As was stated at the hearings by Government spokesmen, articles 1 and 2 define the broad aims and goals of the Organization. The language of article 2 is that of agreeing to "promote," "pursue policies," "pursue * * * efforts" and "contribute * * * by appropriate means." The concrete steps by which the broad aims and goals are to be effectuated remains in the complete discretion of each member nation. We wish to emphasize the point made in Under Secretary Ball's letter to the chairman of February 27, 1961, that such language in article 2 does not constitute a commitment to take any concrete action or refrain from any concrete action. We are merely bound to consult and exchange views and information in a regular and systematic manner on matters within the purview of the article. In our view this language cannot serve as any authorization to Congress to take any action it otherwise could not take.

In this connection it should also be pointed out that treaties, like laws, are subordinate to the Constitution. They cannot violate the Constitution.

Finally, reference is again made to paragraph 3 of article 6. This paragraph, on its face, defers to our constitutional system not only in its distribution of powers between the Executive and the Congress, but also in its distribution of powers between the Federal Government and the States.

3. Nothing in the convention diminishes the power of the Executive or Congress.

In the course of the hearings the question was raised whether provisions of article 2 might not override congressional actions or inhibit congressional actions on particular subjects. As stated before, the terms used in article 2 do not constitute commitments to take any concrete action or refrain from any concrete action. In this view, it is difficult to envisage any statute of Congress or any act of the Executive that could be inconsistent with the terms of article 2. We therefore conclude that the terms of article 2 will not diminish the powers of Congress or the Executive in the fields therein described.

Mr. HICKENLOOPER. Mr. President, I believe I am fully safe in saying that reliance upon the general information and specific opinions developed in the hearings, along the lines which I mentioned a moment ago, motivated the members of the committee to vote for the treaty.

Mr. President, in consideration of the record in regard to the treaty we must go beyond the specific summarized report of the Committee on Foreign Relations and must examine the detailed opinions and the detailed assurances given us in the hearings, both public and

executive, by the authorized representatives of the executive department of Government, which negotiated the treaty.

In connection with my short discussion, I wish to refer to the testimony in the hearings and to the positive assurances given by all those in an official capacity on the subject of the effect or the lack of effect of the treaty upon existing powers or authority vested in the President and in the Congress.

The reason for the care and for the meticulous examination, as well as for the assurances which we sought and received, stems from the fact that a treaty becomes, under the Constitution, a part of the supreme law of the land. It is entirely possible that in a treaty, unless proper safeguards are established, either the executive or the legislative branch of the Government, or the centralized Government itself in combination, will be given authorities flowing as a result of the treaty which did not exist prior to the adoption of the treaty.

For that reason, among others, the meticulous examination was made by the committee in regard to the treaty during the hearings.

Mr. President, the committee, after due deliberations, in complete reliance upon and in agreement with those assurances received from the State Department and the Treasury Department—both legal opinions and administrative opinions—recommended the ratification of the treaty with the interpretations and explanations of what the treaty means in connection with the powers of the executive and of the legislative branches of the Government.

I know of no stronger language or more expressive language which could be written into the advice and consent resolution than has been written into it. It was fully understood that the language was to give assurance in connection with the advice and consent procedure on the point that the Executive would have no alteration in the powers he now possesses, and that the representative to the OECD would have no power to bind the United States other than the Executive could already give any representative who would represent us in such a meeting, and that the Congress would not have its powers enlarged or diminished in respect to those it already possesses.

I dwell on this point, Mr. President, because it is a matter of considerable importance to me personally—that is, in accordance with my philosophy of government—and I wish to make doubly sure and to have it copper riveted without the slightest question, so that I can say to anyone, "Without doubt the treaty does not alter these powers."

Mr. President, without such an interpretation and understanding, which becomes inherent as a part of the resolution of ratification, I could not vote for the treaty, but with it I feel completely assured and I feel it is a complete safeguard against the danger which was considered by certain members of the committee and by other Senators in connection with the treaty.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. I will yield to the Senator in a moment, after I finish the thought I am developing.

Mr. President, while I do not know what benefits will flow from the treaty, nevertheless I believe the treaty will create a vehicle which may provide a more stable and a more cooperative approach by the more prosperous nations of the world to the orderly settlement of economic problems which face us.

If we and other nations approach these problems with sincerity and determination, using such a vehicle as will be created by the treaty, there is indeed great hope that progress can be made toward the goals of better understanding and better cooperation in international economy and in international affairs of an economic nature.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. I yield.

Mr. LAUSCHE. Is it not a fact that the committee tried to guard against the happening of any of the following four contingencies:

First, we did not want, by the treaty, to increase the powers now vested in the Congress.

Mr. HICKENLOOPER. That is correct.

Mr. LAUSCHE. Second, we did not want to diminish the existing power of Congress.

Mr. HICKENLOOPER. That is correct.

Mr. LAUSCHE. Third, we did not want to increase the existing powers of the President in international trade.

Mr. HICKENLOOPER. That is correct.

Mr. LAUSCHE. Fourth, we did not want to eliminate the procedural requirements which Congress has established by statute before the President can take any action on questions of tariff or quotas.

Mr. HICKENLOOPER. That is correct, as I understand, and according to the views of the members of the committee.

Mr. LAUSCHE. Another contingency could be visualized, and therefore we wrote into the resolution of ratification the following provision:

First, that nothing in the convention, or the advice and consent of the Senate to the ratification thereof, confers any power on the Executive to bind the United States in substantive matters beyond what the Executive now has.

Mr. HICKENLOOPER. That was the reason.

Mr. LAUSCHE. Second, or to bind the United States without compliance with applicable procedures imposed by domestic law.

Mr. HICKENLOOPER. The Senator is correct.

Mr. LAUSCHE. Third, or confers any power on the Congress to take action in fields previously beyond the authority of Congress.

Mr. HICKENLOOPER. The Senator is correct.

Mr. LAUSCHE. Fourth, or limits Congress in the exercise of any power it now has.

Mr. HICKENLOOPER. The Senator is correct.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. Yes, I yield.

Mr. SPARKMAN. The Senator from Iowa referred to correspondence printed in the report on pages 18 to 21, including the letter from Mr. Abram Chayes transmitting the memorandum, and the opinion of the Legal Adviser. I wonder if the Senator from Iowa would not deem it wise to have those letters and that memorandum set forth in the RECORD.

Mr. HICKENLOOPER. I asked unanimous consent to have the entire report printed in the RECORD, and was so authorized.

Mr. SPARKMAN. I did not realize that those letters and memoranda were included.

Mr. HICKENLOOPER. To assist in any future interpretation or examination of the treaty and its meaning, I also said that reference should be made to the full testimony as printed in the transcript of hearings of the committee to indicate the process of the Senate committee members in making up their minds.

Mr. SPARKMAN. The Senator said the committee had been cautious. I will add that the Senator from Iowa is certainly cautious.

Mr. HICKENLOOPER. When one deals with the question of the possible enlargement or diminution of the executive power or the congressional power of this country, or the power of the Central Government, I believe an overabundance of caution is merited.

Mr. SPARKMAN. I agree with the Senator from Iowa.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. I yield.

Mr. GOLDWATER. I realize that the committee has worked to overcome some of the questions that many of us have had relative to the impact of the treaty on our own powers in the Senate and the powers of the Presidency. However, I have a question I should like to ask. There is a statement in the resolution as follows:

> The U.S. representative will not have any additional powers in substantive matters to bind the United States after the convention enters into force than now exist in the executive, but that any act of the Organization outside the power of the Executive will require action by Congress or the Senate, as the case may be, before the United States can be bound.

I wish to raise two points. First, if by the resolution of ratification it is meant that the treaty-making powers of Congress are reaffirmed, and it is up to Congress to make those decisions, why has the OECD been set up?

Mr. HICKENLOOPER. I am not sure that I understand the question.

Mr. GOLDWATER. If there is reaffirmation of the powers vested in this body, why is it necessary to have an organization outside this body to enter into these actions?

Mr. HICKENLOOPER. The Organization would bring together at the present time some 20 or 21 countries—I have forgotten the exact number—to attempt to amalgamate and unify basic

approaches, through agreement, understanding and through cooperation, to our general worldwide economic situation. All the treaty would do would be to give official sanction to the creation of such a body. But it would not give that body the authority to bind the United States in any way that does not already exist.

Mr. GOLDWATER. Is the Senator from Iowa satisfied that the reservation takes care of that possibility?

Mr. HICKENLOOPER. I am satisfied. I assure the Senator from Arizona that quite a number of us spent much time in drafting language which would make the point abundantly clear. I am thoroughly convinced—and I think that the members of the Committee on Foreign Relations are also convinced—that this interpretation and understanding that becomes an inherent part of the resolution of advise and consent will be fully protective against any enlargement or diminution of the powers of either the Executive or Congress.

Mr. GOLDWATER. I have a second point.

Mr. CARLSON. Mr. President, will the Senator yield at that point in order that we may question him as to the countries involved in the question asked?

Mr. HICKENLOOPER. I did not attempt to name the countries.

Mr. GOLDWATER. I ask unanimous consent that the list of countries involved may be printed at this point in the RECORD.

Mr. CARLSON. I think such printing would be helpful.

The PRESIDING OFFICER. Has not a list of those countries been printed in the statement of the Senator from South Carolina?

Mr. GOLDWATER. In all probability it was. I was asking that they appear at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

The Governments of the Republic of Austria, the Kingdom of Belgium, Canada, the Kingdom of Denmark, the French Republic, the Federal Republic of Germany, the Kingdom of Greece, the Republic of Iceland, Ireland, the Italian Republic, the Grand Duchy of Luxembourg, the Kingdom of the Netherlands, the Kingdom of Norway, the Portuguese Republic, Spain, the Kingdom of Sweden, the Swiss Confederation, the Turkish Republic, the United Kingdom of Great Britain and Northern Ireland, and the United States of America;

Mr. GOLDWATER. The second point that comes to my mind is that the language of the resolution of ratification previously quoted would require action by the Senate to approve what the U.S. representative to the OECD has done. It seems to me that such requirement would put Congress in the position of having to go along with the statement of agreement or plan of action which our representative to the OECD has made prior to the problem coming to the attention of Congress. As a result, we shall go into this convention already obligated, if not in fact, at least by word of our representative.

How can Congress be free to act under those circumstances and withstand the terrific pressure which will be applied to back up agreements made by our representatives to the OECD?

Mr. HICKENLOOPER. I admit that any action of the Executive in connection with any proposed agreement with a foreign country which requires action either of the Senate through advice and consent, or action of Congress, through legislative approval, always runs up against the question whether or not the Executive or his representative may have gone forward under the powers which he already possesses that are not changed under the treaty. He can make a tentative proposal to these countries, with the understanding, of course, that that proposal cannot go into effect until if, as, and when it is approved by Congress. I do not understand that the treaty would change that situation.

Mr. GOLDWATER. The Senator means, then, that any agreement or plan of action which our representative might agree to would have to be further approved by the Senate. Is that correct?

Mr. HICKENLOOPER. I believe I state the feeling of the Foreign Relations Commitee when I say that without doubt this means that our representative or the Executive cannot do anything or commit the United States to anything after the proposed treaty goes into effect that he cannot do or commit us to do at the present time.

Therefore whatever he can do now he could do then. However, he could do no more—that is, either the Executive or our representative—after the treaty goes into effect to bind us or commit our country than he can already do now.

The Executive can say to a group of countries, "We will discuss this, and I will make a tentative agreement with you, subject to our constitutional process." That process may be ratification or legislative action. He can do that now. He would be bound to submit it. He could not bind us to ratify, and he could not bind the Congress to approve. It does not change his powers in the slightest. That is the full understanding of the committee. That is one of the bases on which the committee voted to report the treaty favorably to the Senate.

Mr. GOLDWATER. I thank the Senator for answering these questions. The question has been raised that the OECD would emphasize European interests rather than those of Mexico and Central and South America. The OECD was formerly called the Organization for European Economic Cooperation, a plan to help Europe recover from the war, which definitely indicates European interest in this protocol.

The United States has been criticized much in the past by our neighbors to the south for placing almost all our emphasis on the development of Europe and the Far Eastern countries to the neglect of Latin America.

The question that is raised is, Will not this protocol contribute even more to this unfortunate feeling which exists among our Latin American friends?

Mr. HICKENLOOPER. On the contrary, I believe it will alleviate that tension, and for this reason. We now have a combination of declarations and approaches. We are already committed both by the past administration and by the previous administration to a greater emphasis in cooperative action with Latin America, through bilateral and multilateral agreements and through other organizations.

OECD definitely contemplates vigorous cooperative action with Latin America as well as with southeast Asia and a worldwide organization. However, I believe the proposed organization, to which they can be a party if they desire, together with the specialized programs which we propose to devote to Latin America, should relieve that feeling.

As a collateral matter, I am not in agreement with many who say that we have completely neglected Latin American countries. I believe since the close of World War II, in one way or another, by way of loan or grant or technical assistance, we have made available approximately $4 billion to Latin America.

While perhaps we should have done more, and perhaps we can do more, I do not believe—and I do not mean that the Senator has accused us of it—we can be accused of neglecting Latin America. Those who say that should take a good look at the figures.

Mr. GOLDWATER. I have taken a good look at the figures, and they show that we have put $41,137 million into Europe and $3,840 million into Latin America. That does not seem to be consistent with the Senator's remarks that we have done a good job in Latin America. I admit that we have done something. The question was raised in my mind, at the time the President spoke out so well in favor of more help for Mexico and Central and South American countries, as to why, by this protocol, we should now be placing so much emphasis upon Europe, a portion of the world by which, in my estimation, we have done pretty well. I was wondering, therefore, if this would not contribute more to the feeling of unhappiness or unrest in South America as it relates to us.

Mr. HICKENLOOPER. Basically the treaty and the circumstances surrounding it contemplate that the more affluent nations—which means the nations of Western Europe and the United States and Canada—will be putting money into it and will be thus stabilizing the economies and the economic systems which affect less developed countries.

Therefore, while the greatest contributors will be Western European nations and the United States and Canada, and probably Japan, their contributions will be directly out of their own funds for the purpose of assisting less developed nations.

Mr. GOLDWATER. The Senator has indicated that there is a possibility existing in the minds of members of the committee that this Organization could be expanded to include other nations. Has the committee taken under consideration, during the development of the treaty, the matter of including South American and Central American companies?

Mr. HICKENLOOPER. Oh, yes; these countries can come in.

Mr. GOLDWATER. Were they approached in the drafting of this particular treaty?

Mr. HICKENLOOPER. I do not recall. I shall have to ask the Senator from Alabama [Mr. SPARKMAN].

The question is on the participation of Latin American nations in the treaty. The Senator from Arizona asks whether they were approached during the negotiations of the treaty.

Mr. SPARKMAN. I do not believe so. My recollection is that the original discussion was by the nucleus of the NATO powers plus the United States. Then it was enlarged to include the United States and Canada and the OEEC powers. Then there was brought up the question of Japan's participation. Japan was not taken in as a full member, but in a participating status. It was certainly felt by the committee that it would be advantageous to the operation of the plan.

Mr. HICKENLOOPER. Basically, the plan is that the more affluent nations would try to set up an organization into which they could draw these other nations for cooperative economic activities to progress. It would be open to all of them to come in. I believe they would.

Mr. MANSFIELD. Mr. President, I believe the Senate should be informed that the treaty was gone over with a fine tooth comb by the Senator from Iowa [Mr. HICKENLOOPER], the Senator from Vermont [Mr. AIKEN], the Senator from Tennessee [Mr. GORE], the Senator from Louisiana [Mr. LONG], the Senator from Indiana [Mr. CAPEHART], and other Senators.

They have asked a good many questions about the treaty. I think the end result is one which should be satisfactory, by and large, to every Member of this body. They are entitled to great credit. I think they brought up questions which the administration had not foreseen. The result was that the inquiry was educational in more ways than one, and the result, I believe, was very much worthwhile.

Mr. President, the Convention on the Organization for Economic Cooperation and Development is one of the most important matters to come before the Senate this year. I consider it a step which will contribute toward creating conditions of greater stability for freedom in a more orderly world.

I, therefore, welcome and support this measure and I congratulate those who have participated in its development. The distinguished Secretary of the Treasury, Mr. Dillon, is to be commended for his initiative which, significantly, he contributed in the previous administration, thereby illuminating the fact that the treaty has no partisan connotations whatsoever. I wish to note particularly the work of the distinguished Senator from Arkansas, the accomplished and farsighted chairman of the Foreign Relations Committee, the Senator from Arkansas [Mr. FULBRIGHT].

Other Senators have made significant contributions, not only to this particular act, but to the formation, over the years, of the attitudes which permitted this new institution to rise.

This proposal was made originally by the United States. It is an example of inventive leadership in foreign policy. It represents the kind of foresight which the world needs and expects from the United States. For it was the United States, Mr. President, which took the lead in reducing barriers to international trade through the reciprocal trade program. That program, which has made such a tremendous contribution to our own prosperity, is directly responsible for the conditions which now make possible this additional form of cooperation.

It was the United States, too, which took the initiative in proposing a program of economic assistance to Europe after the war. That action enabled Europe to rebuild and to forge the great institutions which now bridge the boundaries of participating nations.

It was the United States, finally, which took the lead after the war in advocating the greater integration of Europe, despite the unpopularity of this position in certain quarters. It is noteworthy to recall, for example, as we consider the present convention, that in the Economic Cooperation Act of 1948, the Congress expressly declared its support of a European free market, which has now been at least partially realized by the creation of the Common Market and the Free Trade Association.

It is with some satisfaction, too, that I look back to recommendations which were made in a speech in the Senate in July 1957, noting that:

> The interests of this country require that we stay abreast of these developments pointing toward unity in Western Europe, that we encourage them, that we seek mutually advantageous relationships with the institutions that are emerging from them.

And that—

> The time may be ripe for conferences among the NATO members.

We have had conferences such as were envisaged in those remarks almost 4 years ago and they have led to the treaty now before the Senate.

If this treaty becomes effective, we shall have created a mechanism for dealing with the problem of the two economic groupings, the Common Market and the Free Trade Association.

We shall have created a mechanism, too, for considering an even more urgent problem, that of the tariffs of the Common Market which is closely related to our domestic economic situation, including our balance-of-payments position. If these tariffs are not reduced, it is estimated that substantial trade will be diverted from American companies. This, in turn, will reduce dollar earnings from exports. It may also force further exports of capital from the United States into the member countries of the Common Market.

The creation of the OECD is a recognition of Europe's stake in the state of the economy of the United States. And the creation of the OECD is also a recognition of our need for Europe. For the first time in 30 years, we are living in a world which is not short of dollars. This is a far different world than that of 1945, or even of 1955. There is, for the first time in many years, full currency convertibility between most of the member nations of the OECD. This is a condition we welcome for it signals the recovery of Europe and marks the beginning of a new period of prosperity and economic progress. It signifies, at the same time, the beginning of a new relationship between Europe and the United States. There is now a situation in which economic cooperation, as expressed by this convention, is not just an abstract virtue, Mr. President; it is a practical necessity. Our own economy can continue to grow, and efforts to accelerate this growth can achieve success, only if the concert of economic interests with the Western European nations and Canada is institutionalized in a manner which will result in full and mutual consultation and cooperation on matters of common concern.

Besides cooperation, Mr. President, OECD is also being established for purposes of development, not just of the member nations, but of the underdeveloped countries as well. This is a matter of the greatest importance. The failure to help underdeveloped peoples to satisfy some of their material needs and desires would have serious consequences for the developed nations. Considerable assistance has already been provided by this Nation but the task is too great unless it is shared by all the developed nations. The OECD is designed to facilitate cooperation among a number of the developed nations and to mobilize and coordinate their aid programs. Let us not underestimate the significance of this function of the proposed organization. The last 15 years have been years of American economic advance and European economic resurgence. During the next 15 years, the OECD can contribute a great deal not only to the continuance of this process but also to its extension to those countries still struggling to satisfy basic human needs and aspirations with consequent benefit to the peace and stability of the entire world in which we must live.

Mr. President, in connection with the consideration of the OECD Treaty, I ask unanimous consent to have printed in the RECORD an article which was published in the Denver Post of recent date.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Denver Post]

SENATE SHOULD RATIFY OECD

Ever since World War II, the economic coordination of Western Europe has been moving forward at a rapid pace, with the aid and encouragement of the United States.

A major spur to this development came through the Marshall plan which was undertaken by the United States to help Europe get back on its feet again and repair the damages of war.

In response to the Marshall plan, 18 nations established the Organization for European Economic Cooperation (OEEC) and this in turn has helped to clear the way for other cooperative efforts.

But the United States, which helped to bring European economic cooperation into being, has not always found the fruits of its effort to be an unmixed blessing.

During a period of gold and dollar drain, increasing demands in the underdeveloped areas and a desperate need to expand U.S.

world trade, the United States has sometimes found itself out in the cold, while Europeans cooperated with each other to our disadvantage.

Our Government has concluded that economic cooperation must extend to both sides of the Atlantic, if it is to work to the mutual advantage of nations in the Western bloc.

In December in Paris, the United States, Canada, and the 18 OEEC nations signed a convention setting up a new organization to replace OEEC and promote a cooperative approach to economic problems on both sides of the Atlantic.

The convention setting up the new Organization for Economic Cooperation and Development (OECD) has been submitted to the Senate by the Kennedy administration for ratification.

We believe the Senate should ratify it without any hesitancy.

OECD can be helpful to the United States in at least three ways:

It can point the way to economic policies abroad that will cut down instead of increase the drain of gold and dollars from the United States.

It can bring increased participation by our European allies in the task of financing the development of the underdeveloped areas, relieving the United States of some of the burden.

It can lead to a reduction of barriers that hamper U.S. trade and, particularly, enable us to do business more easily with nations in the Common Market and the European Free Trade Association.

No decision of OECD would be binding on any member nation "until it has complied with the requirements of its own constitutional procedure." In the United States, that would mean approval by the Senate.

Secretary of the Treasury Douglas Dillon has been the major architect and champion of the OECD both in the Eisenhower and Kennedy administrations.

His efforts have reflected the best thinking of both administrations and the growing need of the United States to participate in cooperative economic policymaking with friendly nations across the Atlantic.

OECD is abundantly equipped with built-in safeguards to protect national sovereignty. It is free of major pitfalls and rich in potential benefits for member nations.

The Senate, by prompt ratification, can make clear that the principle of international economic cooperation has the full support of the United States.

Mr. HICKENLOOPER. Mr. President, I yield such time, up to 15 minutes or more, as the distinguished Senator from New York may desire to have.

Mr. JAVITS. Mr. President, my only reason for speaking today is that the genesis of the Organization for Economic Cooperation and Development was in a body to which I have the honor to belong by appointment of the Senate—the NATO Parliamentarians Conference. I am chairman of its Economic Committee, where this idea was given birth about 3 years ago.

I wish to impress upon the Senate one point which I learned there, and which I think is very important to all of us. That is that the OECD represents the expression of American leadership in respect to foreign economic policy, in which the European countries are interested. It represents the greatest single expression of American leadership in foreign policy since the Marshall plan. Let us not mistake it. I sit with the NATO parliamentary delegates in the Economic Committee, and that is their view. This Organization represents to them the intention of the United States to lead, and to lead very effectively, the economic struggle for freedom which is taking place in the world today. If we do not have that realization in mind, then I do not believe we will give adequate credit, as we should, to the assertion just made by the distinguished majority leader that he considers this convention to be one of the most important single measures, perhaps the most important, to come before Congress at this session.

The convention is a tribute to bipartisanship, because it was developed upon the initiative of Douglas Dillon in the Eisenhower administration. He picked up the ball, in a sense, from our work in the NATO Parliamentarians Conference and ran with it very effectively. The convention is now being implemented during the administration of President Kennedy, who has urged its ratification by the Senate.

The Organization for Economic Cooperation and Development was intended to be and is essentially a consultative body. The only new idea introduced into the convention, as I just mentioned to the distinguished Senator from Alabama, was the fact that the members in the OECD who agree upon something—and even if we do not agree, so long as we only abstain—could carry it through. This is very important to them. It is very important that we understand this action is permissible under the convention because these nations are now in a body called the Organization for Economic Cooperation and Development, consisting of the European members of NATO and the United States and Canada. The members have carried on a good many measures with respect to trade in that Organization. They would like to continue to carry on that trade. They do not want to be vetoed or stopped from doing so if we do not desire to participate.

So in the way the convention has been drawn, the concurring nations can carry on what they wish to carry on as long as we abstain and only as long as we do not stop them affirmatively by voting "No." If we wish to join with them, we can, of course, do so, subject to our constitutional processes. That is the negative side of the picture. We will not stop any other country from doing what it ought to do.

The second point relates to the neutrals in the Organization. For the first time, an opportunity will be given to get economic cooperation in respect to the Atlantic community from the neutral nations—Austria, Ireland, Spain, Sweden, and Switzerland. They are not members of NATO; they are members of the OECD. Their membership does not prejudice their neutral status. Therefore, their membership should not prejudice their neutral status when they act in the OECD.

What can the United States expect from the organization? I think it has an enormous amount to expect. I am delighted to see that the convention will be ratified without a struggle. I am proud of the excellent work done by the Committee on Foreign Relations in working out this interpretation, because it would be a shame to have a struggle over the convention, from which I think the United States will derive great benefits.

The 20 nations of the OECD have an annual gross national product in excess of $900 billion, with more than one-half of that by the United States. They have a total trade in excess of $150 billion a year, with the U.S. share nearly one-fourth of that amount. This great economic power is more than double the Soviet bloc's gross national product of $400 billion annually; Soviet bloc trade with the free world is only about $7 billion annually.

With these figures in mind, we can begin to realize how great is the economic power of the free world, and how decisive it can be.

It is extremely important for us to realize what is being marshaled in terms of economic resources, because these resources are the key to what happens to the new nations in Africa, and the nations in Latin America, the Middle East, and the Far East.

Forty-five of the new nations live on one or two primary commodities. This represents 60 percent of their foreign exchange income, whether nitrates, coffee, copper, or tea. This is the staff of life for every one of those countries.

In the membership of the OECD lies the overwhelming importing strength which determines the life of all those developing countries. The European members of the OECD imported about $11 billion worth of goods from the 45 primary-commodity countries, and the indications are that such imports will increase by 50 percent during 1960. What is significant is that this furnishes the newly developing areas with five or six times more foreign exchange than all the public and private development assistance combined.

The United States imports about $6 billion worth of products annually from those countries. As the years go on, we shall have to do a great deal more, and concern ourselves about a stabilization process and what these countries are able to sell to the free world, thus providing a basis for credit to develop.

But the OECD is a consultative agency which has the economic power to do this job, and so it can be decisive in our relations with a group of countries able to determine whether the program will be successful or will fail.

Another point: We are facing an enormous trade bloc in Europe, the European Economic Committee, a free trade association, which has a great potential for good, but also for harm. For instance, it is estimated that because of their greater integration in terms of tariff freedom, there is a diversion of $2 billion a year in trade, of which the United States represents 25 percent. If the standards of living of these nations improve, we can make that up in very short order. A difference of 1 percent in their gross national product can make up anything we lose in the way of diversion of our exports to them.

It is very interesting to observe that in the first 6 months of 1960 trade exports from the United States to the countries of the European Community

increased by 42 percent. So there is a potential inherent in this kind of activity. But we must be certain that it is benign so far as we are concerned, and the only way to make certain is by direct negotiations with them.

Certainly this new organization can give us support in solving our agricultural problems.

One other problem which should be mentioned, to show how the United States is likely to benefit from this organization, is the problem of Japan. We all agree that the viability of Japan economically presents a critical aspect of the struggle for freedom in the world. In the years 1958, 1959, and 1960, the United States provided a market for only one-third of Japan's exports. Japan, however, imports very largely from the European countries which will be members of the Organization for Economic Cooperation and Development. This is not important, very largely, to them now. For example, France and Germany consistently export twice as much to Japan as their small volume of imports from that nation.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD, as a part of my remarks, and as bearing out my view on this point, a table entitled "Japan's Trade With OECD Countries." The figures in the table are set forth both in absolute dollar terms and by area distribution. The table will illustrate another one of the things we can accomplish in connection with the matters I have been discussing.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE I.—*Japan's trade with OECD countries*

[In thousands of dollars]

	Imports from Japan			Exports to Japan				Imports from Japan			Exports to Japan		
	1958 [1]	1959 [1]	1960 [2] (7 months)	1958 [1]	1959 [1]	1960 [2] (7 months)		1958 [1]	1959 [1]	1960 [2] (7 months)	1958 [1]	1959 [1]	1960 [2] (7 months)
Austria	3,456	3,194	(3)	1,789	4,256	(3)	Norway	6,836	11,444	(3)	686	1,086	(3)

Mr. JAVITS. Finally, Mr. President, the OECD offers tremendous assistance in connection with giving aid to the less developed areas. The overall planning of the OECD must also consider the importance of trade to the developing areas and to the newly industrialized nations of the free world. Germany can be expected to increase its direct governmental contributions by about twice what it is contributing today. It is now contributing approximately $500 million; and that amount should increase to approximately $1 billion a year, when negotiations are had in the OECD. That is one of the ways in which the OECD can aid our country.

Italy is also expected to increase its foreign economic aid program, while countries with great technical resources, such as Sweden and Switzerland, should contribute more of these talents to the development effort.

In addition, Mr. President, a major responsibility of the OECD will be to clarify the present situation with respect to what really constitutes development assistance. This is one of the tasks of the Development Assistance Committee of the OECD. That Committee was previously described by the Senator from Alabama; and during the past year it has functioned as the Development Assistance Group, with a membership of the 10 major capital exporting nations, including Japan, of the free world. In other words, it has served as somewhat of a corollary organization to coordinate economic and technical assistance throughout the world; and Japan could be a very important source in that connection.

In short, Mr. President, let me say that I have talked with Mr. Kristensen, Secretary General of the new Organization. He has appeared before the NATO Parliamentarians Economic Committee, of which I am chairman; and he has conferred with a great many distinguished and knowledgeable persons in New York. Everyone with whom I have conferred, who has heard him, is convinced that he will faithfully carry out the kind of mandate I am describing.

Therefore, Mr. President, I submit that the step now proposed offers one of the greatest initiatives in foreign policy ever undertaken by our country. It has been carried through in a completely bipartisan manner, and it will confer

upon our country the greatest benefits in economic terms which could possibly be conceived of.

Frankly, Mr. President, by this means we shall at long last be placing our feet upon the road which can lead us to decisive victory in the cold-war struggle. Our proper course in that connection is not to attempt to counter every move made by Communist Russia, or to attempt to issue a rejoinder immediately following each statement issued by that nation, or to attempt to send up another missile whenever Communist Russia sends up one. Instead, the way for us to proceed is by economic means, so as to enable the underdeveloped areas to proceed from their present state to a level approaching the modern nations in which the people can live under decent conditions. That road is the absolutely sure one which leads to the goal we seek.

Therefore, Mr. President, I view this treaty as the first major step in this direction that our country has taken since the Marshall plan.

Mr. President, I yield back the remainder of the time available to me.

Mr. SPARKMAN. Mr. President, I yield 8 minutes to the Senator from South Carolina [Mr. JOHNSTON].

The PRESIDING OFFICER (Mr. HICKEY in the chair). The Senator from South Carolina is recognized for 8 minutes.

Mr. JOHNSTON. Mr. President, I am opposed on basic principles to ratification of this treaty; but before I speak of these objections, I wish to say a few words about the treaty document itself.

We are told by proponents that this treaty is designed merely to establish a forum for discussion of international trade practices and policies and their examination and consideration. However, the powers bestowed by this document are much broader than this. Testimony by backers of the treaty given before the Foreign Relations Committee acknowledges that the power provided in this document is sufficient to allow subsidiary bodies of an operational nature to be set up for financing, investments, and similar purposes. Article 9 of the document states:

> The Council may establish an executive committee and such subsidiary bodies as may be required for the achievement of the aims of the Corporation.

Backers of the treaty agree that this clause leaves the field wide open for the Council to establish any agency it likes.

There is no protection against a vast spider web of international agencies arising out of the OECD in the future to further complicate and control international finance and trade. Proponents of the treaty suggest that because it is not the intent of the United States or the Council to create such a network, this is sufficient protection.

Mr. President, the intent of the present parties to this treaty is not what we are being asked to ratify. The subject of ratification is the document itself. It will be construed in the future from the four corners of the document. Twenty countries are now proposed for membership in the OECD; and the Council will have the right to admit as many more countries, of whatever political nature, as it sees fit. There is no requirement to consult the U.S. Senate.

I have no doubt that proponents of the treaty are sincere and have no intention to permit evolution of the Organization in the way I have described; but subsequent Secretaries and subsequent administrations may have no such compunctions. There is absolutely no reason why this power should be given to the OECD if there is no intention or desire to use it.

By the same token, the purpose of article 2(d), under which we agree to "pursue efforts to reduce or abolish obstacles to the exchange of goods and services and current payments and maintain and extend the liberalization of capital movements," is not clear.

When Senator LONG questioned in the committee the consistency of this clause with other current U.S. monetary policy, it was conceded by Mr. Dillon and by Under Secretary of State Ball that the language was unclear. It was necessary to resort to the French text in order to understand the meaning.

Mr. President, this treaty is of such import that all language should be absolutely clear in its meaning before the Senate even considers ratification. Again, it is not the intent of the present parties to this document that is important, because personalities will change in years to come, and under this document the parties themselves can be changed by the Council. Furthermore, once this treaty is ratified, the U.S. Senate will have nothing to say about it.

One other thing that concerns me is the reluctance of the proponents of the treaty to go along with the reservation that this treaty neither adds nor takes away powers of the President or the Congress. Instead of a reservation, the proponents suggested a "declaration" or "understanding." The resolution as reported apparently compromised on the phrase "interpretation and explanation" of intent, rather than "reservation."

Mr. President, we have been repeatedly told by witnesses who favor this treaty that it does not affect the current powers of Congress or the President. We have been assured that the other 19 nations have been fully informed of this and understand our situation.

If the other member nations fully understand we are not abridging any present powers, then I see no reason why we should not include the proposed reservation. The objections are that this is not really a reservation in that it does not reserve anything that would otherwise be a part of the agreement and that it might raise doubts in the minds of the other signatory powers. Subsequently, Mr. Ball asserts that this is really an interpretation of the language of the treaty—in his words—"an interpretation which we are persuaded is already understood by all the parties."

Mr. President, as I have already pointed out, there are going to be new and different parties to this treaty after the Senate has completed work on it. Consequently, if all of the present parties understand our position, they certainly should not contest such a reservation. Reservations are frequently used not only to remove something from an agreement, but to preclude something that might possibly have been misunderstood to be included. As was pointed out in the committee hearings, the Supreme Court of the United States has on occasion announced that language was so clear in a document that the intent of the parties would not be considered. Mr. President, there are a good many Members in this Senate who are just a little "gun shy" of the Supreme Court and some of its interpretations. Therefore, in the event this treaty were ratified, the reservation would certainly seem advisable.

The argument is made that under article (3) all OECD agreements are subject to the constitutional requirements of each individual nation. This reasoning loses much of its weight when the fact is faced that the decision as to what are our constitutional requirements will be made by the same people who are entering the agreement for the United States, and not by Congress. The very procedure followed in submitting this treaty to the Senate, instead of to both Houses, has caused protests from Members of the other body of this Congress that correct constitutional procedures are not being followed and that Members of the House of Representatives are being deprived of their right to consider executive agreements involving foreign commerce. Two previous international economic agreements which were properly submitted to the House did not survive. I wonder if that result is related to the State Department's interpretation that this matter is a treaty requiring ratification by the Senate only.

I believe the framers of our Constitution knew what they were doing when they placed control over foreign trade in the Congress, and I think the Congress should not have given it up. Under State Department control, our domestic producers must take a secondary position, subject, always, to what the State Department feels is best in the field of international relations. It is axiomatic that State Department personnel will think first of international relations and second of domestic producers. Under such a structure, our own people who seek relief from unfair foreign competition lose contact with the very people they elected to represent them, and must deal with appointed officials primarily concerned with international problems.

An excellent example of this is the General Agreements on Tariffs and Trade—GATT. While it has never been ratified by Congress, the agreement was entered into by the President's Office under the authority of the Trade Agreements Act, and has 38 contracting parties. Its parties conduct over 80 percent of the international trade of the world, and the tariff schedules of GATT cover 60,000 items.

Mr. President, this is a major portion of the international trade of the world carried on by the United States at least, under authority which is constitutionally vested in Congress, but which we have seen fit to delegate. I have long protested the free importation of goods from foreign countries which are in competition with our domestic industries. For years I protested our aid in building Japan's textile industry to compete with our own, to no avail. Now we have a troubled textile industry that has company in its protest. The ceramics industry, the pottery, glass, plywood, and even the automobile industries are hurt. Currently in the news is a possible boycott of electrical goods made in Japan, sponsored by one of our own electrical unions. This is only a fraction of the list.

The usual comment to a protesting union or company is a State Department admonition that these people have to think of the international ramifications of these domestic acts of boycott. By the same token, however, the people who make these agreements allowing virtually free access to our markets must consider the domestic problems they are creating with their international agreements.

A delegate, seated in a comfortable conference, does not have the excuse for being shortsighted that a man out of work with a hungry family has. These working people expect Congress to protect them and when Congress delegates its authority to an agency beyond congressional control, then it has failed in its duty and shirked its responsibility.

I have fought against free trade many times in the past, and I have seen nothing in the results of our relaxed barriers to change my mind. It has been stated many times that we must narrow the gap between the standard of living in the industrialized countries and the underdeveloped countries. There are two ways to do this. One is by raising their standard, the other by lowering our standard. I believe that we must look after our own first, and have a strong healthy American economy so that we can afford our foreign aid programs to lift up our friends.

For years we gave billions to rebuild the economies of proposed OECD countries that we now force our domestic companies to compete with; our people are beginning to wonder how wise it is to tax our industry, which raises the cost of goods, and then use the tax dollars to build competing economies, which, because of our aid and their cheap labor, can undersell us in a free market. A free market and convertible currency mean liquid money; and liquid money, like all liquids, runs downhill. We cannot raise our standard of living when we have to compete with manufacturers we are subsidizing. Our standard of living in a free market must be forced down to meet that of the other countries.

For these reasons, I oppose the ratification of the treaty.

Mr. HICKENLOOPER. On behalf of the distinguished Senator from Massachusetts [Mr. SALTONSTALL], I ask unanimous consent to have printed in the RECORD at this point a statement prepared by him.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR SALTONSTALL

The current phase of the cold war is characterized by intense economic competition, particularly in the so-called less developed areas of the world. It is also self-evident that the long-term economic strength and stability of the free world is critically important for the survival of freedom. It is difficult for me to understand how the free world can hope to combat international communism without acting in a unified way.

The Organization for Economic Cooperation and Development will provide a consultative forum to assist in coordinating policies for economic growth, to recommend solutions for international trade problems, and to act in concert for expanded economic aid for underdeveloped areas in Asia, Africa, and Latin America. OECD will be a successor to the very helpful Organization for European Economic Cooperation, reorganized in response to the changing conditions in the world. There is every reason to believe that the OECD will serve the broad purpose of promoting international economic growth and development on a sound and enduring basis.

There is, therefore, every reason why the United States should participate in this group. OECD will not interfere with GATT, will not conduct tariff negotiation and will not exist as a trade organization. Nor will it in any way usurp or bypass the authority of Congress. Outside of the paramount aim of keeping the free world economically strong, OECD will act in such a way as to help reduce the deficit in America's balance of payments, and will encourage other Western industrial nations to share the major burden of development assistance for some of the poorer peoples of the world.

There are several important benefits to be accrued by the United States by her agreement to and participation in this treaty. I strongly support the Senate's approval of the treaty.

Mr. WILEY. Mr. President, I will support the treaty on the Organization for Economic Cooperation and Development on ratification here in the Senate as I did in the Committee on Foreign Relations.

In the hearings I asked for a clarification by the Secretary of State on the extent to which normal procedures imposed by domestic law would be involved. I am satisfied that these questions were fully answered by the Secretary.

With regard to the policies to be promoted by the OECD, I believe the words of former Secretary of State Herter spell out the picture clearly. I quote:

The aims of the OECD, as provided for in article 1 of the convention, are to promote policies designed:

1. To achieve the highest sustainable economic growth and employment and a rising standard of living in member countries, while maintaining financial stability and thus to contribute to the development of the world economy;

2. To contribute to sound economic expansion in member as well as nonmember countries in the process of economic development; and

3. To contribute to the expansion of world trade on a multilateral, nondiscriminatory basis in accordance with international obligations.

Mr. President, the big word in the OECD will be "consultation." This will continue to be the great force for reaching agreement on mutual concerns between nations of the free world. The OECD will foster consultation and facilitate coordination among member countries concerning methods for making national resources available for assisting less developed countries.

Through the machinery of the OECD, a less restrictive practice on trade policy than existed in the OEEC will be operable, through the Trade Committee.

Mr. President, I do not wish to go into detail on this proposal, for that will be done by others. I do wish to point out, however, that the United States will in no way be giving away any authority or even sovereignty under this treaty. Any action of OECD would require approval of all member governments. And if a nation abstained from voting on an OECD decision, the decision would not be binding upon that country.

To continue the words of Secretary Herter:

Member countries will be protected from having decisions imposed on them by the provisions of article 6, which are as follows:

1. Unless the Organization otherwise agrees unanimously for special cases, decisions shall be taken and recommendations shall be made by mutual agreement of all the members.

2. Each member shall have one vote. If a member abstains from voting on a decision or recommendation, such abstention shall not invalidate the decisions or recommendations, which shall be applicable to the other members but not to the abstaining member.

3. Decisions shall not be binding on a member until it has complied with its constitutional procedures. The other members may agree that such a decision shall apply provisionally to them.

Mr. President, it should be noted that each decision taken by the United States in the OECD would have to comply with our constitutional procedures. Thus, there is no loss of authority for any branch of the U.S. Government.

The resolution adopted by the Senate Foreign Relations Committee in its last paragraph settled the question of rights to my satisfaction. It stated:

The Senate advises and consents to the ratification of said convention with the interpretation and explanation of the intent of the Senate that nothing in the convention, or the advice and consent of the Senate to the ratification thereof, confers any power on the Executive to bind the United States in substantive matters beyond what the Executive now has, or to bind the United States without compliance with applicable procedures imposed by domestic law, or confers any power on the Congress to take action in fields previously beyond the authority of Congress, or limits Congress in the exercise of any power it now has.

Mr. President, it is my hope that this administration will appoint as our representative to the OECD a statesman, a person whose understanding of the broad avenues of international economic affairs as well as domestic economic policy, will serve the best interests of our

Nation. To fail to do so could seriously jeopardize the interests of this country.

Mr. President, to my mind our trade interests in the OECD are fully protected. But through the agency of OECD, these trade interests will not only be protected, they will be extended. I am pleased to support this treaty on ratification.

I ask the treaty be printed in full following these remarks, together with testimony starting on page 204 of hearings where I interrogated the witness to page 207 at end of my questioning.

There being no objection, the treaty and testimony were ordered to be printed in the RECORD, as follows:

CONVENTION ON THE ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

The Governments of the Republic of Austria, the Kingdom of Belgium, Canada, the Kingdom of Denmark, the French Republic, the Federal Republic of Germany, the Kingdom of Greece, the Republic of Iceland, Ireland, the Italian Republic, the Grand Duchy of Luxembourg, the Kingdom of the Netherlands, the Kingdom of Norway, the Portuguese Republic, Spain, the Kingdom of Sweden, the Swiss Confederation, the Turkish Republic, the United Kingdom of Great Britain and Northern Ireland, and the United States of America;

Considering that economic strength and prosperity are essential for the attainment of the purposes of the United Nations, the preservation of individual liberty and the increase of general well-being;

Believing that they can further these aims most effectively by strengthening the tradition of co-operation which has evolved among them;

Recognising that the economic recovery and progress of Europe to which their participation in the Organisation for European Economic Co-operation has made a major contribution, have opened new perspectives for strengthening that tradition and applying it to new tasks and broader objectives;

Convinced that broader co-operation will make a vital contribution to peaceful and harmonious relations among the peoples of the world;

Recognising the increasing interdependence of their economies;

Determined by consultation and co-operation to use more effectively their capacities and potentialities so as to promote the highest sustainable growth of their economies and improve the economic and social well-being of their peoples;

Believing that the economically more advanced nations should co-operate in assisting to the best of their ability the countries in process of economic development;

Recognising that the further expansion of world trade is one of the most important factors favouring the economic development of countries and the improvement of international economic relations; and

Determined to pursue these purposes in a manner consistent with their obligations in other international organisations or institutions in which they participate or under agreements to which they are a party;

Have therefore agreed on the following provisions for the reconstitution of the Organisation for European Economic Co-operation as the Organisation for Economic Co-operation and Development:

ARTICLE 1

The aims of the Organisation for Economic Co-operation and Development (hereinafter called the "Organisation") shall be to promote policies designed:

(a) to achieve the highest sustainable economic growth and employment and a rising standard of living in Member countries, while maintaining financial stability, and thus to contribute to the development of the world economy;

(b) to contribute to sound economic expansion in Member as well as non-member countries in the process of economic development; and

(c) to contribute to the expansion of world trade on a multilateral, non-discriminatory basis in accordance with international obligations.

ARTICLE 2

In the pursuit of these aims, the Members agree that they will, both individually and jointly:

(a) promote the efficient use of their economic resources;

(b) in the scientific and technological field, promote the development of their resources, encourage research and promote vocational training;

(c) pursue policies designed to achieve economic growth and internal and external financial stability and to avoid developments which might endanger their economies or those of other countries;

(d) pursue their efforts to reduce or abolish obstacles to the exchange of goods and services and current payments and maintain and extend the liberalisation of capital movements; and

(e) contribute to the economic development of both Member and non-member countries in the process of economic development by appropriate means and, in particular, by the flow of capital to those countries, having regard to the importance to their economies of receiving technical assistance and of securing expanding export markets.

ARTICLE 3

With a view to achieving the aims set out in Article 1 and to fulfilling the undertakings contained in Article 2, the Members agree that they will:

(a) keep each other informed and furnish the Organisation with the information necessary for the accomplishment of its tasks;

(b) consult together on a continuing basis, carry out studies and participate in agreed projects; and

(c) co-operate closely and where appropriate take co-ordinated act on.

ARTICLE 4

The Contracting Parties to this Convention shall be Members of the Organisation.

ARTICLE 5

In order to achieve its aims, the Organisation may:

(a) take decisions which, except as otherwise provided, shall be binding on all the Members;

(b) make recommendations to Members; and

(c) enter into agreements with Members, non-member States and international organisations.

ARTICLE 6

1. Unless the Organisation otherwise agrees unanimously for special cases, decisions shall be taken and recommendations shall be made by mutual agreement of all the Members.

2. Each Member shall have one vote. If a Member abstains from voting on a decision or recommendation, such abstention shall not invalidate the decision or recommendation, which shall be applicable to the other Members but not to the abstaining Member.

3. No decision shall be binding on any Member until it has complied with the requirements of its own constitutional procedures. The other Members may agree that such a decision shall apply provisionally to them.

ARTICLE 7

A Council composed of all the Members shall be the body from which all acts of the Organisation derive. The Council may meet in sessions of Ministers or of Permanent Representatives.

ARTICLE 8

The Council shall designate each year a Chairman, who shall preside at its ministerial sessions, and two Vice-Chairmen. The Chairman may be designated to serve one additional consecutive term.

ARTICLE 9

The Council may establish an Executive Committee and such subsidiary bodies as may be required for the achievement of the aims of the Organisation.

ARTICLE 10

1. A Secretary-General responsible to the Council shall be appointed by the Council for a term of five years. He shall be assisted by one or more Deputy Secretaries-General or Assistant Secretaries-General appointed by the Council on the recommendation of the Secretary-General.

2. The Secretary-General shall serve as Chairman of the Council meeting at sessions of Permanent Representatives. He shall assist the Council in all appropriate ways and may submit proposals to the Council or to any other body of the Organisation.

ARTICLE 11

1. The Secretary-General shall appoint such staffs as the Organisation may require in accordance with plans of organisation approved by the Council. Staff regulations shall be subject to approval by the Council.

2. Having regard to the international character of the Organisation, the Secretary-General, the Deputy or Assistant Secretaries-General and the staff shall neither seek nor receive instructions from any of the Members or from any Government or authority external to the Organisation.

ARTICLE 12

Upon such terms and conditions as the Council may determine, the Organisation may:

(a) address communications to non-member States or organisations;

(b) establish and maintain relations with non-member States or organisations; and

(c) invite non-member Governments or organisations to participate in activities of the Organisation.

ARTICLE 13

Representation in the Organisation of the European Communities established by the Treaties of Paris and Rome of 18th April, 1951, and 25th March, 1957, shall be as defined in Supplementary Protocol No. 1 to this Convention.

ARTICLE 14

1. This convention shall be ratified or accepted by the Signatories in accordance with their respective constitutional requirements.

2. Instruments of ratification or acceptance shall be deposited with the Government of the French Republic, hereby designated as depositary Government.

3. This Convention shall come into force:

(a) before 30th September, 1961, upon the deposit of instruments of ratification or acceptance by all the Signatories; or

(b) on 30th September, 1961, if by that date fifteen Signatories or more have deposited such instruments as regards those Signatories; and thereafter as regards any other Signatory upon the deposit of its instrument of ratification or acceptance;

(c) after 30th September, 1961, but not later than two years from the signature of

this Convention, upon the deposit of such instruments by fifteen Signatories, as regards those Signatories; and thereafter as regards any other Signatory upon the deposit of its instrument of ratification or acceptance.

4. Any Signatory which has not deposited its instrument of ratification or acceptance when the Convention comes into force may take part in the activities of the Organisation upon conditions to be determined by agreement between the Organisation and such Signatory.

ARTICLE 15

When this Convention comes into force the reconstitution of the Organisation for European Economic Co-operation shall take effect, and its aims, organs, powers and name shall thereupon be as provided herein. The legal personality possessed by the Organisation for European Economic Co-operation shall continue in the Organisation, but decisions, recommendations and resolutions of the Organisation for European Economic Co-operation shall require approval of the Council to be effective after the coming into force of this Convention.

ARTICLE 16

The Council may decide to invite any Government prepared to assume the obligations of membership to accede to this Convention. Such decisions shall be unanimous, provided that for any particular case the Council may unanimously decide the permit abstention, in which case, notwithstanding the provisions of Article 6, the decision shall be applicable to all the Members. Accession shall take effect upon the deposit of an instrument of accession with the depositary Government.

ARTICLE 17

Any Contracting Party may terminate the application of this Convention to itself by giving twelve months' notice to that effect to the depositary Government.

ARTICLE 18

The Headquarters of the Organisation shall be in Paris, unless the Council agrees otherwise.

ARTICLE 19

The legal capacity of the Organisation and the privileges, exemptions, and immunities of the Organisation, its officials and representatives to it of the Members shall be as provided in Supplementary Protocol No. 2 to this Convention.

ARTICLE 20

1. Each year, in accordance with Financial Regulations adopted by the Council, the Secretary-General shall present to the Council for approval an annual budget, accounts, and such subsidiary budgets as the Council shall request.

2. General expenses of the Organisation, as agreed by the Council, shall be apportioned in accordance with a scale to be decided upon by the Council. Other expenditure shall be financed on such basis as the Council may decide.

ARTICLE 21

Upon the receipt of any instrument of ratification, acceptance or accession, or of any notice of termination, the depositary Government shall give notice thereof to all the Contracting Parties and to the Secretary-General of the Organisation.

In witness whereof, the undersigned Plenipotentiaries, duly empowered, have appended their signatures to this Convention.

Done in Paris, this fourteenth day of December, Nineteen Hundred and Sixty, in the English and French languages, both texts being equally authentic, in a single copy which shall be deposited with the depositary Government, by whom certified copies will be communicated to all the Signatories.

SUPPLEMENTARY PROTOCOL NO. 1 TO THE CONVENTION ON THE ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

The signatories of the Convention on the Organisation for Economic Co-operation and Development;

Have agreed as follows:

1. Representation in the Organisation for Economic Co-operation and Development of the European Communities established by the Treaties of Paris and Rome of 18th April, 1951, and 25th March, 1957, shall be determined in accordance with the institutional provisions of those Treaties.

2. The Commissions of the European Economic Community and of the European Atomic Energy Community as well as the High Authority of the European Coal and Steel Community shall take part in the work of that Organisation.

In witness whereof, the undersigned Plenipotentiaries, duly empowered, have appended their signatures to this Protocol.

Done in Paris, this fourteenth day of December, Nineteen Hundred and Sixty, in the English and French languages, both texts being equally authentic, in a single copy which shall be deposited with the Government of the French Republic, by whom certified copies will be communicated to all the Signatories.

SUPPLEMENTARY PROTOCOL NO. 2 TO THE CONVENTION ON THE ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

The signatories of the Convention on the Organisation for Economic Co-operation and Development (hereinafter called the "Organisation");

Have agreed as follows:

The Organisation shall have legal capacity and the Organisation, its officials, and representatives to it of the Members shall be entitled to privileges, exemptions, and immunities as follows:

(a) in the territory of the Contracting Parties to the Convention for European Economic Co-operation of 16th April, 1948, the legal capacity, privileges, exemptions, and immunities provided for in Supplementary Protocol No. 1 to that Convention;

(b) in Canada, the legal capacity, privileges, exemptions, and immunities provided for in any agreement or arrangement on legal capacity, privileges, exemptions, and immunities entered int between the Government of Canada and the Organisation;

(c) in the United States, the legal capacity, privileges, exemptions, and immunities under the International Organisation Immunities Act provided for in Executive Order No. 10133 of 27th June, 1950; and

(d) elsewhere, the legal capacity, privileges, exemptions, and immunities provided for in any agreement or arrangement on legal capacity, privileges, exemptions, and immunities entered into between the Government concerned and the Organisation.

In witness whereof, the undersigned Plenipotentiaries, duly empowered, have appended their signatures to this Protocol.

Done in Paris, this fourteenth day of December, Nineteen Hundred and Sixty, in the

English and French languages, both texts being equally authentic, in a single copy which shall be deposited with the Government of the French Republic, by whom certified copies will be communicated to all the Signatories.

Senator WILEY. If you will turn to article 5(a) it says: "Take decisions which, except as otherwise provided, shall be binding on all the Members."

The phrase "except as otherwise provided," is covered in article 6, am I right?

Secretary DILLON. That is correct.

Senator WILEY. I refer particularly to subparagraph 3 of article 6: "No decision shall be binding on any Member until it has complied with the requirements of its own constitutional procedures."

I think that is very plain. Let us take a case. As I understand it, the President has authority to require that a certain percentage of all goods manufactured in this country and shipped abroad under mutual security—50 percent—be shipped in American bottoms; is that right?

Secretary DILLON. Yes.

Senator WILEY. My question is this: That is not in the Constitution; that is an authority that is lodged in him. Supposing, pursuant to article 2, which provides that the signatories agree to: "Pursue policies designed to achieved economic growth and internal and external financial stability and to avoid developments which might endanger their economies or those of other countries"; our representative signs an agreement, that only 25 percent need to be shipped in American bottoms. What would happen to that treaty?

Secretary DILLON. The U.S. representative could not enter into such an agreement, since it would be contrary to existing U.S. law. However, to continue your example, if the law were changed to give the President the power and if he had authorized the U.S. representative to enter into such an agreement, that would be a binding agreement. But you would not need this treaty to effect that result.

It is a fact that a number of the European countries, seven or eight of them, have been trying to persuade us to do that, or something like that, for the last 5 or 6 years.

They have come over and have had conferences where they have all come together and met with us. I myself argued with them at length.

We have always refused to do that, and we will continue to refuse to do it because of the existing law and because we think it is unfair to the American merchant marine, and the mere fact that this organization exists——

Senator WILEY. You mean it would be a valid agreement?

Secretary DILLON. It would be a valid agreement, sure.

Mr. BALL. Whether or not there was a treaty.

Senator WILEY. Yes.

Secretary DILLON. Whether or not there was a treaty. This treaty has nothing to do with its being a valid agreement.

PRESIDENT'S RELATIONSHIP TO U.S. REPRESENTATIVE TO OECD

Senator WILEY. In spite of the President's specific authority under the law of the country, this one individual representing us could sign such an agreement?

Secretary DILLON. No, this one individual could only sign an agreement of that nature at the direction and with the authority of the President. He could not just sign it on his own.

Senator WILEY. You are assuming that the President gave him the authority.

Secretary DILLON. That is right.

Senator WILEY. My hypothetical case did not have that assumption.

Secretary DILLON. I see.

Senator WILEY. My assumption was that our representative went contrary to the authority of the President.

Secretary DILLON. Oh, well, I do not think he would have any authority to act.

Mr. BALL. He would not have the authority to enter into any such agreement.

Secretary DILLON. That is right.

Mr. BALL. He has only the authority to carry out the directions of the President of the United States.

Senator HICKENLOOPER. Where do you find that in this treaty?

Mr. BALL. This is simply a matter of the way in which matters of this kind are conducted.

Senator WILEY. My point is this. We are living in a period where men, even acting under the authority, as you say, of the Executive, sometimes act contrary to what the Executive thinks. The Executive could probably remove him.

Secretary DILLON. It would be contrary to the constitutional processes of the United States for a fellow——

Senator WILEY. That is not what the treaty says.

Secretary DILLON. It would be contrary to our constitutional processes for someone to take an action that disobeyed the President of the United States when he was working for the President of the United States.

Senator WILEY. You interpret that, then, as meaning that any plenipotentiary of this Government who acts contrary to what you might say were the best interests of this Government is violating the constitutional provisions.

Secretary DILLON. No, contrary to the express direction of the President, because he gets all his authority——

Senator WILEY. You have used the words "expressed direction" there. Article 2 provides: "In the pursuit of these aims, the Members agree that they will, both individually and jointly * * * (d) pursue their efforts to reduce or abolish obstacles to the exchange of goods and services and current payments and maintain and extend the liberalisation of capital movements."

It seems to me that is a tremendously large delegation of authority. Article 2(e) adds that we agree to "contribute to the economic development of both Member and non-member countries." In this age men differ so much as to what is in the best interests of our country. A lot of people right now think that we should at times have quotas and at times impose duties to protect our interests. Agreements like that could be made under this provision, if I read it correctly.

STATUS OF U.S. REPRESENTATIVE TO OECD

Mr. BALL. Senator, it is my understanding, and we can supply the committee with a memorandum on this, if the committee would like, that the representative of the United States on the Council would act on instructions from the Executive. There is no possibility whatever of a situation in which he would act contrary to the wishes of the Executive. He would act pursuant to explicit instructions. The situation is really one where the Executive can act only if it has the powers, which exist regardless of the OECD convention, and the representative acts only when he is directed by the Executive.

So that as far as the possibility of the United States being bound in a situation like this, that situation is not affected at all by this convention.

Senator WILEY. I think there is another angle to this that we must consider. Assuming you are right, we are agreed now that there is delegated the authority to deal with the tariff, arrange quotas and do other things within the provisions of this language. I am not saying that our President would do it. I am simply saying that it is a pretty serious matter in this age when we are not sure where we are going. Is there authority to do that very thing—rearrange duties and import quotas? Am I wrong about that?

PRESIDENT'S POWER NOT ENLARGED

Mr. BALL. I would say this, sir: There are other indications of American policy along the lines of the aims expressed in article 2, including, of course, domestic legislation. There is nothing in article 2 which in any way enlarges the powers of the President of the United States.

There is nothing that gives him any powers which he does not already have, and there is no intention to utilize this convention for the purposes of tariff or quota negotiation or of any trade negotiations of that kind.

If the President wanted to conduct a tariff negotiation he could do so within the limits of the powers given him by the Reciprocal Trade Agreements Act without regard to this convention and without regard to the proceedings of the Council.

This does not in any way enlarge the possibility of the President's seeking to do that.

Senator WILEY. But it says here: "Pursue policies designed to achieve economic growth and internal and external financial stability

and to avoid developments which might endanger their economies or those of other countries."

That language is pretty broad, to me at least. As I say, in this particular period we want to stop, look, and listen; and that is my only purpose in bringing these questions to the fore. Thank you. I have to leave.

The CHAIRMAN. I just want to remind the Senator that this was negotiated under the authority of President Eisenhower and by his own agency. This is not a Democratic treaty.

Senator WILEY. I am glad you remind me, although I did know that. I want to be frank and say that no matter who it was in the first instance who gave birth to it, I want to be sure that we have got a healthy baby here who is not going to kick up a fuss in our economy; that is all.

The CHAIRMAN. The Senator from Tennessee, I believe.

Senator GORE. I wish, first, to inquire about the provisions of the treaty to which this country would agree.

Senator WILEY. Will you pardon me just a minute. I would like to make sure that we get this memorandum of interpretation.

Mr. BALL. Yes, surely.

Mr. KEFAUVER. Mr. President, it seems to me imperative that the United States become a member of the Organization for Economic Cooperation and Development. The free world nations must consult together and plan together on common scientific, technologic, and economic problems for their own good and the good of the developing nations we are trying to help. These problems cannot be solved by nations acting alone; working together, we can solve them.

Fortunately, there is a growing recognition within the free world that our security rests not alone upon military unity; it depends also upon good relationships involving money and trade. Indeed, it can be argued that the degree of strength we derive from military unity is directly related to our unity in these other important fields.

This principle underlay an important resolution adopted by the Atlantic Congress in London almost 2 years ago. At this meeting, which brought together people in all walks of life from the NATO countries, I was privileged to serve as cochairman of the U.S. committee and chairman of the political committee.

Our resolution pointed out the need for economic growth with stable prices and stable exchange rates, as well as the need for high levels of employment and living standards in all free world nations. We recommended that governments pursue policies designed to meet these needs and to promote greater freedom of trade and currencies by reducing tariffs and other trade barriers.

But at the same time we recognized that gaps exist in arrangements for collaboration in resolving these problems of the Atlantic Community. One of our proposals for bridging these gaps and achieving our other aims called for transforming an existing economic organization limited to some European nations into one which would span the Atlantic Ocean to include the United States and Canada.

Such an enlarged organization, we said, should be charged with:

First, giving immediate and urgent attention to unifying the European Economic Community with the other economies of Western Europe and the free world consistent with the provisions of the General Agreement on Trade and Tariffs and with the United Nations Charter.

Second, promoting coordinated fiscal, monetary, and other policies for expansion and stabilization of the North Atlantic economies.

And third, coordinating national policies and developing cooperative policies for speeding up the economic progress of the Atlantic Community and of the world.

That was 2 years ago. Now many of these aims have been embodied in the OECD Treaty before us. It is a treaty which, insofar as our Government is concerned, has received bipartisan support at the executive level: It was negotiated under the Eisenhower administration, and the Kennedy administration is asking that it be ratified. The same spirit of bipartisanship should be carried forward by this body.

Any fears that our participation in OECD would infringe on the sovereignty of the United States are, in my opinion, groundless. The treaty itself gives this country, as well as each other participant, a veto over any recommendation or decision by OECD. In addition, any such decision must conform to the constitutional procedures of a participating country before it can become binding upon that country. Finally, to remove all doubt, the proposal now before us expresses the intent of the Senate that our participation gives the President no powers beyond those he already has.

What this treaty does is to commit this Nation to consult with the 19 other OECD nations and them with us. Out of these consultations, I am certain, will come more harmonious relationships among the free world nations and a more equitable sharing of the burden of aid to the developing nations of the world.

I urge the Senate to ratify the treaty.

Mr. President a telegram from the U.S. sponsors of the Declaration of Atlantic Unity to Senator FULBRIGHT, and a column by Walter Lippmann in the New York Herald Tribune of March 8, are pertinent to the proposition we are discussing here today. I ask unanimous consent that they be printed at this point in the RECORD.

There being no objection, the article and telegram were ordered to be printed in the RECORD, as follows:

FEBRUARY 14, 1961.

Hon. J. W. FULBRIGHT,
U.S. Senator,
Senate Office Building,
Washington, D.C.:

We the undersigned U.S. sponsors of the Declaration of Atlantic Unity respectfully urge the Foreign Relations Committee to report favorably the Organization for Economic Cooperation and Development Convention. We believe such action will lead both to the improvement of the economy of this country, increased trade within the Atlantic Community and more effective assistance to the developing nations. This request is also supported by the following U.S. signers of the Declaration of Atlantic Unity:

Herbert Agar, Frank Altschul, Elliott V. Bell, William Benton, Jacob Blaustein, Robert Woods Bliss, Gov. Edmund G. Brown, Percival F. Brundage, Harry A. Bullis, Vannevar Bush, James F. Byrnes, James B. Conant, Norman Cousins, Gardner Cowles, Colgate W. Darden, Clifford Davis, F. Trubee Davison, Lewis W. Douglas, David Dubinsky, Mark Ethridge, Benjamin Fairless, Henry C. Flower, Jr., Henry Ford II, William C. Foster, John W. Gardner, W. St. John Garwood, Lincoln Gordon, Joseph C. Grew, Ernest A. Gross, Learned Hand, Albert J. Hayes, Wayne L. Hays, William R. Herod, Christian A. Herter, Henry W. Hobson, Ernest M. Hopkins, Palmer Hoyt, Senator Hubert Humphrey, Senator Jacob K. Javits, Leroy Johnson, Robert L. Johnson, Eric A. Johnston, Wilbur K. Jordan, Senator Estes Kefauver, Henry A. Kissinger, Herbert H. Lehman, Mrs. Oswald B. Lord, Senator Eugene McCarthy, John W. McCormack, Theodore R. McKeldin, Robert McKinney, George Meany, Mrs. Robert W. Patterson, Mundy I. Peale, Stuart D. Pearl, William Phillips, Philip D. Reed, Walter Reuther, Charles S. Rhyne, Elmo Roper, Harry Scherman, Adolph W. Schmidt, George N. Shuster, Charles M. Spofford, Robert G. Sproul, William H. Standley, Miss Anna Lord Strauss, Clarence K. Streit, Charles P. Taft, Harry S. Truman, Tracy S. Voorhees, Arthur K. Watson, Jerauld Wright, Quincy Wright, Henry M. Wriston, Owen D. Young, William Zeckendorf, Harold L. Zellerbach.

AFTER MARSHALL AID

(By Walter Lippmann)

Except for Senator CAPEHART, who did not vote, the Foreign Relations Committee is unanimously in favor of the treaty which will make this country a member of OECD (the Organization for Economic Cooperation and Development). The Senate committee has, however, attached to its report an interpretation and explanation of the intent of the Senate. Nothing in the treaty gives the Executive any power beyond what the President now has. The interpretation is undoubtedly correct. It is surely quite harmless. It is also quite unnecessary, as a reading of the treaty, particularly article VI, will show.

Nothing can be recommended or decided by the Organization except by unanimous consent. That is to say, each member has a veto. Moreover, "no decision shall be binding on any member until it has complied with the requirements of its own constitutional procedures." The rights of Congress are wholly safeguarded.

Thus, in no sense of the word is the OECD a supranational organization which can override the sovereign power of any nation. What then is it? And why is it important?

The best way to get at what it is is to begin by noting that today, without the treaty, the President has the constitutional power to do all that the treaty proposes that he should do. The treaty commits 18 West European countries plus Canada and the United States to consult. They are to consult in order to cooperate for economic stability and growth and in assisting the underdeveloped countries. The President already has the power, if he chooses to use it, to consult with other governments on all of these subjects. If out of these consultations come proposals requiring specific actions, the President must go back to Congress unless the action has already been authorized. He can spend no money that is not appropriated, he can make no loans that are not authorized, he can change no tariff schedule except as authorized under the Trade Agreements Act.

Why then is it important to establish in a solemn treaty the commitment to con-

sult? It is important because in committing ourselves to consult, we receive the commitment of the 19 other nations which comprise all the great economic powers of the non-Communist world except for Japan. Japan is now a member of the Development Assistance group dealing with the underdeveloped countries and may join the OECD.

In return for our commitment to consult with them, we get the right to be consulted by them. This is a valuable right as has been shown by the still uncompleted negotiations with West Germany, as will be shown in the forthcoming discussions about the trade policies of the Common Market countries and the nations of the European free trade area.

It is highly significant that this treaty was negotiated and signed by the Eisenhower administration, and that it is being ratified under the Kennedy administration. This shows that before the change of administration the need which the treaty meets had become clear to President Eisenhower, Mr. Herter, and Mr. Dillon. It had become clear that with the phenomenal economic recovery of Western Europe, in which this country played a historic part, our relations with Western Europe were greatly altered.

At the time of the Marshall plan in 1948 the relations between West Europe and the United States were those of beneficiary and patron, protected and protector. With European recovery, though we are still the biggest economic power, the relationship is mutual as between equals. Instead of the patron and the protector, we are the partner, and to conserve and promote our interests, we need to have recognized, as this treaty does, our right to participate in the discussions, to be consulted, to be fully informed, and to be listened to in the field of high international economic policy.

In the time of the Marshall plan we had the power of the last word. Since the European recovery we shall have in an organization like the OECD the influence which stems from our size, our economic importance, and the enlightenment of our policy. It is a sign of the times, a very good sign, it seems to me, that we shall be ratifying this treaty not as a favor to our friends handed down from above, but because this treaty provides us with a respectable, a recognized, and an orderly instrument for defending our rights and promoting our interests.

Mr. SPARKMAN. Mr. President, I ask unanimous consent that certain memorandums which may be helpful to an understanding of the treaty be printed at this point in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

SOME OBSERVATIONS ON GATT AND HOW IT DIFFERS FROM OECD

The phrase "in accordance with international obligations" was included in article 1(c) to make it clear that the members of the OECD are not expected by virtue of the OECD Convention to take actions inconsistent with existing international obligations. The inclusion of this phrase in the OECD Convention neither strengthens or weakens the existing international obligations or in anyway commits the members to continue them. Nor does it in anyway bind any signatory of the OECD Convention to international obligations it has not undertaken elsewhere.

The OECD will not be a trade organization, and will neither establish nor administer trade rules. Such trade rules are in the GATT and the OECD will have nothing to do with them. Nor will the OECD have any of the functions which had been envisaged for the Organization for Trade Cooperation (OTC).

The GATT is an agreement on tariffs and trade. It establishes specific trade rules and sets up procedures for administering these rules. Signatories to the GATT have undertaken concrete obligations pertaining to tariffs and trade.

The U.S. participation in the GATT, which is pursuant to the Trade Agreements Act, will not be affected in any manner by the OECD. Throughout the year-long negotiations, the U.S. negotiators remained opposed to having any of the numerous OEEC acts in the trade field continued in the OECD. These efforts were successful and none of the trade acts will be carried forward.

Technically, the GATT is not an organization, but rather a trade agreement. Countries agreeing to its provisions are known as contracting parties, not members. Adherence to the general agreement on the part of the United States has not been approved by the U.S. Congress. In fact, in recent legislation approving extension of the Trade Agreements Act Congress has made it clear that in extending the power of the President to make reciprocal trade agreements with other countries it has no intention of signifying approval of the GATT.

The GATT, as it came into existence on January 1, 1948, was a provisional undertaking by eight important trading countries, including the United States.

Since then a number of other countries have agreed to apply the GATT until today 38 countries are contracting parties to the agreement and several other countries participate on an interim basis. The GATT is the most comprehensive international agreement ever concluded for the reduction of trade barriers. The 38 contracting parties, together, carry on more than 80 percent of the international trade of the world and the tariff schedules of the GATT include approximately 60,000 items covering more than half of the world's total international trade. The tariff concessions include reductions in import tariffs and commitments not to increase existing duty treatment. In some cases complete elimination of duties or the reduction, or elimination, of tariff references is provided for.

From the beginning the United States has taken leadership in the organization and activities of the GATT. With the progressive dismantling of discriminations and restrictions imposed during the past 10 years against U.S. exports for balance-of-payments reasons tariffs again have great significance. The present negotiations will give the United States a chance to bargain for tariff reductions abroad and thus strengthen the position of its exporters in an increasingly competitive world market. Of particular importance will be the negotiations with the European Economic Community in an endeavor to keep the external tariff on the Common Market as low as possible.

With a population approximately as large as that of the United States the six Common Market countries together comprise one of the most important markets in the world. It is of great importance to our export trade, therefore, that the common external tariff of the EEC be kept low.

Since the United States is the largest trading country in the world the power of the President to reduce U.S. tariffs and other trade barriers is vital to the success of the GATT. To the extent that the United States is willing to offer tariff concessions on imports from the European Common Market countries, for example, it can request corresponding concessions in the external tariff of the European Common Market. On the other hand, the present modest powers of the President in this regard, together with the avoidance-of-injury philosophy embodied in the escape clause and peril-point amendment, enables the U.S. delegates at Geneva to offer very little in the way of inducement.

Under the Trade Agreements Extension Act of 1958 the President is authorized to reduce U.S. tariffs in annual stages by not more than 20 percent of the rates existing on July 1, 1958.

Alternatively, he may reduce any rate by 2 percentage points ad valorem or he may reduce to 50 percent ad valorem any rate which is above that level. The law likewise authorizes him to agree to "bind" (i.e., continue) duty-free treatment for articles on the free list or to bind existing duties against increase. He must also, during the negotiation of trade agreements, seek information and advice from representatives of industry, agriculture, and labor.

In effect, the GATT is an international organization, not a supranational organization. It is important that these two concepts be carefully distinguished from each other. An international organization is more akin to a trade association than to government. An international organization can be no stronger than its members and it can do no more than its members permit it to do. In no sense does it have power to instruct its members as what they should, or should not do.

The GATT, like any other international organization, can do little more than provide a forum for the international discussion of common problems. It has no enforcement powers and the only obligation that the United States or any other contracting party assumes in acceding to it is to live up to the rules that it has, itself, voluntarily agreed to.

GOLD AND BALANCE OF PAYMENTS

EXPORTS

In 1960, exports reached (approximately) $19.4 billion, almost equaling the record of $19.5 billion set in 1957. Imports were about $14.7 billion. The resulting trade surplus of about $4.5 billion amounts to the third highest of the decade, surpassed only by the margins built up in the Suez-crisis years of 1956 and 1957. In spite of this strong gain in the commercial account over 1959 (the surplus that year was only $910 million), the balance of payments position remained weak, largely because of shifts in private capital transactions, as short-term investment sought higher interest rates abroad.

Through September 1960, Western Europe and Japan accounted for about three-fourths of both the rise in sales and the improvement in our trade surplus. Both areas increased purchases from the United States by more than 30 percent over the year ago 1959 totals. Imports from Western Europe declined slightly; those from Japan rose about 17 percent.

Since 1894, U.S. exports have consistently exceeded imports. Since World War II, finished manufactures have accounted for 60 percent or more of total exports. The percentage of imports of finished manufactures is still substantially lower.

INTERDEPENDENCE

The 1960 payments picture appears mainly to reflect comparative economic circumstances in the United States and in Western Europe and Japan. Slackened activity here, contrasted with boom conditions abroad, increased both the marketability of U.S. exports and the pressure on fluid capital to seek a foreign haven. Removal of restrictions on convertibility in Western Europe at the beginning of 1959 and more recently in Japan helped make the short-term capital market extremely sensitive to interest rate fluctuations. The Survey of Current Business noted:

"The outflow of short-term capital—and to some extent also of funds for longer term investments—was due, therefore, to the same economic forces which are also to a large extent responsible for the recent rise in exports and the slow decline in imports."

The rapid expansion of the industrial countries in recent years has been accompanied by growing interdependence of capital markets. These developments in turn have opened the door to transatlantic capital movements which play a considerable role in determining our payments balance.

U.S. RESERVES POSITION

U.S. gold reserves have declined from $22.8 billion at the end of 1957 to $17.8 billion as of December 31, 1960. Nevertheless, the United States still has nearly one-half of the free world's monetary gold stock. Liquid dollar liabilities in November were $18.7 billion, giving a ratio of U.S. gold to immediate foreign claims of approximately 0.95 to 1. In contrast, the United Kingdom's gold reserve amounts to between one-third and one-fourth of its foreign obligations.

Viewed from another angle, only $5.9 billion of U.S. reserves is "free" gold. The other $11.9 billion is set aside as a 25 percent minimum reserve against outstanding Federal Reserve notes and deposits. Thus, the ratio of free gold to liquid obligations is less than 1 to 3.

The IMF, in a study of international liquidity published in 1958, said this: "The ultimate financial strength of the United States rests on its strong international position and the fact that it is an extremely important market, a dominant supplier of economic and other kinds of aid, and a major source of long-term and short-term capital. It would, therefore, be natural for the rest of the world to maintain large holdings of dollars for working balances, investment, and other purposes."

And the First National City Bank of New York observed in its monthly letter of April 1960:

"What is needed most in appraising our balance of payments problem and prospects is a sense of perspective. As far ahead as can be seen, the dollar's basic worth and stability are beyond question. It would be most damaging not only to American prestige but also to the financial strength of the entire free world if Americans or foreigners should take fright of shadows."

AMERICAN INVESTMENT ABROAD

The net effect of direct foreign investment upon the U.S. balance of payments has been salutary. In the 2½ years ending last June the income returned from these investments exceeded the outflow of new capital by $2.6 billion.

We should regard rising levels of exports and imports as elements in a program for strengthening the U.S. economy. A domestic economy dynamic enough to attract increasing amounts of private capital would also minimize the flow of private capital in response to booming economic conditions and higher interest rates abroad.

Mr. JAVITS. Mr. President, will the Senator yield to me 30 seconds?

Mr. AIKEN. Mr. President, if there is any time remaining, I yield 30 seconds to the Senator from New York.

The PRESIDING OFFICER. All time for debate has expired.

Mr. MANSFIELD. Mr. President, has all time expired?

The PRESIDING OFFICER. All time has expired.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the treaty will be considered as having passed through its various parliamentary stages up to the point of consideration of the resolution of ratification, which will be read for the information of the Senate.

The legislative clerk read as follows:

Having regard to and in reliance on the statement in the letter of January 16 1961, from Secretary of State Herter to President Eisenhower and transmitted by him to the Senate on January 17, 1961, that "the U.S. representative will not have any additional powers in substantive matters to bind the United States after the convention enters into force than now exist in the Executive, but that any act of the organization outside the power of the Executive will require action by Congress or the Senate, as the case may be, before the United States can be bound," and having regard to and in reliance on the testimony of Secretary of the Treasury Dillon and Under Secretary of State Ball in behalf of the administration, and having regard to and in reliance on the opinion of the Legal Adviser of the Department of State dated March 6, 1961, and quoted in the committee report on this convention:

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention on the Organization for Economic Cooperation and Development, together with two protocols relating thereto, signed at Paris on December 14, 1960, by representatives of the United States of America, Canada, and the 18 member countries of the Organization for European Economic Cooperation (Executive E, 87th Cong., 1st sess.), with the interpretation and explanation of the intent of the Senate that nothing in the convention, or the advice and consent of the Senate to the ratification thereof, confers any power on the Executive to bind the United States in substantive matters beyond what the Executive now has, or to bind the United States without compliance with applicable procedures imposed by domestic law, or confers any power on the Congress to take action in fields previously beyond the authority of Congress, or limits Congress in the exercise of any power it now has.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the resolution of ratification?

Mr. MANSFIELD. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the resolution of ratification? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from Alaska [Mr. BARTLETT], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Utah [Mr. Moss], and the Senator from Oregon [Mr. MORSE] are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ] is absent because of illness.

I further announce that the Senator from Texas [Mr. BLAKLEY] is necessarily absent.

I further announce that, if present and voting, the Senator from New Mexico [Mr. CHAVEZ] and the Senator from Arkansas [Mr. FULBRIGHT] would each vote "yea."

On this vote the Senator from Alaska [Mr. BARTLETT] and the Senator from Oregon [Mr. MORSE] are paired with the Senator from Texas [Mr. BLAKLEY]. If present and voting, the Senators from Alaska and Oregon would vote "yea," and the Senator from Texas would vote "nay."

Mr. KUCHEL. I announce that the Senator from Colorado [Mr. ALLOTT] is absent because of a death in his family.

The Senator from Vermont [Mr. PROUTY] is absent by leave of the Senate because of illness.

The Senator from Kentucky [Mr. MORTON] and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent and, if present and voting, would each vote "yea."

The yeas and nays resulted—yeas 72, nays 18, as follows:

[Ex. No. 2]

The PRESIDING OFFICER. Two-thirds of the Senators present concurring therein, the resolution of ratification is agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the action of the Senate on the treaties.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

NOMINATION OF JAMES L. HARRISON TO BE PUBLIC PRINTER

Mr. MANSFIELD. Mr. President, so long as the Senate is still in executive session, I would like to have laid before the Senate the nomination of James L.

Harrison, of the District of Columbia, to be Public Printer. A hearing on the nomination was held by the Committee on Rules and Administration this afternoon. The nomination of Mr. Harrison was reported unanimously by the committee, and it has been cleared by the minority leader. I ask unanimous consent for the immediate consideration of the nomination.

The PRESIDING OFFICER. Is there objection? The Chair hears none. The nomination will be stated.

The legislative clerk read the nomination of James L. Harrison, of the District of Columbia, to be Public Printer.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

NOMINATION OF DR. WORTH BAGLEY DANIELS TO BE A MEMBER OF THE BOARD OF REGENTS OF THE NATIONAL LIBRARY OF MEDICINE

Mr. HILL. Mr. President, I report favorably from the Committee on Labor and Public Welfare the nomination of Dr. Worth Bagley Daniels, of the District of Columbia, to be a member of the Board of Regents of the National Library of Medicine. After consultation with the majority leader and the minority leader, I ask unanimous consent that the Senate proceed to the consideration of the nomination.

The PRESIDING OFFICER. Is there objection? The Chair hears none. The nomination will be stated.

The legislative clerk read the nomination of Dr. Worth Bagley Daniels, of the District of Columbia, to be a member of the Board of Regents of the National Library of Medicine, Public Health Service, for the remainder of the term expiring August 3, 1962.

Mr. HILL. Mr. President, Dr. Daniels is not only one of the outstanding doctors of the country, but he is also the former chairman of the Board of Regents of the National Library of Medicine. No man has contributed more to bringing the library into being than has Dr. Daniels.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to this nomination?

The nomination was confirmed.

Mr. MANSFIELD. Mr. President, I move that the President be notified forthwith of the confirmation of both nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate resumed the consideration of legislative business.

SALE OF CERTAIN CRITICAL MATERIALS

Mr. MANSFIELD. Mr. President, after consultation with the distinguished minority leader, I ask unanimous consent that the Senate temporarily lay aside the unfinished business and proceed to the consideration of Calendar No. 67, S. 1116.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1116) to authorize the sale, without regard to the 6-month waiting period prescribed, of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill.

Mr. DIRKSEN. Mr. President, I understand—and I address my statement to the Senator from Missouri—that these materials are quite in excess of the stockpiling needs and that the General Services Administration is very eager to dispose of them. Is that correct?

Mr. SYMINGTON. I assure the Senator from Illinois that that is correct. I ask unanimous consent that an excerpt from the report of the committee and the text of the bill be printed in the RECORD at this point.

There being no objection, the excerpt from the report and the bill were ordered to be printed in the RECORD, as follows:

PURPOSE

This bill would (1) authorize the disposal of surplus nickel-cobalt-copper calcines and matte from the national stockpile, and (2) permit such disposal to be accomplished before the expiration of 6 months after publication of notice of the proposed sale in the Federal Register.

EXPLANATION

On January 16, 1961, the General Services Administration gave notice of a proposed disposition of approximately 3,431 short tons of nickel-cobalt-copper calcines and approximately 87 tons of nickel-cobalt-copper matte now held in the national stockpile. This notice was based upon a revised determination by the Office of Civil and Defense Mobilization that there is no longer any need for stockpiling these calcines and matte because they are excess to stockpile needs and are of such quality as to be of little or no use in time of war.

Section 3(e) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98b(e)) requires congressional approval of this proposed disposition. The law also requires, among other things, that the disposal may not be made until 6 months after publication of the disposal plan in the Federal Register.

Irrespective of whether the 6-month waiting period is waived, the General Services Administration desires authority to dispose of these materials from the stockpile. The objective in waiving the 6-month waiting period is to accelerate the possible sale and availability of these materials to an industrial plant in a distressed economic area.

During World War II the Federal Government operated a federally owned refinery in the area of Flat River, Mo., for the refining of lead and copper concentrates. This refining operation resulted in the accumulation of several thousand tons of byproducts known as calcines.

After the war the refinery was leased to the National Lead Co. which has continued to operate it in the refinement of nickel and cobalt from byproducts of the extraction of lead. Because of lowered prices of lead the lead-mining operation was discontinued in February 1961. With the ending of lead-mining operations there, no more calcines are being produced. The remaining calcines available there will sustain the refinery operation until March 30, 1961. If additional calcines are not made available the refinery will close on March 30, 1961, resulting in the discharge of 140 employees.

Enactment of this bill would not assure the sale of the surplus calcines and matte to any specific purchaser. The National Lead Co. would have to compete against other possible purchasers, but this company would at least have an opportunity to negotiate for the purchase of these materials, and if successful it would secure a sufficient quantity of the materials to permit continued operation of the refinery for a period of 6 additional months beyond March 30, 1961.

DEPARTMENTAL RECOMMENDATION

Printed below and hereby made a part of this report are (1) a letter from the then Administrator of the General Service Administration, dated January 16, 1961, giving notice of the proposed disposal of these materials and requesting congressional approval of the disposal; (2) a copy of the notice of the proposed disposal published in the Federal Register on January 25, 1961; and (3) a letter from the incumbent Administrator of the General Services Administration, dated March 10, 1961, indicating that the General Services Administration and the Bureau of the Budget have no objection to the enactment of S. 1116.

GENERAL SERVICES ADMINISTRATION,
Washington, D.C., January 16, 1961.

Hon. RICHARD B. RUSSELL,
Chairman, Armed Services Committee,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Enclosed is a notice of a proposed disposition of approximately 3,431 short tons of nickel-cobalt-copper calcines and approximately 87 tons of nickel-cobalt-copper matte now held in the national stockpile. This notice is being published in the Federal Register and is forwarded to the Congress and to the Armed Services Committee of each House thereof in accordance with the provisions of section 3(e) of the Strategic and Critical Materials Stock Piling Act (53 Stat. 811), as amended (50 U.S.C. 98b(e)).

The Office of Civil and Defense Mobilization has made a revised determination, pursuant to section 2(a) of the Strategic and Critical Materials Stock Piling Act, that there is no longer any need for stockpiling this grade and quantity of said nickel-cobalt-copper calcines and matte. The revised determination was made for the reason that said nickel-cobalt-copper calcines and matte are excess to stockpile needs and are of such quality as to be of little or no use in time of war.

Section 3(e) of the Strategic and Critical Materials Stock Piling Act provides that no material constituting a part of the stockpile may be disposed of without the express approval of Congress, except where the revised determination is by reason of obsolescence of the material for use in time of war. Since the revised determination in this case was not by reason of obsolescence, we request that the Congress approve the proposed disposition.

Sincerely yours,

FRANKLIN FLOETE, *Administrator.*

GENERAL SERVICES ADMINISTRATION NICKEL-COBALT-COPPER CALCINES AND MATTE HELD IN THE NATIONAL STOCKPILE—PROPOSED DISPOSITION

Pursuant to the provisions of section 3(e) of the Strategic and Critical Materials Stock Piling Act (53 Stat. 811), as amended (50 U.S.C. 98b(e)), notice is hereby given of a proposed disposition of approximately 3,431 short tons of nickel-cobalt-copper calcines and approximately 87 tons of nickel-cobalt-copper matte now held in the national stockpile.

The Office of Civil and Defense Mobilization has made a revised determination, pursuant to section 2(a) of the Strategic and Critical Materials Stock Piling Act, that there is no longer any need for stockpiling said nickel-cobalt-copper calcines and matte. The revised determination was based upon the finding of the Office of Civil and Defense Mobilization that said nickel-cobalt-copper calcines and matte are excess to stockpile needs and are of such quality as to be of little or no use in time of war.

Since the revised determination is not by reason of obsolescence of nickel-cobalt-copper calcines and matte for use in time of war, this proposed disposition is being referred to the Congress for its express approval, as required by section 3(e) of the Strategic and Critical Materials Stock Piling Act.

General Services Administration proposes to transfer said nickel-cobalt-copper calcines and matte to other Government agencies, or to offer them for sale on a competitive basis upon the express approval by the Congress of this proposed disposition or 6 months after the date of publication of this notice in the Federal Register, whichever is later.

This plan and the date of disposition have been fixed with due regard to the protection of producers, processors, and consumers against avoidable disruption of their usual markets as well as the protection of the United States against avoidable loss on disposal.

Dated January 16, 1961.

FRANKLIN FLOETE, *Administrator.*

GENERAL SERVICES ADMINISTRATION,
Washington, D.C., March 10, 1961.

Hon. RICHARD B. RUSSELL,
Chairman, Committee on Armed Services,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Your letter of March 1, 1961, requested the views of the General Services Administration on S. 1116, a bill to authorize the sale, without regard to the 6-month waiting period prescribed, of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act.

The principal purpose of S. 1116 is to avoid as to the nickel-cobalt-copper calcines and matte referred to in the notice of disposal published in the Federal Register on January 25, 1961, the 6 months' waiting period that section 3(e) of the Strategic and Critical Materials Stock Piling Act requires for a disposal thereunder. The bill would authorize the disposal of those materials by negotiated sale or otherwise. This would permit National Lead Co. to negotiate for the materials while it is still leasing the Government-owned plant at Fredericktown, Mo., for the refining of similar byproducts of lead production in that area. The bill, however, would not assure the sale of the materials to any particular purchaser.

National Lead Co. has advised that, unless it is successful in purchasing those calcines and matte in the immediate future, it would, because of a lack of raw materials, cease operations at the Fredericktown plant, which is located in the Flat River, Mo., area—a depressed labor area. The materials covered by S. 1116 would be sufficient for the continued operation of the Fredericktown plant for approximately 6 months.

The General Services Administration has no objection to the enactment of S. 1116.

The Bureau of the Budget has advised that there is no objection to the submission of this report to your committee from the standpoint of the Administration's program.

Sincerely yours,

JOHN L. MOORE, *Administrator.*

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Administrator of General Services is hereby authorized to dispose of, by negotiated sale or otherwise, approximately three thousand four hundred and thirty-one short tons of nickel-cobalt-copper calcines and approximately eighty-seven tons of nickel-cobalt-copper matte now held in the national stockpile. Such disposition may be made without regard to the provisions of section 3 of the Strategic and Critical Materials Stock Piling Act, relating to dispositions on the basis of a revised determination pursuant to section 2 of said Act, to the effect that no such disposition shall be made until six months after publication in the Federal Register and transmission to the Congress and to the Armed Services Committees thereof of a notice of the proposed disposition.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. WILLIAMS of Delaware. Mr. President, may we have an explanation of the bill?

Mr. SYMINGTON. Mr. President, in reply to the question of the Senator from Delaware, it will have the effect of allowing 140 people to continue to work for 6 months more at the plant of the National Lead Co., where there is a cobalt refining program. If we do not pass the bill quickly, the plant will have to be closed. The General Services Administration normally cannot sell the ore, which is in surplus, or overstock, unless they wait 6 months. The plant employs 140 people, and if we pass the bill these people will remain at work, instead of being laid off at the end of March.

Mr. WILLIAMS of Delaware. I am sympathetic toward the proposal. I am wondering whether the General Services Administration produces the lead.

Mr. SYMINGTON. No; the material goes into the hands of the General Services Administration, and they will simply sell it. Then it will be owned by a private company. However, the material is at the plant of the National Lead Co., and is owned by the General Services Administration. So this bill would increase Government revenues and help dispose of a surplus and put it to constructive use.

Mr. WILLIAMS of Delaware. The proposal seems to do so many wonderful things. I am wondering whether the Senator would withhold action on the bill for a little while so that I may read it. Will the Senator withhold action on it for a few moments?

Mr. SYMINGTON. I merely wish to say that the subcommittee unanimously approved the measure, and the full committee reported it unanimously. The General Services Administration has agreed to it. The Bureau of the Budget has agreed to it. All it does is to afford employment.

Mr. WILLIAMS of Delaware. I am sympathetic with that objective. I may not have any objection to the bill once I have studied it. I did not know it was planned to bring it up at this time. I am asking the Senator to withhold it so that I may study it.

Mr. SYMINGTON. I discussed the matter with the leadership on both sides of the aisle. It was my impression that everyone had agreed to it. If the Senator from Indiana and the Senator from Delaware wish to withhold action on the bill, that is all right.

Mr. WILLIAMS of Delaware. If the Senator will withhold it temporarily, perhaps it can be brought up in a little while.

Mr. CAPEHART. I do not know why the Senator from Missouri includes me in his statement.

Mr. SYMINGTON. I beg the Senator's pardon. I meant the Senator from Delaware.

TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACT OF 1961

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of the unfinished business, H.R. 4806.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate resumed the consideration of the bill (H.R. 4806) to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes.

LEGISLATIVE PROGRAM

Mr. DIRKSEN. Mr. President, at this point I should like to ask the majority leader what is proposed by way of a schedule for the remainder of the day. Earlier in the day it was stated that the discussion of the pending bill would run into tomorrow. I know that Senators who had engagements have been concerned as to whether they should issue telegrams of cancellations. I am advised now that there is some hope that consideration of the bill can be completed today, if the Senate remains in session for not too long a period of time. I should like an expression from the majority leader on that subject.

Mr. MANSFIELD. It is the hope of the leadership that it may be possible to complete action tonight on the proposal before the Senate.

I suggest that Senators remain, so that if votes are to be had, they can be held with expedition. I advance the hope also that the chairman of the Committee on Finance will offer his amendments en bloc for consideration by the Senate. I hope that we can settle our arguments without wasting too much time and

words and arrive at a position at which action can be taken on the pending bill.

If we can complete action on the bill this evening—it is up to the membership of the Senate, of course—I hope that we will also complete action on the Railroad Retirement Extension Act.

That is the situation as it now stands. Many Senators, including the distinguished minority leader, have canceled longstanding engagements. Therefore, I hope that Senators who have had to make sacrifices of that kind will be repaid in full by action taken by the Senate tonight.

Mr. DIRKSEN. It is proposed, then, if action is consummated on the two tax bills, that the Senate adjourn until Monday?

Mr. MANSFIELD. With pleasure.

TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACT OF 1961

The Senate resumed the consideration of the bill (H.R. 4806) to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes.

Mr. MANSFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MANSFIELD. I believe that under the unanimous-consent agreement the Senator from Tennessee [Mr. GORE] is entitled to the floor. When the hour of 3 o'clock arrived, he was still in process of making his speech. On that basis I believe the RECORD will show that he is entitled to the floor. I apologize to the chairman of the committee because I did not realize that to be the fact.

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent that the so-called Byrd amendments, which have some ramifications in the bill, be considered en bloc.

Mr. WILLIAMS of Delaware. Mr. President, reserving the right to object—and I shall not object—I wish to make certain what the parliamentary situation would be in the event the Byrd amendments should be rejected. Would the bill then be subject to amendment advancing the effective date of the tax? That is a provision of the Byrd amendment. Would it be in order at a subsequent time to offer an amendment to advance the effective date so as to make the tax effective for calendar year 1961?

The PRESIDING OFFICER. If the Byrd amendment should be rejected, that would have the effect of restoring the House text, and that would be subject to amendment.

Mr. WILLIAMS of Delaware. It would be subject to amendment as to the effective date of the tax.

The PRESIDING OFFICER. The Chair presumes that that would be true of any amendment.

Mr. WILLIAMS of Delaware. I have no objection.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Virginia?

Mr. MANSFIELD. Mr. President, before the request is agreed to, I should like to ask the Senator from Virginia if he will agree to a time limitation of 1 hour on the Byrd amendment or amendments, the time to be divided equally, at the end of which time the Senate would vote; the agreement to become effective after the Senator from Tennessee has had an opportunity to finish the remainder of his speech, which is very short.

Mr. WILLIAMS of Delaware. Mr. President, reserving the right to object, and I think I would have to object because I do not believe the debate will take very long, some Senators have not had an opportunity to say anything in favor of the Byrd amendment. I would be willing to enter into a unanimous-consent agreement to extend to Senators who favor the amendment an opportunity comparable to that which would be had on the other side if we add in the time which the Senator from Tennessee [Mr. GORE] has used. I would not want the Senator from Tennessee to use 2 or 3 hours speaking against the amendment and then exclude that time from the time limitation under which those who favor the amendment of the Senator from Virginia would speak.

Mr. MANSFIELD. That is agreeable. The Senator from Tennessee has spoken less than an hour. He has two or three pages of his statement remaining. I should say, generally speaking, that it would be another hour.

Mr. WILLIAMS of Delaware. The Senator from Tennessee would have another hour?

Mr. MANSFIELD. No; there would be another hour on the proposal.

Mr. WILLIAMS of Delaware. How much time would there be on that basis?

Mr. MANSFIELD. One hour.

Mr. WILLIAMS of Delaware. I should have to object to that, because the other side has already used a half hour on the amendment.

Mr. MANSFIELD. Suppose we limit the time to one-half hour on the side of the Senator from Tennessee, and an hour and a half on the other side.

Mr. JAVITS. Reserving the right to object, it is not only the Senator from Tennessee who is taking the position he is taking; other Senators take a similar position. For myself, a few minutes will do. Still, 10 minutes is important.

Mr. MANSFIELD. Mr. President, I withdraw my request.

Mr. BYRD of Virginia. Mr. President, I wish to make a brief statement concerning the so-called Byrd amendments.

These amendments provide that a State in which tax collections attributable to wages paid for 1961 and 1962 exceed the amount of temporary benefits paid in that State, will be entitled to have the excess amount credited to its account in the unemployment trust fund where it can be used only for the purpose of paying State unemployment compensation. In a State in which temporary benefit payments exceed tax collections, employers will be required to repay the difference to the Federal Treasury through a reduction in the 90-percent credit against the Federal unemployment tax commencing with respect to wages paid in that State after 1963. This amendment assures that each State will finance temporary benefits paid in that State and that taxes collected in a State will be used only for the purpose of paying benefits in that State. This is the concept which has been followed in the unemployment compensation field for more than 25 years.

The House bill contradicts that concept under which we have operated for all these years.

If these amendments are not adopted the House language would prevail and under the House bill, in violation of the concept that has been in effect since 1935, taxes collected in all States would be pooled in a common fund and from this fund certain States would draw out in benefits more than they contributed in taxes. It would naturally follow that such a federalized account would be a license for deficit States to exercise less care over their expenditures and encourage surplus States to relax the efficiency which has been established in their practices. It cannot be successfully denied that the House language would federalize the financing of payments provided under the bill. If the door is opened now, there is reason to expect that an effort will be made shortly to federalize the entire program—financing and standards—on a permanent basis. The Finance Committee language would preserve the established principles in this program and deter subsequent efforts to federalize. I hope the committee amendments will be adopted.

The Byrd amendments would in no way affect the payment of benefits to the unemployed. They would not change them one iota. The unemployed would get every cent which they would get under the House bill. The Byrd amendments simply provide that the money of one State, paid in not by general taxation, but by taxes paid by employers, should not be sent to another State. That is in accordance with the concept of the legislation which was adopted in 1935 and which has continued to this day.

Mr. GORE. Mr. President, a disagreement with the distinguished and lovable Senator from Virginia [Mr. BYRD] is not a source of pleasure. I do in this case respectfully disagree both with the purport and with the effect of the amendment which he has proposed and which the committee adopted, and I disagree also with the distinguished Senator's interpretation of the amendment.

First, I should like to answer the argument that the House bill would federalize unemployment compensation. In my opinion, this is not the case. This argument, in my opinion, does not comport with the provisions of the bill or its intent.

The pending bill does not change the basic unemployment compensation law.

It does not alter the cooperative relationship between the State officials and the Federal Bureau of Employment Security.

In my view, we are not now dealing with normal unemployment with which State unemployment compensation programs are designed to cope. As a result of a serious recession, the duration of unemployment experienced by individuals has been extended. If the States were in a position to solve this problem, there would be no need at all for such a bill. But the States are not equipped to do so, and their programs were not designed for the purpose of meeting deep, serious, and prolonged national recessions. Unless we have a national solution to provide unemployment compensation benefits for the millions of people who have exhausted their entitlements under the present State programs, and for the many more who soon will exhaust their entitlements, there will be no effective solution.

Mr. President, why do we have the pending bill before us? Its purpose is to provide an additional period of time during which the unemployed who have exhausted the benefits to which they are entitled under present law will be able to draw unemployment compensation benefits to the extent of up to 13 weeks.

Mr. President, this is a Federal program, and the bill calls for the levying of a Federal tax. The benefits under the House version of the bill would be distributed by the State agencies, as contracting agents for the Federal Government.

Now I yield to the Senator from Pennsylvania.

Mr. CLARK. I thank the Senator from Tennessee for yielding.

From his comments today, I gather that he is of the view that unemployment is a national problem in our country, and should be dealt with on a national basis. Is my understanding of this position correct?

Mr. GORE. Yes.

Mr. CLARK. I was happy to note that yesterday the Senator voted in support of the area redevelopment bill, which dealt on a national basis with the problem of chronic and persistent unemployment.

Does it seem consistent and logical for the Senate to vote for a State solution of the unemployment problem, just 24 hours after the Senate voted in favor of a national solution of another kind of unemployment problem?

Mr. GORE. It is not my view that, upon consideration of the problem, the Senate will adopt the principle that the taxpayers of one State shall not pay taxes to relieve hardship in another State.

For instance, in that connection consider the situation in regard to national disasters. There are many instances in which such a principle simply could not be allowed to operate.

Mr. CLARK. Reclamation projects would be another, would they not?

Mr. GORE. The State of New York does not have many irrigation and reclamation projects; neither are there many hydroelectric dam developments in the State of New York. The State of New York pays to the Federal Government more than $17 billion in taxes; but the State of Louisiana, which pays Federal taxes in an amount of less than $1 billion, receives 50 percent more Federal funds for old-age assistance than does the entire State of New York.

We simply must not adopt the ukase that the people of one State shall not be taxed in order to alleviate the hardships encountered by the people of another State; that is antediluvian and it is anti-Federal Union.

Mr. President, there has been distributed to Senators a mimeographed sheet which shows that several States will, under the provisions of this bill, make tax payments which will exceed the anticipated receipt of benefits by the citizens within those States. In that connection, I wish to refer to Pennsylvania. The sheet shows that the State of Pennsylvania will, according to estimates, pay $70 million in taxes under the provisions of this bill, but will receive, according to the terms of the bill, $85 million.

Mr. CLARK. I believe the correct figure is $82 million.

Mr. GORE. Regardless of whether the correct figure is $82 million or $85 million—the exact figure is immaterial to my point—Pennsylvania will be a net beneficiary. But we are told that this should not be permitted; it is said that only the State of Pennsylvania should contribute to the welfare of the unemployed in Pennsylvania. I say that this principle is wrong.

But let me point out that this estimate of benefit payments is an estimate of the unemployment benefits paid within only a very brief period of time—approximately 14 months; and it is estimated that the unemployment situation will then be approximately what it is at the present time.

However, let us consider a longer period; let us consider what Pennsylvania has paid over a period of 25 years. I do not know what the total payments have been; but the 10 percent which is set aside for administration has caused Pennsylvania to pay into the Federal fund $422 million, from which Pennsylvania has received, in return, only $302 million. So, Mr. President, during the operation of this program for 25 years, Pennsylvania has paid in $120 million more, for administrative costs, than the amount returned to Pennsylvania. Yet because we are in a recession and because there is heavy unemployment in Pennsylvania, we are told that it would be a horrible thing if the unemployed of Pennsylvania were now to be entitled to draw $12 million more in benefits than the people of Pennsylvania would pay during this brief period. Mr. President, I think that when we examine that argument, it cannot stand the light of day; it is without merit.

Mr. CLARK. Mr. President, will the Senator from Tennessee yield again to me?

Mr. GORE. I yield.

Mr. CLARK. I thank the Senator from Tennessee for including those references to Pennsylvania in his remarks.

I ask whether he would be willing to have me request unanimous consent to have printed at this point in the RECORD the official letter from the executive director of the Bureau of Employment Security of the Commonwealth of Pennsylvania, with an attached table.

Mr. GORE. Certainly.

Mr. CLARK. Then, Mr. President, I ask unanimous consent to have the letter and table printed at this point in the RECORD.

The PRESIDING OFFICER. Is there objection?

There being no objection, the letter and table was ordered to be printed in the RECORD, as follows:

COMMONWEALTH OF PENNSYLVANIA,
DEPARTMENT OF LABOR AND INDUSTRY,
BUREAU OF EMPLOYMENT SECURITY,
Harrisburg, March 15, 1961.

MR. JAMES SUNDQUIST,
Administrative Assistant to Senator Joseph Clark, Senate Office Building, Washington, D.C.

DEAR MR. SUNDQUIST: Secretary Batt called me from Washington regarding the amendments to the temporary unemployment compensation bill introduced by Senator BYRD. From scanty newspaper accounts I gather that the amendments provide for each State carrying its own tax in this area. If this is so Senator CLARK may be interested in the attached reprint for the last fiscal year which shows that there is already unequal apportionment of Federal grants for administration of the regular unemployment compensation program.

The Federal Government grants administrative funds to each State according to its need and not according to the amount of money collected from Federal employers in that State in the unemployment compensation program. The State of Wyoming, for example, during fiscal 1960 received $914,000 in administrative grants from the Federal Government for unemployment compensation although the Federal Government collected from Wyoming employers only $523,000. This difference was made up by other States where the collections exceeded grants. This has been so for 25 years.

For example, from fiscal 1936 to fiscal 1960 the Federal Government collected from Pennsylvania employers $422,606,000 while the State of Pennsylvania received in administrative grants only $302,067,000, a return of 71.5 percent. This means that $120 million plus collected from Pennsylvania employers in the last 25 years was used by the Federal Government to help other States for their administrative costs.

The attached shows the figures for the fiscal year 1960 as stated but the cumulative total for Pennsylvania is supported by documents in our possession as provided by the U.S. Department of Labor.

I am sure that I do not need to remind you or Senator CLARK that fragmenting the national interest for States as to who gets what would raise the question as to whether or not in a heavy taxpaying State, like Pennsylvania, should support atomic energy installations in Tennessee and Ohio and and missile construction in Florida or dams out west or whether Philadelphia Congressmen should ever vote for farm subsidizing considering the number of farms in Philadelphia.

I trust this material will add something to the picture from your standpoint.

Sincerely yours,

A. ALLEN SULCOWE,
Executive Director.

Estimated Federal unemployment tax receipts and Federal funds allocated to States for administration during fiscal year 1960

[Dollar amounts in thousands]

State	Federal unemployment tax collections [1]	Federal funds allocated to States (including postage)	Ratio of funds allocated to tax collections (percent) by fiscal year			State	Federal unemployment tax collections [1]	Federal funds allocated to States (including postage)	Ratio of funds allocated to tax collections (percent) by fiscal year

Mr. CLARK. Mr. President, will the Senator from Tennessee yield again to me?

Mr. GORE. I yield.

Mr. CLARK. I wish to commend the Senator from Tennessee and also the distinguished Senator from Illinois [Mr. DOUGLAS], who joined in the minority views, for their willingness to take a broad national view of this program. In both instances, the apparently short-range, selfish interest of the Senator from Illinois and the Senator from Tennessee would seem to indicate that they should support the committee bill. But they have risen above the approach of their short-range, selfish interest and have taken the national point of view. So I congratulate them.

Let me state, for the record, that I am not in so fortunate a position. In my judgment, the committee bill does grave injustice to the Commonwealth of Pennsylvania, so that the selfish interest of my State happens to be the opposite of that of Tennessee or Illinois.

I hope I would be equally broadminded and equally prepared to consider the national interest as are the Senator from Tennessee and the Senator from Illinois, and I commend them for it.

If the Senator from Tennessee will yield further, I should like to ask perhaps three questions, and then I shall be through, and it will not be necessary for me to seek the floor in my own right.

Mr. GORE. I yield.

Mr. CLARK. It is being argued that the system of unemployment compensation which was enacted into law during the days of the Roosevelt administration, in 1935, was a State system, and that we should not now disturb it.

I wonder if the Senator will agree with me that a strictly State system was wrong when it was put into law, it has been wrong every year, and it is wrong now. Surveyors have drawn State lines throughout our country, and the surveyors' lines have divided economic regions into halves, quarters, and tenths, and when we are dealing with economic problems, we should recognize mistakes made in the past and seek a national solution.

I am in favor of national minimum standards for unemployment compensation as pledged by the Democratic platform, and I shall support such a measure if we ever get it out of committee. I am afraid we cannot wait in the meantime. We have this opportunity to do something for the unemployed on the national level.

Again I commend the Senator for leading the fight. I ask him to what extent he disagrees with me.

Mr. GORE. Mr. President, I am hardly prepared to discuss in detail the basic structure of the whole unemployment compensation program. I think there is considerable merit in State responsibility. I think we may have taken it too far on occasion.

Moreover, it seems to me that we may have placed an undue burden upon employers in requiring employers alone, even in this instance, to bear the entire burden of unemployment relief. Nevertheless, this is the system we have, and I suppose there is a limit to what we can do in temporary legislation, the bill before us being temporary in character, designed to meet an emergency situation.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. GORE. I yield.

Mr. CLARK. Am I correct in my analysis, first, that the House bill is the Kennedy administration bill, strongly supported by the President? Is that statement correct?

Mr. GORE. Really, I am not qualified to answer the question. I suppose it is, but I am not sure.

Mr. CLARK. Will the Senator yield further?

Mr. GORE. Some changes were made by the House.

Mr. CLARK. I will make the categorical statement that the House bill represents the present thinking of the Kennedy administration.

I ask the Senator whether the committee amendment does not, in substance, although not in form, reinstate the principle and thinking of the Eisenhower temporary unemployment compensation act which we enacted 3 years ago, in that it requires each State to bear its own burden of unemployment benefits through reimbursing the Federal Government after the Federal payments have been made.

Mr. GORE. The mechanics of the pending bill are a little different, but, in a practical effect, the Byrd amendment is on all fours with the bill enacted 3 years ago, and in which, I may say, only 17 States participated.

Mr. CLARK. If the Senator will yield once more, I shall be through.

Mr. GORE. I yield.

Mr. CLARK. Let me say to the Senator and to my other colleagues that I am for the Kennedy program, and I am against the Eisenhower program, which I do not think worked for the reason just stated by the Senator from Tennessee.

In the last analysis, the rather technical issue involved in this debate is perfectly simple. It is the simple question of human rights against property rights. It is whether we want to protect the funds and the employers primarily, or whether we want the money to go—in all 50 States, not in only 17 States—to the people who are unemployed. It is

plutocracy against democracy; and I hope the Senate will conclude that it wants to support the President of the United States and help the unemployed people in this country, as opposed to being overly concerned that the employers of the country are able to build up huge reserves.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. GORE. I yield to the majority leader.

Mr. MANSFIELD. I should like to propound a unanimous-consent request, to the effect that there will be a limitation of 2 hours, 1½ on the side of Senators who are in favor of the Byrd amendments, and one-half hour on the side of Senators opposed to the Byrd amendments, and that the request be granted to go into effect immediately.

Mr. JAVITS. Mr. President——

The PRESIDING OFFICER. Is there objection?

Mr. KUCHEL. Mr. President, reserving the right to object, and I am acting in the absence of the minority leader, I wish to ask the majority leader if this proposal has been agreed to by the minority leader.

Mr. MANSFIELD. Yes, indeed.

Mr. KUCHEL. The minority whip has no objection.

The PRESIDING OFFICER. Is there objection?

Mr. CARLSON. Mr. President, reserving the right to object, I inquire whether the agreement means that the Senate would vote in 2 hours, or sooner if time were yielded back.

Mr. MANSFIELD. Yes. If time were yielded back, a vote would come sooner.

Mr. KEATING. Mr. President, reserving the right to object, may I ask whether it would be on this amendment?

Mr. MANSFIELD. On this amendment and amendments thereto, because all the Byrd amendments are scattered throughout the bill.

Mr. KEATING. There are other contested amendments.

Mr. MANSFIELD. Those are not to be considered at this time. They will come later, and will probably be considered then.

Mr. KERR. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. KERR. I should like to ask the majority leader if there are not a number of amendments to the bill.

Mr. MANSFIELD. Yes, but this request is only on the Byrd amendment, which I understand is scattered throughout different parts of the bill.

Mr. KERR. I do not see how one amendment could be scattered throughout different parts of the bill.

Mr. MANSFIELD. The proposal made by the Senator from Virginia was that his amendments be considered en bloc, and the request was agreed to by the Senate.

Mr. KERR. Then, what other amendment is there to the bill?

Mr. MANSFIELD. There is the Williams amendment. There is the amendment increasing the amount of money. I believe they are about all.

Mr. KERR. There is an amendment as to the time for payments.

Mr. MANSFIELD. That is included in the Byrd amendments.

Mr. KERR. I have one other reservation. Why does the Senator ask for 30 minutes for the opponents to the Byrd amendments, and an hour and a half for the proponents? Are the opponents that confident or that good, or have they already taken one hour's time?

Mr. MANSFIELD. The latter part of the Senator's statement is the reason for the difference.

Mr. KERR. If the RECORD shows that the difference in time is based on the fact that the opponents have already used that much time, I have no objection. It is satisfactory. Otherwise, we would not want to take advantage of the opponents.

Mr. MCNAMARA. Mr. President, reserving the right to object, I have been assured by the majority leader that I could have 4 or 5 minutes. I want the RECORD to show that.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears no objection, and the agreement is entered.

Mr. GORE. Mr. President, I yield to my distinguished senior colleague.

Mr. KEFAUVER. Mr. President, we have all read in the newspapers and heard a great deal of discussion about the purpose and the meaning of the proposed legislation.

It is proposed to give some relief by way of extension of unemployment benefits to unemployed people in various States of the Union. That is the basic purpose of the proposed legislation.

Mr. GORE. That is the purpose for which the bill was introduced and reported to the Senate.

Mr. KEFAUVER. I heard my distinguished colleague say a few minutes ago—and I have read in the portion of the address the Senator has not yet given—that only 17 States participated in the program in 1958, a program along the same line as the Byrd amendments would provide; is that correct?

Mr. GORE. The Senator is correct. The State which my distinguished colleague and I have the honor and privilege of representing was not one of the 17. Therefore, not one unemployed person in the State of Tennessee, and not one unemployed person in many other States, benefited one iota from that program.

Mr. KEFAUVER. What would make anyone believe, if only 17 States participated in 1958, when the program was on the same basis as is provided in the Byrd amendments, that there will be a larger participation in a program at this time?

Mr. GORE. I do not know. I doubt that many more States would participate.

Mr. KEFAUVER. We face the real issue, then. If the Byrd amendments are agreed to there will be only a small measure of relief for unemployed people by way of the extension of benefits in a very few States of the Union.

Mr. GORE. That cannot be stated with certainty.

Mr. KEFAUVER. It can be stated based on experience. That is what happened the last time.

Mr. GORE. The Senator is correct.

Mr. KEFAUVER. That being the case, the purpose of the proposed legislation, which has been advocated so strongly by the President of the United States and which we know is so greatly needed in order to take care of the unemployed people in a very modest way, will not be achieved, and the end result, in a large measure, will be that nothing will be done for the people who are now unemployed.

Mr. GORE. That may be the case. The Byrd amendments, generally referred to as the committee amendments, would require that each State bear the financial responsibility for unemployment within the particular State. In other words, the taxpayers of State A will not be required, no matter how fortunate the State may be with reference to its economy, to make any contribution toward the unemployment distress in State B. This would be true with respect to each State. The amendments undertake to draw a line around each of the 50 States. Indeed, the amendments would do so with respect to the program, financially, and plainly would require that each State bear its own burden.

Mr. KEFAUVER. At the same time corporations, which come under the program in all the 50 States, will have to pay an increased tax for this purpose. The corporations will have to pay the tax even though a State does not come under the program and does not give to unemployed people in the State any additional entitlement in respect to benefits.

Mr. GORE. The tax would be levied on the employers in all States. It would remain for the States themselves to participate or not to participate in the program, so far as payment of benefits to the unemployed is concerned.

Mr. KEFAUVER. The tax would be levied on all employers, and it could not be returned to a State until 1963, which would not do the unemployed people any good during the present emergency.

Mr. GORE. Meanwhile, the States would be eligible to obtain advances from the Federal Government with which to make the payments for the extended period of benefits. However, that is true under present law. No new bill is needed to bring that about. Already there is authorization legislation for the making of an appropriation for this purpose. Already the Federal Government is authorized to make such loans. In that respect, the bill, if amended by the committee amendments, would provide no real improvement.

Mr. KEFAUVER. It appears to me, from the discussion I have heard, that if the Byrd amendments are agreed to a death blow will be death to one of the most urgent and most important parts of the Kennedy administration program; namely, the giving of some additional entitlement to the unemployed workers across the nation at the present time.

Mr. GORE. Let us make no mistake about it. If we follow the principle that each State is to pay for benefits to its own people, there is no need to pass the bill. Let us make no mistake about it.

Mr. KERR. Mr. President, will the Senator yield?

Mr. GORE. I will yield in a moment.

Let us make no mistake about it. If we adopt the principle of the committee amendments, then we shall not have a national solution for a national problem, but each State will have to bear the responsibility for the unemployed people within that State.

Mr. KEFAUVER. I compliment my colleague for the minority report and for the position he has taken. I think it is most important for our Nation, and particularly in order to get us back on the road to recovery, that we do something for the unemployed people today. The position of my colleague should be sustained, and I commend him highly.

Mr. GORE. I thank my distinguished colleague for his generosity.

Mr. KERR. Mr. President, will the Senator yield?

Mr. GORE. I yield to my distinguished friend and colleague the able senior Senator from Oklahoma.

Mr. KERR. As I understood the Senator, he said that if the States wished to have the program of benefits for the unemployed people, no new law was needed, either the House bill or the Senate committee bill. In other words, if the States desire to provide the program of benefits which would be possible under the Senate committee bill, the States would not need to have either the House bill or the Senate committee bill passed.

Mr. GORE. No State——

Mr. KERR. Did the Senator make that statement, or not?

Mr. GORE. Let me state it in my own way.

No State requires authority from the Congress to provide unemployment compensation benefits to the citizens of that State.

Mr. KERR. That was not the statement to which I referred or the principle to which I referred.

Mr. GORE. Very well.

Mr. KERR. The Senator from Tennessee was addressing himself to the Finance Committee bill.

Mr. GORE. That is correct.

Mr. KERR. As I understood the Senator, he said that if a State wished to give to unemployed people in the State the benefits available under the Senate Finance Committee bill, the State did not need to have any bill passed.

Mr. GORE. Why?

Mr. KERR. Did the Senator make that statement? Did I correctly understand the Senator?

Mr. GORE. An appropriation bill would be necessary. So would an appropriation bill be necessary to provide funds authorized by the pending bill, if enacted as amended by the committee amendments. It all depends upon what the Senator calls a bill.

Mr. KERR. I was only trying to quote the remarks of the Senator from Tennessee.

Mr. GORE. Let me state the situation as I understand it, and then we shall have no difficulty understanding each other.

I know of no Senator who can speak with greater clarity or one who can understand with more prescience than my distinguished friend from Oklahoma.

Mr. KERR. I thank the Senator.

Mr. GORE. Under present law the Federal Government is authorized to make loans to States with respect to its unemployment program.

Mr. KERR. Does the Senator refer to present law?

Mr. GORE. The basic act. I cannot give the code designation.

Mr. KERR. The Senator has not been referring to the 1958 act?

Mr. GORE. No, I am not referring to the 1958 act.

Mr. KERR. The Senator from Tennessee is referring to the basic act?

Mr. GORE. That is correct.

Mr. KERR. Does not the basic act provide a program of retention of certain portions of the unemployment taxes paid by employers to States in order to create a fund from which such loans can be made?

Mr. GORE. That is correct.

Mr. KERR. Is there any authorization in the basic law for loans other than those obtainable from the loan fund created by the basic law?

Mr. GORE. I am not sure that there is such.

Mr. KERR. Let us get the facts before us. Let us get the proper premise.

The Senator said that under existing law loans could be made to the States. I am trying only to have the RECORD show to what loans he refers and what the provisions of the law are.

Mr. GORE. I understand it is the basic Unemployment Compensation Act as amended. When it was amended I am not certain.

Mr. KERR. That question is immaterial. All the Senator from Oklahoma is endeavoring to do is to get the facts before us upon which we can agree as the premise.

Mr. GORE. The able Senator from Oklahoma went further and referred to the division of proceeds of taxes as between the Federal Government and the States. The loan program need not of necessity be concerned with such a division. The loan program is already authorized, as I understand, whereby the Federal Government can make a loan—an advance—to a State.

Mr. KERR. I believe if the Senator from Tennessee will advise with his consultant, he will find that the premise contained in the question of the Senator from Oklahoma was accurate.

Mr. GORE. As I tried to say, the authorization exists for the making of a congressional appropriation for the purpose of advancing funds to States for their unemployment compensation program, if the States wish, and do in fact extend the period of benefits to which their unemployed would be entitled. That is my understanding. Does the Senator from Oklahoma understand differently?

Mr. KERR. I do. I understand the situation very differently. I should like to have the staff member who is familiar with the exact division come over here so one of us can be able to substantiate his position. The Senator from Oklahoma understands that there is a provision of existing law for a loan fund that accumulates up to a certain amount in the orderly operation of the Unemployment Compensation Act.

Mr. GORE. Does the Senator not understand that there is an authorization for an appropriation to that fund which would add to it?

Mr. KERR. As I understand, the proceeds flow into the fund automatically under the existing law until the fund reaches a certain amount.

Mr. GORE. Yes; such is true as a consequence of the tax. But there is an authorization for an appropriation in addition to what the Senator has stated, as I understand.

Mr. KERR. Let us find if there is; and, if so, what it is.

Mr. KUCHEL. Mr. President, I wonder if the Senator from Tennessee will yield to me?

Mr. KERR. The Senator from California will get the Senator from Oklahoma farther off the track than he now is.

Mr. KUCHEL. That I would not wish to do.

Mr. KERR. I hope the Senator from California will not contribute to his already slight confusion.

Mr. KUCHEL. Such thought is farthest from my mind, although I have some questions I should like to ask.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. GORE. I yield.

A NATIONAL PROBLEM REQUIRES A NATIONAL RESPONSIBILITY—WEST VIRGINIA WOULD BE PENALIZED UNDER BYRD AMENDMENT

Mr. RANDOLPH. Mr. President, when the Senate Finance Committee, over the objections of the Senator from Illinois [Mr. DOUGLAS] and the Senator from Tennessee [Mr. GORE], amended the temporary unemployment compensation bill before us, a national problem was, in fact, turned back to the individual States for solution.

Mr. President, it has been my concept that the effort to solve a national problem requires the assumption of national responsibility.

But the amendment which would require that the additional tax to be paid by employers in each State will be credited to that State's reserve fund is one which will create deficits in the unemployment compensation funds of 10 States and surpluses in those of the 40 others, according to the most common interpretation.

West Virginia is not only one of the 10 States which, under the terms of this amendment, would suffer a deficit—it is one of only four States in which employers already are paying the maximum unemployment compensation tax rate of 2.7 percent because of the inordinately high degree of joblessness which has too long prevailed in our State.

In 1963, of course, our employers will have to begin repayment of the advances provided under the Temporary Unemployment Compensation Act of 1958—a total of $9 million.

Mr. GORE. Does not the Senator believe that if an additional burden is laid upon the employers and the business and the economy of his State at this

particular time of distress, the situation might be made worse, instead of better?

Mr. RANDOLPH. The Senator is certainly correct.

In addition to the base tax increase of this bill, the Senate Finance Committee proposes that—starting in 1964—West Virginia and the other nine deficit States will have to make up the decrement by paying another increased tax rate, if benefits paid exceed income, as most assuredly would be the case in our State if we participate in the program which this measure would establish.

I say this because it is estimated that the four-tenths of 1 percent tax increase provided under the pending bill will yield in the neighborhood of $8 million over a 2-year period in West Virginia. Estimated benefit payments to eligible unemployed would greatly exceed that income.

Now, Mr. President, in the light of these probabilities, I request permission to direct this inquiry to the chairman of the Finance Committee:

Do West Virginia and the other States said to be facing deficit status under the terms of the committee amendments have the right to stop benefit payments when they have used up the reserve fund to be created by the four-tenths of 1 percent base tax rate—in West Virginia's case a fund estimated to be in the neighborhood of $8 million?

Or, stated another way, is this so-called national legislation going to force West Virginia and other States to create a deficit if they sign an agreement with the Federal Government to participate in this program?

If so, I say this certainly is a peculiar form of national legislation.

Mr. President, if the principle that 40 States have no obligation to help equalize unemployment compensation problems over the whole Union of 50 States in a time of emergency, I say that a new philosophy is here being induced.

I point out that in West Virginia we have practically no eligiblity for Federal aid for education to so-called federally impacted areas, yet West Virginia taxpayers contribute to the National Treasury from which impacted area aid is paid to help the educational systems of other States. West Virginians in the Congress have, in the main, consistently supported this program as being in the national interest.

Furthermore, statistics doubtless will bear out, too, that West Virginia taxpayers pay to the Federal Government huge sums for the furtherance of the national defense effort, including the operation and maintenance of large defense installations which yield large payrolls to help the economies of numerous States other than West Virginia, not excepting our mother State, the Commonwealth of Virginia.

We are being shortchanged in West Virginia, insofar as distribution of the defense dollar is concerned, but we pay our portion of that defense dollar as a part of our obligation to the common defense of the Union of States.

I say again, Mr. President, that a strange new concept is being born in this amendment to a bill which is supposedly intended to be in the national interest.

Amendments of this nature, if enacted, will stand like tombstones over the prostrate forms of States which already have been bypassed by the last wave of national prosperity and which suffer in even greater degree when recession strikes or a so-called downturn of the economy develops.

Mr. GORE. I thank the able Senator for his contribution.

Mr. McNAMARA. Mr. President——

The PRESIDING OFFICER. How much time does the Senator from Tennessee yield to the Senator from Michigan?

Mr. GORE. I yield 4 minutes to the distinguished Senator from Michigan.

Mr. McNAMARA. Mr. President, the purpose of the pending bill is to provide a temporary program of extended unemployment compensation to workers who have exhausted their unemployment benefits under existing State and Federal laws.

In its report on the bill the Committee on Finance states:

> Such a program is necessary to help offset the effects of the current recession on unemployed workers and on the Nation's economy.

Let me emphasize here that the committee does not speak of offsetting the effects of the current recession on the unemployed workers in certain States, in a number of States, or even in a select group of States.

It speaks only of the unemployed workers—period. What is more, it also speaks of the Nation's economy and the effects of the recession on the Nation's economy.

One would suspect, on the basis of these words, that the committee has finally recognized what should have been obvious to everybody for many, many years—that these recurring recessions in our economy are not local problems, that they are not the problems of Michigan, Pennsylvania, or even New York. They are the problems of the Nation as a whole.

The administration bill that passed the House provided that the $827 million estimated cost of the program was to be financed by Treasury advances, to be repaid by a temporary increase in the Federal unemployment tax.

Under the bill as amended by the Finance Committee the cost of the program will be borne in each State by the employers in that State.

Thus, if the additional tax imposed by the bill exceeds the amount of temporary benefits in a State, the excess will be credited to the State's account in the unemployment trust fund.

If the additional tax is not sufficient for the payment of temporary benefits in any State, the difference will be repaid to the Federal Government by employers in such State beginning 1964.

The net effect of the committee amendment, then, is to plunge into deeper financial trouble those States that are the hardest hit by the national recession.

It is national recession, although the amendments of the Finance Committee seek to ignore that fact.

It is true, of course, that unemployment is heaviest in certain industrial States.

But the recession was not caused by anything these States may or may not have done.

The causes of the recession are national—a drop in the purchasing power of the Nation.

Is Michigan to be blamed because the demand for automobiles has fallen off? Is it the fault of the steelworkers of Pennsylvania that the steel mills operate at half their capacity rate?

Obviously not. The causes of these recurring recessions are national, and hence the burden of caring for the innocent victims of the recessions should also be national.

The President has recognized this fact. The House of Representatives has recognized this fact. But the Senate Finance Committee has not.

The Finance Committee wants us to look at our economy as a conglomeration of 50 different isolated economies in 50 different States.

The Finance Committee sheds crocodile tears over the fact that under the House bill some 40 States might help pay the cost of the extra burden of unemployment in the remaining 10 States.

But let us not forget that these 10 States are the industrial States which produce most of the wealth of this Nation.

These are the States which pay most of the taxes of this Nation.

These are the States which, in the past, have borne more—much more—than their proportionate share of the burden of our national existence.

Yet these States do not ask anything in return; they do not ask for alms; they do not even ask to be relieved from carrying, year after year, a more than proportionate share of the tax burden of the Nation.

All they ask for is that when through the operations of the oft-blind forces of national economy a recession hits us, the Nation stand by them and help them to recover their economic health, and thus the economic strength of the Nation.

Virginia will not long be prosperous if Pennsylvania is in a recession.

Alabama will soon suffer if the workers of Michigan stay idle. The Minnesota farmer will suffer too if the Ohio plants stay shut down.

There is no such thing as selective prosperity. We are all in the same boat, and the sooner we recognize it, the better off we shall be.

Michigan is one of the first States to be hard hit in this current recession.

The bill, if properly enacted, would provide a welcome and vital relief for some 300,000 of our workers.

It is important that we enact the bill with the utmost speed. But it is equally important that we do not penalize States like Michigan for having long been in the vanguard of our industrial civilization—for having produced, year after year, most of the automobiles, the steel,

and the machinery that has made this country strong and great.

It is not our fault that the demand for our goods fluctuates violently with the fluctuations of our economy. It is not our fault that our unemployment is higher in recessions than the unemployment of many other States.

But if it is not solely the fault of Michigan, then it is not solely the responsibility of Michigan to carry the whole burden of our recovery.

It is up to the Nation as a whole to regain prosperity in the entire Nation as well as in Michigan.

I would like to call to the attention of my colleagues who make their pious protests about taking on part of our burden in the bill that this is a two-edged sword.

There are many Federal programs which take our tax dollars from Michigan and the other industrial States to help support and strengthen the so-called poorer States.

As a Senator from Michigan, I am under continual pressures from those in my State who keep a balance sheet on Federal tax collections in Michigan and the eventual return of those tax dollars, and who express shock that sometimes more goes out than comes back in.

I dismiss these arguments as short-sighted, because I hold that we are one country, and not merely a collection of 50 States.

We are one people, whether we are born in Mississippi or Michigan.

If we help the people in one area, we help our Nation become stronger.

That is the philosophy behind the Tennessee Valley Authority.

That is the philosophy behind the equalization formulas in such programs as aid to dependent children, aid to the blind, and old age assistance, which gives the poorer States a greater proportionate share of the funds.

But if the representatives of those States seek to penalize us in Michigan when we seek needed help in the bill, then they cannot look for my assistance in the future when they seek subsidies for their people.

Mr. GORE. Mr. President, it is said that the only effect of the committee's amendment is to provide that each State will support its own program and no more. But let us examine the way in which the program would operate.

It must be remembered that the tax levied is a Federal tax. It will be paid by employers in each State whether or not that State elects to participate.

Let us suppose that State A elects not to participate in the program. Employers of that State will pay the tax but no unemployed person will receive any benefits at all from the revenues derived by that tax. The money will simply be credited to that State's trust fund account in December of 1963. Now, this would permit a reduction in payroll taxes levied in that State sometime after 1963, but it would do nothing in 1961 except to provide for a tax increase in time of economic recession, with no compensating benefits.

If we are to follow the principle that each State is to pay for its own benefits, there is no need for this bill. Existing law provides that a State may borrow from the Federal Government to increase benefits to unemployed workers in that State, with repayment to be made after 2 years. The terms of repayment are much more advantageous than those provided in the committee bill, under which repayment would be started immediately. In fact, for many States the committee bill would create a situation in which taxes would be paid in advance, to be recouped 2 years later. I hope, Mr. President, that the economic situation in 1964 will be better than it is today, but the purpose of this bill is to meet the problems of today.

The issue is simple. The Senate must decide whether we shall effectively fight recessions in our national economy with national programs or on a hit-or-miss, inadequate and inequitable State-by-State basis.

It is proposed by the committee amendment to let each State care for its own. This may have some appeal for those who like to hark back to the days when life in America was characterized by the westward march to the frontier and the typical American was the owner and operator of a family farm. Such conditions no longer prevail. Cincinnatus is no longer to be called from the plow but from the factory, the trades and businesses, from the halls of commerce, from industry.

This is an issue on which the frontiersmen of today may unite to meet the challenges of our time. Though the pending issue is not all-encompassing, vast portents ride with the ultimate outcome of this battle.

I now yield to the Senator from Oklahoma.

Mr. MONRONEY. Mr. President, I compliment the distinguished Senator from Tennessee on his address. He brings into being the lessons that we should have learned during the great depression of the 1930's. Having served in Congress through a part of that period, it is clear to me that when an infection strikes one part of the body, it can very quickly go through the rest of the body. If we try to treat this incipient recession as a purely local infection, as the Byrd amendments do, we ignore the lessons of history, and in effect are giving a do-it-yourself kit to each of the 50 States where the infection started.

Mr. GORE. Some States are equipped to do it themselves, and some are not.

Mr. MONRONEY. That is correct. Unemployment in Michigan or Massachusetts reduces gasoline consumption and in that way reduces the production of oil in Oklahoma. It reduces, likewise, the consumption of beef, whether it be white-faced Hereford or Angus, in those areas. A chain reaction is set up by pockets of great unemployment.

One man out of work in one State will at least statistically put a fraction of another man in another State out of work, because the unemployment lessens the market for a product.

I congratulate the distinguished Senator from Tennessee for moving on an overall basis to try to prevent what could grow into a national recession. A recession in Massachusetts is not a local problem, because it will finally affect the other States as well, including Oklahoma. If the taxing powers of the 50 States can be used to aid my State with old-age assistance, in public works, in soil conservation, in disaster relief, in small business loans, in farm programs——

Mr. GORE. Does not the Senator realize that the Federal contribution to old-age assistance in the State of Oklahoma far exceeds the Federal contribution for such purposes in the State of New York?

Mr. MONRONEY. I presume so.

Mr. GORE. I will show the figures to the senior Senator from Oklahoma. I will read from the table entitled "Grants to States for Public Assistance." It lists Oklahoma as receiving $51,773,476. It lists New York as receiving $46,732,734. I give my distinguished friend the record. If it is in error, then I am in error. I am reading from the table.

Mr. KERR. I am happy to have the Senator introduce the table into the RECORD. His statement was that the amount received by Oklahoma far exceeds what the State of New York receives. I believe the difference is about 10 percent.

Mr. GORE. I withdraw the word "far."

Mr. KERR. Then I agree with the Senator's statement.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. DOUGLAS. Is it not true that the population of New York is about eight times the population of Oklahoma?

Mr. GORE. If I must choose between New York and Oklahoma——

Mr. HUMPHREY. I suggest that the Senator take Minnesota.

Mr. GORE. If I must choose between New York and Oklahoma, I am afraid, with my good friends from Oklahoma here, my heart would lean a little toward Oklahoma.

Mr. MONRONEY. I merely mention some of these things because the larger States have been very much concerned by our problems in Oklahoma connected with disaster relief and with the floods and tornados that we have experienced in our part of the country.

They do not question whether we have paid in as much per capita as they have. We will have to pay in under the bill $8,900,000, and will receive $5,800,000. I am not ashamed to help contribute to the relief of a national depression by foregoing $3 million. It is our good fortune not to have the greatest amount of unemployment in the Nation and so we can assist our sister States. What may be a recession in New York today may be a major depression in Oklahoma tomorrow. It may be a major depression in Montana or Wyoming the day after tomorrow.

Mr. GORE. Unless we move effectively to correct current recessionary conditions, the recession may deteriorate into a national depression.

Mr. MONRONEY. In other words, we had better treat the cancer promptly.

Mr. GORE. Yes.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. KUCHEL. I seek information, and I direct the Senator's attention to page 4 of the bill. My State of California has a history of endeavoring to deal sympathetically with respect to the problems of the unemployed. The laws of the State of California provide for the maximum unemployment insurance benefits of 39 weeks. Provision was made in the bill as it came to the Senate from the House to provide for some reimbursement to those States which under their State laws treated beneficiaries of unemployment compensation more liberally and thus granted them 39 weeks, in an instance like that of my own State, instead of those which grant less.

Am I not correct in assuming that the provision commencing on line 21, page 4, was an attempt to provide for some equalization between those States, like my own, which grant more benefits and those States which grant less benefits?

Mr. GORE. Yes.

Mr. KUCHEL. Why, if the Senator from Tennessee can tell me, was that section stricken from the bill?

Mr. GORE. I would rather have Senators who wish to strike it from the bill explain the reasons therefor.

Mr. KUCHEL. Then I invite Senators on either side of the aisle to enlighten me—because I seek information—as to why that provision was deleted.

The PRESIDING OFFICER. The time of the Senator from Tennessee has expired.

Mr. KERR. I yield to the Senator from Tennessee 5 minutes from the other side of the time.

Mr. KUCHEL. I should like to ask one more question.

Mr. GORE. Then I promise to yield to the Senator from Ohio.

Mr. KUCHEL. I should like to have some Senator tell me what motivated the committee to delete that section. Under the bill as it came from the House, the fractional percentage of increase in the unemployment compensation tax would be paid for the calendar years 1962 and 1963. Is that not correct?

Mr. GORE. In the House bill.

Mr. KUCHEL. Under the law as it now stands, those payments would be made by business units on the first day of January 1963, or the first day of January 1964.

Mr. GORE. That is correct.

Mr. KUCHEL. Do I correctly understand the Senator from Tennessee to say that in the committee bill the taxable years are 1961 and 1962?

Mr. GORE. That is a part of the Byrd amendments.

Mr. KUCHEL. Am I to understand, therefore, that the tax would be retroactive to the first day of January 1961?

Mr. GORE. That is correct.

Mr. KUCHEL. Can any Senator enlighten the Senator from California as to the basis for that change?

Mr. GORE. The distinguished senior Senator from Virginia [Mr. BYRD] stated earlier his reasons for that. I did not support it. I think it is not desirable in antirecession legislation to impose a heavier payroll tax in 1961, when we are suffering from a recessionary condition from which we are trying to recover.

Mr. KUCHEL. The bill as it passed the House would impose the tax as of the coming January—1962?

Mr. GORE. It would impose the tax on 1962 payrolls.

Mr. KUCHEL. I thank the Senator from Tennessee.

Mr. GORE. Mr. President, I yield to the Senator from Ohio.

Mr. LAUSCHE. I have listened with great interest to the discussion about the alleged difference between the provisions of the House bill and those of the Senate dealing with the right of the unemployed to participate in the fund. I should like to have the Senator from Tennessee point out to me the language in the bill which establishes his claim that if the version of the Senate shall be adopted, certain States will not participate in the compensation.

Mr. GORE. I did not make the categorical statement that States would not participate. I said that we could at least judge the future by the past, and that when such a program was enacted 3 years ago, only 17 States participated, none of which has as yet repaid the advance made to it.

In practical effect, the Byrd amendment would encompass the same kind of program. I therefore drew the conclusion from past experience that a great many States would not participate now.

Mr. LAUSCHE. I would like to have the Senator point out the language.

Mr. GORE. I will yield to the Senator from Illinois, who can give us enlightenment on that subject.

Mr. LAUSCHE. The language that points out that under the House bill all the unemployed will participate, ipso facto, and that under the Senate bill they will not, unless an agreement is made with the Federal Government.

Mr. DOUGLAS. Mr. President, the Senator from Tennessee has treated this subject very well, but if I may be permitted to amplify it slightly, let me say that under the Byrd amendments there is a direct incentive for employers to put pressure upon their State governments not to participate, because if a State refuses to participate under the Byrd amendments, it will get the additional revenue from the added tax in any event.

Mr. GORE. And that can be used for a reduction of its own tax.

Mr. DOUGLAS. But no benefits will be paid to the unemployed. The result is that those sums will go into the State unemployment insurance fund. This will permit the contributions which the employers make under the universal merit rating system to be reduced. Therefore, this is a direct incentive to the employers in a given State to try to get their State not to accept the act and not to participate.

Mr. LAUSCHE. The tax will become mandatory on all employers.

The PRESIDING OFFICER. The time of the Senator from Tennessee has expired.

Mr. LAUSCHE. The Senator still has not pointed out the language.

Mr. KERR. Mr. President, I yield 3 more minutes to the Senator from Tennessee.

Mr. GORE. If the Senator will turn to page 4 of the bill, beginning on line 22, he will find stricken from the bill provisions running through line 10 on page 5. They are the provisions for reimbursement.

If the Senator will turn to page 21, beginning on line 10, he will find the additions to the bill by way of the committee amendment running from line 10 on page 21 through pages 22 and 23, and through line 8 on page 24.

There are other changes within the 25-page bill which are a part of the Byrd amendments; but I have called to the attention of the Senator from Ohio the particular provision about which he inquires.

Mr. LAUSCHE. Then it is the position of the Senator from Tennessee that the four-tenths of 1 percent tax will become mandatory upon all employers throughout the country; and that the payment of compensation will be made only in those States wherein the authorized agency enters into an agreement with the Federal Government to participate in the program?

Mr. GORE. That is correct.

Mr. LAUSCHE. Is it the Senator's contention that those provisions are contained in the House bill but are not in the Senate bill as it is now pending?

Mr. GORE. It is the other way around. The provisions for State participation are in both the bills to which the Senator has referred.

Mr. LAUSCHE. State participation is provided in both bills?

Mr. GORE. That is correct.

Mr. LAUSCHE. But is there any difference in the rights of the unemployed when one State participates and another State does not?

Mr. GORE. Under the House bill, the Federal Government will make advances to the States by an agreement—if the States so agree—but under the House bill there would not be the credit of the revenue from the taxpayers in each State to the account to which that particular State has entitlement.

On the contrary, under the Senate bill, the payments in each State would be credited to the account on which that State would be entitled to draw; and their entitlements would accrue whether benefits were paid or not.

Under the House bill——

The PRESIDING OFFICER. The time of the Senator from Tennessee has expired.

Mr. KERR. Mr. President, I yield myself five minutes.

I should like to address myself, first, to the reimbursement provision in the House bill, proposed to be taken out by the Senate bill.

Under the reimbursement provision in House bill, an unemployed person would not get a dollar of the amount of the tax which would be collected under the House bill. Actually, under the House bill, about $100 million of the tax imposed would be used to reimburse the States which had already paid 39 weeks under their program, for the amount they had paid beyond 26 weeks.

So, actually, in the States where this help is needed the most, in order to aid the employees who need it the most, the money would go back to the State fund, to reimburse the State, but not for the purpose of being paid to those who were unemployed and who had been out of work beyond the period of time during which benefits were provided by the State, if the benefits were paid for 39 weeks.

So the reimbursement provision which the Senate committee took out would have increased the flow of money to the unemployed, rather than decrease it, because all the money used to reimburse the State fund would be with reference to the benefits already paid by the State, and therefore would not be available for the payment of benefits to the unemployed in that State, to the extent of the money reimbursed to the State.

Mr. KUCHEL. Mr. President, will the Senator from Oklahoma yield?

Mr. KERR. First, Mr. President, I wish to set right, for the record, the other matter the Senator from Ohio was discussing with the Senator from Tennessee. No State has to accept this money and pay it to the unemployed—either under the House version or under the Senate committee version.

Mr. LAUSCHE. I should like to have one matter clarified. Let me ask whether the Senator from Tennessee has heard this statement.

Mr. KERR. Mr. President, I am glad to yield to the Senator from Ohio for a question, but not to ask questions of the Senator from Tennessee, although I wish to say there is no abler man on this floor—either in understanding or in debate—than the Senator from Tennessee.

Mr. GORE. Mr. President, will the Senator from Oklahoma yield at this time to me, so that I may thank him? [Laughter.]

Mr. KERR. If the Senator from Ohio wishes to obtain clarification from me, I shall be glad to provide it; but I shall not attempt to clarify the position taken by the Senator from Tennessee.

Mr. LAUSCHE. I thank the Senator from Oklahoma. Let me ask whether I correctly understand that it is the view of the Senator from Oklahoma that neither under the Senate committee version of the bill nor under the House version is a State mandatorily obliged to participate.

Mr. KERR. The Senator from Ohio is eminently correct.

Mr. LAUSCHE. Very well. I thank the Senator.

Mr. KERR. Under the provisions of the House version, the money is available if the State agency wants it. Under the Senate Finance Committee version, the money with which to pay the benefits would be available to the State, if the State wanted it.

Mr. DOUGLAS. Mr. President, will the Senator from Oklahoma yield?

Mr. KERR. In just a moment. The Senator from Illinois should not point his finger at me in that way; I shall yield without having him point his finger at me.

Mr. DOUGLAS. Why should not I point my finger at the Senator from Oklahoma? He frequently points his finger at me. Why should he not be willing to take what he gives?

Mr. KERR. Neither of us is willing to do that. [Laughter.]

My point is that under neither version of the bill is it mandatory that the State accept the money and use it to pay the benefits to the unemployed.

But there is this difference: Under the House version, the money could not be used by the State for payment to the unemployed, because the State would use the money to reimburse the fund for what the State had already paid out to the unemployed. So, actually, more money would be available for payment to the unemployed under the Senate committee version than under the House version.

Does that answer the question of the Senator from Ohio?

Mr. LAUSCHE. Yes, it does.

Mr. KUCHEL. Mr. President, will the Senator from Oklahoma yield to me?

Mr. KERR. I yield.

Mr. KUCHEL. Let us consider a State which has a State law which provides for unemployment compensation benefits for a maximum of 39 weeks. Let us assume that X has received unemployment compensation for a period of 30 weeks. Will the Senator from Oklahoma enlighten the Senate as to what the House version would do in such a case?

Mr. KERR. The House version would reimburse the State for 4 weeks and would give the State the money with which to make payments to the beneficiaries for an additional 9 weeks. But the Senate committee version would do identically the same.

Mr. KUCHEL. What would the Senate committee version do?

Mr. KERR. The Senate committee version provides the money with which to make the payments for an additional 9 weeks.

Mr. KUCHEL. In other words, the Senate committee version turns its back on States that have seen fit to treat this problem a little more liberally, does it?

Mr. KERR. Not at all. This bill does not provide for a general tax. It provides for a tax on employers, with reference to the employees they have; and it provides a system of benefits for the employees, out of the proceeds of the tax on the employers.

Furthermore—and I want all the States represented here to know this further thing that the House version does—the House version would collect between $50 million and $100 million more than enough to pay the benefits called for by the House version and more than enough to reimburse the States about $100 million, and have a fund further to enrich the trust funds of the States, not on the basis on which the States pay the money into the fund, but on the basis of the relationship between the total benefits in the State and the total benefits in the Nation.

So not only do 40 States pay out more money than they get back, with reference to the part of the money that is spent for the benefit of the unemployed; they get less than they have paid in, with reference to the balance left over after all the benefits under the bill are paid and after all the obligations created by the bill are honored and liquidated, because then the larger States get the lion's share of the money—without relation to what they have paid into it—that is left over, after all the benefits provided for are paid, and after the reimbursement is provided for and paid, and after the distribution of the balance is underway.

Mr. KUCHEL. Is it fair to take the position that since the Senate committee version eliminates the reimbursement section, it discriminates against the States which have more liberal compensation benefits?

Mr. KERR. Not at all.

The PRESIDING OFFICER. The time the Senator from Oklahoma has yielded to himself has expired.

Mr. KERR. Mr. President, I yield myself 5 more minutes.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for an additional 5 minutes.

Mr. KERR. Mr. President, we have been talking about what the States will receive. I love the State of California, even as I reel under the knowledge that California receives 10 percent of every dollar allocated by the Federal Government for interstate highways, while the other 49 States get the remainder.

Mr. KUCHEL. Is my friend crying because of that fact?

Mr. KERR. Yes, I have to, in order to equal the crying the Senator from California does because of the fact that under this measure Oklahoma receives a little more money than California does.

Mr. KUCHEL. Oklahoma never had a better friend in this Chamber, for its projects in Oklahoma, than the Senator now speaking from his desk on this side of the aisle.

Mr. KERR. Mr. President, the Senator from California is correct; and the Senator from Oklahoma satisfies his great friend, the Senator from California, so long as he gives him back two for one. [Laughter.] And I shall continue to do so, because there are many Oklahomans in California.

Mr. KUCHEL. Mr. President, I shall now take the handkerchief from my pocket and tender it to my friend, because I can see the tears in his eyes.

Mr. KERR. Mr. President, the Senator from California is confused by the reflection from his own glasses.

Mr. KUCHEL. Mr. President, my friend, the Senator from Oklahoma, is dancing a little jig; he is trying to avoid answering my question.

I say again that, in my judgment, when a State which deals more liberally with unemployment than do some other States is penalized, I believe that fact should be made known to the Senate. I happen to believe that this problem is a national one, and I believe that the people of California should be—and are grateful to the Federal Government for what it has done for them, and, as a Senator, I want to deal fairly with unemployment, whether in the State of my friend, the Senator from Oklahoma,

or in my State of California, in the temporary, 2-year bill we now consider.

But I do not obtain a satisfactory answer from my friend, when he tries to explain away the elimination of the reimbursement features which the House of Representatives approved.

Mr. KERR. I can understand how the Senator from California would like to have Oklahoma employers reimburse California employers for the program California law has made available to the employees in California.

Mr. KUCHEL. What is the maximum number of weeks for which benefit payments are available to an unemployed person in the beloved State of my beloved friend?

Mr. KERR. Thirty-nine weeks.

Mr. GOLDWATER. Mr. President, will the Senator from Oklahoma yield to me?

Mr. KERR. I yield.

Mr. GOLDWATER. Is it not the opinion of my good friend, the Senator from Oklahoma, that it is the right of Oklahoma to determine that matter, and that it is not the business of California to say whether that period in Oklahoma will be 30 or 29 or 39 weeks?

Mr. KERR. The States have that right under the statutes enacted by the Congress.

First, let me take a moment to reply to the Senator from Arizona.

Mr. KUCHEL. I wish to speak, too.

The PRESIDING OFFICER. The additional time the Senator from Oklahoma has yielded to himself has expired.

Mr. KERR. Mr. President, I yield myself 3 minutes, so that I may visit with the Senator from Arizona.

Under the laws of Congress, the States are authorized to establish these programs. I did not intend to go into this subject at this time. I had intended to go into it a little later. I wanted to yield to the Senator from Delaware.

The Senator from Tennessee started his statement by saying, "This does not federalize unemployment compensation," and then he went on to say, repeatedly, "This is a Federal program."

I think the Senate should understand the accuracy of the latter statement. Both statements cannot be accurate. I submit that to the extent it is a Federal program, it does federalize the program.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KERR. Which program are we talking about? We are talking about the unemployment compensation program; and therefore, to the extent that the bill makes it a Federal program, it does federalize the program; or else I do not understand the meaning of the word.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. GORE. I shall be pleased to have the opportunity to state the meaning of the terms as I used them and as I intended them. The program under consideration is an emergency one to provide benefits for those who have exhausted the benefits to which they were entitled under the basic unemployment compensation program and their own State laws.

Mr. KERR. That is true of either version of the bill.

Mr. GORE. That is true of either version of the bill.

Mr. KERR. Either one.

Mr. GORE. Neither version of the bill would change the basic unemployment compensation law. The pending bill, whether amended by the committee amendments or unamended, superimposes for emergency purposes, for a limited period of time, the extension of benefits not provided by the regular program. That is why I say the emergency bill does not federalize the unemployment compensation program.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KERR. I yield myself 1 more minute.

Mr. GORE. It does not federalize the unemployment compensation program. In making that statement I was referring, and do now refer, to the basic unemployment compensation program. When I say the pending bill is a Federal program, I say it is a Federal program because it levies a Federal tax, for a specified period, and makes available to the States, funds with which to pay additional benefits not provided for by the basic unemployment compensation law.

Mr. KERR. Mr. President, I yield myself 5 minutes.

So the statements of the Senator from Tennessee as of this moment are no different from the ones I referred to and quoted. The House bill does change the basic concept of the unemployment compensation program. The basic concept of the unemployment compensation program is of a collection by the Federal Government of a tax within each State from the employers of that State, which goes into a trust fund for the benefit of the employees of the State, and is not available to the employees of any other State. That is the basic concept of the basic, existing unemployment compensation law.

What does the House bill do? The House bill is a Federal program. It would levy a tax of four-tenths of 1 percent on the wages of the employees of every employer in the Nation. It would not bring the money into the several trust funds. Regardless of where the money came from, it would come to the Federal Government in Washington and be available to the States on a come-and-get-it basis, without regard to where it came from, without regard to the relationship as between the programs of the States. One State may have a program providing $70 a week. The money in the Federal fund will pay for those benefits. The proposal has all the evils of a Federal program, and none of the benefits.

If it is desired to implement a Federal program, it should be done on the basis of all the employees and all the States. The unemployed in Alaska should not be given $70 a week, and the unemployed in another State $12 a week.

This is a Federal program. It is a Federal tax across the board, on all the employers in the country, and there is then a distribution of the money by the Federal Government to the different States on the basis of the specifications of their own programs of benefits, without regard to the fact that the unemployed in one State may get five times as much as the unemployed in another State. So the bill would federalize the program. Every cent collected under the House bill would go into a Federal program. There is that basic difference between it and the existing law.

Certain Senators have been in favor of the concept of a federalized program; but under the worst condition that could result under a federalized program there should be equal benefits.

Why should employers in Oklahoma pay a four-tenths of 1 percent tax, and the employers of another State pay four-tenths of 1 percent, while, from a common fund, the unemployed of another State would get two, three, four, or five times as much as the unemployed in my State?

In other words, the proposal has all the evils which men have visualized in a federalized program, without the benefits we would look for under a federalized program, which would give the unemployed in Missouri just as much as the unemployed in Alaska, or the unemployed in Idaho just as much as the unemployed in Michigan, or the unemployed in Oklahoma just as much as the unemployed in Pennsylvania.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. SYMINGTON. What is the fundamental difference between a Federal program for unemployment compensation benefits and a Federal program for water control or a Federal program for highways?

Mr. KERR. There is a difference. The Senator has referred to the highway program. The money the Government allocates for the highway program comes from the general fund made up of taxes imposed on everyone. The money in the fund provided under this bill would come from employers.

Mr. SYMINGTON. But there is a difference in the tax imposed on trucks and buses and others using the highways.

Mr. KERR. But there is no difference as to who receives the benefits, and highways are not built solely from taxes on trucks and buses. Perhaps operators of the latter think the highways are so built, and under the recent message, they would have some reason for believing that is so.

Mr. SYMINGTON. I have supported many Federal programs which my distinguished friend has advocated, so I was surprised to hear him say this program was wrong. I am not talking about what is to be paid State by State under the program; I am talking about a Federal program.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KERR. Mr. President, I yield myself 5 minutes.

The Senator is correct when he says this is a Federal program. I was calling attention to the fact that the Senator from Tennesee had said it was not a federalized program.

I may say to the Senator from Missouri that, in the first place, all the people in the country participate alike on the basis of a Federal formula. In the assistances program, the per capita income in a State is a part of the formula, but any State with such specifications as are set forth in the formula participates on the basis of a national formula.

Second, the money to pay that benefit will come from a tax to be levied on everyone.

This Federal program which is proposed would not provide equal benefits. That is what I say to the Senator from Missouri. I do not believe the Senator would be in favor of a Federal program which discriminated against the beneficiaries in his State. I do not believe the Senator would be in favor of a Federal program which would provide one standard of benefits for Alaska, another for Michigan, another for Oregon, another for Idaho, another for Virginia, another for Oklahoma, and another for Missouri.

I believe any time the Senator from Missouri supports a Federal program, he will wish to make sure that the people from his State, in the first place, pay their pro-rata share and receive their pro-rata share. Neither would occur under this proposal.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. SYMINGTON. Missouri is a great industrial State. We merchandise a great many commodities all over the United States. I believe the people of Missouri would be willing to make a temporary sacrifice in order to build up markets in other States for the commodities they produce.

Mr. KERR. I think if Missouri is going to do that, the people of Missouri should let the State legislature do it. I do not think the people of Missouri send representatives to Washington to impose a tax on the people of Missouri amounting to $23.6 million, when the people of Missouri will receive only $11 million.

Under the same provisions the people from the great State of New York will benefit. I love New York. I pray for her continued prosperity and progress. So long as New York continues to pay the great sum of taxes she does, I shall continue to be grateful to her. Oklahoma desires only a child's part.

However, under the terms of the proposal New York would pay $119.9 million and would receive $170 million.

I will tell Senators how much New York needs that money. New York has a billion dollars in her trust fund. There is $1 billion in the New York trust fund, yet Missouri is being asked to pay $12.6 million to help give New York a $50 million bonus to further enrich the trust fund.

Then New York would receive another item in the trust fund. There would be approximately $65 million remaining, of the $980 million, which would not be used for unemployed people anywhere. That would not be used to reimburse New York for what she had already paid out. It would not be used for expenses. It would be distributed to the States. In that connection, the adverse proportion as between New York and Missouri, or as between New York and Oklahoma, would prevail.

Mr. President, I yield 5 minutes to the Senator from Delaware [Mr. WILLIAMS].

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. WILLIAMS of Delaware. Mr. President, how much time remains in favor of the Byrd amendments?

The PRESIDING OFFICER. Approximately an hour.

Mr. KERR. Mr. President, I yield to the Senator from Delaware whatever time he wishes.

Mr. WILLIAMS of Delaware. I do not think this will take too long. I appreciate the time the Senator has yielded.

Mr. President, the Senator from California raised a question in regard to reimbursements. The reimbursement for the State of California, or for any other State which has benefit payments in excess of 26 weeks as of today, would be identical under both the Finance Committee bill and the House bill. The only difference is that the reimbursement under the Senate version would be in 1963, or after the program has been completed.

All of the money which had not been spent in the respective States would be returned under the committee bill.

A question was raised with respect to California. California would pay into the fund an estimated $99.4 million. It is estimated there would be $80 million in benefits paid back into the State of California under the Senate committee bill or under the House bill. If the Byrd amendment is retained at the end of the program $19.4 million would, in its entirety, go back to the State of California.

The Senator from Ohio [Mr. LAUSCHE] raised a question earlier as to whether there would be any difference in the agreements which would be required between the Federal Government and the States in order to implement the two bills. There would be no difference under the two bills in the agreements which would have to be entered into so for as utilizing the money is concerned. It would be automatic with both.

The State of Ohio or the State of Delaware, if it did not wish to do so, would not be forced to distribute the money to those people who had used all their employment benefits; but, on the other hand, if the State of Ohio, or any other State, under the Senate bill did not use the funds, at the end of the period the money would be returned. I cannot conceive of States not using the money, but that would be the responsibility of each State. We would not change the formula under the Senate committee bill, as the Senator from Tennessee pointed out. We would continue the same Federal-State relationships which has existed over the past 20 years; namely, the right and the responsibility of each State to set its own formula for payments.

I have discussed with the Senator from California the problem in his State. I believe California provides for 39 weeks of unemployment benefits. Under the House bill California would be reimbursed for the extra 13 weeks at the beginning. Under the Senate committee bill California would receive the reimbursement, but at a later date than would be the case under the bill as passed by the House.

Mr. KERR and Mr. LAUSCHE addressed the Chair.

Mr. WILLIAMS of Delaware. I will yield in a moment.

California would receive even more reimbursements under the Senate committee bill than under the House bill, because California would collect in its entirety the amount California is now paying in but which would not be utilized.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield first to the Senator from Oklahoma.

Mr. KERR. I thank the Senator from Delaware for clarifying the situation. My understanding, when I started my discussion, was that the Senate committee bill did not provide for reimbursement. I understood that the House bill did provide for reimbursement to begin with.

Let us assume there was reimbursement for 4 weeks. Then the beneficiary would have 9 weeks of entitlement.

Mr. WILLIAMS of Delaware. The Senator is correct.

Mr. KERR. Under the Byrd amendments the 13 weeks would be allowed for the benefit of the beneficiary until the program was completed. The employee could receive benefits for the entire 13 weeks. If he did not, the money would be reimbursed to the State.

Mr. WILLIAMS of Delaware. The Senator is corect. The reason we struck the reimbursement provision from the House bill, as shown on pages 4 and 5 of the bill, was that it was unnecessary under the Byrd amendments. That is taken care of beginning at line 10 on page 21 and continuing on to page 22. It is taken care of in that every State would get the same reimbursement as of the excess paid into the fund. In the case of California, the State would get a reimbursement of the $19 million more than would be allowed under the terms of the House bill.

Mr. LAUSCHE and Mr. DOUGLAS addressed the Chair.

Mr. WILLIAMS of Delaware. I yield first to the Senator from Ohio, because I referred to a question the Senator had asked earlier.

Mr. LAUSCHE. I think it is quite essential that there be a clarification of this point. The Senator from Tennessee and his colleague implied that under the committee amendments States could avoid participating in the program, and thus the unemployed people would be denied compensation.

Mr. WILLIAMS of Delaware. That is true, but the States can do that under the terms of the House bill. There is no difference on that point under the terms of either bill.

Mr. LAUSCHE. The Senator from Tennessee and his colleague said that could not be done under the terms of the House bill.

Mr. CURTIS. Mr. President, will the Senator yield to me on that point?

Mr. WILLIAMS of Delaware. I will yield in a moment.

Mr. LAUSCHE. Let me state the position.

Mr. WILLIAMS of Delaware. Yes.

Mr. LAUSCHE. Is it the position of the Senator from Delaware that an agreement is necessary between the Federal Government and the State, under both the House bill and the Senate committee bill?

Mr. WILLIAMS of Delaware. It is my position, and I have confirmed this with the counsel of the committee. He confirms the point that the same agreement is necessary in both cases, whether we approve the Senate committee bill or the House bill.

Mr. DOUGLAS and Mr. CURTIS addressed the Chair.

Mr. LAUSCHE. I have one further question.

Mr. WILLIAMS of Delaware. That is the basis on which we approved the bill in the committee. The staff member of the committee is in the Chamber. That is what we were told.

Mr. LAUSCHE. If there is a failure to make the agreement, the nonagreeing State cannot participate in the fund.

Mr. WILLIAMS of Delaware. The State would not participate under either of the bills, but under the Senate committee bill at the end of the program the State would get back the excess which it paid in over the amount of participation.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I will yield in a moment. I should like to reply, and I will yield first to the Senator from Nebraska.

The representatives of the Department of Labor appeared before our committee and, in answer to the question advanced to them by the chairman of the committee when most of the committee members were present, made it very clear, that under the Senate committee bill there would not be a single employee who had exhausted his or her employment benefits in any of the 50 States who could qualify under the House bill who could not qualify under the Senate committee bill. There would not be a single such person who could not get benefits under either the Byrd amendment or the House bill. In fact, as the Senator from Oklahoma has pointed out, the Senate bill provides an additional $100 million which could be used for proposed benefits.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. LAUSCHE. I wish the Senator from Tennessee [Mr. GORE] would listen to these words. After the dialog I had with him, I read on page 8 of the original bill the section pertaining to agreements with States. My reading of that language clearly demonstrates that both under the House bill and the Senate bill agreements are necessary in order to pay compensation to the unemployed.

Mr. GORE. I made that statement.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. CURTIS. If I may have the attention of the distinguished Senator from Ohio, I should like to call to his attention the report of the Committee on Ways and Means of the House of Representatives, which clearly covers the question in two sentences. The report states the identical language to that in the Senate report with respect to the extension of benefits. Then reading further in the House report I found this statement:

> These payments would be made only in those States which choose to enter an agreement with the Secretary of Labor providing for such payments. It is anticipated that all States will enter into such agreements.

That procedure is the intention of the House, and is exactly the provision of the Senate bill also.

Mr. LAUSCHE. That statement makes the question very clear, but I respectfully submit that the senior Senator from Tennessee pointed out that in 1958 only 16 States participated. None of the other States paid compensation. The implication was that under the House bill States had to participate, and payments were guaranteed throughout the country.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. First, I should like to reply to the Senator from Ohio. The reason the 1958 act was not automatic to the extent of the bill before the Senate is that under this bill we would levy a four-tenths of 1 percent Federal tax to finance the program, and we would have the money automatically.

Under the 1958 act we authorized the appropriation of certain money which was available to the States if they wished to borrow it. The State legislatures then had to act to authorize the borrowing of that money. There is no comparison of the manner in which the financing took place in this instance and in the 1958 instance. In 1958 the State legislatures did have to act in order to participate. Many did not. But in this instance there is no difference in the manner in which they would enter into agreements, under the Senate bill, including the Byrd amendments and the House bill.

The major difference between the bills goes to the heart of the question, as suggested by the Senator from Illinois [Mr. DOUGLAS] in the committee: Do we wish to take the first step toward nationalization of a program which over the period of years has been operated as a State program?

The Senator from Tennessee gave the impression that we were departing on a new program. We are not. The Byrd amendment would maintain the same State relationship under the proposed program as has existed for the past 26 years. The program has worked well. As the Senator from Oklahoma [Mr. KERR] pointed out, why should we pass a bill levying a tax four-tenths of 1 percent against all the employers of America?

The small businessman who has a good experience rating and who should be getting a lower rate, as he does now, would be required to pay a tax of four-tenths of 1 percent, which would go to pay benefits in Alaska of $70 a week. Those benefits can be contrasted with the benefits in the employer's own State where his unemployed would be drawing perhaps $30 to $35.

I do not think we wish to nationalize this program. I point out that there is a vast difference between the program upon which we are voting tonight and many of these other national programs which have been mentioned, because at least there are straight benefits on the basis of equality throughout the States by some fixed formula.

No formula is provided here.

For instance, California, Delaware, Oklahoma, and Alaska have varying rates ranging $30 to $70 per week. Some States provide 20 weeks of unemployment benefits; such benefits can be extended only 10 additional weeks under either the House bill or the Senate bill. In another State with 26 weeks of normal payments such benefits can be extended 13 weeks. There is no uniformity of benefits. There is uniformity only of tax.

I believe the Byrd amendment would greatly strengthen the bill. The bill could go into effect the same day it is signed. A representative of the Labor Department testified before our committee most emphatically in answer to the question of the Senator from Virginia [Mr. BYRD] that there is not a single man in America, in any of the 50 States, who has exhausted his benefits who could not automatically qualify as rapidly under the Senate bill as he could under the provisions of the House bill.

That is an important point. I say there is not a single such man. Yet we would provide more money under the Byrd amendment because we would provide all the money that can be used for the employees, rather than levying a $100 million tax on employers all over the country to reimburse certain States for past payments. We would reserve the right of States such as California, Delaware, Oklahoma, and Vermont under this Byrd amendment to conduct their own programs in accordance with State laws.

I yield to the Senator from Vermont, and then I shall yield to the Senator from Oklahoma.

Mr. AIKEN. Mr. President, as the Senator from Delaware knows, the State of Vermont has been, I believe, the most liberal of States in the extension of unemployment benefits for an additional 13 weeks. Can the Senator from Delaware tell me what the comparative effect on the State of Vermont would be from the House bill and the Senate committee bill?

Mr. WILLIAMS of Delaware. Under the House bill and the Senate committee bill employers in Vermont would over the 2-year period pay a total of $1.7 million of tax into the Federal Treasury. Under both bills it is estimated that the unemployed of Vermont would receive $600,000 over the 2-year period. Under the House bill the remaining $1.1 million would go to make up the unemployment benefits which are being paid in Michigan, New York, and Alaska, whose unemployed are drawing more benefits than the unemployed in the State of Vermont. Under the provisions of the Senate bill that additional $1.1 million

would be returned to the unemployment compensation fund of Vermont.

Mr. AIKEN. Under the House bill the money which would otherwise be returned to the State of Vermont would be used to pay unemployment benefits in other States, some of which have perhaps 50 percent greater per capita income than Vermont.

Mr. WILLIAMS of Delaware. Yes, and States which in some instances are paying three or four times as much in benefits as are paid in the State of Vermont. The bill would depart completely from the principle under which unemployment insurance has been carried for the past 26 years. I cannot reemphasize too much the fact that there is no difference in the agreements which must be entered into between the Government and the States.

Mr. DOUGLAS. I have been trying to ask the Senator from Delaware a question on this very point for some time.

Mr. WILLIAMS of Delaware. I shall yield to the Senator from Illinois in a few minutes. He has previously spoken, and I have only started. I repeat that there is no difference between the benefits which are available here. That has been confirmed by our own counsel and the representative of the Department of Labor.

Mr. AIKEN. At the end of the 1963 period, under the Senate bill the State of Vermont would receive a credit of $1,100,000 which it would not receive under the provisions of the House bill?

Mr. WILLIAMS of Delaware. The Senator is correct.

Mr. AIKEN. I thank the Senator from Delaware. That sum would be money which our people of Vermont had paid into the fund?

Mr. WILLIAMS of Delaware. It would be money collected entirely from the employers in the State of Vermont.

Mr. AIKEN. It would be credited to our State instead of being used in certain other large States, some of which are wealthy States.

Mr. WILLIAMS of Delaware. That is correct. I yield to the Senator from Illinois.

Mr. DOUGLAS. Mr. President, of course, the agreement does not go into effect in any State unless the State legislature or the State agencies agree to it. Of course, that is true. Of course it is true that once the agreement has been made those who continue to be unemployed after the maximum duration of State benefits has been exhausted will be paid. But one question that has been ignored throughout the whole discussion, except for the comments of the Senator from Tennessee [Mr. GORE], is the question of what inducement there is for a State to accept or not to accept. That is the point. I should like to point out, as I tried to point out some minutes ago, that under the so-called Byrd amendments the employers in a given State will gain if the State does not participate and does not accept the agreement.

They will not be paying out benefits in that State, yet they will be receiving additional revenue which is produced by the tax. This will go into the fund, and, going into the fund under the so-called experience rating system, which is universal, this will diminish their future payments. This inducement not to participate is not present in the House act.

Mr. WILLIAMS of Delaware. There is this inducement. The money is available, and will be available under the Byrd amendment to pay those benefits. As a representative of one of those States I am willing to trust our States that they will use these benefits.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I cannot conceive of any State saying, "We have this money, but we will not help these unemployed." Any State can refuse to spend the money under either proposal.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. BENNETT. I am surprised at my friend from Illinois, who seems to believe that the States will not take care of their unemployed without some kind of inducement. It seems to me that there is just as much responsibility in the States which are going to pay out more than they take in, and just as much interest in the welfare of the unemployed as there is inducement in some of the other States to get back more than they paid in. Is that what the Senator means?

Mr. WILLIAMS of Delaware. The Senator is correct. As I understand the Senator from Illinois is looking upon the fact that the House bill will tax a State, and if the State does not use the money it will lose it. He seems to think we need coercion. I do not believe we need coercion. The people of the country recognize the problem. We are dealing here with the problem of unemployed. I believe the States recognize it, and I have every confidence that they will take advantage of the program and that the unemployed will benefit.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield for a question.

Mr. DOUGLAS. I am glad the Senator has yielded to me. The Senator from Utah and the Senator from Delaware are playing table tennis and caricaturing my views. In 1957 we had the same problem. The Eisenhower administration proposed loans. Some of us said that a goodly number of States would not accept the loans because it might well be that they would have to make future payments.

Mr. WILLIAMS of Delaware. Well——

Mr. DOUGLAS. It is not true——

Mr. WILLIAMS of Delaware. Just a moment. I should like to answer the Senator's question.

Mr. DOUGLAS. Is it not true? I would like to ask several questions.

Mr. WILLIAMS of Delaware. No. I will not yield for a filibuster. I have been waiting 7 hours for an opportunity to explain this bill.

Mr. DOUGLAS. I have scarcely been on the floor this afternoon.

Mr. WILLIAMS of Delaware. I will answer the Senator's question. There is this difference. In 1958 the only way a State could benefit under the extended unemployment program was by the State legislature's authorizing the borrowing of the money. It did take action by the legislature of a State. Many States felt their debts were such that they could not do it. This time we provide the money by a tax of four-tenths of 1 percent on the payroll.

Mr. DOUGLAS. My good friend——

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I will yield to the Senator from Illinois later, or he can speak on his own time. I yield to the Senator from Utah.

Mr. BENNETT. I would like to ask the Senator from Delaware whether it is not true that the remaining time for debate is in the hands of the opponents of the bill?

Mr. WILLIAMS of Delaware. Yes.

Mr. BENNETT. The Senator from Utah——

Mr. WILLIAMS of Delaware. All the remaining time is in the hands of Senators who are in favor of the Byrd amendments.

Mr. BENNETT. Yes; in favor of the Byrd amendments.

Mr. WILLIAMS of Delaware. Yes.

Mr. BENNETT. Is it not true that the opponents of the Byrd amendments held the floor most of the day except while we were considering the treaties?

Mr. WILLIAMS of Delaware. Yes; they used all their time.

Mr. BENNETT. Is it not true that they had hours to talk before the unanimous-consent agreement was entered into, so that the total amount of time available to the supporters of the Byrd amendments has been in fact the time assigned to them?

Mr. WILLIAMS of Delaware. That is correct.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. Would the Senator, since he will speak on the other side of the issue, withhold his remarks unless he has a short question to ask?

Mr. KEATING. I want to find out if it is not true that representations were made to those who opposed the Byrd amendments that they would have at least 5 minutes?

Mr. WILLIAMS of Delaware. That is correct, although those who made the representation have since used it. I would prefer to make my remarks first; however, we will see that the Senator gets adequate time.

The major difference between the bill as approved by the Senate and the bill as approved by the House is in the method of financing.

Under both bills the benefits would be paid between the date of enactment of the bill and June 30, 1962. It is estimated that these benefits would be about $1 billion.

Both the Senate and the House versions of the bill provide for the payment of these benefits by increasing the employers' tax at the Federal level by four-tenths of 1 percent; however, under the

House version the first payment of these taxes would not be made until after January 1, 1963, being levied on the years 1962 and 1963, or 6 months after all the benefits have been paid out.

The Finance Committee approved bill accepts this four-tenths of 1 percent tax over a 2-year period but makes this tax effective immediately, or for 1961 and 1962 payrolls. This put the program on a pay-as-you-go basis.

Another difference is that under the House approved bill the tax collected under this four-tenths of 1 percent increase would be put into a fund and used to make payments of the extended unemployment benefits without regard as to the States in which it would be spent and without regard to the source of the collections.

Thus, under the House approved bill employers in many States could be taxed at this increased rate to finance unemployment benefits in other States at more liberal rates and on more lenient definitions of unemployment than those being approved for the unemployed in their own States.

The basic principle of unemployment insurance has always been that it was a State program, subject to administration by the State, with the eligibility requirements for unemployment benefits being fixed at the State level, and with the tax being raised solely by assessments against the employers of the respective States.

This has been true for the past 26 years, and it would be continued under the bill as reported by the Committee on Finance. The same principle is used that has been in effect for the past 26 years.

The House-approved bill would abandon this principle, and to that extent it would be an initial step toward the nationalization of the unemployment compensation program.

The Finance Committee rejected this proposal, and while it leaves the tax against all employers of all States for the 2-year period, the additional tax collected from the employers of each State would be recorded, the extended unemployment benefits paid out under this legislation would likewise be recorded by States, and at the end of the period if any State had paid into the fund more than the amount of the benefits returned under this program, the extra money would be reapportioned back to that State as an addition to its unemployment compensation fund.

This would maintain the principle that unemployment is a responsibility of each State, and any benefits paid thereon would be financed by a tax on the employers of that State.

It would prevent a legislature of one State in its generosity from paying out benefits to the unemployed of that State at the expense of taxes being levied on employers of other areas.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a chart entitled "Estimated Additional Tax Collections Compared With Expected Benefit Payments by States."

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

Estimated additional tax collections compared with expected benefit payments by States under H.R. 4806

[Amounts in millions]

State	Tax collections	Benefit payments[1]
Total	$984.0	$930.3
Alabama	12.2	10.0
Alaska	1.2	2.2
Arizona	5.7	2.1
Arkansas	5.3	4.7
California	99.4	80.0
Colorado	8.3	2.0
Connecticut	18.5	18.2
Delaware	3.2	2.0
District of Columbia	5.5	2.2
Florida	21.4	9.5
Georgia	16.7	12.0
Hawaii	3.1	.7
Idaho	2.5	1.6
Illinois	68.6	40.0
Indiana	28.0	26.0
Iowa	10.8	3.5
Kansas	8.5	3.5
Kentucky	10.6	15.0
Louisiana	13.1	12.9
Maine	4.5	2.0
Maryland	15.8	16.0
Massachusetts	34.2	30.0
Michigan	46.6	93.0
Minnesota	16.0	14.4
Mississippi	5.7	2.2
Missouri	23.6	11.0
Montana	2.6	1.1
Nebraska	5.2	.5
Nevada	2.0	2.0
New Hampshire	3.4	.4
New Jersey	39.7	51.2
New Mexico	3.9	2.3
New York	119.9	170.0
North Carolina	19.9	7.9
North Dakota	1.6	.9
Ohio	62.4	85.0
Oklahoma	8.9	5.8
Oregon	9.6	10.6
Pennsylvania	70.7	85.0
Puerto Rico	3.2	3.3
Rhode Island	5.5	5.5
South Carolina	9.1	7.3
South Dakota	1.6	.2
Tennessee	15.0	7.0 to 9.0
Texas	42.1	30.0
Utah	4.1	2.0
Vermont	1.7	.6
Virginia	16.1	5.5
Washington	15.4	8.9
West Virginia	8.4	9.5
Wisconsin	21.5	16.0
Wyoming	1.5	1.1

[1] Excludes payments to Federal civilian employees and ex-servicemen in all States except Pennsylvania.

Source: Estimates of tax collections furnished by Department of Labor and estimates of benefit payments furnished by State employment security agencies.

Mr. WILLIAMS of Delaware. Mr. President, the Committee on Finance also approved another amendment, which I shall discuss later. It is not a part of the Byrd amendment, but it deals with the method of the payment of unemployment compensation to those who are on retirement. It is not a part of the subject matter we are now asked to consider under the Byrd amendment. Therefore, I shall discuss that phase of the bill at a later time.

Mr. SCOTT. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. KERR. Mr. President, I suggest that the Senator from Pennsylvania has time of his own for a unanimous-consent request, without the time being charged to the proponents of the committee bill.

The PRESIDING OFFICER. Is there objection?

Mr. HUMPHREY. Mr. President, what was the unanimous-consent request?

Mr. KERR. The Senator from Pennsylvania asked time to make a unanimous consent request. I merely asked that such time not be charged to the time of the proponents of the committee bill.

Mr. HUMPHREY. That seems to be a reasonable request; but I thought perhaps the Senator wished to debate it for a moment.

Mr. KERR. No; the Senator from Minnesota seems to be the one who wishes to debate it.

Mr. HUMPHREY. Time will have to be charged to one side or the other. I gather that one side has lost its time.

Mr. KERR. It was not lost; good use was made of it.

Mr. SCOTT. Mr. President, may I inquire where I stand?

Mr. KERR. Close to the Senator's chair. How much time does the Senator request?

Mr. SCOTT. One minute.

Mr. KERR. I yield the Senator from Pennsylvania 1 minute.

Mr. SCOTT. Mr. President, President Kennedy in his letter of transmittal on a temporary extended unemployment compensation program said:

> Unemployment compensation provides unemployed workers with necessary purchasing power. When this compensation is exhausted the purchasing power ceases. This has a serious impact not only on the worker and his family, but on the economic health of the entire economy. The costs and effects of mass unemployment arising from a national recession clearly reach across State lines. The problem is national in scope, and the Federal Government has the responsibility for taking action as soon as possible to meet it.

If the President is correct that the present unemployment problem is national in scope than the amendment submitted by the Senate finance Committee does an injustice to those States that have been hard hit through no fault of their own.

Under the committee amendments a State such as Pennsylvania might very well find itself in the position, even after the additional four-tenths of 1 percent tax increase is imposed, that the amount collected is not sufficient to cover the payment of the extended benefits to the unemployed in its State.

If this was the case, the difference between the amount collected by the additional tax and the amount of extended benefits paid would be required to be paid by employers in my Commonwealth through reductions in the 90 percent credit commencing in 1964.

Mr. President, does this seem equitable in the light of the fact that the economy of Pennsylvania in turn affects the health of the national economy? Does not the unemployment problem cross State lines? Does not the purchasing power of the Pennsylvania employer, the Pennsylvania employee, cross State lines?

Is Pennsylvania to be put in the position of carrying the whole burden of paying for its economic recovery, while our Federal tax payments in every other area help carry the burdens of States paying less per capita in Federal taxes? If we should carry the burden here should the

taxpayers of Pennsylvania be expected to pay $46.6 million under the President's education program and receive only $26.9 million in return? I do not mean to imply that by making this point I am against Federal aid to education but is it equitable to have one philosophy for one program and another philosophy for a different program.

Mr. President, I would also be interested in knowing of the amount that the Pennsylvania taxpayer pays in the support of farm commodities throughout the Nation. If I am not mistaken nationally price support loans came to the grand total of $1,444 million on 1959 crops. Of that total Pennsylvania farmers received $941,000. This is not saying that our Commonwealth farmers would not have been eligible for more support loans but it is pointing out that the people of Pennsylvania through taxes support many, many programs that are national in character and not just limited to Commonwealth projects. So, Mr. President, it is for these reasons that I strongly oppose the committee amendments to the proposed extended unemployment compensation legislation which might subject my Commonwealth to extended taxes and additional burdens.

Mr. KERR. Mr. President, may I inquire how much additional time remains for the proponents of the committee bill?

The PRESIDING OFFICER. Twenty-eight minutes remain.

Mr. KERR. I yield 8 minutes to the two Senators from New York.

Mr. JAVITS. Mr. President, I shall yield 4 minutes to myself, so that an equal time may be used by my colleague from New York.

Mr. President, much has been said about New York. I call attention to the fact that this situation is most unusual. This is probably the first time within the memory of Senators who have been here much longer than I have that New York may be on the receiving end. For New York State, this is really a national emergency, for New York has an enormous roll of unemployed; hence New York is eligible for this dubious distinction. My State today has a higher rate of unemployment—7.3 percent—than the national average. The last reported number of unemployed persons was 557,000, over 400,000 of whom are eligible for unemployment compensation and an estimated 42,000 of whom have exhausted all benefits.

When we talk about the reserves in terms of New York, let us remember that New York taxes its employers heavily. When we talk about reserves, we must remember what the reserves are against.

New York has a wage bill of over $24 billion a year and well over $14 billion a year in taxable wages. So when one says "$1 billion" it sounds like a great deal of money. But not when it is compared with the largest wage bill, by far, of any State in the Nation.

It seems to me that Senators from States which have reclamation projects, which have large rolls of dependent children, which have large rolls of other recipients of Federal aid, while we in New York in our Federal tax payments pay out $1, $2, or $3 for every dollar we receive back, ought to be delighted for, and receptive to, the one day when New York is here asking for a little help, instead of once again being on the paying end.

I am frankly surprised. If this is to be a precedent, my colleague [Mr. KEATING] and I ought to be defending it, because we will make a great deal of money for our State's taxpayers in the process. But we know very well it will not be a precedent; and the very votes which could mow us down tonight may be the very votes which will ask us to pay, pay, and pay tomorrow. We know that very well. That is why we oppose the Byrd amendments.

Our reserves have not been going up; they have been going down, because New York has been suffering from a very serious unemployment situation. Our reserves have been reduced from $1,308 million on June 30, 1957, to closer to $900 million today, with an estimated minimum adequate reserve of about $860 million.

The only reason we have these reserves, as I say, is that we have taxed ourselves to produce them and are taxing ourselves more right now to try to restore these reserves. In addition, by every standard contained in these tables as to the soundness of the way of conducting a program of unemployment compensation, as to the taxes levied, the benefit paid, New York is about in the middle range. New York has not been a profligate State; it has not gone overboard. We have not yet reached the triggerpoint of unemployment which would give our unemployed 13 weeks more compensation under a law just adopted.

I respectfully submit to all Senators that we would be derelict in our duty tonight if we were willing to accept the argument which is being made that every State should be a receptacle unto itself, especially designed for unemployment compensation, but not for anything else. No one would think of it as to anything else, only for unemployment compensation, because it so happens that that might work out to help us in New York. It is not fair to consider New York simply for the role of being the largest taxpayer among the States. I do not believe the people in the States which are represented by those who would take this point of view would themselves take it. It has been my experience that the people throughout the country have an understanding of the emergencies in other States. The people in New York State have an understanding of the emergencies in other States and have been most generous and most bountiful, as has been demonstrated by their representatives in the Senate, whether represented by Senator Lehman, Senator Ives, my colleague [Mr. KEATING], or myself.

This is one night we of New York are on the firing line, asking for help. I hope very much that we will have it from the Senate of the United States.

Mr. KEATING. Mr. President, as my colleague has said, in terms of treatment by the Federal Government, New York State is ordinarily less equal than other States. The only difference in this case is that we are less equal—by more.

For years, we in New York State have accepted the proposition that we can and will pay taxes for programs to deal with national problems, even though in many instances the programs involved do not affect or aid New York State. The Nation as a whole has been the focus of our attention, wherever it is clear that this should be so.

We recognize that, within reasonable limits, New York has a responsibility and an obligation to contribute to the solution of problems which transcend our individual State interests. This proposition is as old as the Constitution and is basic to the form and scope of our Federal Government.

Today, we are asked to vote on a national emergency program which, as amended by the Committee on Finance, violates this premise. By an unfortunate and ironic set of circumstances, in this case New York stands to lose. New York has a 7.3 percent rate of unemployment and would need some $50 million more in benefits than would be obtained under the additional 0.4 percent Federal payroll tax levied under H.R. 4806.

Yesterday the Senate passed a distressed areas bill. My colleague [Mr. JAVITS] and I voted for it. New York State has nine small communities which will qualify. However, the real problem is not in New York. Inevitably this program will cost New Yorkers more than we will receive in the form of area redevelopment loans. That is true of a great many programs.

Today the tables are turned. The bill before the Senate deals with the present high rate of unemployment, which is more serious in New York than in the Nation as a whole. New York State has an unemployment rate of 7.3 percent. The national average is 6.8 percent.

I believe in State responsibility wherever the States wish to take the initiative and can handle the circumstances involved. This is certainly true of unemployment compensation. While I favor having this program administered ordinarily by the States, I maintain that under emergency circumstances, such as those which now prevail, some measure of Federal effort is warranted.

We in New York will tackle our own problems any time, if other Members of this body will not ask us to pay their bills. Yes; we will happily take on our own problems—any day in the week.

Mr. President, I believe in dealing as a nation with problems which are acute and are beyond the resources of individual States acting separately. This is the nature of the unemployment problem at the moment. This situation calls for action to help the jobless and their families.

Although we are now moving out of the mild recession of recent months, there are still too many Americans out of work. Until employment gets back to normal, they need help. Many have exhausted their unemployment benefits and are waiting for Congress—for the Nation—to act.

Unemployment is highest in the industrial States, such as West Virginia, Ohio, New Jersey, Pennsylvania, and New York. These States need help. Several of them cannot meet this dilemma by themselves. That is the reason for having Federal legislation. It is the only reason.

I hope the Senate will not sustain these committee amendments. They are entirely unfair to those States, like New York, which pay the bills of other States time after time.

I shall oppose these amendments. I hope they will be defeated.

I thank the distinguished senior Senator from Oklahoma [Mr. KERR] for yielding time to my colleague and myself.

MR. HUMPHREY. Mr. President, will the Senator yield me 1 minute?

Mr. KERR. We have only 20 minutes left. I have promised to yield time to the Senator from Nebraska and the Senator from Utah. I now yield 1 minute to the Senator from West Virginia.

Mr. BYRD of West Virginia. Mr. President, I am opposed to the pending amendments. When the Senate passed the Area Redevelopment Act, a first long step was taken toward curing unemployment and underemployment in many areas of our Nation. But while the wheels of bureaucracy grind on, even after the act is signed into law, the unemployed need a helping hand—a means of sustaining themselves until the economy demonstrates its inevitable resilience. They need an extension of unemployment compensation benefits on a temporary basis—a chance to hold on and to keep their families and themselves fit and healthy until new employment opportunities open.

In his message of February 6, concerning the extension of unemployment compensation benefits, President Kennedy stated:

> The problem is national in scope, and the Federal Government has the responsibility for taking action as soon as possible to meet it.

The President is absolutely right. The latest unemployment figures, announced on March 7 by Secretary of Labor Arthur J. Goldberg, showed that in February there were 5,705,000 people who were seeking work in these United States, but were unable to find any. This is the highest unemployment our Nation has had since before World War II.

H.R. 4806, as passed by the House, is a reasonable bill, and will alleviate a serious condition in our national economy. I have an intense interest in its passage by the Senate, because it is common knowledge that my own State of West Virginia has one of the severest unemployment problems of any State in the country.

Today, in West Virginia there are approximately 152,000 unemployed persons—or about 14.2 percent of the State's labor force. In some counties in my State, unemployment averages about 26 percent. In fact, in 42 percent of the counties in West Virginia there is one unemployed person out of every four in the labor force.

But insofar as unemployment compensation is concerned, I cannot feel that my responsibility to aid the unemployed in other States is any less than my responsibility to aid the unemployed in West Virginia. For this reason, Mr. President, I must oppose the pending amendments to H.R. 4806.

These amendments, if accepted by the Senate, would not accomplish the purposes for which the extended benefit program was designed. The bill as passed by the House would provide for dealing on a nationwide basis with our existing national unemployment problem. The proposed amendments would not do so.

Unemployment in individual States arises from causes which are interstate in character, since our laws today are nationwide and our commerce is interstate and interdependent. What happens in the automobile industry in Detroit affects the steel industry in the Ohio Valley; when the steel industry suffers an economic slump, our coal mines and our railroads suffer. When the rate of new construction declines, a whole gamut of industries suffers. Thus, any program for aiding the unemployed must be national in character.

The program cannot be financed on an individual State basis. States in which unemployment and underemployment have been chronic and long standing—as is the case in West Virginia—would be hard pressed to finance a temporary extension of unemployment.

Thus, the proposed amendments would be somewhat self-defeating. Certainly, if the financing is placed on a State-by-State basis, only States with the most severe unemployment would sign agreements with the Department of Labor to pay extended benefits under the Senate bill. They would do so, however, I fear, only if such benefits would cost no more than the tax receipts from that State's employers under the bill.

Mr. President, I urge Senators to reject the Byrd amendments. The unemployed should not be made victims of possible State fiscal and tax problems. Their distress is all too real—and in many instances, too grim.

Mr. CURTIS. Mr. President——

Mr. KERR. I yield 5 minutes to the Senator from Nebraska.

Mr. CURTIS. Mr. President, I believe it well that we keep in mind that we have before us a bill for a temporary program to meet a need, and that need is to provide additional unemployment compensation to the unemployed who have exhausted or who will exhaust their benefits under our State systems.

Under either version, that need is met. No one has a monopoly on compassion for the unemployed.

I call attention to the following language in the Senate committee report.

> Your committee's bill, like the House bill, would provide extended benefits for up to 13 weeks of total unemployment to workers who have exhausted their rights under State unemployment compensation programs and under Federal unemployment compensation programs for ex-servicemen and Federal employees. The weekly benefit amount would be the same as the individual worker was drawing under his State law.

Mr. President, in the House committee report we find identical language.

For years, individuals in this country have advocated the federalization of our unemployment systems. I totally disagree with that, but I say they are entitled to their day in court. However, they should come before our committees and, on that particular issue, should present their case, not try to slip such a provision into a temporary measure intended to meet a specific need.

To inject into this measure provisions for a Federal unemployment compensation system, without permitting the committees of both Houses to go fully into the pros and cons of a Federal system versus our State systems, is not the best way to enact legislation.

I do not believe we should federalize our unemployment compensation programs.

There are many reasons for that. As the system is now, it is closer to the people, and can be administered better, and there can be set up programs to encourage continuous employment, whereas with a national program there is a tendency—since it is paid for from Washington, a long way from the States—to say, "Let us get what we can."

I do not believe a Senator should vote for national legislation because under it his State will receive more than it pays; but, by the same token, I believe any disparity between the States should be reasonable.

Some States would be treated more favorably, but not because their unemployment problems are greater. Some States have been more liberal in regard to the benefits provided under their systems. Some States have been more lax in the administration of their unemployment benefit programs. Those matters should be taken into account.

It happens that under the House version—and without the Byrd amendments, I could not vote for the House version—Nebraska will pay $10 for every dollar Nebraska receives. Of all 50 of the States, Nebraska would thus be discriminated against to the greatest degree.

I do not contend that the mere fact that the program would not work out equally for all the States is a reason why we should withhold our support from such national legislation; but certainly a great disparity of this kind, in connection with such a program and formula, worked out in such a manner, shows that the bill has some fatal defect. The need can be met by the adoption of the Byrd amendments. They will preserve our State systems. Then let federalization be considered in the committees and debated on its merits.

The PRESIDING OFFICER. The time yielded to the Senator from Nebraska has expired.

Mr. KERR. Mr. President, I yield 5 minutes to the Senator from Utah [Mr. BENNETT].

The PRESIDING OFFICER. The Senator from Utah is recognized for 5 minutes.

Mr. BENNETT. I shall not use all of the 5 minutes.

Mr. President, as a member of the Finance Committee, I participated in the discussions on this bill.

My State is one which finds it would be called upon to tax its employers twice as much as would be used in our State.

I, too, am greatly disturbed by the fact that this bill, without presenting the problem openly for consideration, turns out to be a very important step toward the federalization of our programs.

I am disturbed because, as the Senator from Nebraska has pointed out, in some States which have what are called more liberal programs, in some States which make unemployment compensation easier to obtain than does my State, the unemployed will be treated, under either measure, more generously than will the unemployed in my State. I am disturbed because of the fact that the employers in my State will be called upon to pay for it.

There are two ways to deal with this matter: One is to liberalize the entire system and to provide a standard set of benefits for everyone in the United States. The other is to preserve the identity of the State programs until we decide definitely on the question of federalization and equalization of benefits.

Under this bill a tremendous windfall is given to States which under some circumstances have already approached the point where they are making unemployment a career.

Because of those great defects in this bill, personally, in representing the State of Utah, I could not in good conscience support the bill.

I hope the Senate will realize what it is doing tonight. I recognize the position of my two friends, the Senators from New York. I applaud them for it; and I point out that if every Member of this body would act on that basis and would vote in the interest of his State, rather than in the interest of some other State, the bill would be passed by an overwhelming vote, because under this bill more than two-thirds of the States will make substantial contributions for the benefit of the unemployed in the other less than one-third.

Mr. President, I yield back the remainder of the time available to me.

Mr. KERR. Mr. President, I yield 3 minutes to the Senator from Indiana [Mr. CAPEHART].

The PRESIDING OFFICER. The Senator from Indiana is recognized for 3 minutes.

Mr. CAPEHART. Mr. President, if the Byrd amendments are not agreed to, tonight, the Senate will be changing the fundamental, underlying principle which was adopted when the Unemployment Compensation Insurance Act was passed, years ago.

Let me point out that the amount of money every employer pays into the fund is recorded, and if he has a good record, the percentage he pays decreases. If he has a bad record, the percentage increases. Every State operates as an individual unit, and the Federal Government acts as the trustee for each employer and State. All the Federal Government does is hold the money for the respective States.

For example at the moment New York has a surplus or reserve of $900 million with the Federal Government. Yet, under the House version of the bill, New York would pay into the fund $119 million, and receive $170 million. It ought to pay the $50 million out of its reserve. That is the principle involved.

If we adopt the House version of the bill, and not the Senate version, we shall kill the underlying principle which was established. I know what I am talking about, because, as an employer, I have been paying into the fund for many years. I am glad to do so. I always have been in favor of unemployment insurance. However, if we adopt the House version of the bill, we shall be States should be put into one pile, or one fund and then the money should be drawn out of that fund. In so doing, we would take away from the States their incentive, and take away from individual employers their incentive to employ workers, keep them working, and keep their funds on a sound basis.

Please do not do so, because it does not make any difference to the unemployed whether we adopt the House version of the bill or the Senate version. They will get exactly the same, whichever we adopt. They will all be covered. They will get exactly what the respective States provide. Please do not change the underlying principle of the legislation, which has worked so well for so many years, because if we do change it, we shall regret it. We shall be federalizing unemployment compensation.

Mr. KERR. Mr. President, how much time is left to the proponents?

The PRESIDING OFFICER. Eight minutes.

Mr. KERR. I yield 1 minute to the Senator from Minnesota [Mr. HUMPHREY].

Mr. HUMPHREY. Mr. President, it seems to me much of this argument was settled back in 1789, when the Constitution was adopted and the several States were no longer a confederation, but the United States of America. Indeed, if we adopt the principle some Senators are now advocating, that each State should stand on its own feet, there is no longer a true Union of the States.

I might say that the principles involved in the House version of the bill make more sense to me in light of the integrated economy of the American free enterprise system. Unemployment in the iron mines of Minnesota is not due to any action on the part of Minnesota, and our employers should not be held responsible for it. Unemployment in the iron mines of Minnesota is due to international affairs, as well as to the national recession.

I have prepared a statement on this measure, and I ask unanimous consent that it may be incorporated in the RECORD following my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PROGRAM FOR TEMPORARY EXTENSION OF UNEMPLOYMENT COMPENSATION, H.R. 4806

The purpose behind the President's request for a temporary extension of unemployment compensation was to relieve human suffering and bolster purchasing power in communities affected by unemployment during the current national recession. Specifically the proposal aimed to furnish additional unemployment insurance protection for workers who have been unemployed so long they have exhausted their regular State benefits. The House bill (H.R. 4806), passed by a 13-to-1 majority, accomplishes the President's objective. The bill reported out by the Senate Finance Committee has so altered the House bill that its basic purpose is defeated. Now here are the main arguments against the Senate committee's amendments of this bill.

1. SENATE COMMITTEE AMENDMENTS IGNORE NATIONAL CHARACTER OF PROBLEM

Today we find nearly 6 million workers totally unemployed. About 3½ million of them are drawing unemployment insurance; about another 700,000 of them have used up all of their benefits and have no place to turn. Between now and 1 year from now, another 3 million workers will have exhausted their benefits without having found jobs.

These facts depict a grim picture of our Nation's economy which cries out for urgent, effective action on a national scale. The committee's amendments ignore the fact that this country's unemployment at the present time is national in its causes and national in its effects. It is not a collection of State problems that they individually can resolve. State lines are no barrier to the growing menace of unemployment in periods of recession. The problem is national in scope and therefore requires a national solution. The committee amendments have exactly the opposite effect and prevent a national solution of the problem.

2. COMMITTEE AMENDMENTS REQUIRE STATE LEGISLATIVE ACTION

Under the temporary unemployment compensation program of 1958, 9 of the 17 States that participated found it necessary to obtain legislative authority to participate, while other States refrained from participation for lack of such authority. Attorney generals in 10 of these States wrote opinions that legislation would be required for their States to come into the program. This authority was needed since TUC entailed obligating the State to pay for benefits not provided for under State law.

The Senate committee's amendment altering the financing arrangements for TUC now places each State in the same potential position with respect to assuming financial obligation that they found themselves in in the 1958 program. The amendment stipulates that a State which pays out more in benefits than is raised in that State through the added 0.4 percent tax must obligate itself to repay the funds furnished by the U.S. Treasury to cover the excess benefit costs on the same basis as was specified in the temporary unemployment compensation program of 1958. Each State faces this eventuality since no State can be sure that future extended benefit costs will not exceed the additional tax revenue raised under the bill.

This being the case, no State which requires legislative authority for such obligation can safely proceed to participate in the program without first obtaining such authority. Thus the Finance Committee's amendment revives the very circumstances which led to delays and to restricted participation in the 1958 program. Similar delays and restriction in participation are sure to result under the Senate Finance Committee's bill and would defeat the basic aims of this measure: rapid and universal extension of unemployment benefits. Lost would be the necessary salutary effects of

speedy relief of considerable human suffering and broad substantial support for purchasing power at a critical stage in the economy's emergence from the recession.

3. COMMITTEE AMENDMENTS DISCOURAGE STATE PARTICIPATION

Besides inhibitions on participation by States requiring legislative authority, States are encouraged to limit or refrain from participation to assure a return of tax revenues not used for extended benefits, as provided by committee amendments. Many States will feel the pressures of employers to avoid participation so that a future rebate of tax revenues to the State funds may furnish a basis for future State tax reduction.

The House bill assures participation by all States by using excess tax revenues in some States to cover excess benefit costs in other States in keeping with a national approach to a national problem, thereby providing no incentives for individual States to avoid extending benefits.

4. COMMITTEE AMENDMENTS IMPOSE FEDERAL TAX WITHOUT ASSURING ACHIEVEMENT OF OBJECTIVE

Even the Senate committee version of the bill recognizes that the problem faced is a national one requiring a national remedy. It does so simply by establishing a Federal program and especially by imposing a nationwide uniform increase in the Federal unemployment tax.

But the Senate committee's amendments then, in effect, destroy the very purpose of this approach by permitting a State to obtain a rebate of the entire tax if it chooses not to extend benefits. Moreover, a participating State may obtain a rebate of its taxes not used for benefits or may have to raise additional taxes to pay for costs of benefits which exceed the 0.4 percent tax. In taking this approach, the Senate committee has eliminated the sense behind the imposition of a uniform nationwide increase in the Federal tax.

The House version of the bill assures that the purposes of the TEUC program will be achieved throughout the Nation since no State would be able to recover any of the taxes paid or derive any advantage except by extending benefits to unemployed workers who need them.

5. THE SENATE FINANCE COMMITTEE AMENDMENTS OVERLOOK PRECEDENT IN THE DISTRIBUTION OF FEDERAL UNEMPLOYMENT TAX COLLECTIONS

The Senate committee contends that each State should take care of its own unemployment problem. But there is precedent in the administration of the Federal-State employment security program to support a sharing of heavy unemployment benefit costs among the States.

The Department of Labor allocates Federal funds to the States for administration of their employment security programs out of the proceeds of the present Federal unemployment tax collections. The amount each State receives is based on its needs for efficient administration regardless of the amount of Federal taxes collected in the State. In fiscal year 1960, e.g., administrative costs exceeded Federal unemployment taxes in 26 States. Three States received administrative funds which were more than double the revenue collected in those States; nine others received administrative funds which exceeded tax collections by 50 percent or more. There were comparable variations in prior years.

The States where this happens are usually sparsely populated and not highly industrialized. It is sound policy to make allocations of administrative funds without regard to the amounts of Federal unemployment taxes collected from these States because it assures adequate machinery throughout the Nation to handle the important job done by the employment security system.

If this principle is accepted as sound for administrative financing, why should there be a sudden departure from this approach when allocating funds for Federal unemployment compensation payments to meet the serious national problem of recession unemployment.

6. COMMITTEE AMENDMENTS IGNORE SEVERE TAX BURDEN ON EMPLOYERS IN HARD-HIT STATES

Employers in the major industrial sections of our Nation face the stern prospect of extremely high State contribution rates through an accumulation of several factors. These include the effects of a gradually rising level of unemployment that has been in progress for some years, apart from recessions; the higher tax rates reflecting costs of the last recession; the still unpaid 1958–59 TUC obligations; and the increase in the Federal tax under this TEUC bill. These employers are then faced with the additional prospect of paying the even higher costs of extended benefits that will occur in these areas in the coming year—those exceeding four-tenths of a percent—under the amended version of the bill.

It is easy to see that an almost impossible burden on these employers will result in the future, possibly in the midst of another recession. Such a burden is inequitable because of the national character of the causes and effects of heavy unemployment in these areas. Toleration of such a burden on a particular group or area is counter to sound national policy.

7. SENATE COMMITTEE AMENDMENTS IMPOSE A FEDERAL STANDARD ON TREATMENT OF PENSIONERS

In requiring that the unemployment compensation of pensioners be reduced by the amount of pension received, the committee's amendment completely reverses the legislative policy underlying all federally financed unemployment compensation programs enacted since 1953. (Unemployment compensation for Federal employees enacted in 1954; the Temporary Unemployment Compensation Act in 1958; and unemployment compensation for ex-servicemen in 1958.) All of these programs made the payment of benefits subject to the terms and conditions of State laws. The Senate committee's bill, however, usurps the rights of the States to decide for themselves the action that should be taken.

The committee's amendment with respect to pensioners is also arbitrary and punitive in its effects. Studies show that most of the pensioners who are drawing unemployment compensation are in the labor market seeking employment; that they have been employed in work since retirement; and that they need to work to supplement their meager pension payments.

H.R. 4806 passed by the House excludes all of these objectionable features. These features defeat the purpose behind the President's request for a temporary extension of unemployment compensation. H.R. 4806, as passed by the House, supports this purpose and therefore, should be enacted.

Estimated Federal unemployment tax receipts and Federal funds allocated to States for administration during fiscal year 1960

[Dollar amounts in thousands]

State	Federal unemployment tax collections [1]	Federal funds allocated to States (including postage)	Ratio of funds allocated to tax collections (percent) by fiscal year			State	Federal unemployment tax collections [1]	Federal funds allocated to States (including postage)	Ratio of funds allocated to tax collections (percent) by fiscal year		
			1960	1959	1958				1960	1959	1958
United States	$338,769	$319,570	94.3	98.0	88.7						
Alabama	4,191	4,322	103.1	107.3	98.1	Montana	$878	$1,670	190.2	199.9	165.1
Alaska	394	1,448	367.5	342.2	292.8	Nebraska	1,799	1,473	81.9	80.3	73.9
Arizona	1,972	3,775	191.4	198.3	193.6	Nevada	700	1,270	181.4	172.6	150.5

[1] State distribution estimated on basis of data from the 1959 ES–202 reports, "Employment, Wages, and Contributions," and the accompanying certified report, the ES–202 "Taxable Wage Supplement" for calendar year 1959.

THE NATIONAL CHARACTER OF THE PROBLEM

This country is in no position to view its present unemployment problem as 50 separate unemployment problems. When nearly 6 million workers are jobless throughout the country, as was the case in February, there is no time to spend waiting for particular States to decide whether or not they should or can take care of their own unemployed. Who can say who shall be responsible for the thousands of auto workers laid off in Michigan and Wisconsin because the cars they made are not selling well in New York, Kansas, Kentucky, or in dozens of the States? Who is to say that the thousands of steelworkers thrown off their jobs and now exhausting their unemployment compensation in Illinois, Ohio, and Pennsylvania are purely the responsibility of Illinois, Ohio, and Pennsylvania when this happens because the cut in auto production in Michigan and Wisconsin results in reduced demand for steel? Is it of no consequence to the farmers of Iowa and Nebraska, or the textile and garment manufacturers of the Carolinas that jobless workers in the Northeast or the Great Lakes area will no longer be drawing unemployment benefits to buy food and clothing for their families?

This is not a collection of State problems that we face; this is a national problem that requires a national solution. The administration bill offers a truly national approach; the committee's bill clearly does not. It imposes a national tax—that's true, but it turns around and says to a State, 'if you do not use this money to pay benefits, you can have it back."

If we fail to recognize the national character of this problem; if we fail to furnish an effective remedy for the pressing problem that exists across the land; if, as is certain to happen under the committee bill, many workers find themselves cut off from the added protection they need because their State would not or could not assume the burden on its own, then we here will have to face the responsibility for the continued hardship that will result.

If we do not recognize the national scope of this problem, we will in effect be saying to those States hardest hit by the recession, "You can go it alone." And, in effect, we will be saying at this crucial period in our history: "We are not a united nation."

The proponents of the amendments say that about 40 States will be contributing revenue in excess of the amount of benefits that will be paid in these States. While it is true that Federal revenue may exceed benefit payments in the majority of States, I am not so sure that the number will finally turn out so great as 40 or 35 or possibly even 30. I base my statement on the fact that the estimates of benefits and taxes for some States are so close as to put them on the doubtful list in this respect. For example, Connecticut and Louisiana are two of the States presumably included in the count of States with taxes exceeding benefits. But look at the closeness of the estimates for these States:

	Benefit cost (millions)	*Tax collections (millions)*
Connecticut	$18.2	$18.5
Louisiana	12.9	13.1

These are, after all, only estimates; the actual benefit cost for Connecticut could easily turn out to be $19 million and the cost in Louisiana $13.5 million or $14 million. There are others not quite so close but where a few plant shutdowns or failure of plants to reopen, not possible for any individual to foresee in making such estimates, could easily lower the count as I said to perhaps 30.

The important point, however, is not to look at the total of 40 States or even 30 States, if this number is more correct, but to think of the basic objective of this proposed legislation. The basic issue is simply this—are we going to attack a national unemployment problem which was caused by conditions that transcend State lines with a program that reflects vigorous national action or are we going to offer to the country a program that will never get underway.

And I suggest we look at the employer's side of this problem for a moment. If the Congress approves the recommendations of the Senate Finance Committee which would require each State to provide its share of the cost of additional benefits, employers in those States hardest hit by the recession will face a tremendous tax load in the years ahead.

The original administration bill, already adopted by the House, provided for all costs of the extended program to be met out of increased revenues from a proposed temporary increase of 0.4 in the tax rate under the Federal Unemployment Tax Act. This means that for the years 1962 and 1963 the Federal Government would collect 0.8 percent—0.4 for the administrative financing of the employment security program, and 0.4 percent to pay temporary extended benefits.

Now the amended bill would require employers in all States to pay an additional Federal unemployment tax of 0.4 percent for each of the taxable years 1961 and 1962. This amendment does two things: One—by making the due date for the increased tax 1961 instead of 1962, employers are denied a breathing space in a time of severe economic downturn. Secondly—this additional tax on employers in each State will be earmarked for the sole use of that State. This means that in States where unemployment is so severe that the additional temporary taxes are insufficient to finance the extended benefit costs, employers will be assessed additional taxes to make up the deficit.

If industries in the States hardest hit by the recession are forced to pay an accelerated tax on extended unemployment compensation far out of proportion to employers in more fortunate States, the depressed area employers have only one alternative—to pick up and move out.

We will be compounding an already deleterious employment situation. I urge you to consider carefully before accepting any recommendation which would impose even further hardship on the already hard-pressed employers in depressed areas.

Yes; the current unemployment situation makes it imperative that Congress act quickly to approve legislation paying additional unemployment insurance benefits to jobless workers who exhaust their benefit rights and cannot find employment. I know all of us want to get this program into action as promptly as possible. However, the committee amendment changing the arrangements for financing the temporary program would delay rather than speed up the payment of benefits. If we accept these amendments I believe we would be making the same mistake we made 3 years ago with the temporary unemployment compensation program of 1958.

The committee's amendment altering the financing arrangement for temporary extended unemployment compensation now places each State in the same possible position with respect to assuming a financial obligation in which they found themselves in the 1958 program. The amendment stipulates that a State which pays out more in benefits than it raises through the added four-tenths percent tax must obligate itself to repay the funds furnished by the U.S. Treasury to cover the excess benefit costs. Each State faces this eventuality since no State can be sure that future extended benefit costs will not exceed the additional tax revenue raised under the bill.

This being the case, no State which requires legislative authority for such an obligation can safely proceed to participate in the program without first obtaining such authority. Thus the committee's amendment revives the very circumstance which led to delays and to restricted participation in the 1958 program.

Similar delays and restriction in participation are sure to result under the committee's bill and would defeat the basic aims of this measure: rapid and universal extension of unemployment benefits. Lost would be the necessary salutary effects of speedy relief of considerable human suffering and broad substantial nationwide support for purchasing power at a critical stage in emerging from the recession.

SUMMARY

In conclusion, I am strongly opposed to adoption of the financing provisions which the Senate Finance Committee has incorporated in the Temporary Extended Unemployment Compensation Act of 1961. I am opposed to these provisions because their adoption would nullify many of the important advantages which would flow from the bill as approved by the House. The House bill represents a four-square nationwide approach to a nationwide problem—the problem of recession unemployment. The House bill would assure the participation of every State in a broad-gage attack on unemployment. Its passage would assure that all States would pay additional benefits to jobless workers exhausting their benefit rights under the permanent unemployment insurance programs administered by the Federal-State system. As a result the purchasing power of all jobless workers eligible to receive additional benefits would be increased. These benefits would be spent immediately for food and other necessities. The money spent by jobless workers would help to sustain local purchasing power. The cumulative effect of such payment on a nationwide scale would have a major impact on national purchasing power and make a strong contribution to economic recovery.

A nationwide attack on unemployment would be assured by the House bill because all States would be brought into the program. Thus, the House bill recognizes that the unemployment problem we face is a national, not simply a State problem.

Let us look at the proposed financing amendments to the House bill which are in the bill reported by the Senate Finance Committee. These amendments would provide no incentive for States to participate. Actually they provide an incentive against such participation.

The proposed amendments would impose an extra tax on all employers just as the House bill does and in the same amount. However, the taxes collected in an individual State would be earmarked for that State's use in the unemployment trust fund in the U.S. Treasury. If a State participated in the program the proceeds of the Federal tax on employers in that State would be available solely for paying extra benefits in that State while the temporary program was in effect. At the conclusion of the program these proceeds, if not used by the State in full, would be returned to that State's account in the unemployment trust fund. If the State did not participate in the program, the extra taxes collected from its employers would be held until the program terminated and transferred in full to the State's account in the trust fund. Under such conditions what incentive would there be for the State to participate?

However, if a State participated in the Federal temporary program as passed by the House and the proceeds from employer taxes in that State were insufficient to pay the additional benefits paid the State's workers, the employers in that State, beginning in 1964 would be subjected to an extra tax which would be continued until the deficit was paid. This would happen in States where

unemployment is the heaviest. As a result, employers in those States hardest hit by the current recession will be faced with a tremendous tax burden in the years ahead if the proposed amendments to the temporary extended unemployment compensation bill are enacted.

The House bill is actuarially sound. It provides a way to promptly finance the costs of the temporary benefits. The Senate version of the House bill would stretch out repayments in some States for years to come.

The House bill is more equitable because it deals with our unemployment crisis in a national manner and because it does not penalize employers located in States facing heavy unemployment.

Mr. KERR. Mr. President, I yield myself 3 minutes.

I thank the Senator from Minnesota for making the statement. It very clearly demonstrates that the purpose of the House version of the bill is to federalize unemployment compensation. If we are to federalize unemployment compensation, why should we do it on a basis that provides the unemployed in one State, two, three, or four times as much as it provides the unemployed in other States? I submit that we ought to have either a State program, as provided by the basic law, or a Federal program such as has just been advocated by the Senator from Minnesota. But if we are to have a Federal program, let us so arrange it that the unemployed in Minnesota get the same as the unemployed in Oklahoma, Kansas, Virginia, or Alaska.

That is the simple issue before the Senate. The unemployed in the Nation will get the same benefits under either of the two versions of the bill. Under the House version, everybody pays an equal amount, but the beneficiaries get different amounts. Under the Senate version of the bill, everybody pays the same amount, but the employers within each State get credit for what they pay against their future liabilities for their employees.

I submit that, on the basis of benefits, the unemployed get the same under either version; on the basis of equity, the Senate version should prevail.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. PASTORE. Is it not a fact that the bill as it was reported to the Senate provides that, in case money is contributed by a particular State over and above the amount necessary for the temporary relief, or emergency relief, for certain employees, that particular State will later be given an allowance, or a reduction of the 2.7 percent contribution that now is required under the law?

Mr. KERR. A State, if it pays into the fund more money than its unemployed draw, will receive credit for that amount in the trust fund. As to the future amount, it will depend on the future operation of the fund.

Mr. PASTORE. Are we not, in fact, adding insult to injury? Insofar as competition or attracting industry to the various States may be concerned, and in view of the fact that in the future the prosperous States are going to be in a better fiscal position because their contribution will be below the 2.7 percent, as against another State, where, chances are, the contribution will be the 3 percent, are we not actually initiating a national emergency by making the situation better for the States that are well off, and worse for the States that are badly off?

Mr. KERR. No.

Mr. PASTORE. I submit we are.

Mr. KERR. Mr. President, I yield no further.

I yield back the remainder of our time.

Mr. PASTORE. Mr. President, is there any time left?

Mr. HUMPHREY. Mr. President, as I understand, the time of the opponents for the Byrd amendments has been used, and there is no time left. Is that correct?

The PRESIDING OFFICER. All time has been used.

Mr. HUMPHREY. Mr. President, I ask for the yeas and nays on the Byrd amendments.

The yeas and nays were ordered.

Mr. HUMPHREY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the so-called Byrd amendments, offered by the Senator from Virginia. The yeas and nays have been ordered, and the clerk will call the roll.

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. What is the specific matter presently pending before the Senate?

The PRESIDING OFFICER. The question is on agreeing to the various committee amendments designated as the Byrd amendments, which have been ordered to be considered en bloc.

Mr. DIRKSEN. A further parliamentary inquiry. Are they the amendments which have been referred to generally in the discussion as the Byrd amendments?

The PRESIDING OFFICER. That is the understanding of the Chair.

Mr. DIRKSEN. A further parliamentary inquiry. Those who are in favor of the Byrd amendments will vote "yea," and those who are opposed will vote "nay." Is that correct?

The PRESIDING OFFICER. The Senator is correct.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD (when his name was called). On this vote I have a pair with the senior Senator from Massachusetts [Mr. SALTONSTALL]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withhold my vote.

Mr. METCALF (when his name was called). On this vote I have a pair with the Senator from Kentucky [Mr. MORTON]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withhold my vote.

The rollcall was concluded.

Mr. HUMPHREY. I announce that the Senator from Alaska [Mr. BARTLETT], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Arizona [Mr. HAYDEN], the Senator from Oregon [Mr. MORSE], and the Senator from Utah [Mr. Moss] are absent on official business.

I further announce that the Senator from Texas [Mr. BLAKLEY], the Senator from Minnesota [Mr. MCCARTHY], and the Senator from Maine [Mr. MUSKIE] are necessarily absent.

On this vote, the Senator from Alaska [Mr. BARTLETT] is paired with the Senator from Texas [Mr. BLAKLEY]. If present and voting, the Senator from Alaska would vote "nay," and the Senator from Texas would vote "yea."

I further announce that, if present and voting, the Senator from Arizona [Mr. HAYDEN], the Senator from Minnesota [Mr. MCCARTHY], the Senator from Oregon [Mr. MORSE], the Senator from Maine [Mr. MUSKIE], and the Senator from Utah [Mr. Moss] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Colorado [Mr. ALLOTT] is absent because of death in his family.

The Senator from Vermont [Mr. PROUTY] is absent by leave of the Senate because of illness.

The Senator from Kentucky [Mr. MORTON] and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent.

The pair of the Senator from Massachusetts [Mr. SALTONSTALL] has been previously announced by the Senator from Montana [Mr. MANSFIELD].

The pair of the Senator from Kentucky [Mr. MORTON] has been previously announced by the Senator from Montana [Mr. METCALF].

The result was announced—yeas 42, nays 44, as follows:

[No. 16]

YEAS—42

Aiken	Dirksen	Miller
Beall	Dworshak	Mundt
Bennett	Eastland	Proxmire
Boggs	Ellender	Robertson
Bridges	Ervin	Russell
Bush	Fong	Schoeppel
Butler	Goldwater	Smathers
Byrd, Va.	Hickenlooper	Smith, Maine
Capehart	Holland	Stennis
Carlson	Hruska	Talmadge
Case, S. Dak.	Jordan	Thurmond
Cooper	Kerr	Wiley
Cotton	Lausche	Williams, Del.

NOT VOTING—14

Aiott	Mansfield	Moss
Bartlett	McCarthy	Muskie
Blakley	Metcalf	Prouty
Fulbright	Morse	Saltonstall
Hayden	Morton	

So the amendments of Mr. BYRD of Virginia were rejected.

Mr. MANSFIELD. Mr. President, I move to reconsider the vote by which the Byrd amendments were rejected.

Mr. HUMPHREY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table the motion to reconsider was agreed to.

Mr. BUTLER. Mr. President, may I address an inquiry to the Senator from Illinois [Mr. DOUGLAS]? I should like to know where the "holy alliance" has gone.

Mr. DOUGLAS. The "unholy alliance" is still operating.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The LEGISLATIVE CLERK. On page 10, after line 10, it is proposed to insert:

LIMITATION ON PAYMENTS OF COMPENSATION TO INDIVIDUALS ENTITLED TO RETIREMENT BENEFITS

(e) Any such agreement shall provide that temporary extended unemployment compensation payable to an individual with respect to a week shall be reduced by the amount of the following payments received with respect to such week: (1) a primary insurance benefit under title II of the Social Security Act, (2) a retirement annuity (other than a survivor annuity) under the United States Civil Service Retirement Act of 1930, (3) any other retirement system established by or pursuant to State or Federal law, if the employer contributes to such system, or (4) a retirement pension under a private retirement plan provided, or contributed to, by an employer. A payment for a period other than a week shall be prorated by weeks in accordance with regulations prescribed by the Secretary. Notwithstanding the foregoing provisions of this subsection, no reduction shall be made from the temporary extended unemployment compensation to which any individual is entitled if (1) the entitlement of such individual to any such insurance benefit, pension, annuity, or other retirement benefit is based on disability or (2) (i) such individual is at least sixty-five years of age and (ii) the benefit to which he is entitled is payable under laws administered by the Veterans' Administration and such pension is based on service performed by such individual.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 10, after line 10.

Mr. HUMPHREY. Mr. President, I request an explanation of the amendment.

Mr. WILLIAMS of Delaware. Mr. President, I can explain the amendment very briefly. The amendment would correct a situation that was called to the attention of the Congress by the Comptroller General. There are those who were drawing unemployment compensation and who at the same time were drawing substantial retirement benefits, either as retirees from private industry or as retirees from the Federal Government.

This amendment would provide that the unemployment compensation of such people would be reduced by the amount of their pensions. In other words, if retirees are drawing a retirement pension in a greater amount than would be available under the unemployment compensation provisions, they would not receive their unemployment compensation.

The amendment would not reduce unemployment compensation because of any regular veterans' pensions which are being paid to veterans over 65, nor would the compensation be reduced by any pension which is being received by any individual as a result of disability.

However, the amendment would eliminate an abuse called to our attention by the Comptroller General. The Comptroller General made a survey of the District of Columbia for 1 month and out of 1,610 former Federal employees—and the survey involved mostly Federal employees, although the situation exists in cases involving private pension plans—there were 298 voluntary retirees in the District who were drawing two or more benefits from the Federal Government, including their unemployment compensation.

Mr. CASE of South Dakota. Mr. President, will the Senator yield for a question?

Mr. WILLIAMS of Delaware. Yes, I yield.

Mr. CASE of South Dakota. Will the Senator from Delaware repeat those figures? Am I to understand that out of 1,600 retirees from Government employment in the District of Columbia, over 200 are drawing both retirement pay and unemployment compensation?

Mr. WILLIAMS of Delaware. The Senator is correct. Out of that number, 45 of those claimants, or 15 percent, as disclosed by the survey of the Comptroller General, were drawing three or more types of Federal benefits. Five claimants, or 2 percent, were receiving four or more types of Federal benefits concurrently, and one of those individuals was receiving five types of Federal benefits concurrently.

I ask unanimous consent that there be printed at this point in the RECORD a report furnished by the Comptroller General, in which he shows the various pensions which are being paid under this system, along with the compensation payments.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

LABOR DEPARTMENT, BES, TEST OF UNEMPLOYMENT COMPENSATION PAYMENTS TO VOLUNTARY FEDERAL RETIREES WHO ARE RECEIVING RETIREMENT ANNUITIES AND OTHER FEDERAL BENEFITS CONCURRENTLY

The attached schedule shows the results of a test of unemployment payments to individuals in the District of Columbia who had voluntarily retired from Federal employment and were receiving retirement annuities, and who were also receiving other Federal benefits.

The test involved the 1,610 former Federal employees who received unemployment compensation in the District of Columbia during the week ended February 7, 1959. As already reported to the Congress in a report of April 26, 1960 (B–133285), 298 of the 1,610 claimants were voluntarily retired Federal employees who were receiving retirement annuities. Further tests were made to ascertain whether these 298 voluntary retiree claimants were also receiving any other Federal benefits. The number of cases checked and the results of the test are summarized below:

Type of benefit Feb. 7, 1959	Number of cases checked	Number of claimants receiving benefits	
		Number	Percent
Unemployment compensation	298	298	100
Civil service retirement	298	298	100
Social security [1]	240	27	11
Railroad retirement	298	2	1
Veterans compensation [1]	[2] 171	9	5
Veterans pension [1]	[2] 171	13	8
Military retirement	[2] 171	1	1

[1] Several claimants have been awarded benefits after Feb. 7, 1959, but these were excluded from the results shown.

[2] Checked males only.

The review of the 298 voluntary retiree cases shows that 45 claimants, or 15 percent, were receiving 3 or more types of Federal benefits concurrently. Five claimants, or 2 percent, were receiving four or more types of Federal benefits concurrently, and one was receiving five types of Federal benefits concurrently.

Federal unemployment compensation paid to voluntarily retired Federal employees who were receiving a Federal retirement annuity and also receiving other Federal benefits

Case No.	Age January 1959	Unemployment compensation received after retirement		Other Federal benefits received concurrently

Mr. WILLIAMS of Delaware. These cases are stated by number rather than by name because we did not think it was fair to publish the names. As a specific example I call attention to the case of one individual who retired voluntarily from the Government at the age of 62. He was drawing $437 a month civil service retirement pension. He was drawing a veteran's pension of $226 a month. In addition to that amount, he drew 34 weeks of unemployment, of $1,020. Other individuals are listed who were drawing as many as five different checks.

Mr. LAUSCHE. Mr. President, may I ask that the Senator from Delaware repeat those figures? I did not hear them.

The PRESIDING OFFICER. The Senate will be in order.

Mr. WILLIAMS of Delaware. I said that the Comptroller General's report refers to case No. 278. The individual involved was 62 years of age. He voluntarily retired from the Government. He drew $437 a month in civil service retirement pension. He was drawing $226 a month veteran's benefits and, in addition, he was awarded 34 weeks of unemployment compensation, or a total of $1,020. There were other cases such as that.

Mr. CASE of South Dakota. Mr. President, I doubt if those figures were heard by all Senators. I think the case he stated points up the need for the amendment offered by the Senator from Delaware. If I understood correctly, a man retired at the age of 62 voluntarily. He received $437 in civil service retirement, $226 additional in veteran's benefits, and then he drew 34 weeks of unemployment compensation. Is that statement correct?

Mr. WILLIAMS of Delaware. That statement is correct. The Comptroller General called to our attention in this survey that of the 1,610 former Federal employees who were retired Federal employees, 298 voluntary retirees were receiving a retirement annuity during this period and, in addition, were receiving unemployment compensation; 45 of those individuals were drawing 3 or more types of Federal benefits concurrently; 5 were drawing 4 or more types of Federal benefits concurrently; and one was drawing 5 benefits concurrently.

Mr. CASE of South Dakota. So the report of the Comptroller General indicates that 298 of the 1,600 retirees were drawing unemployment compensation, and that many of them were drawing several forms of Federal benefits?

Mr. WILLIAMS of Delaware. Two hundred and ninety-eight of them were drawing one or more in addition to unemployment compensation.

Mr. CASE of South Dakota. The statement of the Senator from Delaware certainly points up the need for a corrective amendment, and I hope that the amendment of the Senator from Delaware will be agreed to.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I shall, but I should like first to yield to the Senator from Kentucky [Mr. COOPER], to whom I promised to yield.

Mr. DIRKSEN. I shall take only 30 seconds.

Mr. WILLIAMS of Delaware. I yield to the Senator from Illinois.

Mr. DIRKSEN. I believe the Senate should pass judgment on this frightful abuse. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. COOPER. Mr. President, I should like to ask a question.

Mr. HUMPHREY. Mr. President, we would like to hear the Senator's question. We would like to hear what the Senator from Kentucky has to say. He is always very informative.

The PRESIDING OFFICER. The Senate will be in order.

Mr. COOPER. I would like to ask whether the Senator's amendment would take away any veteran's pension.

Mr. WILLIAMS of Delaware. The amendment exempts veterans' pensions. If the Senator will read the amendment, he will see that veterans over 65 are excepted; and also it exempts all disability benefits.

Mr. COOPER. Is there anything in the amendment which would reduce the compensation of a pension or a benefit paid to a veteran?

Mr. WILLIAMS of Delaware. Not on his veteran's pension.

Mr. COOPER. There is no case at all of that kind involved here?

Mr. WILLIAMS of Delaware. Only if it is a military pension. It would affect

a general, for example, because his pension would run pretty high.

Mr. COOPER. But it would not affect anyone else. Is that correct?

Mr. WILLIAMS of Delaware. The Comptroller General listed these cases. There are veterans' pensions for privates, and so forth. Then there are the military retirements, which are pensions paid to the regular military personnel. The latter would be included.

Mr. COOPER. The reason I ask the question is that it seems to me that any individual who receives a pension or compensation because of his war service ought not to have it taken away by virtue of the Senator's amendment. If the Senator assures me that there is no such case in which a veteran's benefit or compensation payment is affected——

Mr. WILLIAMS of Delaware. I cannot say of any kind, because, as I said before, there are the military retirees who are not disabled, who would be affected. Some of the military pensions run to $8,000, $10,000, and $15,000 a year. I am speaking of the so-called veterans' pension plan. Those are not affected.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. KEATING. What the Senator is referring to is not truly a veterans' pension.

Mr. WILLIAMS of Delaware. No. The Senator from Kentucky, however, referred to a veteran under any circumstances. Regular veterans' benefits are exempt, but certain types of military benefits are not.

Mr. KEATING. If a veteran were receiving retirement pay, it would affect the retirement pay.

Mr. WILLIAMS of Delaware. I am sure the point the Senator is interested in is protected. I wish to close the debate, because I think the situation is clear now. I emphasize that I am not directing any criticism against Government employees. There are many similar cases in private industry throughout the States. There is a case of one individual who is drawing more than $9,000 from a company. He retired and then was awarded unemployment compensation. That is the kind of situation we want to correct.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. PASTORE. We in Rhode Island pay a cash disability benefit to which an employee himself exclusively contributes, without any assistance from the employer. Would the amendment affect that situation in any way?

Mr. WILLIAMS of Delaware. Did I correctly understand the Senator to say disability?

Mr. PASTORE. Yes; disability.

Mr. WILLIAMS of Delaware. The amendment would not affect such a case.

Mr. PASTORE. We have a situation in Rhode Island of a person becoming incapacitated, and for that reason is unemployed, and there are certain marginal cases, in which there is justification for the collection of both, for the simple reason that in such instances it is more or less insurance, because the person himself pays for it without any contribution from the employer. Would the amendment affect that situation in anyway?

Mr. WILLIAMS of Delaware. I will answer that question in two sections. If the benefit which he is receiving is paid for by the employee and is not a company-contributing plan, it is not at all affected by the amendment. The amendment deals only with those instances in which there is a company contribution or employer contribution.

Mr. PASTORE. May I ask another question?

Mr. WILLIAMS of Delaware. There is another part to the Senator's question. Even if it is a beneficiary company pension plan in which the employer is a contributor or an employee of the U.S. Government under which the Government is a contributor, and that pension results from disability, it is likewise not affected. The amendment exempts such pensions. It exempts also those pension plans which are paid in full by the employee, because that is just the same as the case of an employee buying an insurance policy. The amendment has nothing to do with that type of plan.

Mr. PASTORE. So that we may properly establish a legislative history of this situation, I understand the Senator to say that under any circumstances when an employee makes a contribution on his own, without any assistance from the employer, on any plan of cash disability, or any hospital plan, that is not included in his amendment. Is that correct?

Mr. WILLIAMS of Delaware. That is correct. The amendment affects only those pension plans which are employer-contributed plans.

Mr. PASTORE. Will the Senator yield for one more question?

Mr. WILLIAMS of Delaware. I yield.

Mr. PASTORE. Was the amendment proposed to the committee?

Mr. WILLIAMS of Delaware. Yes; and it was approved in the committee. I would not want to say for certain, but I do not believe there was any objection to it in committee. The Secretary of Labor helped to draft the amendment to get in a form which would be workable. The Secretary of Labor said he recognized the problem. He thought it was one with which we should deal. However, I do not want to create any misunderstanding. He opposed the amendment on the bill because he was opposed to any amendments. In other words, he was not endorsing any amendments. I do not recall any objection to it in committee.

Mr. PASTORE. Is it fair for me to assume that all the amendment does is to eliminate an abuse?

Mr. WILLIAMS of Delaware. That is all it is intended to do.

Mr. PASTORE. I would like to help the Senator. I fought him as hard as I could for the elimination of previous amendments. I was happy that they were rejected. I believe that if we are to maintain the integrity of this program, it behooves all of us to remove this abuse. I shall support the Senator in his amendment.

Mr. WILLIAMS of Delaware. I thank the Senator.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. AIKEN. I would like to ask whether the Senator's amendment applies to a person who is drawing retirement benefits——

Mr. HUMPHREY. Mr. President, we cannot hear the Senator from Vermont. May we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

Mr. AIKEN. Would the Senator's amendment apply where the retirement pay was not adequate to live on, and where a person had taken a job?

Mr. WILLIAMS of Delaware. A man who is drawing retirement compensation, let us say, of $20 a week in a State which is paying $40 a week unemployment compensation, under my amendment would continue to draw the $20 retirement compensation. His unemployment compensation would be reduced by the amount of the retirement. So he would get the $20 in unemployment compensation, or in the difference. The reason we drafted it in this way was because we did not want to repeal any of the retirement benefits. We therefore provided for a reduction. In the case of a person drawing $60 a week in retirement, if the State were paying $45 in unemployment compensation, that person would not be eligible for unemployment compensation.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. CASE of South Dakota. What the Senator has just said, as I understood it, is that if the retirement benefit is less in amount than the unemployment compensation, the retirement compensation will not be reduced, but the unemployment compensation will be reduced, so that the total amount would be equal to the maximum that he could receive under unemployment compensation.

Mr. WILLIAMS of Delaware. That is correct. I conclude by just citing two more cases. I believe we have established the case. The Comptroller General called attention to two particular situations.

One case involved a single man. His take-home pay, while he was working, was $3,451 a year. That was his take-home pay before retirement. After retirement, and as a result of the additional tax benefits to which he was entitled, his take-home pay was $4,416, or $965 more income a year after he quit work and began to receive unemployment benefits than when he was working.

The second case was that of a married couple, both of whom were qualified for employment in the labor force and thus were entitled to unemployment benefits. While they were working, their combined take-home pay was $6,453 a year. After they retired, they had take-home pay of $7,418.

As the Senator from Rhode Island pointed out awhile ago, the Comptroller General emphasized that such cases are far in the minority; but they are abuses, and they act to discredit what should be

recognized as a useful and good program. I think it is important that we clean it up and close the loophole at this time.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. KUCHEL. I do not attempt to justify the type of example which has been read. However, suppose a person in the Senator's State or mine has retired, is over the age of 65, and is getting $60 or $70 a month. Under the law, he is permitted to engage in outside employment to the extent of $1,200 a year. Suppose he works sufficiently long to be able to build up some credits, so that he would be entitled to some unemployment compensation benefits. Would the amendment which the Senator now offers prevent him from getting the benefits he would have earned by his outside employment?

Mr. HUMPHREY. Yes, indeed.

Mr. WILLIAMS of Delaware. If the benefits he would earn outside would exceed the amount of his unemployment benefits, it would.

The amendment provides that the temporary extended unemployment compensation payable to an individual shall be reduced by the amount of the pension payments. If the pension to which he was entitled was $40 a week, and if California were paying him $45 a week in unemployment compensation, he could collect the $5 differential. If his pension were $30 a week, he could collect the $15 differential.

Mr. KUCHEL. What is wrong with a person who receives retirement benefits under social security, which are modest, taking advantage of his right to work each year to the extent of earning an additional $1,200 a year income, and then, becoming unemployed from that temporary additional work, receiving what I assume would be modest unemployment compensation benefits based upon the $1,200 a year extra compensation, without penalizing him? What is the theory behind that?

Mr. WILLIAMS of Delaware. If that were done where would it stop? How would the Senator from California propose to correct the situation of the individual to whom I previously referred, who was drawing approximately $750 a month in Government pensions from two different sources, but who voluntarily quit his job and at the same time made a claim for unemployment insurance?

Mr. KUCHEL. Why not make a distinction between a person who is receiving social security retirement benefits, on the one hand, and a person who receives retirement benefits from another system, above a certain level?

Mr. WILLIAMS of Delaware. The level is established by the unemployment compensation. After talking with the Comptroller General, we decided that this was the best kind of provision that we were able to draft. The first proposal was that the person should have an election. That approach was dropped.

Mr. KUCHEL. He could not draw $60 a week under social security.

Mr. WILLIAMS of Delaware. No; $60 a month. I suppose a change such as you propose could be made, but we do not want to amend the social security law, or the pension plans of various companies and of the Federal Government.

The only way in which the drafters of the amendment were able to prepare it was to provide that unemployment compensation in the respective States should be reduced by the amount of the pension which is received from an employer-contributed plan, with consideration being given in the compensation to veterans' pensions for those over 65, or any pension, even an employer-contributed pension, which comes as a result of disability.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. AIKEN. Does the Senator's amendment make any distinction between those who, as in the cases he has cited, retire voluntarily in order to get their fingers into several pies at the same time, and those who retire involuntarily, who wish they could keep on working and earning a living at their usual work?

Mr. WILLIAMS of Delaware. There is no legal way in which a distinction can be made, we were told, in such case. Presumably even those who, the Comptroller General said, had retired on a voluntary basis had to say when they applied for unemployment compensation that they were willing to accept another job, if it were available.

But how can the vice president of a company who is drawing $9,000 a year pension be assigned to another comparable job? How can a Government employee who has established eligibility for $470 a month civil service benefits—he must have had a top-level job—qualify to remain in the work force which he has quit?

The committee and the staff decided that this was the only way in which the problem could be approached, and this is the amendment they recommended.

Mr. AIKEN. I hope the Senator from Delaware catches the malefactors, who, as he has indicated, retire voluntarily and then try to collect several thousand dollars a year to which they are not entitled. However, I would not want to commit injustices on those who retire involuntarily on an income of $75 a month, and can hardly live on that sum, but are desirous of getting the little unemployment compensation to which they think they are entitled.

Mr. WILLIAMS of Delaware. They would get some. They could collect the differential during the actual period of time they were unemployed.

Mr. CASE of South Dakota. Mr. President, will the Senator from Delaware yield for a question?

Mr. WILLIAMS of Delaware. I yield.

Mr. CASE of South Dakota. It is a little difficult for me to understand the hypothetical case posed by the senior Senator from California. If I understood him correctly, the unemployment entitlement in California is $45 a week. If it is $45 a week, a person would be better off unemployed.

Mr. KUCHEL. The Senator from South Dakota is talking about the ceiling. That is not what a person who has been earning $100 a month will get.

Mr. CASE of South Dakota. When he works for $100 a month, he is getting only $25 a week.

Mr. KUCHEL. I am talking about a man who cannot make more than $1,200 a year in employable income after he retires. His benefits from unemployment compensation will be only a few dollars a month.

Mr. WILLIAMS of Delaware. The Senator from California has referred to an individual who under social security is making only $1,200 a year. Even if he is making $1,200, he is not unemployed.

Mr. KUCHEL. But when that man is out of a job, the Senator's amendment would prevent him from working.

Mr. WILLIAMS of Delaware. If he is working he is not unemployed.

Mr. KUCHEL. A person who makes $100 a month under the law of California is not entitled to $15 a week. A man who builds up some credit for unemployment compensation and then loses his job is entitled to only a few dollars a month in unemployment compensation.

Mr. WILLIAMS of Delaware. I have explained the amendment and have cited the abuses which it is sought to correct. At least a year ago the Comptroller General called this situation to the attention of Congress in one of his reports. He described it as a glaring abuse. It was called to the attention of the committee again this year. This amendment was accepted by the committee. I believe it is the nearest we can come to an amendment which would correct the abuse and not do injustice to any of the individuals concerned.

Mr. PASTORE. Mr. President, will the Senator yield for a question?

Mr. WILLIAMS of Delaware. I yield for a question.

Mr. PASTORE. The Senator keeps repeating "where a person voluntarily leaves his employment." I understand it is basic in the law that there must have been a compulsory discharge. In other words, if a person voluntarily leaves his job, under the concept of this law he is not unemployed.

Mr. WILLIAMS of Delaware. The Senator from Rhode Island is partially correct.

Mr. PASTORE. Will the Senator from Delaware show me where I am partially incorrect?

Mr. WILLIAMS of Delaware. The Comptroller General was speaking, in connection with the case before the committee, of voluntary retirement from the Federal Government.

Mr. PASTORE. When a person voluntarily retired, under this law he would not be entitled to receive unemployment compensation.

Mr. WILLIAMS of Delaware. No, Mr. President, the Comptroller General referred to persons who retired voluntarily, who quit their jobs with the Federal Government, and he cited 298 cases in which such persons had done just that. They voluntarily retired at permissible age; they elected to take their civil service retirement benefits. Then they

would go to the Unemployment Compensation Board and would say they had decided to go to work again. Naturally they could not get their old jobs back. In that event they were, by their own election, back in the labor force. In the District of Columbia, in many such instances, payments are withheld for 4 or 5 weeks for what is called a waiting period, and then they can draw unemployment compensation because they say, after voluntarily retiring, that they have elected to go back to work. Those were cases in the District of Columbia.

Mr. HUMPHREY. Mr. President, if ever there was a time when this body should not legislate Federal standards—and that is what is proposed right now—it is tonight. But that is exactly what the amendment proposes to do—namely, to change the State laws of 28 States. Twenty-two States have laws which relate somewhat to the question of adjusting the unemployment compensation benefits, on the basis of the pensions received. There are 28 States which do not have such laws.

The Senator from Delaware has cited as evidence the cases of a number of Federal employees covered by the inspection of the Comptroller General—Federal employees who voluntarily retired after earning their benefits under laws established by the Congress, and who may have retired because of a desire to take other employment. Perhaps they needed employment which would be more gainful; perhaps they had sickness in their family, or had some other family problem which required greater income. So they retired, and took a partial pension—which can be done under what may be called the accelerated retirement plan. Then the employee got a job—which undoubtedly was needed, because I do not find that most people are so much under a compulsion neurosis to work themselves to death that if they have an adequate pension, they will search for work, just for the love of working.

So that person took a job. But later he lost his unemployment compensation benefits because, as the Senator pointed out, in private employment one is not qualified to receive unemployment compensation unless he loses his job either because of a failure to have enough work or because the employer dismisses him.

The Senator from Delaware has said he has been able to dig up a few such cases. He cited two of them, and then he cited two more. But millions of people in the country today draw pensions, most of which are inadequate. Let me say that certainly the employees are not overburdened with pension funds. If such persons were caught up in the present unemployment situation, some of them, who would be entitled to receive temporary unemployment compensation, up to a maximum of 13 weeks, would—under this proposal—have that unemployment compensation reduced by the amount of their pension payments, unless they were payments for disability or for veteran's pensions.

I submit that such a step would rewrite State law; and all the "States righters" should stop and think what they are doing.

A moment ago there was a big hue and cry about Federal standards; but now, when there is proposed a Federal standard which would downgrade the program, some would vote for it.

I submit that if anyone can show me 100 cases, out of the 180 million Americans, in which the persons involved are getting rich out of unemployment compensation, I will apologize publicly to the Senate.

What kind of nonsense is this?

Mr. PASTORE. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield.

Mr. PASTORE. I submit to the Senator from Minnesota that it is not nonsense at all. The one thing which will destroy the program is the abuse perpetrated on the part of the few, which makes matters extremely difficult for the many.

First of all, we acted on the amendment which we have already defeated, tonight—with my help, and I am glad of it—which would have made this a State affair. But it should not be a State affair; and that is why I voted as I did.

Now it is proposed that we have this big reservoir from which all may draw, because otherwise it is an inequitable hardship to adding insult to injury to a State which already is suffering from widespread unemployment.

The point is that if a person is not entitled to receive these benefits, which are being contributed exclusively by the employers—the employees not having made any contribution to them—if we are to allow personal expropriation and profiteering by a few and if we allow those few thus to reduce the fund and make it unstable, then I am afraid we are laying the foundation for destruction of the nobility of the program.

No one has worked harder for liberalization of unemployment compensation than I did when I was Governor of my State. But at the same time I fought hard to eliminate all abuse.

I say to the Senator from Minnesota that if such an abuse exists, I do not think we should attempt to dress it up in a lot of fancy phrases. An abuse is an abuse; and if a person is receiving more than he is entitled to, he is taking that money out of the pocket of someone else; and that is absolutely unfair.

Mr. HUMPHREY. Mr. President, the Senator from Rhode Island makes a very persuasive argument; and because he is a man of fact and of deep conviction, no Member of this body would contest the work he has done either as Governor or as Senator. But if, to correct 500 cases of abuse, 1 million or 100,000 or 200,000 persons will be hurt, it seems to me that is very poor equity.

A while ago the Senator from California brought up a very plausible case, but the figures were a little inaccurate. Some talked of $60-a-week old-age pensions. Where? Up with sputnik? And there was talk of $40-a-week old-age pensions. Where? In America?

We are talking about people who are lucky if they get $70 a month, or people who, if they get $100 a month, are said by some persons to be on the gravy train.

If those people get a pension, and then qualify for unemployment compensation, under this amendment they would have their employment compensation reduced by a proportion of the pension.

I submit that I could not agree more with the Senator from Rhode Island. I do not want to see someone ride a gravy train and receive $900 a month if he is not supposed to, or receive $400 a month, and then get unemployment compensation. But for every case of that sort which might be shown, I can show, out in the States, many, many cases in which those who are receiving old age assistance payments and old age pensions—I refer to those who have gained new jobs and have qualified under the credit system in their States—would, under this proposal, have their unemployment compensation reduced, and they would be made second-class citizens.

I have been told many times that the States know best; they have a better idea. There have been 25 years of experience under this program.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. MANSFIELD. I took it on myself to ask the Secretary of Labor, Mr. Arthur Goldberg, about the amendment. This is what he has to say, and it applies to what the Senator from Minnesota has been saying about the matter:

> The amendment to reduce from the Federal benefits provided by the bill amounts of retirement payments to workers imposes a Federal standard in a temporary bill. It has always been the accepted principle that any temporary Federal payments should follow the eligibility and disqualification provisions of the State laws. The amended bill is in this respect a departure from this principle. Moreover it introduces noninsurance features in an insurance program, and as the figures I presented at the hearings show, the problem is so small as not to justify the amendment proposed.

That is the end of the quotation from the letter written by Secretary of Labor Goldberg insofar as his opinion on this particular proposal is concerned.

Mr. HUMPHREY. One final word. I know my colleagues are tired and want to come to a vote. The information I received on this subject—and I checked into the question last night and today—is this: I do not claim to be an expert on it. I do not assert that there are not abuses under existing law. There are other abuses under the law. It is pretty hard for people to live on the little amount received under unemployment compensation benefits. Some of my colleagues are willing to impose uniformity so far as pensions are concerned, but are unwilling to impose Federal standards on benefits or duration, asking that every State have the same standards as California or New York, or other States. They will not do that. Now that the Senator from Delaware is able to obtain from the Comptroller General examples of abuses in cases of Federal employees who have retired. I call attention to the fact that Senators increased the pension allowances.

They are the pensions the Congress put those employees under. At age 62

they voluntarily retire. Then at age 62 and 1 month, they get a private job, and qualify under the law for unemployment compensation benefits, and it is found that they are receiving $400 pension from the Government, and, in addition, receiving unemployment compensation benefits after they have lost their private jobs. What some Senators are saying is, "We are going to get that fellow. He is hurting the system." But, in the meantime, while we are hurting him, we are going to get somebody else who may receive a pension from his former company, or under social security, and we are going to see to it that his unemployment compensation is reduced proportionately.

Mr. President, I do not deny that there are violations or weaknesses under the law. I suggest to Senators who believe the States ought to establish standards that they permit them to do so, unless they want to start federalizing the program. After 25 years of experience, we have found that fewer than half of the unemployment compensation laws have disqualified beneficiaries or have reduced unemployment compensation benefits to them. I remind my colleagues tonight that, in 25 years' practice, less than half the States have imposed the principle which is being asked for tonight by the Senator from Delaware.

Furthermore, of the less than half of the States that do impose some disqualifications, in half of those States the reduction applies only to unemployment compensation based on employment from which the pensioner has retired.

Mr. President, my case is quite simple. In order to correct an abuse which can be revealed, I do not think we wish to throw out not only the wash water, but also the baby. That is in a sense what we would be doing.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. AIKEN. First let me say I wish the Senator from Minnesota had been as right on the last amendment as he is on this one.

Mr. HUMPHREY. I thank the Senator.

Mr. AIKEN. When a person retires after 30 years' employment, his retirement benefits are in the form of deductions from his earnings over the period of 30 years. I think the deduction for Federal employees is 6 percent now. That amount of money does not belong to anybody else but the retired employee.

Mr. HUMPHREY. The Senator is surely correct in that statement. May I add that, under social security, the employee has to pay into that fund.

Mr. HOLLAND. Mr. President, in the first place I call attention to the fact that the General Accounting Office, and not the Senator from Delaware, not even the committee, which has unanimously voted this amendment into the bill, is the one that first called the Senate's attention to the abuses which even the Senator from Minnesota has stated to be existing abuses. There is not any question that they do exist. I cannot see, from a reading of the legislation as proposed in the amendment, how it will affect any person unless it can be shown, as to him, that the abuse exists.

Having established the General Accounting Office as an arm of the legislative branch, to advise us when it finds matters going wrong in connection with the expenditure of public money, I wonder whether we are going to be deaf to its report.

Next, Mr. President, I thought it was interesting to hear the Senator from Minnesota talk about States rights. We do not change any aspect of the States rights situation by the amendment, because any State, including the District of Columbia, which can pay under its law, can continue to pay under its law. We do not undo that law. We do not affect a single person who is brought under that law, in any respect. We simply say that, as to tax money raised in other States and from employers in other States, we do not think it is fair or equitable or just to ask them to pay taxes to be paid out to persons who are abusing the legal objectives of the law in their own States. That is all there is to it.

I think we are indebted to the committee and to the Senator from Delaware and to the General Accounting Office for having called our attention to this matter.

I close by saying we are not interfering, in the slightest jot or tittle, with a State or District law. Insofar as the amendment operates, under its own fund, as to its own people, it will continue to operate. We are only saying that we should heed the advice and warning coming from the General Accounting Office that there are abuses, as indicated even by the Senator from Minnesota, and that wherever abuses exist, we do not think money raised from employers in other States where the problem does not exist should be paid to persons who are practicing those abuses.

That is how simple the question is. I think the amendment should be adopted.

Mr. HUMPHREY. Mr. President, I merely wish to say that the distinguished Senator from Florida would have made a much more eloquent argument if he had made the argument at the time of the consideration of the Federal unemployment compensation bill of 1954, when this issue was before us. Such conditions were not imposed in that act at all. Nor were they imposed in 1958.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. HOLLAND. Was there any question at that time of the Federal Government's considering the raising of tax money from other States to be used to meet the inability of any State to pay its own unemployment compensation?

Mr. HUMPHREY. The Federal Government was imposing the tax. I also say to the Senator from Florida that when the Federal Government imposes a tax, it is a Federal tax. I add further that there is nothing whatsoever which compels any State under this bill, if the amendment is taken out, to abuse the legal rights of any citizen or its own law. There are 22 States that have decided to impose qualifications. Twenty-eight States disagree. If we want to rewrite the law for 28 States, States that are represented by Senators in this Chamber, I think this temporary unemployment compensation measure gives us the opportunity to do tonight.

Mr. WILLIAMS of Delaware. Mr. President, I point out to the Senator from Minnesota that the reason why this proposal was not considered in 1954 and 1958 was that many Members of the Senate, including myself, did not know about it. The General Accounting Office called attention to it on January 20, 1960. This is the first time we heard of it. Before we drown in the crocodile tears of the Senator from Minnesota over the matter of States rights or work standards, I call attention to the fact that the proposal is applicable only to the extent benefits provided in the bill the Senate is considering tonight will be financed by Federal funds.

Mr. HUMPHREY. Mr. President, will the Senator agree with me that it applies to those persons who receive old-age insurance?

Mr. WILLIAMS of Delaware. The amendment will apply——

Mr. HUMPHREY. Will the amendment apply to those who are recipients of old-age insurance?

Mr. WILLIAMS of Delaware. Surely.

Mr. HUMPHREY. Very well. If Senators wish to cut down people receiving the old-age insurance, I say to my colleagues, let that rather dubious responsibility rest on their shoulders.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 10, after line 10. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll, and Mr. AIKEN voted in the negative when his name was called.

Mr. DOUGLAS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOUGLAS. What is the precise question before the Senate?

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 10, after line 10, to insert language relating to "limitation on payments of compensation to individuals entitled to retirement benefits."

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk resumed and concluded the call of the roll.

Mr. HUMPHREY. I announce that the Senator from Alaska [Mr. BARTLETT], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Oregon [Mr. MORSE], the Senator from Utah [Mr. MOSS], the Senator from Georgia [Mr. RUSSELL], and the Senator from Alaska [Mr. GRUENING] are absent on official business.

I further announce that the Senator from Texas [Mr. BLAKLEY] is necessarily absent.

I further announce that, if present and voting, the Senator from Texas [Mr.

BLAKLEY], the Senator from Georgia [Mr. RUSSELL], and the Senator from Arkansas [Mr. FULBRIGHT] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Colorado [Mr. ALLOTT] is absent because of death in his family.

The Senator from Vermont [Mr. PROUTY] is absent by leave of the Senate because of illness.

The Senator from Kentucky [Mr. MORTON] and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent. If present and voting, would each vote "yea."

The result was announced—yeas 51, nays 38, as follows:

[No. 17]

YEAS—51

Anderson	Dirksen	Miller
Beall	Dworshak	Monroney
Bennett	Eastland	Mundt
Boggs	Ellender	Pastore
Bridges	Ervin	Pell
Bush	Fong	Proxmire
Butler	Goldwater	Robertson
Byrd, Va.	Hickenlooper	Schoeppel
Byrd, W. Va.	Holland	Smathers
Cannon	Hruska	Smith, Maine
Capehart	Johnston	Stennis
Carlson	Jordan	Talmadge
Case, S. Dak.	Keating	Thurmond
Church	Kerr	Wiley
Cooper	Lausche	Williams, Del.
Cotton	Long, La.	Yarborough
Curtis	McClellan	Young, N. Dak.

NAYS—38

Aiken	Hayden	McGee
Bible	Hickey	McNamara
Burdick	Hill	Metcalf
Carroll	Humphrey	Muskie
Case, N.J.	Jackson	Neuberger
Chavez	Javits	Randolph
Clark	Kefauver	Scott
Dodd	Kuchel	Smith, Mass.
Douglas	Long, Mo.	Sparkman
Engle	Long, Hawaii	Symington
Gore	Magnuson	Williams, N.J.
Hart	Mansfield	Young, Ohio
Hartke	McCarthy	

NOT VOTING—11

Allott	Gruening	Prouty
Bartlett	Morse	Russell
Blakley	Morton	Saltonstall
Fulbright	Moss	

So the amendment was agreed to.

Mr. DIRKSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WILLIAMS of Delaware. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The LEGISLATIVE CLERK. On page 14, line 18, it is proposed to insert the language down to and including line 22, as follows:

Such information shall include data (which may be procured on a sampling basis) relating to the personal characteristics, family situation, employment background, and experience under this Act of individuals found to be entitled to temporary extended unemployment compensation.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The LEGISLATIVE CLERK. At the top of page 25, it is proposed to insert section 14, as follows:

SEC. 14. Notwithstanding the limitation contained in subparagraph (A) of paragraph (1) of subsection (c) of section 901 of the Social Security Act, the Congress may make available for grants to States under such paragraph (1), for fiscal years ending June 30, 1961 and June 30, 1962, an amount which shall not exceed $425,000,000 for each such fiscal year.

Mr. BYRD of Virginia. Mr. President, this amendment was requested by the Secretary of Labor in order to increase the ceiling on administrative expenses from $350 million to $425 million.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. WILLIAMS of Delaware. Mr. President, have all the committee amendments been disposed of?

The PRESIDING OFFICER. All the committee amendments have been disposed of.

Mr. WILLIAMS of Delaware. Mr. President, I offer an amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 19, lines 14 and 15, strike out "1963 and 1964", and insert in lieu thereof "1962 and 1963".

On page 20, line 7, strike out "(as of December 31, 1964)" and insert in lieu thereof "(as of December 31, 1963)".

On page 20, line 12, strike out "December 31, 1964" and insert in lieu thereof "December 31, 1963".

On page 20, line 23, strike out "1964" and insert in lieu thereof "1963".

On page 20, line 25, and page 21, line 1, strike out "1962 and 1963" and insert in lieu thereof "1961 and 1962".

On page 21, line 4, strike out "1962 and 1963" and insert in lieu thereof "1961 and 1962".

On page 21, line 9, strike out "1964" and insert in lieu thereof "1963".

On page 24, line 24, strike out "1962 and 1963" and insert in lieu thereof "1961 and 1962".

Mr. WILLIAMS of Delaware. Mr. President, the amendment merely proposes to change the effective date of the tax. The bill before us, with the Byrd amendment defeated, proposes to start the tax levied at four-tenths of 1 percent for the calendar years 1962 and 1963. Under the House bill the tax would be paid on an annual basis, or after the close of the calendar year. Thus under the House bill none of the tax would be paid into the Federal Treasury until after January 1963. Under the proposed amendment we would advance that date to make the tax effective immediately for this calendar year, and half of the tax would then go into the Federal Treasury next January.

Under the bill as it is now before us, there is provision for approximately $1 billion for extended unemployment benefits. Approximately $1 billion in benefits would be paid out prior to June 30, 1962. If the amendment is not adopted we shall have passed a bill authorizing the payment of $1 billion in benefits by June 1962, and we shall not have collected one dime in tax to repay the amount paid out until 6 months after all the benefits under the bill have been paid. Certainly, if Senators favor the proposed program, they are ready to place a price tag on it. If we voted for the measure let us go back home and say that we voted for the benefits but we also voted for the tax. Let us not have any deferred payment proposal in the measure.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. DIRKSEN. Could the amendment properly be called a pay-as-you-go amendment?

Mr. WILLIAMS of Delaware. That is exactly what the amendment is. It is a pay-as-you-go amendment. I cannot conceive of any objection to the amendment, but if there is objection I wish a yea-and-nay vote. If we could agree to the amendment without such a vote, I would be perfectly willing.

I emphasize that the amendment would not affect the bill in any way, shape, or form, except that it would advance the tax so that it would be effective immediately. Of course, it likewise advances the refund basis by 1 year, because that would be available 1 year sooner under the proposed amendment.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield to the Senator from Louisiana.

Mr. LONG of Louisiana. Can the Senator from Delaware tell me on what date the first tax payment for a year falls due?

Mr. WILLIAMS of Delaware. Does the Senator refer to the provision of the amendment?

Mr. LONG of Louisiana. Under the amendment.

Mr. WILLIAMS of Delaware. Under existing law there is a 3.1 percent tax, of which 0.4 of 1 percent is a Federal tax. The 0.4 of 1 percent Federal tax is due at the close of each fiscal year. So the remainder of the tax which is 2.7 percent, is payable quarterly, but the 0.4 of 1 percent increase which is provided in the bill as an increased tax to finance the bill is attached to the present 0.4 of 1 percent Federal tax. Therefore, if the House bill were not amended, no tax would be collected for the Federal Treasury until after 1963, or 6 months after all the benefits had been paid out.

Mr. LONG of Louisiana. When would the amendment of the Senator from Delaware cause the money to be due?

Mr. WILLIAMS of Delaware. Employers would pay the money starting next January on their payroll for the calendar year 1961.

Mr. LONG of Louisiana. As a Senator who runs for office next year, my reaction is, as I stated when this suggestion was discussed in the committee,

that we ought either to make the payment effective immediately or make it effective after the next election.

If I were proposing the amendment, I might make the payments effective before the election, preferably 2 months; but if I could not hit it exactly on that date, I would try to make it effective as close to that date as possible. I will say that the Senator has not missed that date very far.

Mr. WILLIAMS of Delaware. The amendment would apply to the full payroll of the calendar year 1961 and would be payable before the 1962 elections.

Mr. MANSFIELD. Mr. President, it is with great reluctance that I take the position on this bill which I now do. I have the greatest respect for the fiscal acumen of the distinguished members of the Finance Committee and their able chairman, the Senator from Virginia [Mr. BYRD]. These men know their arithmetic, their bookkeeping. They are the financial experts of the Senate.

But I must most respectfully suggest to the Senate that the problem of unemployment which is the subject of the bill before us is not solely an unfettered question of arithmetic. It is not solely a problem of bookkeeping.

It is also a problem of human hardship, of human anxiety on a massive scale. This problem exists not in some faraway land, not in India or Korea or Formosa or elsewhere abroad, for which we have voted billions upon billions of dollars in the past. This is a problem of human hardship, human anxiety, here in our own midst. It is real hardship; well-founded anxieties affecting millions, in Detroit, in Pittsburgh, in Butte, in West Virginia, in California, in every State of the Union.

When we talk about the pending bill, we are not talking solely about equalization formulas, or whatever, or about retroactive payments which will be imposed on businessmen under the pending amendment if it is agreed to. We are also talking about American breadwinners out of work, American women wondering where the rent money is coming from or the children the next meal. That is the situation which stares millions of Americans directly in the face and all of us indirectly even though we may be less aware of it in the comparative insulation of this depression-proof city. That situation, that human situation is not going to express itself in one mathematic formula or another over which we may argue. But it is there, nevertheless. It is at the very heart of the problem. It is urgently and immediately involved. All over the Nation, Americans are running out of the right to the small benefit which they now draw from the unemployment insurance system. And all over the land, States are running out of funds with which to continue these benefits.

That is one part of the question which is not reflected in the Finance Committee's draft of this bill: its urgency. There is another: How shall this Nation react to a crisis which affects most immediately and most severely a great body of its citizens in only a scattering of the States? We can answer this question best, I believe, by asking other questions. What do we say when the Mississippi overflows its banks? Do we say that the suffering which follows is a matter solely for the States along the river edge or do we act swiftly as a Nation—a Nation of 50 parts, intimately concerned, one with the other, to rush help through the Federal Government to the stricken area? What do we do when a runaway production of corn, cotton, or peanuts or feed grains or whatever overwhelms the capacities of any single State? Do we say—the rest of us—that is a problem for Iowa or Kansas or California or Wisconsin or Georgia or South Carolina and turn our backs on it? Or do we, as Americans, recognize the problem as national and take money from California, New York, Pennsylvania, Washington, and all the States to deal with it?

Is there a Member of the Senate who would say that the problem is less acute, less national in its dimensions, when the crisis is one of men cut adrift by economic forces rather than houses torn loose from their moorings in a flood? When the surpluses are human muscles and brains, unused in unemployment, rather than corn or peanuts or wheat which go unconsumed?

Is there a Member of the Senate who believes that the rest can go on supremely indifferent to an economic crisis in the automobile industry, the steel industry or in mining or in textiles because they do not have these industries in their States? Are we a nation, for better or worse, for the good as well as bad or are we not? Let each State individually seek only the good, only the better for itself and turns its back on the situations of the others and it will not be long before all shall suffer the bad, the worst. I repeat the quotation I read to the Senate when the President first sent a message to the Congress on the problem of unemployment, when he made it the most urgent matter of business of the new administration:

> Never send to know for whom the bell tolls; it tolls for thee.

The point, Mr. President, which I have tried to make is that the problem of persisting unemployment and how to deal with it is not mere arithmetic. It is that, to be sure, for the money we pay to the unemployed has to come from somewhere. But the House version of the bill provides for that no less than the Senate and it provides for it in a form closer to that which the President has sought. To be sure, there are problems of equity in financing and other subjects which the Senate Committee version touches upon and with which the President has promised to deal in full in the near future.

There will be time enough, when the President proposes basic revisions, for the Committee on Finance to reshape the mathematics of the unemployment system in a more effective and equitable fashion. That time is not now. The circumstances are not now. We are in an emergency in the matter of unemployment and I hope that the Senate will recognize it and act on it.

I hope also, in view of the urgency which confronts us at this time, that there will be no serious delays. I assure the Senate that if the bill is passed, and agreed to by both Houses and presented to the President, it will not be long before these people, 700,000, at least, who have now run out of unemployment benefits, will be given the help and succor which in this modern day and age are not only their due, but also their right.

Mr. WILLIAMS of Delaware. Mr. President, I will take only a moment to say that the adoption of the amendment would not delay the enactment of the bill. The bill will go to conference anyway; that was a foregone conclusion. There was a Senate amendment which was requested by the Secretary of Labor which was necessary in order to finance the administrative costs of the bill. The Senate has just unanimously adopted that amendment. Of course it did not adopt my first amendment unanimously, but it did adopt the other amendment unanimously.

The adoption of the pending amendment therefore has nothing whatever to do with delaying the enactment of the bill. Therefore, the point of the Senator from Montana is not very well taken. Why do Senators want to postpone the payment of the billion dollars in benefits? Why do they want to delay the payment of the tax until after the 1962 election?

Mr. President, surely the pending bill is not being presented as a pump priming operation. If it is, let the administration label it in that way. Let us have the RECORD clear on that point. However, if the bill is for the benefit of the unemployed in America, as it is intended to be and as it should be, then let us vote the tax effective the same day. Let those who go back home and say, "We have given you these benefits," also go back home and say, "We have raised your taxes."

We will be paying out $1 billion in benefits between now and next June 30 if the pending amendment is not adopted. The only way in which we can get the money with which to make a single payment is by borrowing it.

I say we do not have the surplus in the Treasury. We are already operating under a deficit which is increasing every day. If the Congress does not want to pay for these benefits we should stop advocating them and stop voting for them.

I say that the pending amendment should be adopted. I say we should start paying for these benefits now because if we do not adopt this amendment we will be paying out a billion dollars in benefits without putting up a single dime until 1963, or 6 months after the benefits are supposed to be paid.

I ask the Senator from Montana where he is going to get the money to finance the program contemplated in the bill if he is not willing to accept this amendment.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. CASE of South Dakota. The Senator from South Dakota may be facing the voters in 1962, and he would like to say to them that we have put this

program on a pay-as-you-go basis. I would like to ask for the yeas and nays.

Mr. DIRKSEN. Before that is done——

The PRESIDING OFFICER. Is the request sufficiently seconded?

The yeas and nays were ordered.

Mr. DIRKSEN. Mr. President, I was tearfully touched and deeply impressed by the eloquent speech of my beloved friend from Montana. He did not mention the amendment. Is he going to vote for the amendment?

Mr. MANSFIELD. I am not. I did mention the amendment. I think the amendment would place an imposition on the businessmen of the country by making it retroactive.

Mr. WILLIAMS of Delaware. Under the amendment we would be telling the businessmen about the cost. Sure, we would be putting a tax on them, but they are going to have to pay this bill. The only difference is the Senator from Montana wants to postpone the tax until after the next election. The proponents would be paying out the benefits and bragging about them, but at the same time kidding the businessmen that it is not going to cost them anything.

Mr. DIRKSEN. We have fallen into the Christmas habit of fiscal irresponsibility of buy now and pay later. The amendment has no impact on the benefits of the bill. All it does is to provide that we will pay as we go.

Mr. WILLIAMS of Delaware. If we do not adopt the amendment there will be no money provided in the bill with which to pay for the benefits. The only way the Secretary of the Treasury can get the money is by borrowing it. We will have to increase the national debt, and we will have to borrow the money and pay interest on it.

If the purpose is to charge employers, and if this is an employment tax, let us impose it and be honest about it. Let those who go home and boast that we voted a billion dollars of benefits also tell about the billion dollars in taxes.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. DWORSHAK. If we have reached the point where we admit our insolvency and are unable to finance these programs, which admittedly are very desirable, is it not possible that we can invoke a reverse foreign aid program and ask the nations which have been the beneficiaries of our largess during the past decade to step in during this emergency and help us to finance our needs of the hour?

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Delaware [Mr. WILLIAMS]. The yeas and nays have been ordered.

Mr. GORE. Mr. President, I am one who feels that the condition of our economy is not such that we should enact a general tax reduction. Many economists, many leaders, many businessmen, think that it would be wise and advisable to provide a general tax reduction now. Indeed, the President of the United States has said he will reconsider the question after April 1. For whatever my opinion is worth, I have advised against a general tax reduction.

What is being proposed by the amendment is to take $450 million or $500 million out of the economy in the year 1961. As a small businessman, I know what the businessmen do. The distinguished Senator from North Carolina knows what businessmen do with respect to their tax liabilities. They begin to set them aside. Yet, during the very year when under a new and vigorous leadership we are trying to break the back of this recession, it is suggested that we impose a repressive tax on the very men who must provide the jobs.

Mr. ERVIN. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. ERVIN. I do not know whether the Senator was referring to me or to my colleague from North Carolina, who knows much more about matters of finance. However, is it not a fact that if we do not impose a tax and start to collect the tax at the earliest possible moment, instead of doing a favor to the businessman, we shall be imposing on them, in addition to the amount of the outlay for unemployment compensation, the burden of paying interest on the money that we expend before we start to collect the taxes?

Mr. BRIDGES. That is correct.

Mr. GORE. If the Senator from North Carolina asks me if it is fair and equitable to require those who employ people to bear the full burden of unemployment relief, I must say to him, in all candor, that I do not think it is fair. I think we go too far in that regard. This is an obligation of the entire society. But that is not the question here. The question here is whether we will apply the tax for the year 1961, one quarter of which has just about passed, therefore making the tax retroactive in character; or whether we will begin the application on January 1, 1962, when we hope that the condition of our economy will be greatly improved.

I am not posing as an economist, but I say that if we take from the spending stream approximately as much as we expect in benefits, then economically it seems that we have pretty well washed the situation out in the year 1961 as an antirecession measure.

Mr. MANSFIELD. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. MANSFIELD. What the Senator has said is correct.

Will the Senator tell the Senate just how much, for example, the automobile dealers, the automobile manufacturers, and other businessmen in the State of Michigan have to pay?

Mr. GORE. I have not the figures as to a particular State, but I am advised by the staff that the overall total take from employers by the Williams amendment for the year 1961 would be from $450 million to $500 million. That is a very heavy burden in a year when we are trying to break the back of a recession.

Indeed, the President of the United States has said he will soon submit to Congress recommendations for a tax incentive or some tax relief for businessmen, to enable them to expand and improve their production facilities. Yet we have before us tonight an amendment—which, incidentally, we have already voted down once; it was a part of the Byrd amendments—to add a burden of approximately half a billion dollars on the businessmen of the country.

Mr. MANSFIELD. It is my impression that business in general in Michigan is probably taxed higher than business in any other State in the Union; and taxation has just about reached the limit of possibility.

I point out that the administration agreed to go along with the method of financing proposed by the House Committee on Ways and Means in the interest of reducing the area of controversy concerning the bill and to assure the prompt passage of the much needed program.

The bill as passed by the House and agreed to by the Administrator met generally the suggestions made by representatives of the employer groups who testified at the hearings before the House committee, and seemed acceptable to all interested groups at that time.

Mr. BUTLER. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. BUTLER. Does not the bill itself contain a retroactive provision? Does it not levy a tax to reimburse States which have already paid out their money?

Mr. GORE. The tax under the bill as it is now before the Senate would be levied as of January 1, 1962.

Mr. BUTLER. But the purpose of the tax is to reimburse some of the States for payments which have been made.

Mr. GORE. Mostly for the payments we hope will be made.

Mr. BUTLER. But it does contain that feature. Some of the States which have already made payments will be reimbursed under the tax. So we are levying a tax beginning a year from now to reimburse States for payments which were made last year.

Mr. GORE. The Senator's statement is correct.

Mr. BUTLER. So the bill already contains a retroactive provision. Therefore, why gag at retroactivity so as to make the plan a pay-as-you-go plan?

Mr. GORE. The Senator is correct as to payments, but he is incorrect in his statement about the retroactivity of the tax provision.

Mr. BUTLER. If we do not levy the tax, the simple question is, where are we to get the money?

Mr. GORE. I suppose that is a question which every Senator must ask himself in connection with every bill which comes before Congress.

Mr. BUTLER. I think it would be well if we did.

Mr. GORE. Here is a provision for unemployment relief. The recommendation is that the tax apply not last January, but next January, and that it be paid fully. This provision is not pay as you go; it is pay before you go.

Mr. BUTLER. It is my understanding that no payment will be paid under either version of the bill—the House

bill or the Senate bill—which would require any payment of tax prior to January of 1963. Is that correct?

Mr. GORE. It is not correct.

Mr. BUTLER. It is correct, is it not?

Mr. BYRD of Virginia. That is correct.

Mr. GORE. As the bill now reads, the tax on payrolls begins in 1962.

Mr. BUTLER. It starts in January 1962, and is collected in January 1963.

Mr. GORE. I think we agree if we understand each other. The liability would begin as of January 1, 1962. The payment of that liability would be on January 1, 1963.

Under the WILLIAMS amendment, the liability would begin with the wages that have already been paid as of January 1, 1961, and payment would be due on January 1, 1962. So there is a difference of 12 months in this amendment.

Mr. BUTLER. It is proposed to tax the employer for payments made 6 months ago.

Mr. BYRD of Virginia. This tax dates back to July 1 of last year, for those who had exhausted their benefits.

Mr. GORE. Does the Senator mean the payments?

Mr. BYRD of Virginia. Yes. The Senator from Maryland is absolutely right about that.

Mr. GORE. I agree about that.

Mr. BYRD of Virginia. No payment is proposed to be made until January 1, 1963. It will not be a payment in advance.

Mr. GORE. There is no disagreement about the facts. I concur in the statement the Senator from Maryland made about the payments.

Mr. BYRD of Virginia. The Senator from Tennessee said it started on January 1 of this year. But it actually goes back to January 1 of last year, for those who had exhausted their benefits.

Mr. GORE. I think the Senator understands, as I do——

Mr. BYRD of Virginia. I am speaking of the payments.

Mr. GORE. Very well. We understand about the payments. I agree with the Senator. Now let us speak of the tax.

Mr. BYRD of Virginia. There must be a tax, in order to be able to provide the payments.

Mr. GORE. Will the Senator state when, under the bill, as it is now before the Senate, the wages paid by employers will be subject to the added tax?

Mr. BYRD of Virginia. When the benefits are exhausted, beginning the first of last July.

Mr. GORE. No, I am speaking of the taxes.

Mr. BYRD of Virginia. The taxes will not be paid, under the present bill, until January 1, 1963. The Williams amendment provides for payment on January 1, 1962.

Mr. GORE. So there is a 12-month difference.

Mr. BYRD of Virginia. That is right; but the money will already have been paid out.

Mr. GORE. Then the question before the Senate is whether the tax will be applied to the wages paid in the calendar year 1961 or whether the tax will begin to be applied to the wages paid in 1962. Those are the facts, and we are agreed.

I say it is very questionable—in fact, I go further, and say that in my humble opinion it is unwise—to place an additional $450 million or $500 million burden in the year 1961, when we hope soon to break out of the present recession condition. I hope that by 1962 business will have improved and businessmen will be able month by month to set aside funds in accordance with their liability for unemployment compensation, without the repressive influence which the proposed arrangement surely would have at this time.

Mr. ERVIN. Mr. President, under this bill, payment of the unemployment compensation authorized by it will begin 15 days after the bill is signed into law by the President. Under the bill, the expenditure of the money will begin 15 days after the bill is signed into law by the President. Under the bill, although the payments will begin 15 days after the bill becomes law, the tax with which to replace the money expended under the bill will not begin until January 1, 1962; but the tax will not be payable until January 1, 1963—which means that either the employers who will be subject to the tax or the taxpayers of the Nation will have to begin paying interest on these expenditures beginning 15 days after the enactment of the bill, and will have to continue to pay interest on all the funds thus expended until January 1, 1963.

I submit that if we wish to do something for business in the Nation, we shall avoid as much as possible the useless expenditure of interest; and that would require beginning at as early a moment as convenient the payment of the tax called for by this bill.

I believe we should start the payment of the tax before the next general election. I think the businessmen who will have to pay the tax ought to realize that fact when they go to vote. In November 1962, they will be paying the tax.

Mr. President, I am willing to vote for the bill, despite the fact that I thought it unfair to convert the State of North Carolina—which has managed in a prudent manner its affairs in this respect—into an eleemosynary institution, and make it pay $10 million more than it will receive under this bill.

I believe that the best thing the Senate and the Congress can do for American business, and to enable us to get out of the unfortunate economic situation in which the country finds itself today, is to convince the American people that the Congress is willing to put the country on a pay-as-you-go basis and is determined to stop spending money which it does not have.

In my judgment, we would strike one of the worst blows which could be struck at American business, American labor, and American taxpayers, if we were to say that we are not going to start collecting any tax under this bill until after the next general election, and that we are going to make someone pay interest on the money from 15 days after the bill becomes law until the 1st of January, 1963.

I, for one, am willing to face the issue squarely. I am willing to vote for this bill; but I also desire to vote for a pay-as-you-go method which will convince the American taxpayers that we are willing to impose upon them sufficient taxes to pay for the funds we appropriate.

The Federal Government is now paying approximately $9 billion in interest. Why add to it?

Mr. CAPEHART. Mr. President, will the Senator from North Carolina yield?

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair). Does the Senator from North Carolina yield to the Senator from Indiana?

Mr. ERVIN. I yield.

Mr. CAPEHART. Do I correctly understand that 15 days after the bill becomes law, the employers must start accounting for one-tenth of one percent of their wage payments?

Mr. ERVIN. No. Fifteen days after the bill becomes law, the expenditure of the money will begin. As I understand, the sum will approximate, in its totality, $1 billion.

But those who have to pay the tax will not even become liable to make the payments until January 1, 1962—that is when the tax will start; and they will not have to pay the tax until January 1, 1963.

Mr. CAPEHART. Let me see whether I correctly understand the situation. On January 1, 1962, the employers will begin to account for and to set up, as a credit or indebtedness to the Federal Government four-tenths of 1 percent of their payrolls. Is that correct?

Mr. ERVIN. Yes. The tax liability will begin on January 1, 1962.

Mr. CAPEHART. But the employers will hold on to that money—which they will collect or will set aside, each month—until January 1, 1963?

Mr. ERVIN. The tax for that calendar year will become payable on January 1, 1963.

Mr. CAPEHART. I have never heard of anything quite so ridiculous. Why not provide—as is now the case—that the payments shall be made monthly or quarterly to the Federal Treasury, as is the case in connection with the present unemployment compensation insurance—in that case, each quarter.

Mr. ERVIN. Because of the unfortunate way the original bill was phrased. We specify that right here.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield on that point?

The PRESIDING OFFICER. Does the Senator from North Carolina yield?

Mr. ERVIN. I do not know what interest would be paid, but I assume the interest rate would be 4 percent, and on $40 million a year that is a great deal of money.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. ERVIN. I yield to the Senator from Maryland.

Mr. BUTLER. Does the Senator believe, as has been stated here, that would

be a regressive tax on the employers to pay as they go? It has been suggested that the new tax on employers may be regressive.

Mr. ERVIN. There may be something to that argument. I think all taxes are regressive. I think they are more regressive when interest has to be paid on them, or the cost of the interest has to be passed on to the taxpayers.

Mr. CAPEHART. I can think of nothing worse than to impose on little businesses the burden of setting aside four-tenths of 1 percent each month, and then holding it and paying it 12 months later. They will spend it. It will be gone. There will be many deficiencies. It is unfair to ask businesses to do that. I am sure industry would prefer to pay quarterly, starting with the first quarter of 1962. I have never listened to anything quite as impractical or unrealistic as holding up payment for a year. The employer has to set the amount on his books as a liability month by month, and he will do so during the entire year. He will keep the money, but set it up as a liability on his books, and then he will have to pay the money all at one time, instead of quarterly. It will work a hardship on the businessmen of America.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. ERVIN. I yield to the Senator from Delaware.

Mr. WILLIAMS of Delaware. I think the Senator from Indiana is somewhat confused on this point. Under the existing law, the tax on payroll is 3.1 percent. Four-tenths of 1 percent of that amount under existing law is a Federal tax. The 2.7 percent that is paid reverts directly back to the States. The 2.7 percent is paid by the employer and sent to the Treasury on a quarterly basis. The four-tenths of 1 percent is computed by the employer annually and is sent in after the close of the calendar year.

This particular tax, since it is a Federal tax, is added to the four-tenths of 1 percent, rather than added to the 2.7 percent. That matter was decided in the preceding vote.

For 26 years, since the unemployment tax has been in effect, that is the way it has been operating. We are merely continuing that operation under this proposal. We are changing it to make it an eight-tenths of 1 percent Federal tax.

We are not now faced with the question of whether an employer should pay on a quarterly or annual basis. That arrangement is already fixed in the existing law, and neither the House nor the Senate version of the bill proposes to change that factor. All we are proposing is that the additional four-tenths of 1 percent tax will be payable on the payroll of 1961, which will mean it will be turned in to the Government after January 1962.

It puts this program on a pay-as-you-go basis.

In rejecting the Byrd amendments, the Senate has voted for about $100 million in retroactive payments, payments retroactive to a time prior to the enactment of the bill. So there is provided payment of $100 million retroactively. The question here is, Do we want to put up the money to finance the program, or merely go back home and brag about what we are giving them, not telling them about the tax? Under the bill without the amendments there is no provision to get a single dollar to pay for the extended benefits until January 1963. The money would be borrowed by the Secretary of the Treasury, who would issue the Government notes, and the employers would then be paying a minimum of 4 percent interest on $1 billion dollars being paid out.

If Senators do not like the bill they should vote against it; but if they are for it let them at least finance it, and not put it in the pump-priming class.

Why saddle the employers with an unnecessary $40 million in interest charges merely because the administration wants to postpone the tax until after the 1962 elections?

Mr. ERVIN. Mr. President, my understanding is that the tax which is imposed on employers for unemployment compensation is payable quarterly, whereas the additional tax which will be imposed for the emergency purpose under the bill will be paid annually.

Mr. WILLIAMS of Delaware. The Senator is correct. This amendment merely puts this program on a pay-as-you-go basis.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. ERVIN. I yield.

Mr. CLARK. I should like to ask the Senator from North Carolina, with the state of our economy as it is at the present time, with an inevitable deficit coming up in the current fiscal year, and with the likelihood that we shall have a deficit in the next fiscal year, if he would be in favor of increasing Federal taxes in order to balance the budget.

Mr. ERVIN. The Senator from North Carolina has noticed that in this country, for more than a quarter of a century, Congress has been appropriating money, and virtually always it has been said, "We are in a depression; we cannot afford to levy taxes sufficient to cover all these appropriations." I think the budget has been balanced about five times in the last 28 years.

Mr. CLARK. Did I correctly understand the answer of the Senator from North Carolina to be "Yes"? Does the Senator believe taxes should be imposed to balance the budget under the present condition of our economy?

Mr. ERVIN. Yes. I think people would have greater confidence in the fiscal condition of our Government.

Mr. CLARK. But the Senator thinks we should impose taxes to balance the budget in this period of recession?

Mr. ERVIN. I say Congress ought not to make appropriations of money unless it has the political and moral courage to impose taxes to cover the costs of the appropriations.

Mr. CLARK. I thought the economic theory that the budget must be balanced each year, rather than over the entire period of the business cycle, went out with Herbert Hoover. I think it has gone out in every college of the country. I regret it has not in the Senate.

I think the Senator from Tennessee made the case earlier when he said if we want to do something to ease the recession, we had better postpone payment of those taxes.

Mr. ERVIN. I think this country would be in a far better position if business and labor and the taxpayers of this country would see to it that Congress, in Washington, did not make appropriations unless it exercised the political and moral courage to levy taxes sufficient to cover the cost of the appropriations.

Congress has not had the moral and political courage to do that for a long period of time, and as a consequence we have a national debt of $290 billion, the biggest national debt on the face of the earth, and we are, in effect, spending money for all kinds of purposes, but we are leaving the payment for the money we are spending to be made out of the unearned incomes of unborn generations of Americans.

I think Members of Congress who vote for appropriations ought to levy taxes upon our living constituents, who have the right to vote, and let those living constituents say, at the ballot boxes, whether expenditures they require should be paid for by taxes. Instead of doing that, Members of Congress all too often are acting like the member of the British Parliament, according to the old story. There was a proposal to issue a vast amount of bonds, but the payment for those bonds was not to start for 50 years.

The member of Paliament rose and said, "Gentlemen of the House, the bond issue which is proposed is not fair to posterity."

Another member of Parliament rose and said, "Well, I am for the bonds. I am in favor of starting repayment 50 years from now. Posterity has never done anything for me, and I don't expect to do anything for posterity; and, furthermore, posterity can't vote at the next election." [Laughter.]

Mr. BUTLER. Mr. President, the remarks of the Senator from Pennsylvania [Mr. CLARK] remind me of a television program about a week ago, when one of the presidential economists was being interviewed. The economist was asked what he thought would be good for this country, and his answer, surprisingly enough, was "a $5 billion deficit."

Does the Senator from Pennsylvania subscribe to that thought?

Mr. CLARK. Mr. President, will the Senator yield?

Mr. BUTLER. I have yielded. I have asked the Senator a question.

Mr. CLARK. Not yet. If the policies my friend from Maryland advocates were to prevail in the future, as they have in the past, it might be necessary to take so drastic a step in order to restore our country to well being and to prosperity. The Senator from Maryland belongs to the ancient and honorable school of economics which I think went out about 40 years ago.

Mr. BUTLER. I ask the Senator whether he subscribes to the need for a $5 billion deficit. Does the Senator

think that would be a good thing for the country?

Mr. CLARK. I believe almost every modern economist thinks that probably it is necessary to have a deficit in a time of recession, while in times of prosperity one should have a surplus. There should be a balancing over a period of time.

I think hardly an economist anywhere in the world today would disagree with that.

Mr. ERVIN. Mr. President, will the Senator yield so that I may make an observation?

Mr. DIRKSEN. Mr. President——

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. DIRKSEN. Mr. President, I should like to ask the majority leader whether he can obtain a 10-minute time limitation with respect to the amendment, 5 minutes on either side. It is nearly half past 10 o'clock. I understand the distinguished majority leader desires to finish this bill and the extension of the railroad unemployment insurance benefits bill tonight.

Mr. MANSFIELD. Yes, indeed. If the Senator will permit, I should like to make a unanimous-consent request that the Senate vote on the pending amendment at the end of 10 minutes, the time to be divided 5 minutes to a side.

Mr. BUSH. Mr. President, I should like to have 2 minutes.

Mr. MANSFIELD. That is satisfactory.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

Mr. LONG of Louisiana. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. THURMOND. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BUSH. Mr. President, I shall be very brief.

I think this is a very significant vote we are about to take tonight. It relates to other problems which face the Congress, and problems with respect to which the Congress is facing the world.

I have in mind the balance-of-payments problem. Mr. President, what the United States will do this month, next month, and in the few months immediately ahead will be watched very carefully by people all over the world. It all relates to the balance-of-payments problem. The balance-of-payments problem is going to be resolved on the basis of confidence. If the Congress does not conduct itself in a way to inspire the confidence of our friends all over the world, we shall adversely affect the balance of payments, and shall interfere with our efforts to change the direction of the balance of payments and to stop the outflow of gold.

Fiscal responsibility is at issue in the vote we are about to take. We are being asked by the opponents of the amendment to defer for a year or two an obligation which is current. We are asked to postpone the payment for money which will be paid from the Treasury immediately after we pass the amendment.

Mr. President, that is wrong. There are times when longer term loans are thoroughly justified, especially with respect to benefits which come with a longer term, but in a case such as this, immediate expenditures for immediate relief, there is no justification for postponing the collection of the money.

Mr. President, I hope the amendment of the Senator from Delaware will prevail.

Mr. GOLDWATER. Mr. President, I shall not detain the Senate more than a few moments. We have listened tonight to the same kind of talk that has gotten our economy in the trouble it is in. Now the chickens are coming home to roost. This time let us shoot them, let us not build another roost.

We have listened to the philosophy of Keynes, as we have listened to it for 28 years. We have not given the free enterprise system of America a chance in 28 years. We tried these same shopworn ideas back in the 1930's, and it took World War II to get us out of the depression. Now we are dabbling around again with the symptoms. I ask, "Have we the courage to get at the disease?" The disease is wrapped up in high taxation, in fiscal irresponsibility, and in inflation.

We should give our free private enterprise system an opportunity, and it will then put to work every man who is unemployed who wishes to go to work again.

We are listening to stupidity tonight, if Senators do not mind my saying so, in the realm of economics. We are talking about pulling the country out of a depression, and are talking about $500 million. That represents one-half of one day's business in this country. We are talking about being fearful of applying taxes, as we should, on a pay-as-you-go system. These taxes represent one-tenth of 1 percent of the taxes which will be collected in this country this year. We are not even talking about peanuts, we are merely talking about the shells which fall on the floor.

If this philosophy is good, let us go "whole hog." Let us spend about $10 billion we do not have. According to Mr. Keynes, we can do it. According to the school of economic thought of which my friend from Pennsylvania [Mr. CLARK] so thoroughly disapproves, we should not be engaging in deficit spending and we should not be engaging in inflation. We should be putting the economy to work.

I am one Republican who is waiting patiently—but my patience is wearing thin—for the new President to stand up, with courage, and tell the people of this country what they have to sacrifice and what they must do——

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. GOLDWATER. In order to bring the U.S. economy out of the recession it has been in; a recession, I suggest, that nothing which has been suggested so far will ameliorate.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield the floor.

Mr. SYMINGTON. Mr. President, I often respect the thinking of the Senator from Arizona. He talked about the President exhibiting courage. Now there can be honest differences of opinion about philosophies incident to the subject we are discussing tonight.

But based on my years of service in the Senate, it is my opinion that the present President of the United States has shown more courage in the last 2 months from the standpoint of facing up to the realities of this country's problems in the world as it is today, than was shown in the previous administration in the previous 8 years.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Delaware [Mr. WILLIAMS]. On this question the yeas and nays have been ordered, and the clerk will call the roll.

Mr. LONG of Louisiana. Mr. President——

The PRESIDING OFFICER. The Senator from Louisiana is recognized.

Mr. LONG of Louisiana. Mr. President, the amendment at the desk is in handwritten form. It is not available to Senators who will be required to vote on it. I assume the Senator from Delaware has given careful consideration to the amendment and that he has placed his figures where he wishes them to be, and that they will be where we would like to see them in the bill.

As one Member of this body, of course, I am in no position to know that the figures are in the correct places, because the amendment is not in print. The amendment is written out by hand, and is at the desk.

I regret that something has been said about interest rates in regard to the bill. If we take a few more months to put the proposal into effect, we shall have to pay interest. I had hoped we were not going to get into that. I have spent 8 years criticizing the fact that the Republican administration doubled the interest rate on the national debt and that it cost us an extra $5 billion a year, a total of about $40 billion. I am glad somebody is going to be responsible about a bill which is going to cost a billion dollars.

If interest at 2½ percent, which is the current rate for short-term loans, runs for a year, the amount would run into about $125 million. It seems strange to see those who can accept $40 billion, and swallow that sum like a camel, straining at gnats. We are considering $125 million against the $40 billion that was imposed on the national debt through high interest rates with which I, as one Senator, disagreed.

When I first ran for office I was known as something of a tax expert, because I had advocated a tax program to pay for many benefits. It was embarrassing to run for office while people were paying taxes but waiting for the benefits. It is difficult to be elected under those circumstances. Having been through that experience, I learned what an effective date means. I am not going to state the name of the Senator with whom I spoke, but I looked at the provisions of the bill and said, "Do not tell me the tax bill will go into effect on January 1. Why do we not make the effective date July 1, or tomorrow, because the sooner we get the bill into effect, the easier it will be on

people's minds, and the more they become accustomed to the tax by the time the election occurs."

If the effective date is postponed to the eve of election, the measure becomes more of a factor politically. That sort of factor makes a difference.

I favored moving up the effective date until I learned that the proposed effective date occurred after the election. A very logical basis for the date was stated, because the tax would be payable on a calendar year basis. That is the way it has always been. If the tax is payable on a calendar year basis, the only way it can be logically handled is to start with the first calendar year after the tax is levied. Such reasoning makes all the sense on earth, if that is how the tax is presently being collected.

My Republican friends have voted for retroactive taxes on occasion, but they do not like to do so. I do not like to vote for retroactive taxes. No one likes to vote for any tax.

I have heard a great amount of dispute on the question of whether we can spend our way out of a recession or depression. I have yet to hear a single economist contend that we can tax our way out of a depression. Herbert Hoover made a small effort to do so, but as fast as he raised taxes, the national income went down. He could not raise taxes fast enough to meet the Nation on its way down. Everything he did in an effort to tax us out of a recession pushed us further down. From an economic point of view, that is what we have heard tonight.

The bill has a well considered effective date. It was considered in the House. It was carefully studied. It was advised by the President's Economic Council. Considering the bill a measure to relieve a recession or to meet the problems of recession, those elements were carefully considered by economists for whom we have appropriated money to advise us in problems such as the one we are considering. Some of those economists I believe are as well qualified as is my friend the Senator from Illinois [Mr. DOUGLAS] who, from an economist's point of view, agrees with what I am now saying about economics. I am not a Ph. D. on this subject, though on occasion I once majored in it.

Here is a problem that has been considered, the advice of economists secured, and all the economic factors have been taken into consideration.

I do not go to a lawyer to learn my economics, and I do not go to an economist to learn my law. But here is a subject upon which economists agree. We cannot tax ourselves out of a recession. We have before us a bill in which all those factors have been taken into consideration, plus the logical fact that if a tax is proposed on a calendar year basis, the tax is applied as it has been in the past. We start with a liability accruing at the beginning of the tax year and pay it at the end of the tax year.

I must say to my Republican friends that, unfortunately, from the point of view of the Republican Party, it does not work out too well, because the public will feel better satisfied if they must pay on January 1, 1963, than if they must pay on the eve of election.

If I were a Republican, I would wish the public to feel as dissatisfied as possible at the next election. As a Democrat, I would wish the public to feel as contented as possible. It is that simple.

I do not blame the Senator from Delaware for offering his amendment. He is a great Senator. He will be chairman of the Finance Committee when the Republicans take charge. If we heed his advice, Republicans will be in power a little sooner than if we refuse to accept his amendment.

I hope the Senate recognizes that this is a carefully considered bill. The House carefully considered it. We rejected the Byrd committee amendments, which contained the Williams amendment. I admit that it was a close vote, but I do not think we should now agree to the Williams amendment, which is at the desk. It is a handwritten mandate. This is a carefully written bill. It should be passed in the form in which it has come to us.

Mr. WILLIAMS of Delaware. Mr. President, the tax is not retroactive. The Senator from Louisiana makes the point that the amendment is not printed. It is printed. It is on the desk, and he voted for it when he voted to report the bill from the committee. The amendment merely restores to the bill that portion of the Byrd amendments which was stricken out on the floor of the Senate, and which the Senator from Louisiana voted for in committee.

Mr. LONG of Louisiana. Mr. President, will the Senator yield for a correction?

Mr. WILLIAMS of Delaware. I yield.

Mr. LONG of Louisiana. I did not vote to report the bill. I was not there on that day.

Mr. WILLIAMS of Delaware. I thought the Senator was present.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. SCOTT. I support the amendment. It does not take much courage to see what we can do for ourselves and to ask what we can do for ourselves and what we can do for our constituents, but when it comes to asking what we can do for the country, I suggest that one thing we can do for the country is to pay our bills when we incur them, and to have the courage to meet our debts, and not to provide the benefits now and postpone the accounting for those benefits until after future elections.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Delaware. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DODD (when his name was called). On this vote I have a pair with the Senator from Alaska [Mr. BARTLETT]. If he were present and voting he would vote "nay." If I were permitted to vote, I would vote "yea." I therefore withhold my vote.

The rollcall was concluded.

Mr. HUMPHREY. I announce that the Senator from Alaska [Mr. BARTLETT], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Alaska [Mr. GRUENING], the Senator from Oregon [Mr. MORSE], the Senator from Utah [Mr. MOSS], and the Senator from Georgia [Mr. RUSSELL] are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ] is absent because of illness.

I further announce that the Senator from Texas [Mr. BLAKLEY] is necessarily absent.

On this vote, the Senator from Texas [Mr. BLAKLEY] is paired with the Senator from New Mexico [Mr. CHAVEZ]. If present and voting, the Senator from Texas would vote "yea," and the Senator from New Mexico would vote "nay."

On this vote, the Senator from Georgia [Mr. RUSSELL] is paired with the Senator from Oregon [Mr. MORSE]. If present and voting, the Senator from Oregon would vote "nay," and the Senator from Georgia would vote "yea."

I further announce that, if present and voting, the Senator from Alaska [Mr. GRUENING] and the Senator from Utah [Mr. MOSS] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Colorado [Mr. ALLOTT] is absent because of death in his family.

The Senator from Vermont [Mr. PROUTY] is absent by leave of the Senate because of illness.

The Senator from Kentucky [Mr. MORTON] and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent, and, if present and voting, would each vote "yea."

The result was announced—yeas 45, nays 42, as follows:

[No. 18]

YEAS—45

Aiken	Curtis	McClellan
Beall	Dirksen	Miller
Bennett	Dworshak	Monroney
Boggs	Ervin	Mundt
Bridges	Fong	Proxmire
Bush	Goldwater	Robertson
Butler	Hickenlooper	Schoeppel
Byrd, Va.	Holland	Scott
Cannon	Hruska	Smith, Maine
Capehart	Javits	Stennis
Carlson	Jordan	Talmadge
Case, N.J.	Keating	Thurmond
Case, S. Dak.	Kerr	Wiley
Cooper	Kuchel	Williams, Del.
Cotton	Lausche	Young, N. Dak.

NAYS—42

Anderson	Hayden	McNamara
Bible	Hickey	Metcalf
Burdick	Hill	Muskie
Byrd, W. Va.	Humphrey	Neuberger
Carroll	Jackson	Pastore
Church	Johnston	Pell
Clark	Kefauver	Randolph
Douglas	Long, Mo.	Smathers
Eastland	Long, Hawaii	Smith, Mass.
Ellender	Long, La.	Sparkman
Engle	Magnuson	Symington
Gore	Mansfield	Williams, N.J.
Hart	McCarthy	Yarborough
Hartke	McGee	Young, Ohio

NOT VOTING—13

Allott	Fulbright	Prouty
Bartlett	Gruening	Russell
Blakley	Morse	Saltonstall
Chavez	Morton	
Dodd	Moss	

So the amendment of Mr. WILLIAMS of Delaware was agreed to.

Mr. DIRKSEN. Mr. President, I move that the Senate reconsider the

vote by which the amendment was adopted.

Mr. WILLIAMS of Delaware. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Are there any further amendments to be offered to the bill? If not, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

Mr. THURMOND. I wish to say only a word about the bill before it is passed. If the Byrd amendment had been adopted, I would have voted for the bill. I do not object to having each State make its own determination. I believe that is the way it should be. However, I do not believe it is fair for five of the largest States in the Nation to receive aid from some of the smallest and poorest States in the Nation.

I wish to give a few figures. Nine States will be benefited. They are Alaska, Kentucky, Michigan, New Jersey, New York, Ohio, Oregon, Pennsylvania, and West Virginia. The other 41 States will be penalized. Five of the biggest and richest and most powerful States of the Union will be benefited.

How are they being benefited? They are being benefited with funds which must come from the weaker and poorer States. For example, consider Michigan. The benefits to Michigan are $93 million, and the additional tax assessment is $46.6 million. That makes a gain for Michigan, which is a rich State—or was—of $46.4 million.

New Jersey gains $11½ million. New York, the largest and certainly one of the richest States, gains $51 million. Ohio gains $22.6 million. Pennsylvania gains $14.3 million.

What happens to the weaker States in the Nation? My State is about 48th in per capita income in the Nation. What happens to us? We contribute $1.8 million. What happens to Mississippi, one of the poorest States in the Nation? It contributes $3½ million. What happens to New Hampshire, a very small State? It contributes $3 million. Nebraska, a very small State, contributes $4.7 million. Utah, a small State, contributes $2.1 million. Wyoming, a very small State, having only one Representative in the House of Representatives, contributes four-tenths of a million dollars.

Mr. President, is that the kind of bill we will pass? In my opinion, we shall make a great mistake this evening by passing this bill, not only from the standpoint of making the little, poor States—41 of them—contribute to the other 9 States, 5 of which are the richest States in the Nation. These 5 States have 138 electoral votes, which is more than one-fourth of the electoral votes of all the States in the Union. Yet the little States will have to contribute in order that this fund may operate. I do not think that is right, just, or equitable. If the experts had studied the matter carefully, or if the Members of this body had examined the subject very carefully, I do not see how they could vote for the bill.

Mr. CASE of South Dakota. Mr. President, will the Senator from South Carolina yield?

Mr. THURMOND. I yield.

Mr. CASE of South Dakota. I understood the Senator to say that Michigan is or was a rich State. Would the Senator enlighten me by saying when Michigan was a rich State?

Mr. THURMOND. I understand it was a rich State some years ago, but that in recent years it has not been in quite such good shape. But it is still a rich State in the Nation.

I simply wish to ask Senators from the other 41 States in the Nation, Is it right or just for us to have to support 5 of the richest States in the Nation and send as much to 1 State as the $51 million that will be sent to New York?

I shall not take up any more of the Senate's time. I think I know the temper of the Senate. I think I can feel the atmosphere here. I have felt it throughout the debate. I have seen the maneuvering. I have seen people called into the offices of others, and I know of the lobbying which has been taking place. I know of the terrific pressure which is being brought to bear here. I do not believe the Byrd amendment would have been defeated if there had not been such terrific pressure brought upon this body. I make that statement, and I challenge anyone to deny it, unless he wants some names to be called.

Mr. President, it seems to me that we ought to begin to think a little about the welfare of the country. We have just agreed to an amendment on which a hard fight was made. It was adopted by a small margin, but I am very glad to say it was adopted. But there should not have been any question about adopting it.

The philosophy of the Senator from Pennsylvania [Mr. CLARK] about not collecting money as we go along is perfectly ridiculous. In 24 of the last 30 years, the Government has had deficits. The budget has been balanced in only 6 years out of the last 30. We owe $291 billion. The interest runs about $11 billion. Some persons want to blame the increased debt on defense. It cannot all be blamed on defense. From 1953 to 1961, defense expenditures went down about $4 billion, while nonsecurity cash expenditures rose about $25 billion.

I think it is time we paused a little. I think it is time we began to think about the fiscal condition of the country. Some persons seem to think that any money the States get from Washington is like manna from heaven. They are eagerly grabbing at it. I think we show a lack of courage when we do not stand up and say to them, "You, the taxpayers, only get back the same money you pay in." The taxpayers who get money from the Federal Government are the same ones who pay it.

Mr. President, we are building the Federal Government larger and larger every year. We are centralizing more power here. One thing I fear from the action being taken by the Senate tonight is the precedent which will be set. In my opinion, we are providing the opening wedge to federalize, to nationalize, the entire unemployment compensation program.

By defeating the Byrd amendment, we have taken a step this evening which, in my opinion, will bring on a proposal to federalize the entire system. In other words, are we going to take away from the States the right of those States which are conservative, which are economical, which handle their funds properly, as we have had to do in South Carolina, and make them conform; and make us, one of the poorest States in the Nation, put in almost $2 million to send to a rich State like New York? Are we to follow that kind of policy?

By refusing to adopt the Byrd amendments this evening, I think we have laid the foundation and have set the stage for federalizing the entire unemployment program before this year is out. Then there will be grab, grab; we will see taxes going up and up. We will see industry suffer in this country. It is my opinion that if we will only be reasonable and fair to business, private enterprise will provide jobs. It is my opinion that if we will show some consideration to the people who have money, they will invest it to create jobs. But I do not believe they will invest and take a chance or take a risk when they are taxed and taxed and do not know how much more to expect.

We talk about trying to instill confidence in the Nation. One of the best ways in which we can instill confidence is to let people know that the Government will let them alone. We are not letting them alone tonight. We are putting them in hot water, and more hot water. Furthermore, we are forcing the employers in my State and every other little State to contribute money to pay to New York and every other big State. I do not like it. I know we can be outvoted. We do not have the votes. The majority party will stick together with, perhaps, some Senators from the other party to pass the bill. I can sense the feeling. I simply say that it will be a great mistake. I believe the people of the country will ultimately regret the action we are about to take this evening.

I wish the Senate would delay this decision and think a little about it. I do not know how Senators from the little States can go back home and explain why they sent money to the rich States. At any rate, aside from that, there is a bigger principle involved. We are opening the door to enable the Federal Government, with its great power and strength, to pounce down and take charge of the whole program. And that may be the end of it.

Mr. HART. Mr. President——

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Illinois will state it.

Mr. DIRKSEN. It seemed to me that the question on the passage of the bill was put, and I believe the gavel fell. Has the measure been passed?

Mr. HART. Mr. President, as the Senator from South Carolina indicated, we in the back row were not able to hear what was said.

The PRESIDING OFFICER. The Senator from Michigan was on his feet seeking recognition.

Mr. HART. I thank the Chair.

As is true of each Senator, my senior colleague, Mr. McNAMARA, and I are proud of the State from which we come. If anyone who reads the RECORD attempts to evaluate the bill on the basis of "What is in it for me?" let the RECORD show that over the years, under this program, Michigan has contributed in taxes more than $285 million and has received back less than $185 million. We will continue to support the poorer States with that $100 million.

We regularly return home to answer the question I heard asked, "How can you explain sending more money to Washington than you get back?" We explain it on the basis that we are in one boat. We are one people and one Nation. If we have an opportunity to improve the economy of five or six States now, those States will be stronger, too. We believe that. That is the way we vote in this body, and have voted historically. I am sure we shall continue in that way.

Mr. LAUSCHE. Mr. President, I concur in the views expressed tonight that if we spend, we ought to have the moral courage to tax. I cannot concur in the views of those modern economists who argue that we ought to spend but not tax.

Moreover, I do not agree with the idea that the responsibility of taxing ought to be put beyond election day.

I listened to the argument made by the Senator from South Carolina, and Ohio was included among the States which are to receive more than they pay. Under the House version of the bill, Ohio would impose taxes in the amount of $62 million, and would receive $85 million in return. So, Mr. President, by the enactment of the House version of the bill, Ohio would supposedly profit in the sum of $23 million.

I voted against the House version. I did so because I know that the $23 million was "carried by a Greek" who, today, is making a gift to the State of Ohio; but when the final federalization comes, the payment made by Ohio each year will be many times in excess of the $23 million.

And I think I would be somewhat delinquent if I did not state that—to my great disappointment and shock—in the 4 years that I have been here, I have discovered that there is great ingenuity and there is great skill in the drafting of bills in a manner which supposedly will provide gifts to certain States, so that the Senators from those States will be persuaded to vote for the bills. I learned that 1 year ago, when I found that the formula of the school bill was so written—deliberately—that it would give certain States more money than they would have to pay. One Senator came to me and said, "If the formula is changed in accordance with the way you suggest, my State will receive less money than it will have to pay; and, therefore, I will have to vote against it."

Tonight, I had quite a decision to make. I recognize that someone will ask me, "How is it that you voted for the Byrd amendments, although the bill without those amendments will give Ohio $23 million more than Ohio will have to pay?"

Mr. President, to my fellow Ohioans I merely wish to state that when the final nationalization and federalization come, they will pay on the basis of a burden far greater than the benefit of the $23 million that would come under the House version of the bill.

I believe that I would be confessing a deep limitation in reason unless I stated tonight that the signs show that federalization will be proposed. The proponents of this bill will try to make the duration of payments and the amounts of payments uniform, everywhere in the country, regardless of the difference between the economy in one section and the economy in another. I wish to say to the Senate that we cannot by legislative fiat make things equal if they are not equal; we cannot by legislative fiat make the cost of living in New York equal to the cost of living in Mississippi, nor can we by legislative fiat make the cost of living in Ohio equal to the cost of living in South Carolina. Those who will bring in the bill, supposedly with innocence, will find that that is a fact, when in truth it is not.

Mr. President, we already see the signs which indicate what will be proposed: Uniformity, straitjacketing, no difference anywhere, a monolith. It sounds rather close to the philosophy of monolithic government that has dominated nations in Eastern Europe and Middle Europe—the peoples under the control of Russia: Nothing different; all must be identical; and if they are not equal by nature, the Congress will make them equal.

I will vote for the bill, because I believe we should provide help to the unemployed. But I now serve notice that I will not go along with the proposition of trying to make all men look alike, or the proposition of trying to make all men act alike, or the proposition of trying to make all men pray alike, or the proposition of trying to make all men speak alike, even though the Lord created them to be individual and dignified and with the right to think for themselves. The direction is toward a monolithic government, with Washington telling the people how they should think, how they should speak, what they should do; and that though economics vary, the Federal Government by legislation will declare that the cost of living in Alaska is identical with that in New Mexico. Red will be declared to be green; truth to be false. With these things in prospect, I announce now my opposition to this obvious program of federalization.

The PRESIDING OFFICER. The bill has been read the third time. The question now is, Shall the bill pass?

Those in favor of passage of the bill will say "aye"——

Mr. LAUSCHE. Mr. President, I ask that a yea-and-nay vote be taken on this question. We want our position on this question to be shown.

The PRESIDING OFFICER. Is the demand for the yeas and nays sufficiently seconded?

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall the bill pass? On this question, the yeas and nays have been ordered; and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from Alaska [Mr. BARTLETT], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Alaska [Mr. GRUENING], the Senator from Oregon [Mr. MORSE], the Senator from Utah [Mr. Moss], and the Senator from Georgia [Mr. RUSSELL] are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ] is absent because of illness.

I further announce that the Senator from Texas [Mr. BLAKLEY] is necessarily absent.

I further announce that, if present and voting, the Senator from Alaska [Mr. BARTLETT], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Alaska [Mr. GRUENING], the Senator from Oregon [Mr. MORSE], the Senator from Utah [Mr. Moss], the Senator from Georgia [Mr. RUSSELL], the Senator from New Mexico [Mr. CHAVEZ], and the Senator from Texas [Mr. BLAKLEY] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Colorado [Mr. ALLOTT] is absent because of death in his family.

The Senator from Vermont [Mr. PROUTY] is absent by leave of the Senate because of illness.

The Senator from Kentucky [Mr. MORTON] and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent.

The Senator from Kentucky [Mr. MORTON], the Senator from Vermont [Mr. PROUTY], and the Senator from Massachusetts [Mr. SALTONSTALL] would each vote "yea."

The result was announced—yeas 84, nays 4, as follows:

[No. 19]

NOT VOTING—12

Allott	Fulbright	Moss
Bartlett	Gruening	Prouty
Blakley	Morse	Russell
Chavez	Morton	Saltonstall

So the bill (H.R. 4806) was passed.

Mr. MANSFIELD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HUMPHREY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD of Virginia. Mr. President, I move that the Senate insist upon its amendments and request a conference with the House on the disagreeing votes thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. BYRD of Virginia, Mr. KERR, Mr. LONG of Louisiana, Mr. SMATHERS, Mr. WILLIAMS of Delaware, and Mr. CARLSON conferees on the part of the Senate.

SALE OF CERTAIN CRITICAL MATERIALS

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 67, Senate bill 116.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 1116) to authorize the sale, without regard to the 6-month waiting period prescribed, of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, the bill was brought up earlier today. Consideration of it was held up at the request of a Senator. That Senator has had an opportunity to look it over. It has been cleared by the minority leadership.

I ask unanimous consent that extracts from the report accompanying the measure may be incorporated in the RECORD at this point.

There being no objection, the extracts were ordered to be printed in the RECORD, as follows:

This bill would (1) authorize the disposal of surplus nickel-cobalt-copper calcines and matte from the national stockpile, and (2) permit such disposal to be accomplished before the expiration of 6 months after publication of notice of the proposed sale in the Federal Register.

EXPLANATION

On January 16, 1961, the General Services Administration gave notice of a proposed disposition of approximately 3,431 short tons of nickel-cobalt-copper calcines and approximately 87 tons of nickel-cobalt-copper matte now held in the national stockpile. This notice was based upon a revised determination by the Office of Civil and Defense Mobilization that there is no longer any need for stockpiling these calcines and matte because they are excess to stockpile needs and are of such quality as to be of little or no use in time of war.

Section 3(e) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98b(e)) requires congressional approval of this proposed disposition. The law also requires, among other things, that the disposal may not be made until 6 months after publication of the disposal plan in the Federal Register.

Irrespective of whether the 6 months' waiting period is waived, the General Services Administration desires authority to dispose of these materials from the stockpile. The objective in waiving the 6-month waiting period is to accelerate the possible sale and availability of these materials to an industrial plant in a distressed economic area.

During World War II the Federal Government operated a federally owned refinery in the area of Flat River, Mo., for the refining of lead and copper concentrates. This refining operation resulted in the accumulation of several thousand tons of byproducts known as calcines.

After the war the refinery was leased to the National Lead Co. which has continued to operate it in the refinement of nickel and cobalt from byproducts of the extraction of lead. Because of lowered prices of lead the lead-mining operation was discontinued in February 1961. With the ending of lead-mining operations there, no more calcines are being produced. The remaining calcines available there will sustain the refinery operation until March 30, 1961. If additional calcines are not made available the refinery will close on March 30, 1961, resulting in the discharge of 140 employees.

Enactment of this bill would not assure the sale of the surplus calcines and matte to any specific purchaser. The National Lead Co. would have to compete against other possible purchasers, but this company would at least have an opportunity to negotiate for the purchase of these materials, and if successful it would secure a sufficient quantity of the materials to permit continued operation of the refinery for a period of 6 additional months beyond March 30, 1961.

DEPARTMENTAL RECOMMENDATION

Printed below and hereby made a part of this report are (1) a letter from the then Administrator of the General Services Administration, dated January 16, 1961, giving notice of the proposed disposal of these materials and requesting congressional approval of the disposal; (2) a copy of the notice of the proposed disposal published in the Federal Register on January 25, 1961; and (3) a letter from the incumbent Administrator of the General Services Administration, dated March 10, 1961, indicating that the General Services Administration and the Bureau of the Budget have no objection to the enactment of S. 1116:

GENERAL SERVICES ADMINISTRATION,
Washington, D.C., January 16, 1961.

Hon. RICHARD B. RUSSELL,
Chairman, Armed Services Committee,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Enclosed is a notice of a proposed disposition of approximately 3,431 short tons of nickel-cobalt-copper calcines and approximately 87 tons of nickel-cobalt-copper matte now held in the national stockpile. This notice is being published in the Federal Register and is forwarded to the Congress and to the Armed Services Committee of each House thereof in accordance with the provisions of section 3(e) of the Strategic and Critical Materials Stock Piling Act (53 Stat. 811), as amended (50 U.S.C. 98b(e)).

The Office of Civil and Defense Mobilization has made a revised determination, pursuant to section 2(a) of the Strategic and Critical Materials Stock Piling Act, that there is no longer any need for stockpiling this grade and quantity of said nickel-cobalt-copper calcines and matte. The revised determination was made for the reason that said nickel-cobalt-copper calcines and matte are excess to stockpile needs and are of such quality as to be of little or no use in time of war.

Section 3(e) of the Strategic and Critical Materials Stock Piling Act provides that no material constituting a part of the stockpile may be disposed of without the express approval of Congress, except where the revised determination is by reason of obsolescence of the material for use in time of war. Since the revised determination in this case was not by reason of obsolescence, we request that the Congress approve the proposed disposition.

Sincerely yours,

FRANKLIN FLOETE,
Administrator.

GENERAL SERVICES ADMINISTRATION NICKEL-COBALT-COPPER CALCINES AND MATTE HELD IN THE NATIONAL STOCKPILE PROPOSED DISPOSITION

JANUARY 16, 1961.

Pursuant to the provisions of section 3(e) of the Strategic and Critical Materials Stock Piling Act (53 Stat. 811), as amended (50 U.S.C. 98b(e)), notice is hereby given of a proposed disposition of approximately 3,431 short tons of nickel-cobalt-copper calcines and approximately 87 tons of nickel-cobalt-copper matte now held in the national stockpile.

The Office of Civil and Defense Mobilization has made a revised determination, pursuant to section 2(a) of the Strategic and Critical Materials Stock Piling Act, that there is no longer any need for stockpiling said nickel-cobalt-copper calcines and matte. The revised determination was based upon the finding of the Office of Civil and Defense Mobilization that said nickel-cobalt-copper calcines and matte are excess to stockpile needs and are of such quality as to be of little or no use in time of war.

Since the revised determination is not by reason of obsolescence of nickel-cobalt-copper calcines and matte for use in time of war, this proposed disposition is being referred to the Congress for its express approval, as required by section 3(e) of the Strategic and Critical Materials Stock Piling Act.

General Services Administration proposes to transfer said nickel-cobalt-copper calcines and matte to other Government agencies, or to offer them for sale on a competitive basis upon the express approval by the Congress of this proposed disposition or 6 months after the date of publication of this notice in the Federal Register, whichever is later.

This plan and the date of disposition have been fixed with due regard to the protection of producers, processors, and consumers against avoidable disruption of their usual markets as well as the protection of the United States against avoidable loss on disposal.

FRANKLIN FLOETE, *Administrator.*

GENERAL SERVICES ADMINISTRATION,
Washington, D.C., March 10, 1961.

Hon. RICHARD B. RUSSELL,
Chairman, Committee on Armed Services,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Your letter of March 1, 1961, requested the views of the General Services Administration on S. 1116, a bill to authorize the sale, without regard to the 6-month waiting period prescribed of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act.

The principal purpose of S. 1116 is to avoid, as to the nickel-cobalt-copper calcines and matte referred to in the notice of disposal published in the Federal Register on January 25, 1961, the 6 months' waiting period that section 3(e) of the Strategic

and Critical Materials Stock Piling Act requires for a disposal thereunder. The bill would authorize the disposal of those materials by negotiated sale or otherwise. This would permit National Lead Co. to negotiate for the materials while it is still leasing the Government-owned plant at Fredericktown, Md., for the refining of similar byproducts of lead production in that area. The bill, however, would not assure the sale of the materials to any particular purchaser.

National Lead Co. has advised that, unless it is successful in purchasing those calcines and matte in the immediate future, it would, because of a lack of raw materials, cease operations at the Fredericktown plant, which is located in the Flat River, Mo., area—a depressed labor area. The materials covered by S. 1116 would be sufficient for the continued operation of the Fredericktown plant for approximately 6 months.

The General Services Administration has no objection to the enactment of S. 1116.

The Bureau of the Budget has advised that there is no objection to the submission of this report to your committee from the standpoint of the administration's program.

Sincerely yours,

JOHN L. MOORE,
Administrator.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. DWORSHAK. Mr. President, may we have the assurance of the Senator that "Soapy" Williams, and Reuther, and Meany are in favor of the bill?

Mr. MANSFIELD. I cannot speak for them, but the Senator from Delaware [Mr. WILLIAMS] is in favor of it. [Laughter.]

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (S. 1116) was passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Administrator of General Services is hereby authorized to dispose of, by negotiated sale or otherwise, approximately three thousand four hundred and thirty-one short tons of nickel-cobalt-copper calcines and approximately eighty-seven tons of nickel-cobalt-copper matte now held in the national stockpile. Such disposition may be made without regard to the provisions of section 3 of the Strategic and Critical Materials Stock Piling Act, relating to dispositions on the basis of a revised determination pursuant to section 2 of said Act, to the effect that no such disposition shall be made until six months after publication in the Federal Register and transmission to the Congress and to the Armed Services Committees thereof of a notice of the proposed disposition.

EXTENSION OF RAILROAD UNEMPLOYMENT INSURANCE BENEFITS

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 68, House bill 5075.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 5075) to provide temporary extended railroad unemployment insurance benefits, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. BURDICK. Mr. President, the bill before the Senate was passed unanimously by the House on March 6, 1961, and is identical to S. 1196, introduced on March 3, 1961, by myself and other Senators.

It provides for railroad workers temporary unemployment insurance benefits similar to those provided in H.R. 4806 for workers in industry generally.

The benefits provided in the bill would go to those unemployed railroad men who, after June 30, 1960, and before April 1, 1962, exhausted their rights to unemployment benefits ordinarily provided by the Railroad Unemployment Insurance Act.

The maximum number of additional days for which these new benefits would be payable would be 65, or 13 weeks.

The bill was referred to the committee, and unanimously reported without amendments.

It is a bill that provides benefits for railroad workers similar to benefits provided to workers in industry generally as provided in the bill just passed by the Senate.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 5075) was ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BURDICK. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UTILIZATION OF TELEVISION FACILITIES FOR EDUCATIONAL PURPOSES

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 65, Senate bill 205, and that it be made the unfinished business.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 205) to expedite the utilization of television transmission facilities in our public schools and colleges, and in adult training programs.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Interstate and Foreign Commerce, with an amendment, on page 4, after line 5, to insert a new section, as follows:

SEC. 8. (a) Each recipient of assistance under section 3 of this Act shall keep such records as the Commissioner shall prescribe including records which fully disclose the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Commissioner and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to assistance received under section 3 of this Act.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby authorized to be appropriated such amounts as may be necessary to assist the States and certain organizations therein to establish or improve television broadcasting for educational purposes, in accordance with the provisions of this Act, by providing for the establishment and improvement of television broadcasting facilities.

SEC. 2. Any agency or officer, or organization in a State, described in clause (b)(2) of this section, which is establishing or improving television broadcasting facilities, may receive a grant as authorized in this Act to cover the cost of such establishment or improvement by—

(a) making application therefor in such form as is prescribed by the United States Commissioner of Education; and

(b) providing assurance satisfactory to the Commissioner of Education—

(1) that the necessary funds to operate and maintain such facilities will be available;

(2) that the operation of such facilities will be under the control of (a) the agency or officer primarily responsible for the State supervision of public elementary and secondary schools, (b) a nonprofit foundation, corporation, or association organized primarily to engage in or encourage educational television broadcasting, (c) a duly constituted State educational television commission, or (d) a State controlled college or university; and

(3) that such facilities will be used only for educational purposes.

SEC. 3. Upon determining that an agency or officer of an organization has satisfied the requirements of section 2 of this Act, the Commissioner of Education is authorized to make a grant to such agency, officer, or organization in such amount as is determined by the Commissioner to be reasonable and necessary to cover the cost of such establishment or improvement of facilities. An agency or officer or an organization may receive one or more grants under the provisions of this Act, but the total amount of such grants for television broadcasting facilities in any State shall not exceed $1,000,000. Such grants shall be made out of funds appropriated for the purposes of this Act, and may be made in such installments as the Commissioner deems appropriate.

SEC. 4. As used in this Act the term "establishing or improving television broadcasting facilities" means the acquisition and installation of transmission apparatus necessary for television (including closed-circuit television) broadcasting, and does not include the construction or repair of structures to house such apparatus, and the term "State" means the several States and the District of Columbia.

SEC. 5. The Federal Communications Commission is authorized to provide such assistance in carrying out the provisions of

this Act as may be requested by the Commissioner of Education.

SEC. 6. Nothing in this Act shall be deemed (a) to give the Commissioner of Education any control over television broadcasting, or (b) to amend any provision of, or requirement under, the Federal Communications Act.

SEC. 7. No application for any grant under this Act may be accepted by the Commissioner of Education after the day which is 5 years after the date of enactment of this Act.

SEC. 8. (a) Each recipient of assistance under section 3 of this Act shall keep such records as the Commissioner shall prescribe, including records which fully disclose the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Commissioner and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to assistance received under section 3 of this Act.

LEGISLATIVE PROGRAM

Mr. DIRKSEN. Mr. President, I should like to query the majority leader as to what time the Senate will adjourn and what the business is likely to be next week if we adjourn until Monday.

Mr. MANSFIELD. Mr. President, in answer to the question raised by the distinguished minority leader, there is on the calendar only one bill, S. 205, which has been made the unfinished business. I assume that on Monday or Tuesday we shall also have the conference report on the feed grains bill. I hope the committees will continue, as expeditiously as possible, hearings on the various measures before them.

I expect that perhaps, from the committee headed by the distinguished Senator from Virginia [Mr. BYRD], the bill with respect to aid to dependent children will be forthcoming for speedy and prompt consideration.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. HOLLAND. What was the bill which was made the unfinished business?

Mr. MANSFIELD. The educational TV bill, S. 205.

Mr. HOLLAND. Not the bill for aid to education?

Mr. MANSFIELD. No.

Mr. HOLLAND. I thank the Senator.

ORDER FOR ADJOURNMENT UNTIL MONDAY NEXT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate concludes its deliberations tonight, it stand in adjournment until 12 o'clock noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ST. PATRICK'S DAY

Mr. MANSFIELD. Mr. President, March 17, 1961, marks the 1,500th anniversary of the death of St. Patrick, famed patron of Ireland and the Irish. Throughout the world, wheresoever the Irish have traveled, the story of Patrick has been told and retold in story and song.

Through the length and breadth of Ireland special celebrations will be held during the present year, which has been dedicated to St. Patrick as the Patrician Year. Cardinal McIntyre of Los Angeles has been named papal legate to represent Pope John in the inauguration of the year in special ceremcnies to be held at Armagh, the primatial see of Ireland, established by St. Patrick, the first bishop of Ireland.

It is fitting today that we join with the Irish in celebrating this great anniversary and to extend to them our sincere wishes for every happiness throughout the year. We pray that the economic development of the country may continue to prosper and that this outstanding democratic nation may continue to be a shining example to all the smaller nations of the world, especially the newly emerging nations.

As has been the custom over the years, we are privileged to bedeck ourselves in green, the symbolic color of Ireland. The green carnations we have received today have been presented to us through the courtesy of the national board of the Ancient Order of Hibernians, a national organization of Americans of Irish descent, dedicated to fostering the glorious culture and traditions of the Irish and promoting the well-being of this small island country. We extend to the national board and to all Hibernians our gratitude for their kindness in supplying us each year with these carnations and we wish them all success and happiness, especially on the occasion of this magnificent anniversary of their patron, St. Patrick.

COMMEMORATION OF THE 100TH ANNIVERSARY OF THE UNIFICATION OF ITALY

Mr. DIRKSEN. Mr. President, today the Ambassador of Italy in the United States and the American Honorary Committee for the Italian Centennial commemorated the 100th anniversary of the unification of Italy in the auditorium at the State Department at 10:30 with a large delegation of public officials and guests. The centennial celebration is under the patronage of the President of the United States and the President of the Republic of Italy, the Honorable Giovanni Gronchi.

Mr. President, the history of Italy is basic to our civilization. From the early Roman Empire on through to today, the Italian leaders and people have presented to the world much of the civilization as we know it. The language, the arts, the religion, and the law have become a significant part of peoples throughout the world. One hundred years ago, in March of 1861, the cradle of Italian unity was founded in the city of Turin. In recognition of the progress and achievements of the people of Italy during the past century, the Congress of the United States expressed itself with a concurrent resolution stating it is the sense of Congress that the President of the United States should extend official greetings from the United States to the people of Italy on the occasion of their centennial anniversary of the unity of Italy.

Mr. President, on this occasion I should also like to point out the great contributions which the Americans of Italian descent have made to the greatness of America. The best evidence of the record of the Americans of Italian extraction is the fact that we have such outstanding statesmen and leaders as our colleague JOHN O. PASTORE, of Rhode Island, numerous Representatives and four Governors. I extend my personal greetings to the people of Italy and to the Americans of Italian descent in this country on the occasion of the 100th anniversary of the unification of Italy.

Mr. President, in order that the readers of the CONGRESSIONAL RECORD may be fully aware of the history behind the unification of Italy, I ask unanimous consent that the extension of remarks of the Honorable VICTOR L. ANFUSO of New York, which appeared in the CONGRESSIONAL RECORD, volume 105, part 9, pages 11690–11691, be printed in full at this point in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

"ONE HUNDREDTH ANNIVERSARY OF UNIFICATION OF ITALY"—EXTENSION OF REMARKS OF HONORABLE VICTOR L. ANFUSO, OF NEW YORK, IN THE HOUSE OF REPRESENTATIVES, TUESDAY, JUNE 23, 1959

Mr. ANFUSO. Mr. Speaker, I am today introducing a concurrent resolution which expresses the sense of Congress that the President extend official greetings from the United States to the people of Italy on the occasion of the centennial anniversary of the unity of Italy, which occurs in March of 1961. In connection with the celebration that is to be held that year in the city of Turin, the cradle of Italian unity, the resolution provides for official participation by the United States in the celebration in recognition of the progress and achievements of the people of Italy during the past century.

The centennial anniversary of the unification of Italy and its emergence as a free and united nation capable of shaping its own destiny is a great event in the history of the Western World. I believe it would be of invaluable benefit to the whole free world to participate in this celebration, in order to demonstrate to nations all over the globe what a free and determined people can achieve. I am informed that a major international exhibit will be held in connection with this anniversary celebration which will stress the achievements of human labor and the human mind over the last 100 years. In that case, the free world will have much to gain by this exhibit, while the neutral and the anti-Western nations will have much to learn from it.

One hundred years ago this month, in June 1859, the troops of the Kingdom of Sardinia were victorious over the forces of the Austro-Hungarian Empire in battles at San Martino and Solferino in northern Italy. They were supported by the French Army, their ally in the war against a nu-

merically superior enemy. When the smoke of battle had subsided and the short war of 1859 had ended, it was clear that the decisive struggle for the unification of Italy under an Italian ruler had been won. Although Austria still held Venice, its grip on the rich Po Valley had been broken loose and a great nationalistic tide surged forward with increasing speed.

The goal of the unity of Italy, the dream of the creation of a single nation out of a myriad of small states, many of them under foreign domination, but all of them maladministered and economically unbalanced, was now moving forward. The small kingdom of Piedmont and Sardinia, under the liberal King Victor Emmanuel II, had become the guiding force behind the unity movement which became known in history as "Risorgimento Italiano," a new political renaissance. Victor Emmanuel was fortunate in his choice of a Prime Minister, the celebrated Camillo Benso di Cavour, one of the outstanding statesmen of the 19th century.

Following the retreat of the Austrians from Milan and Lombardy, the latter regions accepted the rule of King Victor Emmanuel. A few bold political strokes in 1859 and 1860 resulted in the annexation of the many small states, following plebiscites expressing the will of the people. It is in this period that we learn of the exploits of Garibaldi and his volunteers in the expedition which culminated in the downfall of the Bourbon dynasty in the campaign of 1860. Garibaldi's name has since become legendary and is known to millions of schoolchildren the world over. There were, however, many other able and patriotic Italian leaders who labored for years to help make Italy what it is today—one of our most trusted allies and a dependable friend.

The Risorgimento was truly a national movement and a great magnetic force that was forging a strong nation out of small and weak states. Their citizens were all of common blood, common language, and common national aspirations, yet they were subject to different laws, different rulers, and different destinies. The patriots, who were condemned as conspirators, were jailed and tortured. They were the Italian counterpart of the Paul Reveres and the Benjamin Franklins in America, of Washington, Jefferson, Adams, and the others who fought in the American Revolution and gained the independence of our Nation.

In post-Napoleonic Europe of the 19th century it was difficult to introduce innovations to the people stressing the principles of freedom as proclaimed by the victory of the American Revolution and embodied in the U.S. Constitution. The United States was a new nation, comprised of people who settled on a new continent and shaping their own history as they went along, but free from any historical bondage once they were successful in casting off British domination. This was not true, however, in the case of Italy and Germany. In the aftermath of the Napoleonic era, these two nations suffered from the old bondages of feudalistic practices and the absolute rule of too many and inept hereditary princes and kings.

Centuries of political divisions had created barriers which seemed insurmountable. Forces totally alien to Italy had become entrenched over the years, such as Austrian domination in the north, the Bourbon dynasty in the south and in Tuscany, and others. If a new nation had to be created, it required a truly national movement with concomitant forces working in each region toward a common goal. It also required as leader one of the small States active in the national movement. The kingdom of Piedmont and Sardinia was the logical leader, since it took the lead in granting to its subjects a liberal constitution in 1848 and in forming a constitutional government along democratic lines. It had the necessary leaders, the administrative organization and a willing ruler to accept this challenge.

Over the coming 2 years, between now and 1961, the people of Italy will relive the events and the experiences associated with the struggle for unity a century ago. It is to be hoped that they will find renewed strength to tighten the bonds of their national unity in order to enable Italy to emerge unscathed from the ideological struggle of today, which threatens to undo from within what has been achieved over the past century. There will be many celebrations as the events of 100 years ago are relived in ceremonies in all parts of the country.

The major national celebration, however, will take place in the city of Turin, the capital of Piedmont and the recognized cradle of Italian unification in 1861. There, in the austere Baroque palace which housed the first Parliament of the delegates of Italy, where modern Italy was proclaimed a unified nation in March 1861, solemn ceremonies will be held to observe this centennial anniversary.

From March to October 1961 a series of spectacular events will reenact those fateful years of Italian history and three major exhibitions will bear witness to the progress of Italy and of world civilization over the last century. Two of these exhibitions are to be devoted strictly to Italy, its history and its achievements. The third exhibition is to be international in character and scope, and all nations have been invited to participate. The organizing committee, which is presided over by the Premier of Italy, the Honorable Antonio Segni, intends to honor at these exhibits the accomplishments of human labor in the various nations, their well-being, their cultural progress, and their efforts to improve the standard of living of their people.

U.S. participation in the celebration has been officially presented to the U.S. Government by the "Comitato Per Le Celebrazioni Del Primo Centenario Dell'Unita d'Italia"—Committee for the Celebration of the First Century of the Unification of Italy—through the good offices of the Italian Embassy in Washington. The above-mentioned committee is represented here by the America-Italy Society, a private nonprofit organization whose offices are located in New York. Mr. Peter Grimm is president of the society and Mr. Peter G. Treves is treasurer.

No doubt this initiative will have also the full support of all the organizations of Americans of Italian extraction, and of all of the associations, agencies, and individuals in this country who care for the development of intimate relations of friendship existing between Italy and the United States.

Mr. Speaker, I am happy to introduce this concurrent resolution designed to express the friendly feelings of the people of the United States toward the people of Italy as they approach their centennial anniversary as a unified and independent nation. I trust that we shall participate, together with other nations, in the great celebrations scheduled in 1961 as a token of our esteem and our moral support of Italy's unity and independence in this crucial period in world affairs.

COMMENDATION OF THE SENATE

Mr. MANSFIELD. Mr. President, I wish to take this opportunity to commend the entire Senate for a week of real progress.

We have, this week, given our approval to a vitally needed program of assistance to areas having prolonged unemployment, by passing the area redevelopment bill. I particularly wish to pay tribute to the great work done by the Senator from Illinois [Mr. DOUGLAS] in leading the fight for the bill, and to others, like the Senators from West Virginia [Mr. RANDOLPH and Mr. BYRD], the Senator from Pennsylvania [Mr. CLARK], the Senator from Maine [Mr. MUSKIE], and the distinguished majority whip, the Senator from Minnesota [Mr. HUMPHREY], who worked tirelessly to make and to keep S. 1 a strong bill. We have, in passing the bill, taken a step toward making future recessions less severe and toward providing the means by which many communities and rural areas can get on their feet again economically.

Also this week the Senate has passed the measure extending temporary unemployment compensation benefits for an additional period to those unemployed men and women who have exhausted their entitlement to them. The same kind of extension of benefits has been provided in the case of the railroad unemployment insurance benefits. The President requested these measures out of a humanitarian concern for those who have been out of work for a prolonged period of time. It has also been pointed out that passage of these bills will give a measure of purchasing power to areas of severe unemployment.

The Senate also this week has passed a feed grains bill, which seeks to increase farm income, and at the same time to reduce the mounting surpluses of corn and other feed grains going into Government stocks. The Senator from Louisiana [Mr. ELLENDER] and the Senator from Minnesota [Mr. HUMPHREY], worked swiftly and well to produce a bill which will help us prevent a complete disaster in the feed grains program.

Finally, the Senate has approved, by overwhelming majorities, two major treaties—the Columbia River Basin Treaty, by which the United States agrees to cooperate with Canada in the development of that great river system; and the OECD treaty, by which we hope to make some headway in meeting common economic problems with various nations whose economies are closely allied to our own.

The Senate Committee on Foreign Relations gave these treaties an intense and searching examination, raising many questions which illuminated certain results which may flow from their ratification.

So, Mr. President, I think all Members of the Senate may take pride in the accomplishments of this week. Again, as the agent of the Senate, I express my thanks for the courtesy and cooperation given to me by all my colleagues.

WHAT MAKES GOOD GOVERNMENT?

Mr. CASE of South Dakota. Mr. President, on February 20 it was my pleasure and honor to participate in the program of the American Legion Student Government Day at Yankton, S. Dak.

On this occasion, Roy Shoemaker, the Student Government Day mayor of the city of Yankton, a city which 100 years

ago this summer became the capital city of Dakota Territory, delivered a short talk entitled "What Makes Good Government?"

This presentation of a student mayor, Mr. President, is demonstrative of the American Legion's purpose in sponsoring student government activities. A responsible concern for providing our young citizens with a realistic understanding of the processes of representative government provides the fundamental impetus in this activity.

Roy Shoemaker's address testifies that this American Legion program does successfully stimulate, among the young people it affects, serious reflections on civic responsibilities.

The South Dakota Department of the American Legion has rendered an outstanding service and influence for good citizenship in the United States.

It was the South Dakota department which initiated American Legion sponsorship of the Student Government Day program, the Yankton post being the originating unit.

It was the Milbank, S. Dak., post which initiated the American Legion junior baseball program. This program has for years occupied a highly valued and now deeply institutionalized status nationwide.

Such programs for our youth as these can work only in ways beneficial for our society.

Mr. President, because of its very high quality, I shall make the Student Government Day address made by Roy Shoemaker, student mayor of Yankton, S. Dak., so that it may appear in the CONGRESSIONAL RECORD as it would if this young man were a Member of the Senate and delivered it here:

Mr. President, What makes a good government?

Is it the big businessman downtown? Is it the mighty industrialist who furnishes the Nation's steel? Is it the Government official in Washington or the Government employees at Cape Canaveral? Is it the ambassador to foreign countries or the brainy scientist who makes rockets that go faster and faster?

Is it the farmer or the butcher in the store? Is it the schoolteacher or the minister? Is it the bank owner or the bank depositor? Is it the citizen who earns $3,000 a year or the citizen who makes $10,000 a year?

Is it the straight "A" student or the average student? Is it little 4-year-old Johnny who dreams of becoming President some day, or is it 4-year-old Judy who plans to be a housewife?

All these different kinds of people, whether big or small, make up good government.

Everybody has a part to play in making government good. The big businessman is nothing unless the people buy his wares. The steel industrialist would not be there were it not for the people who mine the iron and run the smelting machines.

The Government official owes his position and power to the people. The foreign ambassador represents the people of the United States. The scientist owes his talents to none other than the people who gave him his opportunities. The farmer raises the wheat that the people eat. The butcher sells the meat which he got from the farmer. The bank owner is penniless unless the people trust and cooperate with him.

The straight "A" student would acquire little knowledge without the people's money that pays for the books and the teachers. Four-year-old Johnny wants to become President, but Judy has the power to see whether he makes it or not. Government depends on all persons no matter how big or small a position this person occupies. It is the people that make a government and the people that can make it or break it. The interest and participation that the people take in their government can make either a strong and powerful government or a very weak one.

Millions of Americans are being awakened from their complacent lives and many more are yet to be awakened. They are beginning to realize that government is a tool to be used by the people. And tools have to be kept in good running order and repairs have to be made. A tool that is used poorly or carelessly can lead to disaster. As the world now stands, participation and correct use of this tool can never be a matter of choice, but rather a matter of necessity.

The younger generation are an important part of the people. We will be the future farmers, businessmen, bankers, government employees, butchers, and housewives. We will determine the outcome of the Government of the United States of America. Soon it will be our turn to face the many, many problems of keeping this tool running properly.

It is through programs such as Student Government Days that we gain interest, knowledge, and foresight as to the running of government. Many of us have encountered the problems of government today and we have learned much. I am sure this program will bear good fruit in the future for us, the students of Yankton High School. Thank you.

Mr. President, that is the address of the student mayor, Roy Shoemaker of Yankton, S. Dak., delivered by him on February 20, 1961, concluding the activities of Student Government Day.

AMENDMENT OF HOUSING ACT OF 1950—ADDITIONAL COSPONSORS OF BILL

Mr. SPARKMAN. Mr. President, I ask unanimous consent that, at the next printing of the bill (S. 1245) to amend title IV ("Housing for educational institutions") of the Housing Act of 1950, as amended, introduced by me on March 7, 1961, the names of Senators DOUGLAS, ANDERSON, and KEATING may be added as additional cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT TO MONDAY

Mr. CASE of South Dakota. Mr. President, I move, pursuant to the order previously entered, that the Senate adjourn until 12 o'clock Monday.

The motion was agreed to; and (at 11 o'clock and 29 minutes p.m.) the Senate adjourned, under the order previously entered, until Monday, March 20, 1961, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 16, 1961:

RENEGOTIATION BOARD

Thomas D'Alesandro, Jr., of Maryland, to be a member of the Renegotiation Board.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 16, 1961:

RENEGOTIATION BOARD

Herschel C. Loveless, of Iowa, to be a member of the Renegotiation Board.

DEPARTMENT OF AGRICULTURE

Charles S. Murphy, of Maryland, to be Under Secretary of Agriculture.

James T. Ralph, of California, to be an Assistant Secretary of Agriculture.

FEDERAL TRADE COMMISSION

Paul Rand Dixon, of Tennessee, to be a Federal Trade Commissioner for the unexpired term of 7 years from September 26, 1960.

U.S. ATTORNEYS

Lawrence Gubow, of Michigan, to be U.S. attorney for the eastern district of Michigan for the term of 4 years.

James P. O'Brien, of Illinois, to be U.S. attorney for the northern district of Illinois for the term of 4 years.

U.S. GOVERNMENT PRINTING OFFICE

James L. Harrison, of the District of Columbia, to be Public Printer.

PUBLIC HEALTH SERVICE

Dr. Worth Bagley Daniels, of the District of Columbia, to be a member of the Board of Regents of the National Library of Medicine, Public Health Service, for the remainder of the term expiring August 3, 1962.

HOUSE OF REPRESENTATIVES

THURSDAY, MARCH 16, 1961

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

I Thessalonians 3: 12: *The Lord make you to increase and abound in love one toward another, and toward all men.*

O Thou who art the Creator and Companion of our souls may we daily feel the touch of Thy spirit renewing our faith, cleaning our minds and hearts and kindling in them a pure flame of insight and aspiration.

We pray that all who have been entrusted with leadership in the various branches of government may be the honored servants of the Lord in directing our Nation in the ways that are well pleasing unto Thee.

May our hope and confidence in the coming of Thy kingdom of righteousness and peace never be eclipsed by the dark clouds of cynicism and defeatism.

Show us how we may help to make life more sacred and significant for some who have a contempt for it; happier for those whose days are filled with sorrow and loneliness; less difficult for the many

for whom life is a tremendous struggle; and more full of meaning and worth for all of us.

Hear us in Christ's name. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 1. An act to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically distressed areas.

S. 900. An act to provide for the striking of medals in commemoration of the 250th anniversary of the founding of Mobile, Ala.

The message also announced that, pursuant to law, the Vice President made the following appointments:

The Senator from Nevada, Mr. BIBLE; the Senator from Minnesota, Mr. MCCARTHY; and the Senator from Idaho, Mr. DWORSHAK, members of the Board of Visitors to the U.S. Military Academy.

The Senator from Mississippi, Mr. STENNIS; the Senator from New Jersey, Mr. WILLIAMS; and the Senator from South Dakota, Mr. MUNDT, members of the Board of Visitors to the U.S. Naval Academy.

The Senator from Oklahoma, Mr. MONRONEY; the Senator from North Dakota, Mr. YOUNG; and the Senator from Nevada, Mr. CANNON, members of the Board of Visitors to the U.S. Air Force Academy.

The Senator from West Virginia, Mr. BYRD, member of the Board of Directors of Gallaudet College.

The Senator from Iowa, Mr. MILLER, member of the Outdoor Recreation Resources Review Commission.

The message also announced that the Vice President had appointed Mr. JOHNSTON and Mr. CARLSON members of the Joint Select Committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the U.S. Government," for the disposition of executive papers referred to in the report of the Archivist of the United States No. 61–4.

ADJOURNMENT UNTIL MONDAY, MARCH 20, 1961

Mr. MCCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CALENDAR WEDNESDAY BUSINESS

Mr. MCCORMACK. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday of next week be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

COMMITTEE ON RULES

Mr. MCCORMACK. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tomorrow night to file certain reports.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ST. PATRICK'S DAY

Mr. KIRWAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. KIRWAN. Mr. Speaker, once again we join with all our Irish friends in celebrating the feast day of St. Patrick. We have been presented with these fine green carnations through the generosity of the national board of the Ancient Order of Hibernians. For many years we have been presented with these carnations through the kindness of the Hibernians and we wish to assure them of our sincere appreciation of their thoughtfulness and hope that they may continue to prosper through the years ahead.

The celebration of St. Patrick's Day this year has special significance in that it is the 1,500th anniversary of the death of St. Patrick, apostle of Ireland and its first bishop. This year is being dedicated in Ireland as the Patrician Year, and there will be special commemorations and celebrations throughout the country this year.

The Patrician Year is being inaugurated this St. Patrick's Day in ceremonies at Armagh, the primatial see of Ireland. James Cardinal McIntyre of Los Angeles has been designated by Pope John as his papal legate for the occasion, and he will officiate at the special religious ceremonies.

We wish the people of Ireland every happiness throughout this anniversary year and hope that this island Republic, a true democracy, may continue to grow and prosper economically and spiritually. We join with the people of Ireland and with all her sons and daughters in America, particularly with the members of the Ancient Order of Hibernians, and with the Irish throughout the world in celebrating this great Irish feast day and commemorating this 1500th anniversary.

Mr. MCCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and further that all Members who desire to do so may extend their remarks at this point in the RECORD on the subject of St. Patrick's Day.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. MCCORMACK. Mr. Speaker, the great St. Patrick, patron and apostle of Ireland, died and entered into everlasting glory almost 15 centuries ago, but his day is kept with increasing enthusiasm and devotion the world over. The life of St. Patrick, the words of St. Patrick, and the heroic spirit of St. Patrick inspire the world today as much as they inspired the non-Christian inhabitants of Ireland in the days of his mission.

The spirit of St. Patrick, evidenced by his word, deeds, and accomplishments, lives with vigor in the world of today, not only in the minds of those of Irish blood, but in the minds of countless of millions of persons of non-Irish blood, and of religions other than Catholic, because he was truly a man of God. St. Patrick will never die in the minds of good persons everywhere, now and in the future.

The spirit of St. Patrick is the spirit of dedication to God, mankind and country. In the troubled world of today, we need the spirit of St. Patrick animating, influencing, and inspiring the minds of millions everywhere to constructively meet the deadly forces of atheistic communism.

It is well that we pause to honor the memory of this great saint whose God-loving influence has been and will continue to be among the greatest in the known history of man.

Mr. OLSEN. Mr. Speaker, as March 17 comes around each year, the thoughts of millions of Irish descent, whether still living in the old country or far across the seas, turn toward their patron and ever beloved St. Patrick, the one-time slave boy who rose to be one of the greatest of Christian missionaries; whose name for 1,500 years has been one to conjure with; whose luster fades not with the centuries.

So it is with pleasure that I greet you on this glad day which is so justly held in reverence by the Irish people and their myriad descendants in the United States. It is a day on which men and women of true Irish descent foregather to renew their allegiance to a noble past and to reaffirm their loyalty to the great traditions of their race as they have been handed down through countless generations. Of this past, of these traditions, St. Patrick must ever remain the supreme and unchanging symbol. The time has long since elapsed—oh, a thousand years ago—when ever saint or missionary, however miraculous, however holy, could, by any stretch of the imagination, replace him: he shines in the Irish sky, a star without compare. Every race of high culture has its own special folk hero in whom, surrounded though he be by clouds of mythology, are summed up what the nation feels embody its noblest virtues and aspirations. Whether he be partly or wholly legendary does not greatly matter; so long as he symbolizes in his own life and personality what his countrymen feel to be their own peculiar heritage woven out of the deeds and exploits, the hopes, yearnings, and fears that constitute the national folklore, he is taken to their hearts as their own peculiar possession. Thus, Norway has her St. Olaf, England has her King Arthur, Wales her St. David, Scotland her Robert the

Bruce, France her Joan of Arc, Switzerland her William Tell, the Slavs their Sts. Cyril and Methodius, and so forth. And Ireland has her St. Patrick. So well does he, through his works and character, personify to the Irish what they most revere that, to paraphrase the French philosopher, if there were no St. Patrick it would have been necessary to invent him. But he was—is—very real. Before we examine his wonderful story, let us cast a brief glance into the ancient cultured heritage of Ireland and of the Ireland Patrick left behind him.

It has been estimated that hunters and fishermen, arriving by way of Scotland, settled on the northeast coasts of Ireland some 10,000 years ago, and were the first human beings to find a home in Ireland. Certainly their relics are the earliest to be found there today, belonging to the transition period between the early and late stone ages. This period, it is held, was preceded by intense glacial conditions, covering the whole of Ireland and extending over Britain as far south as the estuaries of the Severn and the Thames. There followed the Neolithic and Copper periods, which are well represented in Ireland, although their relics belong to archeology rather than to history. The Bronze Age in Ireland, however, although it has no documents, has nevertheless left evidences sufficiently abundant and characteristic to be termed historical. To it belongs the massive tombs surmounted by great tumuli, or mounds, of earth or stones. The latter are sometimes carved with designs, symbolic or ornamental, which proves them to be products of a settled civilization. While there were rich copper mines, there was no tin, necessary to make bronze, in Ireland, so that the tin must have been imported—without doubt from the mines of adjacent Cornwall, as did the ancient Phoenicians of the Mediterranean area. The distinctive feature of this early period was gold, which was mined from deposits in the Wicklow Mountains district. Irish artisans gained the reputation for skilled craftsmanship and Irish gold ornaments have been found in many places in Britain and in the western part of the European Continent.

About 1000 B.C., according to such archeological evidence as we have, the Celts commenced to infiltrate Ireland. Just who they were, we do not know; no one in the literate world saw them, and there is no indirect evidence since they cremated their dead. It was they who introduced iron into Ireland. They established small states whose chiefs were called kings; these states were gradually separated into five groups whose names, under modernized spelling, still figure in Irish geography, names such as Ulster, Leinster, Munster, et cetera.

About the beginning of the Iron Age, during the great population movements which spread throughout Western Europe at that time, groups speaking Celtic dialects, from which Irish and Welsh derive, broke in a series of waves through France, thence south into Spain, and north into Britain and Ireland. These tribes, mingling with the older inhabitants, form the basis of the society revealed when history proper begins with the introduction of Christianity in the fifth century. By then that society had been long established.

This society on which the curtain rises with the arrival of the first Christian missionaries, who were able to read and write and hence record what they saw, was an elaborate one. The political structure was that of a heptarchy, with semi-independent rulers in seven coordinate kingdoms, all acknowledging the overlordship of the Árd Ri, or High King, whose court was held at Tara, as head of the confederacy. It was apparently a most splendid court that these High Kings held; but only mounds of green earth mark today the site which 14 centuries later led to the poet's famous lament on "The harps that once through Tara's halls."

Throughout the entire country, in these pre-Christian days, an involved legal system governed almost all relations, from the conduct of doctors, judges, teachers, and builders to the duties of foster parents and foster children. The same Gaelic language, uniform in the preserved literature, was spoken throughout Ireland, and also in Scotland, which was colonized from Ireland. The conditions of our knowledge of this culture are such that we see it from the beginning, with its original pagan structure profoundly modified by Christian and classical influences. But it was a harmonious, and for a time glorious, adaptation. Christianity and classical learning were implanted in Ireland not by force of arms—for Ireland was never invaded and conquered by the Roman legions—but by the willing and peaceful reception of the message of the slave boy who become St. Patrick. This Christian culture, superimposed upon an earlier pagan civilization, led to a wonderful flowering—a veritable sunburst, which became Ireland's golden age where for a few centuries she dispersed light and learning in what would otherwise have become almost total darkness. The great age paled, the sun went out, but not before Ireland had kindled the flame of Christian culture on the Continent; kept learning and letters alive in those very dark ages. Many, many weary centuries of grinding poverty and brutal tyranny were to follow until in the 20th century of the Christian era the Isle of the Saints came once more into its own, with freedom to learn, to worship, and to develop its own resources. Meanwhile, if we recall that in the history of our own country the great host of Irish immigrants who for 2 centuries have landed on our shores have been largely poor and of primitive learning, let us remind ourselves at the same time that at the most critical juncture in the history of European Christianity, Ireland, and Ireland alone, held the torch aloft. To quote an eloquent paragraph in the elaborate brochure issued by the Irish Ministry of External Affairs in 1950:

> On her alone, from the sixth to the ninth centuries, fell the main burden of preserving European civilization and of propagating the Christian faith on which that civilization depended. Her people did not shrink from that tremendous task, in all appearances absurdly disproportionate to the resources of the remote little island. Her monks went to every part of the then known world and perhaps beyond it. They brought Christianity as far north as Iceland and as far east as Kiev. They founded monasteries in Scotland—St. Columba's Foundation of Iona was made 50 years before St. Augustine came to Kent—and St. Aidan at Lindisfarne introduced reading and writing to the English: the only extant MS. of the earliest English epic Beowulf is written in the Irish lettering. On the Continent St. Columbanus' monasteries at Luxeuil, in France, and Bobbio, in Italy, became the principal centers of the reconversion and education of a Europe lapsed into barbarism. St. Fridolin at Strasburg, St. Fearghal among the Bavarians, St. Gall in Switzerland labored at the same task. The schools of Ireland naturally attracted students from all over Europe and they produced great men—among them John Scotus Erigena, probably the most learned man of his day and the first great philosopher to arise since the fall of Rome. The German scholar Zimmer has said that these Irish were the possessors and bearers of a higher culture than was to be found anywhere on the Continent, and therefore instructors in every known branch of the science and learning of their time. They laid, he says the cornerstone of Western culture on the Continent.

Thus the background.

Today Irishmen all over the world will celebrate the traditional birthday of their patron saint. The year of his birth is as obscure as his birthplace itself. The dates of his birth have been assigned to years as widely at variance as 373 to 396; his death, anywhere from 461 to 493. As for his birthplace, one tradition places it in either Kilpatric or Dumbarton, in Scotland; still another, on the southwest coast of Britain, and so on. Patrick's Celtic name was Sucat to which was later added Patricius. His father, apparently a Christian, is said to have been a municipal councilor; his grandfather was a presbyter, an officer in the Christian church of his community. According to the familiar story, Patrick was captured, when a lad of about 16, by an Irish raiding party and carried off into slavery, in the words of the story, in a region "near to the western sea"—possibly the present County Antrim. After 6 years he managed to escape; the period of slavery, however, had not been spent in vain for in his years of bondage Patrick had learned to speak the Irish tongue and to understand the Irish character thoroughly. Thus, through the mysterious workings of providence, the captive youth gained an insight into the minds and hearts of his captors which was to fit him, at the proper time, to become one of the greatest of Christian missionaries; indeed, there has been none greater since apostolic times.

He took refuge after his escape in a French monastery where, after 14 years of arduous study, he was ordained a priest. It was during those years of retirement and contemplation, as he tells us in his "Confessions," written toward the close of his life, that he had a vision in which as the Macedonians besought St. Paul, the Irish besought Patrick to come over and help them. Henceforth

the pattern of his life was set. Consecrated bishop of Ireland, in the year 432 the former slave boy turned his face toward the land he had seen in his vision calling to him to lead it forth from darkness into light.

Although it cannot be known for certain, it is probable that Patrick landed at the mouth of the River Vartry in the present County Wicklow at a place called Inverdea. Proceeding into east Ulster, he began his missionary work on the southwest side of Strangford Lough in a wooden barn given him for religious purposes by a convert named Dichu, a chief and a man of importance in that part of the island. Patrick quickly revealed himself a statesman as well as a missionary, for he grasped the importance of winning the favor of the kings and chieftains and soon appeared before the high king and the Druid priests on the royal hill of Tara. It is to this period of his life that many of the legends and traditions, mostly of a miraculous nature, are ascribed. Whatever we may believe as to the saint's driving the snakes from Ireland—and no true Irishman for a moment doubts it—and many other miracles, Patrick proved a most formidable foe of paganism to which, especially in the persons of the Druids, he dealt a death blow. Personally, he appears to have been a man of iron will as well as of very considerable executive ability. He must also have been considerable of a diplomat to have achieved such success in the midst of warring factions and in the face of Druidism which had long been firmly entrenched in the land. Whatever may be doubtful concerning his personal life, there can be no doubt whatever that he was a very great organizer, a man of tireless energy. We are told that before he laid down his work he had founded 360 churches, baptized with his own hands some 12,000 people, and ordained countless priests. At his death, so runneth the ancient tale, "so great was the glory that there was no night for 12 days."

To his spiritual sons the great apostle to the Irish bequeathed a wonderful heritage which, like profitable stewards, they did not dissipate nor hide under a napkin but vastly increased. As has been previously pointed out, during the intellectual night of what has been aptly termed the Dark Ages of Europe, when all cultural knowledge but bare literacy itself was on the point of extinction, the early Irish missionaries kept the torch aloft. From northern Scotland to southern Italy, all over the face of a darkened continent, these indefatigable crusaders wandered, bearing the light of learning, shoring up and preserving not only the sacred writings of their own faith, but the rich heritage of pagan antiquity. As the German scholar Zimmer said, these Irish of old, the spiritual heirs of St. Patrick, were the possessors and bearers of a higher culture than was to be found anywhere on the Continent, and therefore instructors in every known branch of the science and learning of their times. They laid, indeed the cornerstone of Western culture on the Continent.

Our Western, Christian civilization can never repay the debt we owe to these intrepid spirits who lived so many centuries ago yet whose labors are made manifest every hour of our daily lives.

The spirit of St. Patrick was early felt in our own midst, here in a New World of which he and St. Iona and St. Columba never dreamed. The story of Irish immigration to these shores forms one of the most significant chapters of our national history. The earliest American celebration of St. Patrick's Day, of which written record has been found, occurred so early as 1737. On the traditional March 17 of that year the Charitable Irish Society was organized in Boston. The preamble of the instrument of organization reads, in part, as follows:

> Whereas, several gentlemen, merchants and others, of the Irish nation residing in Boston in New England, from an affectionate and compassionate concern for their countrymen in these parts, who may be reduced by sickness, shipwreck, old age and other infirmities and unforeseen accidents, have thought fit to form themselves into a charitable society, for the relief of such of their poor and indigent countrymen, without any design of not contributing toward the provision of the town poor in general as usual.

Thus did St. Patrick arrive in America.

The hospitality extended on these shores to Irish immigrants has been from the start richly repaid, both in mass and by individual contributions to American history. The very first skirmish in what was to be the opening of the Revolution memorializes the name of Gen. John Sullivan. Born at Somersworth, N.H., he was the son of an immigrant from Limerick. Elected a delegate to the First Continental Congress in 1774, he was back in New Hampshire in time to receive Paul Revere's warning of a British threat, whereupon he rallied a band of local patriots which assailed and captured Fort William and Mary at the entrance of Portsmouth Harbor and seized 100 barrels of gunpowder. Elected a Member of the Second Continental Congress, in July 1775, he was commissioned brigadier general.

His career in the Revolution was long and distinguished. A member of Washington's staff in the siege of Boston, he took part in the ill-fated expedition to Quebec. Promoted major general, he joined the Union Army and in the Battle of Long Island August 27, 1776, was captured and taken before the British commander, Lord Howe, who wished to send him back to his own lines with peace overtures. With Washington's permission, Sullivan went to Philadelphia, where Congress was sitting, to present the British overtures. The overtures were not accepted, but in the course of the negotiations Sullivan was exchanged for a British general of corresponding rank—a fortunate exchange for the Americans, who needed him badly. Sullivan shared in the retreat across the Jerseys, led the right column at Trenton, and pursued the British to Princeton. His spirited conduct and Irish temper had meanwhile made him enemies in Congress who demanded a court of inquiry on Sullivan's failure to capture Staten Island and for alleged failure at the Brandywine. Washington, however, stood immovably behind his spirited subordinate and investigation fully exonerated Sullivan's conduct. He was with Washington during the terrible winter at Valley Forge and in the spring was ordered north to Rhode Island to make a junction with the French Fleet under D'Estaing. This failed, owing to the French withdrawal, and Sullivan, although he severely repulsed the British near Newport, was obliged to withdraw because of greatly inferior forces.

We last see him during the war in a raid on western New York where he thoroughly crushed a Loyalist and Indian threat, performing perhaps his most valuable single service for his country during the war for its independence. Ill health compelled him to resign from the Army, and in 1780–81 he reappeared in Congress as a delegate from his State. In 1782 he sat as a member of the New Hampshire Constitutional Convention and later served as attorney general of the State and speaker of the assembly. In 1786 he was elected president; that is, Governor of New Hampshire and his tenure was marked by the firmness and moderation with which he suppressed the paper money riots. Reelected president, he served as chairman of the New Hampshire convention which ratified the Federal Constitution; served again as speaker of the assembly and yet again as State president. In September 1789, his old friend and commander, President Washington, appointed him U.S. district judge of New Hampshire in which capacity he served until his death in 1795. Descriptions of this fighting Irishman, as they come down to us, leave us the picture of a fearless soldier; hotheaded, sensitive, generous to a fault, like so many of his race, usually out of money—also not uncommon among the sons of the Emerald Isle—and a born political organizer—that, too, a role not unknown to those who bear such names as Sullivan, and the like. Whatever else he was, or was not, he was a most devoted, intrepid patriot—this descendant of the Sullivans of County Limerick, the first to win an engagement in our War for Independence. What more appropriate day than March 17 to recall his name and fame?

Then on the naval side of the Revolution, there was the redoubtable Commander Barry, born in County Wexford, and a fighting Irishman if there ever was one. He is often called the founder of the American Navy, and if he was not exactly that, he undoubtedly shares with the great John Paul Jones the credit for the glorious naval victories which launched the American Navy on the oceans of the world. In the yard at Philadelphia, directly in front of Independence Hall, stands the vigorous representation of the doughty Irishman who was once the terror of his foes as he trod his quarterdeck. Every line of the virile, heroic figure proclaims the fighter: even memorial bronze cannot stifle an Irishman's instinct for the dramatic, and so the Irish commander,

as he was fondly called, stands on perpetual guard in front of the shrine which saw the birth of the American Independence Barry helped so mightily to insure. On December 2, 1783, General Washington sent an address to the members of the volunteer association and other inhabitants of the Kingdom of Ireland who have lately arrived in the city of New York, which I cannot refrain from reading to you:

NEW YORK, *December 2, 1783.*

GENTLEMEN: The testimony of your satisfaction at the glorious termination of the late contest, and your indulgent opinion of my agency in it, affords me singular pleasure and merit my warmest acknowledgment.

If the example of the Americans successfully contending in the cause of freedom, can be of any use to other nations; we shall have an additional move for rejoicing at so prosperous an event.

It was not an uninteresting consideration, to learn that the Kingdom of Ireland, by a bold and manly conduct had obtained the redeess of many of its grievances; and it is much to be wished that the blessings of equal liberty and unrestrained commerce may yet prevail more extensively; in the mean time, you may be assured, gentlemen, that the hospitality and beneficence of your countrymen, to our brethren who have been prisoners of war, are neither unknown, or unregarded.

The bosom of America is open to receive not only the opulent and respectable stranger, but the oppressed and persecuted of all nations and religions; whom we shall welcome to a participation of all our rights and privileges, if by decency and propriety of conduct they appear to merit the enjoyment.

I cannot pause to single out all the Irishmen who have borne their gallant parts in the various wars of the United States; whether they rose to lasting fame like General Sheridan of the Union Army in the Civil War, whose parents had immigrated from County Cavan, or whether they were merely "in the ranks," you may be sure that Pat and Mike and Terence were always to be found in the forefront of the fight—after all, a good fight is an Irishman's greatest luxury and his basic concept of good breeding is to restrain himself only so far as to inquire whether it is a private row or whether anybody can join in. Nor will the Irishman be the last to leave—unless, indeed, he is left stretched out on the field.

> There were three cats of Kilkenny;
> They fit an' they fit
> Until there weren't enny.

There is glory enough for all. No American of Irish descent need ever be ashamed of the long and illustrious roll of soldiers and sailors who have distinguished themselves in every war in which the United States has been engaged from the Revolution through World War II. As Bishop Sheen once remarked, "Since an Irishman loves more than anyone else, he fights more than anyone else." Let me give you a few famous firsts of Irish-Americans during the last conflict:

The first American bombardier to sink a Jap ship was Colin Kelly.

The first American to kill a Jap was Michael Murphy.

The first American flyer to bag five planes was Edward O'Hare.

The first American to be eulogized for bravery by the President was John Patrick Powers.

The first American coastguardsman to catch a spy was John Patrick Cullin.

The first American to make himself a human torpedo was Richard O'Rourke.

The War Department does not give out information regarding nationality of service personnel, but the Irish War Veterans, USA, have estimated that during World War II, 3,500,000 persons of Irish or part-Irish descent served in the Armed Forces.

Several Irishmen have influenced my life greatly. One, Jeremiah J. Lynch, first in influence upon me—like his breed in this country, rose from obscurity as an immigrant to position of eminence in the field of law in Montana. He influenced many, like me, new law graduates. Jeremiah J. Lynch, a kindly district judge of the second judicial district of Montana, lectured and tutored me in my early practice of the law in Butte. I shall always cherish his memory.

Out of respect for him and his family, Mr. Speaker, I recount briefly of his biography.

Jeremiah J. Lynch was born in Ballycrovane, County Cork, Ireland, January 9, 1871. He was educated in the so-called National Schools from the age of 4 to 18½ years. Mathematics, grammar, geography, English composition, euclid, algebra, and mensuration were the chief subjects taught. It was what equaled a good high school education.

On May 25, 1890, he arrived in the United States. For 4 months he lived in Fall River, Mass. Three of the four months were spent working as a deckhand on the *Puritan* sidewheeler. Late in September 1890, he came to Butte. From October 1890 to April 1891, he worked in the mines. He then went to Utah where he worked in the Ontario drain tunnel and in the Keystone mine until later in September 1891. He returned to Butte and worked in the Anaconda and St. Lawrence mines from September 1891 until July 4, 1897. In 1895 he was admitted to citizenship. He entered the Kent College of Law in September 1897, and graduated from it in June 1899, with the bachelor of law degree. In June 1899, he returned to Butte and was admitted to the bar of Montana in December 1899.

From April 26, 1898, until it mustered out on order of President McKinley in October 1898, he served as private and corporal in the 7th Illinois Volunteer Infantry.

In May 1901 he was appointed deputy county attorney and held that office until August 1904. In January 1907 he was elected district judge and held that office for 26 years until 1933. He was appointed assistant attorney general in January 1933 and held it until January 1937. He was returned to the bench in January 1937 and held it for an additional 12 years. Early in 1949 he retired from active practice of the law, but he still attends to probate work when offered.

He still counsels all people who seek his advice—especially does he continue to aid the novices and the learned in the law. Judge Lynch is a living example of the Irish citizen in America and in my old hometown of Butte, Mont.

I am exceedingly proud of all the proud Irish of my friendship and acquaintance. In this tribute to St. Patrick and to Judge Lynch, I render sincere tribute to all the Irish of my western Montana district and of the Nation.

And so we round out another day of St. Patrick. Whether his sacred dust has reposed there 1,500 years under the great boulder at Downpatrick, or elsewhere, we may be sure that his spirit rejoices as he looks down to behold, every 17th of March, the group of his devoted admirers gather together all over the earth to refresh themselves in good green remembrance.

Erin go bragh. Which, for your information, means Ireland forever.

Mr. CONTE. Mr. Speaker, it is always a pleasure to join my colleagues on this particular day, to address this distinguished body in tribute to St. Patrick of Armagh. For 1,500 years this great and good man has been remembered on March 17 and, as the years pass, the meaning of this feast becomes more apparent and important.

The Irish nation owes its introduction into Western civilization to this great churchman. With the establishment of Christianity on the Emerald Isle and the subsequent development of the abilities and talents of the Irish people, contributions of inestimable value were made to the rest of Europe. Knowledge and culture, preserved in the monasteries of Ireland, were spread across the continent of Europe, and there to influence the roots of Western civilization itself. Because we are the heirs to this tradition and culture, we are indebted to the early Irish monastics who, during a dark period in history, preserved and handed down the great treasury of man's noblest efforts, to enhance the cornerstones of the civilization to which we belong.

In the United States, St. Patrick has become a symbol of the brotherhood of man. Men of all faiths seem to find in this celebration another instance of the common ground upon which all mankind must stand if lasting peace is ever to be achieved in this world. Because in commemorating the memory of St. Patrick, in the joyous and festive air of the occasion, we seem to be prompted to consider our fellow men from an attitude of understanding, mutual trust, and respect. If such is the only good to come from this feast, then I am sure that St. Patrick would agree that his message has indeed spanned the years of time but, more important, that it is just as vibrant and alive among men today as when it was first enunciated.

I think that in this sense St. Patrick belongs not only to those in Ireland or of Irish descent around the world, but to all men who understand the universal language of brotherhood, goodness, and charity.

Mr. TOLL. Mr. Speaker, St. Patrick is beloved the world over, and his day is observed, year after year, with more universal enthusiasm. I believe this is because his life and his writings embody

the principles of fundamental importance in this time of world unrest and danger, of oppression and violence. It was no easy and peaceful world that St. Patrick grew up in. Captured by piratical raiders, serving long years in slavery, he learned what it is to be ruled by violence and force—to exist without any rights that stronger people are bound to respect.

Out of this experience, and out of his prayers and meditations, St. Patrick developed a harmonious combination of apparently contradictory qualities. He was a peaceful man of fiery courage and determination. He was a humble man who stood defiantly before kings and chieftains, and braved their anger. He loved the oppressed and enslaved, and devoted his energies to their liberation and protection; but his love for their enslavers and oppressors was no less, and he preached to them with a persuasive warmth of affection that came from his deep realization of the harm their violence and injustice was doing to themselves.

Today St. Patrick is recognized the world over as a champion of steadfast faith, of the human rights of minorities and individuals, and of the right of small nations to their national independence. On his feast day, I salute St. Patrick and all who share the Irish blood or the Irish spirit.

Mr. RODINO. Mr. Speaker, tomorrow we celebrate the anniversary of the death of St. Patrick, for, according to tradition, it was on March 17, more than 400 years ago, at Saul in Ulster, that the great apostle of Ireland breathed his last.

Yet it takes no such event as this to arouse interest in St. Patrick. For centuries the Christian world has commemorated his feast day with an enthusiasm rarely bestowed upon that of any other saint.

One explanation for this is the deep and abiding love of the Irish people for their patron saint, a love they carried with them when the sad misfortunes of their native land forced them to emigrate to the four corners of the earth a century ago.

But the real answer lies deeper, for the keen and perceptive sense of the Irish does not readily permit them to give their hearts to a man unless they see something in him that especially recommends him as an object of affection.

What, then, was it that the Irish saw in Patrick which made them conceive for him so lasting a love—a love passed on from generation to generation, as one of their most cherished traditions? Not only has it shone for 1,500 years among their own descendants but also among men of all nationalities who have come to know Patrick and to appreciate something of the significance of his life.

The answer to the question can, I think, be found only in the character of the saint himself. Born about A.D. 385 in Roman Britain, he was captured by Irish raiders at the age of 16 and taken as a slave to Ireland, where for 6 years he tended the flocks of a pagan master. It was during his time of servitude that he discovered the secrets of God's love.

There, he heard in his dreams the heavenly voice that directed him to the seacoast, and to an escape from slavery on a ship carrying Irish hounds to shores of Burgundy.

A brief sojourn in Britain with his family did not still the voice, which kept repeating that Patrick's mission in life was the conversion of the pagan Irish. Once more he crossed the channel, to train for the ministry. And upon his return he was ready to begin his mission. When the bishop of Ireland died, Patrick was chosen his successor.

From the day he reappeared in Ireland, in A.D. 432, until the day of his death nearly 30 years later Patrick worked ceaselessly to uproot paganism and to plant the cross of Christ.

When he passed away, Patrick could do so in the knowledge that his efforts had accomplished more than he ever dared to dream.

There is an old proverb that says, "Words move, example draws." It was Patrick's example that proved the sincerity of his words. And not only that. From the moment of his youthful conversion among his flocks, his entire energies were devoted to fulfilling the laws of Christ and to promoting them wherever he went.

His writings and a study of his deeds show how splendidly St. Patrick met the test of true greatness. In the face of the fiercest opposition from the pagan Druids, he boldly declared:

> Regardless of danger, I must spread everywhere the name of God so that after my decease I may leave a bequest to my brethren and sons whom I have baptized in the Lord.

Such was the courage and the will of this saint we honor today, whose spirit is illustrated so clearly in an ancient prayer attributed to himself:

> Christ in the heart of every man who thinks of me. Christ in the mouth of every man who speaks of me.

Mr. ADDABBO. Mr. Speaker, it is a singular privilege to join with the House membership in its annual observance of St. Patrick's Day. I feel that the word "celebration" may be better employed than "observance" because all my memories of March 17 are occasions of festivities, wit, and wholesome merriment. I boast the friendship of hundreds of friends—men and women of Irish descent. From them I have also learned their true inner feelings—of how their ancestors, who loved their native land, experienced centuries of tragedy and suffering in defense of their inborn freedom of spirit. Success crowned their efforts when eventually most of the Emerald Isle was released from colonial status, and the Irish people were rewarded with the rights of government through democratic principle. This little country stands as a splendid example today, stimulating hope in the hearts of small nations of the world imprisoned under Communist rule.

Many glowing words, in song and story, will be heard this weekend, wherever people stop to pay tribute to Ireland's patron saint. I will enjoy hearing them because Paddy's Day is of great significance in New York City. For my own part, I would like to conclude my statement by reading the words of Ireland's National Anthem. It is a stirring song, and as you hear its words you will detect a similarity to our own beloved anthem, which was inspired by the deeds of a fighting little band of Americans who were dedicated to breaking their own colonial shackles. I am grateful to Mr. J. J. Bolger, an attaché at the Irish Embassy, for his courtesy in furnishing me this grand "Soldier's Song," which follows:

THE SOLDIER'S SONG

We'll sing a song, a soldier's song,
With cheering, rousing chorus.
As round our blazing fires we throng,
The starry heavens o'er us;
Impatient for the coming fight,
And as we wait the morning's light,
Here in the silence of the night,
We'll chant a soldier's song.

(Chorus)

Soldier's are we, whose lives are pledged to Ireland;
Some have come from a land beyond the wave,
Sworn to be free, no more our ancient sireland,
Shall shelter the despot or the slave;
Tonight we man the gap of danger, in Erin's cause come woe or weal;
'Mid cannon's roar and rifle's peal, we'll chant a soldier's song.

In valley green on towering crag
Our fathers fought before us,
And conquered 'neath the same old flag
That's proudly floating o'er us.
We're children of a fighting race
That never yet has known disgrace,
And as we march the foe to face
We'll chant a soldier's song.

(Repeat chorus)

Sons of the Gael! Men of the Pale!
The long-watched day is breaking;
The serried ranks of Innisfail
Shall set the tyrant quaking.
Our campfires now are burning low,
See in the East a silv'ry glow,
Out yonder waits the Saxon foe,
So chant a soldier's song.

(Repeat chorus)

Mr. BOLAND. Mr. Speaker, no unofficial holiday, whether in America or elsewhere, is celebrated with more wholehearted and spontaneous enthusiasm than that day on which we observe the anniversary of the birth of the patron saint of Ireland. How much the name evokes, to be sure. It embodies the emergence from paganism of the fair and legend-laden isle which for a few centuries was to be the very center and spark of Christian learning; it recalls the notable missionary zeal which, like the leaven that leavens the whole lump, went forth with quenchless zeal in those Dark Ages after the collapse of the Roman Empire, tirelessly preaching the Gospel of Christ.

Of all the great missionaries who shine through their works in those darkling years, the name of Patrick figures gloriously in that triumphant band which went forward to conquer in the sign of the cross. For 1,500 years his star has twinkled steadfastly in the constellation of the saints; among all the early Christian missionaries who followed the Apostolic Age none is greater than that of the great apostle to the Irish. The slave boy, kidnapped by the wild band of

Gaelic invaders and carried off to Ireland, escaping from his captors in the course of time, returned many years later to "lead captivity captive" in the bonds of Christ.

Tomorrow, on many an Irish breast, in many a pot set in the windows of humble thatched cottages, will be evident the tiny trifoiled plant which is the emblem of St. Patrick.

Surely we have all heard the lovely story of the shamrock. It was from this humble little plant with its three tiny leaves, we are told, that St. Patrick drew his illustration of the doctrine of the Trinity. It is one of those traditions so entirely fitting, so eminently right, that it is safer to believe than to disregard it. When a proud and ancient people have for 1,500 years handed down from generation to generation without a break, or shadow of doubt, a previous story enshrining one of their most revered figures, he would be a rash person indeed who would presume loftily to wave it aside as a mere myth, a bit of folklore of the imagination.

May the sons of Erin long cherish the green shamrock and the beautiful legend it yearly recreates for them. May the Irish people and their descendents, who have settled long since in other lands across the seas, honor by their recollection and their works, their incomparable saint from the Isle of the Saints.

Mr. CAREY. If a man will not rejoice in the wisdom of his forebears who else will honor them? I am proud not only in the knowledge that my grandparents had the intelligence and foresight to be born in the County Galway, Ireland, but exhibited even greater wisdom in making the hazardous crossing to the United States to settle in the county of Kings, in the borough of Brooklyn and I would be remiss if I did not extend a similar compliment to the ancestors of the gentleman whose lineage traces itself to County Wexford and whose peregrinations have led by way of Boston to the residence at 1600 Pennsylvania Avenue. I will be among the first to scout and scotch any notion that the color of his gracious mansion should ever be any but white. However, by reason of his presence there I believe that what I saw today it seemed to take on just the slightest tinge of green, for this day we celebrate the 1,500th anniversary of Ireland's great St. Patrick and open the patrician year to commemorate his legendary elevation from slavery to eternal freedom.

The fame of St. Patrick is hard to explain, in one sense, yet completely comprehensible in another. He is the patron saint of Ireland, a small land of comparatively small population and yet his name is world renowned and hailed on the anniversary of his birth, not by Irishmen alone, but by millions of others in every corner of the earth.

The reasons for this may be many, yet by no means the least are a universal respect for knowledge and admiration for the teacher who goes among the uninformed to sow the seeds of wisdom.

Such a man was St. Patrick, who returned to the land of his captivity to preach the gospel of our Lord Jesus Christ. Malice was absent from Patrick's nature and he therefore sought not to punish those among whom he had once served as a slave. Rather, he sought to bestow on them the eternal light inherent in the teachings of Jesus. That he succeeded is apparent today, as for centuries past, in the devout nature of the Irish people.

When we contemplate conditions in Ireland at the time of Patrick's service, we well may wonder at the immensity of his accomplishments. For this was a stronghold of the Druid religion, and few there were who expected Christianity to prevail in so solid a heathen citadel. Yet the power of Christ is mighty in the hands of a teacher, and Patrick was that. In short time he was able to banish heathen notions in his own vicinity and convert the local multitude to Christian views.

Elsewhere it was necessary to send out other priests, ordained by Patrick, and these, in turn, were to aid in the final Christianizing of the land.

In consequence of this, Ireland stands forth today as an enlightened Christian nation and a glorious tribute to the efforts of their patron.

To all who respect the power of intellect, the power of love, and the power of truth, Patrick will ever remain a figure of importance in the annals of history.

No longer an Irish hero alone, he stands for light in a world eternally in need of light: as strength in a world praying daily for strength. No wonder, then, that his fame is great and his memory blessed not only to those who live in Erin but throughout the world on this 17th day of March when all are beloved of the Irish and the Irish beloved of all.

Mr. HALPERN. Mr. Speaker, it is not often that we have the opportunity to pay tribute to an individual who has touched the imagination and heart of so many of divergent creeds and nationalities, and has by his example brought about closer and more harmonious ties among men. I am speaking of St. Patrick, a figure strong both in legend and literature, who decided to go to Ireland at the head of an Irish mission, after a dream in which a man appeared before him with a letter, the opening lines of which read: "The voice of the Irish." As he read he seemed to hear the voices of individuals who were near his place of slavery crying out: "We beseech thee holy youth to come and walk once more among us." As history tells us, he pursued his mission with singleness and dedication to purpose, espousing the highest principles of justice, kindness and charity to all men no matter who they be or from whence they sprang. Be of good cheer, temperate in your manner, humble but firm as to purpose, and above all, tolerant as to the feelings and thoughts of another. It is these principles which still guide us in our relationships to our fellow men, yet there are some who wish us to abandon our allegiance to these high ideals and fall into the morass of deceit and criminality, without which they could not exist.

What could be a more appropriate symbol for St. Patrick than the color green, warm and gay to the eye, reminding some of the lush fields and hills of Ireland, and to others, that spring with all its freshness and beauty is not far away.

We are grateful that a nationality which has contributed so much to the American ideal allows us the opportunity to share in the celebration which commemorates a man dear to their heart and history, and now to ours.

Mr. GALLAGHER. Mr. Speaker, the story of St. Patrick is the story of captive peoples everywhere, throughout the history of mankind. Moreover, it stands as a symbol of hope to all the captive peoples of the present day. For Patrick was not simply a local hero with the ability to cope with local problems. Indeed, his problems were those of civilization, itself, and his solutions applicable not only to Ireland, but to nations of every description, in every time and place.

Carried into slavery in his youth, Patrick was transported to Ireland around 400 A.D., and was not to retain his liberty for 6 long years. In the time that elapsed this saintly man gave no thought to revenge, for that was far from being his nature. Instead, as a Christian, he came to understand the heathen weakness of his Irish captors, and determined that some day he would come among them as a Christian teacher, to spread the Gospel to those so sorely in need.

Escaping his bonds, he fled to France, where he entered upon the study of missionary work, and in the year 432 he returned to Ireland in the role of a bishop.

History and tradition record many wondrous acts by St. Patrick during his service in Ireland. Three hundred and sixty churches are said to have been built under his auspices, and 12,000 people baptised at his own hand. As an able administrator he knew no peer, and in the time that he stayed in Ireland he was to ordain so many priests and convert so many heathen that the Druid religion—the religion of his persecutors—was shocked out of existence in the land.

Through fables and folk tales we are told that he did many wondrous things to win the confidence of the people. It is said that he drove the snakes and toads from Ireland, for instance; that in contests with the Druid priests he was known to have performed many miracles; that he was able to confound his enemies by bringing darkness upon them, and that at his death, the sun shone steadily for 12 days.

Be that as it may, there is no denying the persevering and noble qualities of the man, who entered the land of his captivity to bring the love of Christ to those who knew it not; to spread the light of Christianity among those that had dwelt for years in veritable darkness.

Nor can anyone with knowledge of the Irish people fail to consider the fact that they radiate a Christian spirit unsurpassed by any other nation on earth today.

In the period embracing Patrick's lifetime, Ireland was but a conglomeration

of municipalities ruled over by a score of self-designated kings. By singling them out, one by one, Patrick managed to win over most of the kings to the Christian cause. His knowledge of the Irish language was of course a great benefit to him in all his undertakings among the Irish people; and his experience of 6 years in the country had given him an insight into the character of the people that he could probably not have learned as well in any other way.

In such a manner did Patrick profit by his captivity and in time was able to turn against his captors the forces of righteousness. So it has ever been in the case of captive peoples, and so it is again today.

The spirit of Patrick radiates today beyond the confines of Ireland and beyond the Irish in other lands, to serve as a promise of truth and justice to all who are denied those rights in their own country.

As a symbolic enemy of slavery, St. Patrick looms larger today than ever before; and, as always, the slave master trembles at the sound of his name.

Truly, St. Patrick will stand as a hero of mankind, so long as Christianity prevails.

SUBCOMMITTEE ON GENERAL EDUCATION

Mr. BRADEMAS. Mr. Speaker, I ask unanimous consent that the Subcommittee on General Education be permitted to sit today during general debate.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

SUBCOMMITTEE ON IRRIGATION AND RECLAMATION

Mr. ROGERS of Texas. Mr. Speaker, I ask unanimous consent that the Subcommittee on Irrigation and Reclamation be permitted to sit during general debate this afternoon.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

HAILING THE FTC DECISIONS IN THE TBA CASES

Mr. ROOSEVELT. Mr. Speaker, I ask unanimous consent to extend my remarks in the body of the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, on March 15, 1961, the Federal Trade Commission announced that it had issued final cease and desist orders in two cases of great importance to gasoline service station operators. I refer to the proceedings involving, in one case, FTC Docket No. 6486, the Atlantic Refining Co. and the Goodyear Tire & Rubber Co., and in the other, FTC Docket No. 6487, Shell Oil Co. and the Firestone Tire & Rubber Co.

Over 206,000 service stations are vitally interested in this matter. Therefore, as chairman of Subcommittee No. 5 of the Select Committee on Small Business of the House of Representatives, I hail and welcome the fact that there is now a final adjudication by the Federal Trade Commission declaring that contracts between the Nation's two largest manufacturers of rubber products and two major petroleum corporations under which the latter are paid so-called override commissions on the sale of TBA items made by these manufacturers to the lessee-dealers who operate service stations are illegal as being violative of the antimonopoly laws. I believe that these two decisions will serve as landmark cases hereafter.

I noted with considerable interest that the Federal Trade Commission upheld the hearing examiner's findings that the petroleum companies have coerced their retail dealers to buy sponsored TBA, thus giving credence to the testimony of the many witnesses who appeared before Subcommittee No. 5 of the House Small Business Committee at its public hearings over the past few years. During the subcommittee's hearings, testimony was received from representatives of the retail and wholesale segments of the petroleum industry, who came from every section of the United States, and who charged that certain major oil companies, through pressure and through coercive means, forced and compelled its retail gasoline dealers to handle only those TBA items in their stations which are sponsored by the petroleum companies.

In this connection, it is worthy of note that the sales representative is the one who contacts the service station operators in connection with lease renewals as well as with the sale of his company's products. An examination of the various leases for such service stations discloses that the matter of the renewal of such leases is optional only with the oil companies. In that respect, such agreements are unilateral. Thus, in having the sales representative who regularly calls on the service stations, being at the same time in a position to tell the service station operator that he, the oil company's salesman, could decide whether or not the lease for a service station would be renewed, is indeed an unfair arrangement.

From this it can readily be gathered that the operator of a service station is under a tremendous pressure to comply with the demand, whether expressed or implied, of such sales representative that he handle the petroleum company's sponsored TBA items exclusively. Nor should it be forgotten that such small and independent service station operator has a considerable investment in his business which the petroleum company could wipe out with either cancellation of the lease or refusal to renew. It is, therefore, apparent that the dealer operating his station under a lease from the oil company supplier is not in fact independent and is subject to control by the oil company supplier. The freedom of choice of the dealer with respect to the manner in which he operates his station is circumscribed by the economic power and might of his oil company supplier whether or not such power is specifically exercised against him.

The tremendous inequality of economic bargaining power between the major oil companies and their small retail service station operators can be gaged from the fact that these corporations rank among the largest and most powerful in the world. It is, therefore, abundantly clear that the petroleum companies hold the means of economic life or death of countless members of this segment of our small business economy.

Recently, the U.S. Court of Appeals for the Fourth Circuit decided the case of Osborn against Sinclair Refining Co. in favor of a service station operator whose lease was canceled because he did not buy enough of his petroleum company's sponsored TBA. That court, reversing the district court, pointed out that the perniciousness of the tie-in between the petroleum and rubber companies is aggravated by the fact that the petroleum companies are not even in the business of selling TBA. This important case was cited by the Federal Trade Commission in support of its decisions and prior thereto received considerable publicity by being included in the record of the hearings of the subcommittee.

During the 86th Congress, I introduced in the House, H.R. 9894, which would have prohibited oil companies from acting as agents and receiving commissions for the sale of tires, batteries, and accessories. It did not surprise me in the least that the top officials of the prior administration of the Department of Justice, Bureau of the Budget, and Department of Commerce were opposed to this measure on behalf of small business. Fortunately, a more favorable climate prevails in all executive departments now.

Now, we not only have an adjudication by a U.S. Appellate Court, but also have clear rulings of the Federal Trade Commission in the two cases mentioned.

The Federal Trade Commission is to be commended for being mindful of the economic implications involved and furnishing further evidence that it adheres to the rulings enunciated by the U.S. Supreme Court to the effect that the heart of our national economic policy has long been faith in the value of competition.

The decisions of the Federal Trade Commission, plus the ruling in the Osborn case, should go a long way toward alleviating the many problems faced by over 206,000 gasoline retailers in the service station industry, and the relief afforded is welcome news to this vital segment of the American economy.

I wish, nevertheless, to point out the quite obvious fact that the decision in the Osborn case and the final cease and desist orders of the FTC are res judicata only as to the particular parties involved. Of course, these decisions furnish a valuable precedent for future action, but they are binding only on the parties to the proceedings. An enactment by the Congress, on the other hand, has the effect of promulgating a rule for the future and, hence, acts prospectively to govern future actions.

I shall watch with considerable interest what effect these decisions of the Federal Trade Commission and the Osborn case will have on petroleum companies which will guide me as to the necessity for considering the introduction of legislation on behalf of the small businessmen engaged in the service station industry.

AMERICAN CRAB FISHERMEN TO PAY PRICE OF BANNING MACHINERY EXPORT TO SOVIET UNION

Mr. PELLY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. PELLY. Mr. Speaker, I read the other day where some one woke up to the fact that we were sending Communist Russia some precision machine tools which would not have been in the best interest of our national security. The shipment was stopped, but under a policy of being kind to Khrushchev and placating the feelings of the Soviets, an announcement was quickly forthcoming saying that our Government planned to lift a ban on importation of Russian crabmeat into the United States.

In order to build good will, we have allowed foreign fish products to flood the American market. Take the case of the New England fish industry. It has been ruined by such imports, and tariff relief has been repeatedly denied. The Pacific Northwest fishermen have been called upon to sacrific year after year in the interest of conservation. Yet the Japanese take American-spawned salmon without any regard for conservation and then flood our market.

Now again the fishing industry is discriminated against. The crab processors and fishermen of America will be ruined if this latest move to admit Russian crab is true.

I have strongly protested to the State Department and have, likewise, asked the House Committee on Merchant Marine and Fisheries to investigate.

THE RUG-GED NEW FRONTIER

Mr. DEROUNIAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York.

There was no objection.

Mr. DEROUNIAN. Mr. Speaker, the leader of the New Frontier and his colleagues in the executive department have unanimously cited the peril to America from recession, unemployment, depressed areas, and balance of payments. They have pledged themselves not only to talk about these things but to correct these things by positive action.

For the welfare of America I sincerely hope that the action I read about in the press is not typical of the New Frontier idea of positive action. The Washington Evening Star for March 15, 1961, reports from Lille, France, as follows:

WHITE HOUSE CARPET ORDER

LILLE, FRANCE, March 15.—A New York firm has ordered 200 meters (a little more than 600 feet) of Tourcoing carpet from a local factory, stating it is needed for use at the White House in Washington. The design of the carpet chosen is of oriental inspiration with red, green and gold on a white and black background.

Will this carpet purchase abroad help end the administration's recession? Will this purchase of foreign rugs help eliminate unemployment in the United States? Will it bring industrial activity to a depressed area? Will it help solve our balance-of-payments deficit? How much more or less will it cost than the $200,000 that was to be spent for a recreational facility for military personnel serving overseas that was recently canceled on the order of the intrepid leader of the New Frontier? Is this rug purchase typical of what Mr. Hodges meant when he assured the southern textile manufacturers prior to the November 8 election that the Kennedy administration would be aware of their need for help against imports?

Mr. Speaker, it is my suggestion that the textile industry representatives not be caught napping when the White House attempts to pull the rug out from under them.

PROGRAM FOR WEEK OF MARCH 20, 1961

Mr. HALLECK. Mr. Speaker, I ask unanimous consent to proceed for 1 minute in order to inquire of the majority leader what the program will be for tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Indiana.

There was no objection.

Mr. McCORMACK. On Monday the Consent Calendar will be called and there will be seven suspensions, as follows:

H.R. 5463. Extend and amend the Sugar Act.

H.J. Res. 124. Puerto Rico, debt limitation deleted.

H.R. 5189. Income of foreign central banks.

H.R. 848. Veterans, provide vocational rehabilitation.

H.R. 4538. Veterans, special dividends, national service.

H.R. 1258. Amend Longshoremen's and Harbor Workers' Compensation Act.

S. 307. Erosion control, San Diego County, Calif.

If time remains following the consideration of the above-mentioned suspensions and if a rule is granted on it from the Committee on Rules, we will take up H.R. 5000, the armed services military construction bill.

On Tuesday the Private Calendar will be called and following the call of the Private Calendar if the consideration of H.R. 5000 has not been finished it will be the continuing order of business.

Following the disposition of the military construction bill, we will take up H.R. 3935, the Fair Labor Standards Amendments of 1961.

I make the usual reservation that any further program will be announced later and that conference reports may be brought up at any time. I would remind the gentleman that the emergency farm bill is now in conference. We want to dispose of that as soon as possible after they report it out.

Mr. HALLECK. As I understand the feed grain bill is still in conference and it is not anticipated there will be any action on it this week.

Mr. McCORMACK. No, but should they agree it will be brought up on Monday.

CHINESE REPRESENTATION IN THE UNITED NATIONS

Mr. JOHANSEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. JOHANSEN. Mr. Speaker, a press report from Formosa discloses that President Kennedy's administration has repudiated a public statement made last week by Mrs. Eleanor Roosevelt.

Our delegate to the United Nations General Assembly told a university audience that "the vote in the last session of the General Assembly pointed to the fact that we would not be able much longer to keep up the fiction that Nationalist China represents the whole of China."

I rejoice that the administration rejects this view—very similar to one which U.N. Ambassador Adlai Stevenson has been repeating publicly.

However, I must add that this administration obviously has one censorship rule for Mrs. Roosevelt and Ambassador Stevenson and quite another one for Adm. Arleigh Burke and the household help at the White House.

Or is it that the administration is able to gag the Joint Chiefs of Staff, but cannot silence A.D.A. spokesmen at the U.N.?

IN THE EVENT OF AN ALL-OUT THERMONUCLEAR ATTACK ON THE UNITED STATES

Mr. MINSHALL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. MINSHALL. Mr. Speaker, a blood-chilling war game was played at the Pentagon last fall. The score reached by electronic computors was 100 million dead Americans, in the event of an all-out thermonuclear attack on U.S. cities.

Pentagon top brass fed into the mechanical brains top-secret facts and estimates of United States against Soviet weapons systems, in a variety of strategies. The computers clicked out the grim information that most of our population would be incinerated, or be cas-

ualties of radiation fallout, in missile warfare aimed at our cities.

It is a horrifying picture.

As a member of the Department of Defense Appropriations Subcommittee, I am doing all in my power to see to it that such a doomsday never arrives.

As a Member of Congress, I am investigating every avenue of thinking that might lead to genuine, lasting disarmament, with ironclad controls.

As a private citizen, I feel it is my responsibility to provide for all Americans as much protection as I possibly can from nuclear blast and its death-dealing aftermath of fallout.

The same electronic computers that ground out the ghastly estimates also reported that more than half those Americans would survive if vigorous civil defense measures are taken—and chief among those measures the computers checked off construction of home fallout shelters.

Accordingly, I have today reintroduced my bill to stimulate citizen participation in such a constructive program.

My home city of Rocky River, in the 23d District of Ohio, which I have the honor to serve, pioneered in home shelter construction. My State of Ohio was the first in the Union to grant tax exemptions to citizens who construct such shelters, or who improve existing facilities which would provide such protection.

Such legislation on the national level is highly appropriate, and completely in line with my philosophy of resolving as many problems as possible on the local level. The Minshall bill would permit amortization over a 60-month period of certain civil defense facilities. It does not burden the Federal Government with new or vast expenditures.

At a time when we are spending $42 billion a year on national defense, and another $88 million on civil defense, it is little enough to offer private citizens the encouragement of a tax deduction in providing fallout protection.

A DEPARTMENT OF SMALL TOWNS AND RURAL AFFAIRS

Mr. CUNNINGHAM. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. CUNNINGHAM. Mr. Speaker, I must rise to state my opposition to a recent administration proposal to create a Cabinet-rank Department of Housing and Urban Affairs.

While we all appreciate the problems of metropolitan areas, I think we are already overfeeding such sections with liberal doses of Federal money. I would like to see less Federal aid for urbania, despite the lure to the politicians of the hundreds of thousands of voters assembled in such centers.

We are already building city expressways with 90 percent Federal money; we are advancing the urban renewal program with huge Federal grants and loans; we are contributing mightily to the home-building industry in urban areas through Federal housing programs; we furnish aid to the city airports, hospitals, and sewage treatment plants; we subsidize virtually every phase of urban existence and the way things are going I fear that city government will someday be used merely to process applications for Federal aid and dole out the checks sent back from Washington. We face endless growth of metropolitan areas spurred by Federal assistance programs at the expense of other sections.

Now, I do have an alternate suggestion. I propose that we spend a little time and money studying what needs to be done for the small towns and cities and for the rural sections of the country. I do not have any grandiose scheme in mind, but rather than give Cabinet rank to big cities it might be the better part of wisdom to create a Cabinet-rank Department of Small Towns and Rural Affairs, and I would favor such a move. I have in mind some studies and surveys by Federal agencies and departments to see what can be done for the small towns of America.

Small towns are truly wonderful places. They are green and pleasant. You can drive a few minutes and be in the country for a picnic, hunting or fishing. Or you may want to buy something that is really "farm-fresh," not "farm-fresh" in the mind of some advertising copywriter.

There is little or no juvenile delinquency in small towns, except for some hooliganism on Halloween. There is no crime to speak of, except when a visiting hoodlum from the city pays his respects. There is a delightful life at a pace much more conducive to long life than all the medical care bills passed by Congress.

And think of our national leaders—where did they come from? Small towns, in most cases. For instance, our Speaker is from Bonham, Tex. Our colleague and former Speaker, the gentleman from Massachusetts [Mr. MARTIN] is from North Attleboro. Look at our committee chairmen: Mr. CANNON is from Elsberry, Mo., Mr. VINSON from Milledgeville, Ga., Mr. COOLEY from Nashville, N.C., Mr. SPENCE from Fort Thomas, Ky., Mr. ASPINALL from Palisade, Colo., Mr. HARRIS from El Dorado, Ark., Mr. MURRAY from Jackson, Tenn., Mr. SMITH from Broad Run, Va., and so forth. Only five are from larger cities.

President Eisenhower grew up in Abilene, Kans.; President Truman in Independence, Mo. Vice President Nixon was from Whittier, Calif., and Vice President JOHNSON from Johnson City, Tex. Of course, President Kennedy is from a big city, but it is remarkable that so many national leaders are from smaller towns.

Now my suggestion is that some of the survey experts we have in the Federal Government go out and run some surveys in the small towns. Nothing too fancy would be needed, but I am sure we could turn up some interesting information as to how the small towns could play a more important role in national affairs and in our national economy.

We might even find out that it is smart business to locate small manufacturing plants in small cities and towns. We might find that there is plenty of housing available in small towns to house workers for small manufacturing plants. We might even find that there is no critical need for schools, highways, and sewage-treatment plants, to say nothing or airports, jetports, and heliports. We might find that some of the unemployed who seek work fruitlessly in urban areas could find regular jobs awaiting them in small towns.

I do not know what such surveys would disclose. But as an alternative to billions of dollars for the already highly subsidized urban areas, may I suggest that we take a look at the small towns that have been the backbone of the Nation for a century and a half and see if they may not offer at least a partial solution for the housing gap, the employment gap, the airport gap, highway gap, and other problems we hear so much about.

If America is to remain free, healthy, and independent, we must give our time and attention to the preservation of our towns and villages lest we end up with vast, sprawling, metropolitan areas and lose that individuality and independence which our forefathers fought so hard to preserve.

THE TRUTH IS ALL-IMPORTANT

Mr. FORD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. FORD. Mr. Speaker, on March 12, 1961, the Office of Assistant Secretary of Defense, Public Affairs, issued the following statement:

> The report that General Lemnitzer has protested to Secretary McNamara that the Chiefs are being bypassed or edged out of crucial military decisions by the Kennedy administration is simply without foundation.

This statement was carried on Monday, March 13, in many of the newspapers and other news media of the United States and probably in many of the newspapers throughout the world. This statement was issued by the Office of Assistant Secretary of Defense, Public Affairs, because the public charge had been made previously that Gen. L. L. Lemnitzer, Chairman of the Joint Chiefs of Staff, had protested the transfer of control of space development to the Air Force.

The aforementioned statement issued by the Office of Assistant Secretary of Defense, Public Affairs, is, to say the least, a half truth. The Assistant Secretary of Defense for Public Affairs knew or should have known the facts and he should not now try to cover them up. General Lemnitzer as Chairman of the Joint Chiefs did submit a statement dated March 2, 1961, in opposition to the draft directive on assignment of space

systems development. In General Lemnitzer's reply to the Department of Defense draft directive he stated that the Joint Chiefs did not have a full opportunity to study this matter which according to him has far-reaching military implications.

General Lemnitzer's reply or memorandum also strongly protested the Department of Defense draft directive on the basis that such a move would result in an overall loss of effectiveness through the failure to utilize the full potential of our total defense resources.

The Office of Assistant Secretary of Defense, Public Affairs, by semantics is seeking to deny to the public the facts: facts the public is entitled to know. The release of Sunday, March 12, by the Office of Assistant Secretary of Defense Sylvester is a clear-cut distortion.

This deliberate attempt to gloss over the true facts is difficult to understand when on Tuesday, March 14, Mr. Edward R. Murrow, the new Director of the U.S. Information Agency, categorically stated the United States must tell the truth both to Americans and to the world. On this date Mr. Murrow lectured Members of the Senate on complete frankness both at home and abroad. I suggest that this honorable approach be conveyed or transmitted to the Assistant Secretary of Defense, Public Affairs. He should follow the same guidelines in the future even though his Office did not do so in this specific case.

A TRIBUTE TO RAMON MAGSAYSAY

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ZABLOCKI. Mr. Speaker, on March 17, 1957, President Magsaysay of the Philippines was killed when his airplane crashed in the Province of Cebu. Because the House will not be in session tomorrow I rise at this time to pay tribute to President Magsaysay who was a strong supporter of close United States-Philippine ties, a firm believer in the democratic process, and an outstanding leader of free Asia.

In these days when the course of world history is clouded by inflamed passions and false dogma, it is therefore fitting that we pause for a moment and pay tribute to a man of our time who saw his way clearly. Ramon Magsaysay pursued the twin goals of freedom and independence with a vision and a valor that entitles him to a special place in the hearts of freemen everywhere.

It was 4 years ago that a stunned and shocked world learned of the tragic death of the great Philippine leader. On March 17, 1957, the plane carrying him on one of his many missions crashed into a mountainside in Cebu. The loss was felt everywhere. But most especially, the loss was felt by those who had learned from personal experience the value of liberty.

Ramon Magsaysay will be remembered because he championed liberty by identifying himself with the masses of his people. He was convinced that only a people liberated from ignorance, poverty, and abuse are a people able to enjoy a real freedom. In the words of Carlos Romulo, "he championed liberty, not with words, but in flaming action," risking his life in war as a guerrilla leader. Later, as a Secretary of Defense he fought an alien ideology in the swamps and in the hills of the Philippines.

Ramon Magsaysay's greatest achievement, it has been said, was the establishment of the Republic of the Philippines as a respected member of the community of nations. Like the great leaders of all time, in whatever land, he managed to transmit his own passion for work and sacrifice to his people. A true son of the barrios, he understood the ambitions and aspirations of the humblest of his countrymen. He did his utmost to better this way of life. Resettlement programs, land reform, agricultural credit facilities, community development, education, and social security were some of the measures he advanced during his brief tenure as President of the Philippines.

But Ramon Magsaysay was more than a tireless administrator and great patriot. In his view, liberty was a need of all men. It is worth remembering that it was in Manila, under his auspices, that the Southeast Asia Treaty was signed and the Pacific Charter proclaimed. Again, when the Republic of Vietnam was consolidating its hard-won independence, the Philippine people, under President Magsaysay, launched Operation Brotherhood, a program designed by Asians to help Asians.

National independence is variously defined these days, but I'd like to read now a definition that Magsaysay gave in a memorable speech delivered on the 10th anniversary of Philippine independence. The words are often quoted, but I think they bear repetition. He said:

> On several occasions in recent months I have urged our people toward greater expression of what I have called positive nationalism. Actually, I could just as accurately say true nationalism. For example, I see no real patriotic or constructive contribution from those who resurrect buried enemies or revive dead issues, from those who sneer at the worth or validity of our national institutions or culture, from those who try to imprison us behind a wall of suspicion, distrust, and hatred of the outside world, from those who would have us follow a policy of synical expediency. Honest and fearless criticism should be welcomed as a healthy manifestation of democracy, but we should insist that it be presented soberly, based upon evidence, and accompanied by a constructive alternative.
>
> True nationalism—

He concluded—

> is that which seeks, discloses, and cultivates what is good in the community and the nation, knowing that the stronger growth of what is good will choke out the weeds of what is bad.

These are the words of a great man and a great leader. He was, it seems to me, the champion of the free individual in a free society. The liberty that he espoused and defended was that to which all of us aspire.

AMERICAN AGRICULTURE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 109)

The SPEAKER laid before the House the following message from the President of the United States, which was read, referred to the Committee on Agriculture, and ordered to be printed:

To the Congress of the United States:

In recent times, it has become customary to speak of American agriculture in terms of distress and failure, as a burden on the taxpayers and a depressant on the economy. But this is only one part of the picture. As the provider of our food and fiber, American agriculture is a highly successful and highly efficient industry. In no other country, and at no other time in the history of our own farm economy, have so many people been so well provided with such abundance and variety at such low real cost.

Nor is this bounty confined to our own people. We are today the world's largest exporter of food and fiber. Seventy percent of these exports are sales for dollars, one of the principal bulwarks of our export trade. The other 30 percent is made available under special programs to promote economic development abroad and to relieve hunger and suffering—efforts that are fundamental to our world leadership and security.

In short, our farmers deserve praise, not condemnation; and their efficiency should be a cause for gratitude, not something for which they are penalized. For their very efficiency and productivity lies at the heart of the distress in American agriculture which—while it represents only a part of the picture—constitutes that part to which our efforts must be devoted. The steady and continuing decline in income has been most serious for the 7 million people engaged in farming operations, and substandard conditions on the farms—which are so important to our economy—lead directly to substandard conditions in all segments of the national economy. Farming remains our largest industry—it employs 12 times as many people as work in steel and 9 times as many as in the automobile industry. It employs, in fact, more people than steel, automobiles, public utilities and the transportation industry combined. The farmer is a consumer as well as a producer, and other economic groups are affected by the continued drop in farm purchasing power. Some $40 billion is spent each year for production goods and services needed on our farms and for the consumer goods used by farm families. Six million people are employed in the manufacture and distribution of the supplies that farmers use. Each year farm families spend from $2.5 to $3 billion for new automobiles, trucks, tractors and other farm machinery; and $3.5 billion for fuel, lubricants, and

maintenance of motor vehicles and machinery. It is deeply in the interest of all Americans that our agriculture be not only progressive but prosperous.

Yet as our farm families enter the 1960's, their incomes are lower relative to the rest of our population than at any time since the 1930's. Although there has been a continuous rise in consumer prices during the past 10 years, farm income has steadily declined. Abundant production has filled our bins and warehouses, but 1 out of 10 American households have diets so inadequate that they fall below two-thirds of the standard nutrition requirements.

These paradoxes are of concern to all of us—the farmer, the taxpayer, and the consumer. They affect the vitality of our Nation, the strength of our most basic industry, agriculture, and the economic health of every community in the land.

Much of the current problem results from four factors:

First. The inability of millions of separate producers to control either output or price of their products. Acting individually the farmer can neither plan his production to meet modern requirements, and shift away from commodities for which there is limited demand, nor bargain effectively for a fair return.

Second. A technological revolution in agricultural production, which is still underway, that has resulted in generally increased yield from a reduced input of acreage and manpower—so that today each farmer produces the food and fiber necessary for 25 people, while at the turn of the century each farmer produced the food and fiber for only 7 people.

Third. A faulty system of distribution, which allows one-half of the people of the free world to suffer from malnutrition at the very same time our surpluses have reached a point where the availability of adequate storage facilities has become a real problem.

Fourth. The steady and continued increase in farm costs. The average farm requires an investment of $36,000. The farmer's interest costs have increased over 300 percent in the past decade. His equipment costs have increased 75 percent.

The solution lies not so much in severe restrictions upon our talent to produce as upon proper channeling of our abundance into more effective and expanded uses. American agricultural abundance can be forged into both a significant instrument of foreign policy and a weapon against domestic hardship and hunger. It is no less our purpose to insure that the farm family that produced this wealth will have a parity in income and equality in opportunity with urban families—for the family farm should be protected and preserved as a basic American institution.

Our intention is to accomplish these goals while eventually reducing the cost of our programs to the taxpayer. This can be accomplished in part because it is cheaper to use our agricultural products than to store them. Present storage costs total over $500 million a year or $1.4 million every day.

But it must also be our purpose to see that farm products return a fair income because they are fairly priced. No farm program should exploit the consumer. But neither can it subsidize the consumer at the cost of subnormal incomes to the farmer. We cannot tolerate substandard conditions on the farm any more than we can in industry. A fair return is a necessity for labor, capital, and management in industry. It is equally necessary for those who produce our food and fiber.

It must be our purpose to provide an agricultural program that will eventually eliminate the vast farm surpluses that overhang the market and overburden the economy; that will permit effective economies of administration; that will recognize the right of the consumer to fair prices; and that will permit the farmer to receive a fair return for his labor. This will be neither simple nor easy. It will require the cooperation and effort of the farmer, government, and the urban dweller. But the alternative is not alone a substandard rural economy—it is a weakened nation.

I. A WIDER RANGE OF TOOLS TO BOOST FARM INCOME

This administration's studies to date on how to meet our responsibilities in agriculture have led us to the following conclusions:

There is no single farm problem, and no single solution. Each commodity requires a somewhat different approach.

Swift and frequent changes in weather, acreage, yield, and international market conditions requires Federal programs alert and sensitive to change.

The Secretary of Agriculture is now equipped with broad responsibilities for the maintenance of farm income. In order to fully and effectively meet these responsibilities he has had authority to set and adjust the level of support prices, set the level and terms of loans, prescribe acreage allotments, specify conservation payments, establish marketing agreements and orders, and take other steps to adjust supplies and protect the prices and incomes of farmers. But these powers have not been fully employed in recent years; and neither are they sufficiently flexible for all contingencies.

I am deeply concerned—and I believe the Congress shares that concern, along with most of our consumers, taxpayers, and the farmers themselves—that our farm program is drifting into a chaotic state, piling up surpluses, penalizing efficiency, rewarding inertia and noncompliance, and constantly being torn and weakened by disputes and conflicting pressures. This is not a situation that can be ended by any one sweeping act of magic. It will require diligent study, hard work, imaginative initiative, and sound constructive leadership. But I believe that the decline in farm income and the drift in farm policy can both be gradually reversed by the program I recommend.

This will require that the Secretary of Agriculture make full and effective use of all the responsibilities now reposed in him, and that the Congress establish guidelines to enable the administration to exercise responsible leadership in consultation with those farmers most concerned in establishing sound programs for each commodity for which they are needed.

A generation ago Congress enacted the Reciprocal Trade Agreements Act to place in the executive branch the authority for a tariff-by-tariff approach that could be more effectively and equitably handled there instead of in the Halls of Congress. The Reorganization Act similarly shifted the initiative in that complex field to the executive branch. Now agriculture needs a commodity-by-commodity approach, fitting each program to the pertinent problems, initiated by the Secretary of Agriculture under Presidential direction, subject to the approval of the farmers voting in referenda and to final review by the Congress.

The authority Congress has previously granted to the Secretary for the management of farm supply and the stabilization of farm income requires additional adjustment. A variety of gaps must be filled before all necessary administrative tools are available for every commodity. I am therefore asking the Congress to enact legislation to be submitted shortly and to be known as the Agricultural Enabling Amendments Act of 1961, covering the following matters:

1. The Agricultural Marketing Agreement Act of 1937, which now authorizes marketing orders for milk, certain fruits and vegetables, tobacco, soybeans, and some specialized crops, should be amended to permit marketing orders to be used for a wider range of commodities, to make it more flexible in dealing with commodities for which a national or area program may be devised, and to permit, subject to the approval of producers and acceptance of the Congress as noted below, the establishment of quotas and allotments for individual producers. This will enable the valuable tool of the marketing order to be extended and combined with effective production control where the latter is essential.

2. The Agricultural Adjustment Act of 1938 should be amended to permit supply adjustment through marketing quotas for any agricultural commodity for which quotas might be most effective in achieving our goals and subject to affirmative approval by producers and acceptance of the Congress as indicated below. Quotas should be authorized either in quantitative terms—pounds, bushels, or bales—or in terms of production for individual farm acreage allotments. This will insure effective supply adjustment where this is indicated under proper safeguards. Such adjustment in turn is our best assurance against excessive costs to the taxpayers.

3. The Agricultural Act of 1949 should be modified to permit, subject to similar producer approval and congressional acceptance, the method of supporting producer income that is most appropriate to the competitive and international position of the commodity, the nature of the supply adjustment needed, and economy to the taxpayer. There should be authorization of compensatory payments as well as commodity loans, commodity

purchases, diversion programs, incentive payments, and export payments as circumstances require. All of these measures, properly safeguarded as to use, have proven their value in practice and are essential if the programs are to be adjusted to needs of individual commodities. As a part of payment programs the Secretary of Agriculture should be authorized to make payments in kind in cases where producers prefer such payments and where the Secretary determines that the goal of reduction of available stocks makes such payments feasible.

4. The Soil Conservation and Domestic Allotment Act of 1936 should be amended to provide for the establishment of national farmer advisory committees for every commodity or group of related commodities for which a new supply adjustment program is planned. Members of the committees would be elected by the producers of the commodities involved or their appropriate representatives. In consultation with the Secretary of Agriculture, they would be charged with the responsibility for considering and recommending individual commodity programs. To make it possible for farmers to participate in the work and consultation necessary for the development and implementation of sound proposals, the bill should authorize the payment of expenses for the members of these farmer committees.

In order to insure effective farmer participation in the administration of farm programs on the local level, the Secretary of Agriculture is being directed to revitalize the county and local farmer committee system and to recommend such amendments as may be necessary to safeguard such farmer participation.

5. Programs formulated in accordance with the enabling legislation here proposed and involving controls over production and marketing should not go into effect until approved by a majority of two-thirds of the producers voting under regularly authorized voting procedures and there should be legislation to this end. Such voting will be after full opportunity for debate and discussion and will insure that the producers of no commodity will be asked to accept programs to which they have not given strong affirmative approval.

6. All comprehensive programs prepared under existing and requested authority will be duly submitted to the Congress of the United States not less than 60 days before taking effect. If within the 60-day period the program is rejected by either House of the Congress, the program will not go into effect. Thus no agricultural program will be adopted if it is regarded adversely by a majority of either House of the Congress.

Agricultural programs must always involve an effort to take the best of the available alternatives. Our task, building on past experience and present authority, is to find a simple and rapid accommodation to changing circumstances which is both effective and consistent with our democratic traditions. I believe that the present proposals will go a long way toward achieving these goals.

II. EXPANDING THE USE OF OUR FARM ABUNDANCE

A. TO IMPROVE DISTRIBUTION AND NUTRITION AT HOME

We have already taken a number of steps toward greater utilization of our agricultural abundance at home as well as abroad. I have directed the Secretary of Agriculture to increase both the quantity and quality of our surplus food distribution to the needy; and under this program the amount of food going to each needy family has already been doubled. In addition, pilot food stamp programs are being launched in eight areas to provide emergency aid where the distress is particularly acute. These pilot plans will furnish operating experience necessary for our determination of the most effective kind of food allotment program.

To improve further our system of distribution I recommend:

1. An expansion of the school lunch program, with the increase going to those schools providing a high proportion of free lunches because of the high level of unemployment in their localities, and with a change in the allocation formula to include, in addition to school age population and per capita income, the number of children who actually receive school lunches. In this way the best possible nutrition will be made available to every school child, regardless of the economic condition of his family or his local school district.

2. Extension and improvement of the special school milk program. Existing authorization for this program expires June 30. No lapse should be permitted.

B. TO IMPROVE NUTRITION AMONG NEEDY PEOPLES ABROAD

We have barely begun to explore the ways in which our abundance can advance the cause of peace and freedom around the world, and contribute to the well-being and stability of undeveloped nations whose peoples eye our storage stockpiles with hungry dissatisfaction. I have already dispatched a series of missions to such areas to ascertain how we can best use our food in a helpful fashion. In addition, I ask the Congress:

1. As previously requested, to authorize an additional $2 billion for this calendar year under title I of the Agricultural Trade Development and Assistance Act of 1954, which permits the sale for local currencies of our surplus agricultural products. The need for this legislation is urgent, for the funds now available under this title are virtually exhausted. Until Congress acts we will be unable to process new requests now coming in from friendly governments.

2. To extend and expand the Agricultural Trade Development and Assistance Act of 1954 for a period of 5 years. Unless there is some assurance of a continuing program we can neither make the advance plans best suited to an effective instrument of foreign policy nor gage its long-term effect upon our domestic program. Title I sales should be authorized at a higher level; and our contributions of food and fiber to voluntary agencies such as CARE for use abroad should be liberalized.

C. IMPROVED RESEARCH

We should not only continue our research activities directed toward better production and lower costs, but we must expand research into marketing, nutrition, and especially utilization. Today approximately two-thirds of our agricultural research is directed toward improved production and only one-third toward utilization. Yet these small expenditures have resulted in the past in developing such items as frozen orange juice, potato flakes, and other foods which have vastly increased food demand and made possible the use of an estimated 500 million pounds of additional animal fats in livestock feed, an additional 250 million pounds of additional animal fats in the manufacture of plastics, and an additional 800,000 bales of cotton for washable cotton fabrics. The proportion of our effort directed at food and fiber utilization should be increased.

In addition, I am directing the Secretary of Agriculture to survey the nutritional needs of our Nation and to formulate plans for helping achieve optimum nutrition goals for all Americans. The Secretary and the Food for Peace Director have already initiated a study of the food and fiber needs of other free countries. With completion of these studies we will be in a position to press forward vigorously to eliminate malnutrition and starvation as a common experience.

D. EXPANDED EXPORTS

I am directing the Secretary of Agriculture and all other appropriate departments and agencies of the Government to intensify our efforts to expand dollar sales of agricultural products. The Foreign Agricultural Service's assignment of market promotion specialists and agricultural attachés to critical areas will be encouraged. This will strengthen our overseas programs of trade fair exhibits and trade centers, improve information services and market news to the United States trade, and supply us with vitally needed information about agricultural developments abroad and the competition our products face in world markets.

In our progress toward a trade liberalization program, there has been a marked lag in convincing other nations to reduce barriers on agricultural products. Especially at this time, it is important that we redouble our efforts to gain access for more of our agricultural products to the markets of foreign countries.

III. ENCOURAGEMENT OF COOPERATIVES

One of the methods by which farmers can increase their bargaining power and thus remedy to some extent their weakness in the marketplace is through the effective operation of their own cooperatives.

To this end I recommend legislation to reaffirm and protect the right of farmers to act together through their cooperatives in the processing and marketing of their products, the purchasing

of supplies, and the furnishing of necessary services. This legislation should specifically permit farmers' cooperatives to purchase, acquire, and build processing plants and related facilities and to merge with other cooperatives so long as such activities do not tend to create a monopoly or substantially lessen competition.

IV. LOW INCOME FARMS

In those areas where farms are predominantly in the lowest income group, entire rural communities have suffered severe economic damage. The small businesses are liquidating, the community facilities are deteriorating, and community institutions are weakened. These present a special problem.

The area redevelopment bill now under consideration by the Congress is needed by farmers as urgently as it is needed in cities and towns. I reiterate my urgent recommendation for the speedy enactment of this bill, and thus enhance the resources available to the Secretary of Agriculture as he mobilizes all the services available to him, such as FHA, REA, Forest and Extension Services, to assist in the development of better levels of living, better income opportunities, and better communities in our rural depressed areas.

V. FARM CREDIT AND REA

One of the features of modern agriculture that poses an increasing problem to farmers, especially during periods of low income, is the need for increased capital investment, accompanied by the high cost of credit.

I am directing the Secretary of Agriculture to liberalize and extend the lending operations of the Farmers Home Administration so that any needy farmer can obtain loans for operating capital and for farm home improvements at low cost, and I recommend that the present legislation be amended to permit farm improvement loans to be secured either by mortgages or by other acceptable forms of security.

I have further directed the Secretary of Agriculture to initiate two measures that will encourage the storage of grain on the farm and strengthen economic activity in farming areas:

(a) Modifying present farm credit regulations to permit farmers to borrow up to 95 percent (instead of the present 80 percent limit) of the cost of materials for building farm storage facilities and equipment; and

(b) Guaranteeing that farmers will be able to earn 2 full years' storage payments for continuing to store 1960 crop wheat, corn, and grain sorghum, and at least 1 year's storage payments for continuing to store other 1960 crops.

The loans are for 5 years at an interest rate of 4 percent. The effect of this directive will be to increase the demand for steel, wood, and other building materials, to procure the additional farm storage needed for 1960 crops, and to place an estimated $40 million in credit funds in the rural economy in the months ahead.

I have also directed that the Rural Electrification Act be administered in accordance with the original intent and purpose of that program, which has done so much to advance agriculture throughout the Nation. Over 95 percent of our farms now have electricity. But much remains to be done. There are constantly increasing demands for additional power. Only one-third of our farms have modern telephone installations. The cooperatives which so successfully brought light and power to the farm can make an enormous contribution to the continued development of our rural communities.

VI. FOREST RESOURCES

One of our most important natural resources, and one of our most neglected, is our forest land.

We need to give special emphasis to the improvement of the 256 million acres of small, privately owned farm woodlands and other small forests. This is an important sector of our agricultural economy in which the rate of progress and production is far from satisfactory. Yet here is a crop which is not in surplus and to which many farmers should turn, for their benefit and the Nation's. If our grandchildren are to have only the same continuous supply of timber products as we now have, growth of timber on these farm woodlots and other small holdings will have to be doubled within the next 40 years. To insure adequate forest resources in the future by sound, effective programs relating to privately owned woodlands as well as our national forests, the following administrative and legislative measures are needed:

1. Rejuvenate the Forest Service's long-range program for the development and improvement of our national forests—a program already returning substantial revenues to the Treasury and designed eventually to return $500 million a year. Accompanying measures were requested in my earlier message on resources.

2. Accelerate, through a larger Federal grant, the present Federal-State cooperative assistance program to farm and small forest owners for the application of scientific forestry techniques.

3. Expand tree planting funds, in order to make productive 50 million acres that will not restock naturally within a reasonable time, and to increase the timber stand on another 100 million acres.

4. Increase protection against losses caused by fire, forest insects, and tree diseases. The Federal Government's share of the burden in preventing and controlling forest fires has not been met, even though the States contribute the greater share.

5. Emphasize our incentive cost-sharing programs with owners for tree planting, timber stand improvement, and certain other practices under the agricultural conservation program.

6. Expand forestry research, too long neglected.

7. Encourage the establishment of management and marketing forest cooperatives.

VII. SOIL AND WATER CONSERVATION

We have so taken soil conservation for granted in this generation that we forget it is a task which is barely underway. By June 30, 1960, the Soil Conservation Service had helped 1,301,450 farmers and ranchers to complete basic conservation plans and an additional 500,000 were being assisted. But this represents only 27 percent of all farms and ranches in soil conservation districts. Nearly three-fourths of this important job remains to be done.

I am requesting the Congress to provide the funds necessary to accelerate this program for permanent soil conservation practices and to increase our efforts for small watersheds as well. These smaller projects, now being planned and developed, may well hold the key to our future water and soil requirements at a time of rapidly growing population.

CONCLUSION

The measures I have recommended are not directed solely to the purpose of aiding the farmer. Nor are they simple prescriptions for Federal assistance to a harried segment of our population. Rather they are directed toward broad goals of achieving agricultural production geared to meet needs for food and fiber at home and in the free world, under programs that will enable the farmers of this Nation to earn a fair income.

We cannot expect to solve the farm problem in a day or in a year, or perhaps even in this administration. But we can and must adopt a new approach based on a clear recognition of the goals we seek, a realistic appraisal of the problems involved, and a firm determination to solve these problems and attain these goals.

The bills I have suggested will be debated and discussed in terms of general administration policies and powers. Various portions will undoubtedly be challenged as restrictive upon the farmer or inconsistent with complete freedom in the market. But I am convinced that the objectives of these programs will, when accomplished, provide for a reasonable balance between supply and demand. They will eliminate the hardship and suffering which inadequate returns force upon so many of our farm families; they will reduce our surpluses to manageable proportions; they will relieve the taxpayer of the unnecessary drain upon the Federal budget; they will spur our national economy, and they will assure the consumer of stable price levels.

Responsibility must be accompanied by the authority to accomplish these goals. If we move forward along the lines I have recommended, the entire Nation will benefit. The farmer can join the city dweller in the march toward economic health.

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 16, 1961.*

FIFTH ANNUAL REPORT OF THE SURGEON GENERAL, PUBLIC HEALTH SERVICE — MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 110)

The SPEAKER laid before the House the following message from the President of the United States, which was

read, and, together with the accompanying papers, referred to the Committee on Interstate and Foreign Commerce and ordered to be printed:

To the Congress of the United States:

Under the provisions of title VII of the Public Health Service Act, as amended by Public Law 835, 84th Congress, and further amended by Public Law 777, 85th Congress, I transmit herewith for the information of the Congress the fifth annual report of the Surgeon General of the Public Health Service summarizing the activities of the health research facilities program.

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 14, 1961.*

ACTIVITY UNDER AUTHORITY OF PUBLIC LAW 875, 81ST CONGRESS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 111)

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with accompanying papers, referred to the Committee on Public Works and ordered to be printed:

To the Congress of the United States:

I have the honor to transmit herewith a report of activity under authority of Public Law 875, 81st Congress, as amended, and required by section 8 of such law.

Funds which have been appropriated to accomplish the Federal assistance determined eligible under this authority are specifically appropriated to the President for purposes of disaster relief.

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 16, 1961.*

COMMITTEE ON AGRICULTURE

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight Saturday night to file a conference report on the feed grain bill, H.R. 4510.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

SUGAR QUOTAS

The SPEAKER. Under previous order of the House, the gentleman from Florida [Mr. SIKES] is recognized for 20 minutes.

Mr. SIKES. Mr. Speaker, it is increasingly apparent that the Congress will continue in force for the time being sugar legislation which is substantially the same as that passed last fall. One or two safeguards will be added which will provide greater control over the disposition of sugar formerly allotted to the Republic of Cuba. I concur in this policy. Obviously there is not now time to draft a completely new bill to cover this complicated and important subject before the expiration of current laws. The extension of the laws presently in force will give the Congress and the administration additional time with which to cope with the permanent solution to the complexities of sugar quota legislation in a proper manner.

For the immediate future, it is my hope that the administration will take a highly realistic look at the sugar quota problem and that it will promptly move to help deserving friends, particularly in Latin America. We have there a number of stanch friends who are in position to produce sugar profitably and whose economy can materially benefit if they are permitted to sell on the American market. There is no more important way to demonstrate friendship than through trade.

In the interim administration policies, and in the permanent legislation which the Congress enacts, it would be remembered that the Sugar Act affects many different legitimate interests at home and abroad. But chiefly, it affects the American consumer and the American taxpayer.

I come from a district where no sugar is produced but this is an important commodity and an important subject in every district. Sugar production, sugar availability, and sugar prices all have a profound impact on the American economy.

The fact that we have paid a premium on sugar adds to the complications and heightens the interest of the American consumer in the action our Nation takes. Since sugar produced for the United States commands a 2-cent-per-pound premium over the world market, there are international ramifications. Sugar quotas have been pretty largely a closed issue. This has been disappointing to many good friends who are anxious to produce sugar for the American market. Obviously, the payment of a premium for sugar imports has a bearing on our dwindling gold reserves and our foreign trade balance. The American consumer and taxpayer are footing the bill and they too need a new deal on sugar.

We operated for a long time under the complicated and involved program which existed prior to last September. In fact, that program worked so smoothly that the average housewife was not aware of the fact that there is or has been a sugar problem or that she has had to pay a premium for the sugar which her family needs.

The lion's share of the premium payments on sugar has gone to Cuba. But, as everyone well knows, a very different set of circumstances now prevails in Cuba. At the hub of this different set of circumstances is a bearded beatnik, the Red dominated dictator of Cuba, Fidel Castro. He upset the applecart for all the quota producers who have been subsidized in one form or another for sugar production since 1934 when our quota system was made law. In varying amounts since that time the cost has been up to $5 million a week. Last year the bounty paid to foreign producers allowed to sell raw sugar in the United States amounted to $250 million. Chief recipient of this bounty was the Republic of Cuba, whose 1960 quota had been set at 3,119,655 tons. Still confiscating U.S.-owned property and hardly skipping a beat in his stepped-up "hate America" campaign, this Cuban dictator in 1959 scooped up $150 million and demanded more. The answer of the United States was to cut Cuba's sugar quota and finally, to eliminate trade with that country almost altogether.

As usual in such circumstances, the Kremlin jumped eagerly and readily into this tangled situation and recognized that in sugar quotas they held an explosive weapon with which to club the United States. Sugar became a weapon in the cold war. We then wound up with a strange set of circumstances facing us—Castro at one end, and his opposite at the other end, Generalissimo Trujillo, denouncing the United States for economic aggression in juggling the sugar quotas—the latter resulting from action taken by the Organization of American States. Castro's cries were audible in Moscow, and the Soviet Union promptly announced that it would be happy to buy the tonnage rejected by the United States—mainly in barter. Red China followed suit with a pledge to buy 500,000 tons and Castro redoubled his efforts to make Cuba the bridgehead for world communism in the Western Hemisphere and hailed the half-price, soft-money deals with the Communists with wild exuberance.

This is the situation in which we now find ourselves. Speaking before the House of Representatives on September 1, 1960, the distinguished chairman of the Committee on Agriculture said this:

> There is not a man in this House who can go back to his constituents and explain the sugar situation in detail; not one. I have lived with it for 25 years and I know I couldn't do it. It is a complicated problem.

Upon the recommendation of his committee, the Congress put over until January 1 our problem of sugar quotas. Well, January has come and gone and it is now March. The expiration date of present legislation is rapidly approaching and we must now come to grips with this problem. Spirited by the elimination of Castro's quota, there are those who seek a larger share of the American sugar market. First, of course, are our own producers. Both sugarcane and beet sugar producers in the United States seek to expand their production. Certainly this should be a major consideration to us. Next in importance is the fact that we have close and loyal friends in this hemisphere who could and should be given an opportunity to share in the American sugar market.

Vitally intertwined with our consideration of this subject is the question of our relations with Latin America. My own position is clear: I want the American consumer and the American producer to be given top priority and consideration. However, if the American sugar producers cannot provide the necessary demands to meet the needs of an ever-growing America and we must turn to foreign producers for needed sugar, I, for one, wish to see our real friends in Latin America, who are capable of supplying sugar to us, be given a fair opportunity to sell raw sugar on the American market.

Let me be more specific. Guatemala is acknowledged to be a country around whose leadership the anti-Castro forces

are rallying and well it might, for this is the only nation which has ever successfully thrown off the Communist yoke. Can you imagine the repercussions throughout Latin America if the former Communist President of Guatemala, Jacobo Arbenz, should succeed in returning from his exile in Castro's island Red citadel to the presidential palace in Guatemala? Guatemala has proved that she is a good, loyal, and courageous friend of the United States. I remind you, my colleagues, that the United States recently sent its fleet to help protect the sovereignty of this country and we do not send the fleet unless we consider the well-being of another country to be essential to the preservation of peace and security of the Western Powers. Guatemala, among other nations in Latin America, deserves special consideration.

Colombia is yet another friend of the United States. We had its distinguished President address us here during the last session of Congress. In a report from Cali, Colombia, the President of Colombia's National Association of Sugar Cane Growers is quoted as saying:

> If the United States wants to improve relations with Colombia, it should grant us a sugar quota. That would be far better than all your big loans.

Mr. Speaker, the distinguished chairman of the House Committee on Agriculture speaking from this floor last June when we were debating the Sugar Act, gave his own views on this very matter and expressed his deep interest in Latin America. At that time the committee chairman gave views favorable to the inclusion within the specific quota system of the smaller sugar producing countries like Guatemala, El Salvador, Colombia, and Ecuador. The chairman reemphasized these views later during the same session when we were debating the conference report. This expression of views gave much hope to the small producing countries involved.

As a matter of fact, much of the area of Latin America is suitable for the production of sugar cane from which sugar can be manufactured. By singling out some nations, I do not intend to exclude the legitimate claims of others. All nations in Latin America who produce raw sugar in excess of their domestic needs and who wish to sell on the American market should be considered. Brazil, for example, is a large producer of sugar and it is important that Brazil and the United States reach a closer understanding on many matters of mutual concern. Other nations in Latin America which have a genuine interest in this problem are Haiti, Argentina, Peru, and the soon to be established Republic of the West Indies.

Last year as a result of the Cuban deficit, four nonquota nations, Guatemala, Colombia, El Salvador, and Ecuador were granted purchase authorizations. These authorizations probably will be allowed to stand and should be, but uncertainty does not allow these friendly producers to operate properly and economically. Nations with established quotas can plan their production while others must make a hit-or-miss estimate. Sugar growing is a labor-intensive industry with a major portion of the costs, as I understand it, estimated to be labor costs. Given a reasonable certainty that these friendly producers of sugar in Latin America can find a market for their product, they can plan production and with it will come a certainty of employment and needed help in stabilizing the economies of these countries—especially in the rural areas where it is needed most.

I feel, Mr. Speaker, that we cannot continue to say to these nonquota nations, as we have in the past, "Well, be patient, the act will be extended and we will take care of you in good time." Unless we act now we shall fail our friends and miss important opportunities to build sturdy fences of good will, not through foreign aid and development loans, but through mutually beneficial dealings on a basis of equality, dignity, and self-respect. As one who for many years has striven for better relations in inter-American affairs, I can state emphatically that there is no lack of opportunity for the United States to blaze new trails in helping Latin America in its quest for peace, freedom, security, and dignity. This we must do now and not next time. This I think is in keeping with the spirit of the Kennedy program for the sound and strong development of the Western Hemisphere.

UNITED STATES-CANADA INTERPARLIAMENTARY GROUP MEETING

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New Jersey [Mr. GALLAGHER] is recognized for 60 minutes.

Mr. GALLAGHER. Mr. Speaker, I wish to take this opportunity to thank you for appointing me as Chairman of the Canada-United States Interparliamentary Group. I have asked for this opportunity to present to the House a short report on these meetings.

I would like to name those members who served on this Canada-United States Interparliamentary Group. They served conscientiously and made an outstanding contribution to our Nation.

One measure of the interest and conscientiousness of the participants can be found in the fact that in our meetings whether they were plenary sessions or committee meetings, we had perfect attendance. I would like to thank each and every one for his participation and contribution.

First, I would like to name the individuals who accompanied me. From the Committee on Foreign Affairs there was the gentlewoman from New York [Mrs. KELLY], the gentleman from Massachusetts [Mr. CURTIS] and the gentleman from Michigan [Mr. BROOMFIELD]. We four members constituted the steering group of the House delegation. In addition there were the gentleman from Massachusetts [Mr. PHILBIN], the gentleman from New York [Mr. DULSKI], the gentleman from Massachusetts [Mr. DONOHUE], the gentleman from Illinois [Mr. MURPHY], the gentleman from New York [Mr. STRATTON], the gentleman from Nebraska [Mr. CUNNINGHAM], the gentleman from Michigan [Mr. HARVEY], and the gentleman from Maine [Mr. TUPPER]. I should add that until this year the gentlewoman from New York [Mrs. KELLY] headed the House delegation. She has done a splendid job in building this organization into an effective instrument of international cooperation. I only hope that I can approximate the contribution she has made.

From the Senate we were fortunate to have Senator GEORGE D. AIKEN as head of the Senate delegation. I believe I express the unanimous views of the American delegation that Senator AIKEN combined splendid leadership with a warm and understanding personality that made for easy cooperation with our Canadian friends. Other members of the Senate delegation were the Senator from Colorado [Mr. ALLOTT], the Senator from Texas [Mr. YARBOROUGH], the Senator from North Carolina [Mr. JORDAN], the Senator from Connecticut [Mr. DODD], the Senator from Indiana [Mr. HARTKE], the Senator from Hawaii [Mr. FONG], the Senator from Delaware [Mr. BOGGS], and the Senator from Montana [Mr. METCALF].

It will be readily apparent that the U.S. delegation represented both parties from both Houses and Members who encompassed divergent viewpoints. In short the delegation was a really representative group. The participation of each of these individuals in the work of the meetings is a matter of intense pride to me. To each of them I extend my thanks for a job well done.

The Canadian delegation comprised some of the most able individuals in Canadian public life. The cochairmen were Hon. Mark R. Drouin, speaker of the senate, and Hon. Roland Michener, speaker of the house of commons. Both of these gentlemen have attended these meetings since the group was organized. Along with their colleagues from the senate and the house of commons they presented the Canadian viewpoint with clarity, conciseness, and courtesy. In addition to the formal sessions the Canadian cochairmen and the Prime Minister were our hosts at luncheons and dinners that gave all of us an opportunity to enlarge our understanding of each other's country in an informal way.

We sat in the gallery of the house of commons where the usual proceedings were interrupted to allow the Prime Minister, Rt. Hon. John G. Diefenbaker, Hon. Lester B. Pearson, leader of the opposition, and Mr. Hazen Argue, to address the house on the importance which all political segments of Canada attach to these meetings. In the senate, where the delegation was accorded the privilege of the senate floor, various senators spoke in a similar vein. There was never any doubt about our welcome in Canada.

These meetings started in 1959 pursuant to authority voted by Congress. They arose out of a recognition that our good neighbor to the north had been accepted as a fact of history and geography but not much more. Our country was besieged with so many more pressing problems abroad that differences and problems between Canada and ourselves

were not always accorded the priority they deserved. Some of these differarose from plain misunderstanding, misences had a degree of validity; others information, or frustration. It was the more distressing that any problems should ever have arisen since I know of no two countries that have easier and freer association with each other. Every day thousands of citizens of the two countries move across the border. Nowhere else in the world is there a boundary of almost 3,000 miles that is undefended. Our common heritage and traditions have given us a common devotion to human freedom and from it a sense of obligation to preserve a forum from which freedom can grow.

The Canada-United States Interparliamentary Group was created to provide an additional link between the two countries. I must make clear that it has never been the intention in either country that the group would intrude upon the executive prerogative of conducting foreign relations. The efforts of the group have been directed to making easier the job of the diplomat by reducing areas of misunderstanding and by maintaining a high level of understanding between legislators on issues that call for legislative action in pursuit of common objectives.

While these meetings did have their origin in 1959 they were preceded during the war years by a visit of Senators and Representatives to Canada to discuss mutual wartime problems. The Canadians have given recognition to this earlier meeting as well as to the current series by arranging for the hanging of a commemorative plaque in room 16 of Parliament Building. This is a historic room in the history of the Canadian Parliament. It is planned that the plaque will hang over the fireplace in that room and will provide a suitable reminder to the generations ahead of the significance of these legislative meetings.

Mr. Speaker, it is possible to cite many areas of mutual interest and concern between the two countries. I shall content myself with mentioning at this time only one that looms large; namely, defense. Looking at the old-fashioned mercator projection map it would appear that Canada leads only to the North Pole. But the air age has taught us that Canada lies on the shortest route between the United States and the western Pacific. Jets and missiles intended for our country must cross Canada. In recognition of this fact Canada and the United States have embarked upon several cooperative programs. One is a series of alert lines that run from the Atlantic to the Pacific. The most northerly of these is the distant early warning line, commonly called the DEW line, that was built, and is maintained, by the United States. The mid-Canada line was built, and is operated, by Canada. The most southerly is the Pine Tree line, jointly operated, that runs along the border with installations in both countries. The two countries have established a combined continental defense system, called NORAD, with headquarters in Colorado Springs. Officers and men from both countries serve in this command.

For my part I am convinced that these and other defense arrangements must be maintained and strengthened. Yet I must report that there is discussion in Canada—in Parliament, in the press and in public forums—of a more neutral role for Canada. There are some Canadians who argue that Canada, with only one-tenth the population of the United States and less than one-tenth of this country's wealth, is carrying a disproportionate load of the defense effort. Others offer the view that Canada is treated as something less than an equal partner in defense planing. The advent of nuclear weapons has suggested to still others that Canada's best defense is one of neutralism.

I can understand the basis of some of these criticisms; with others I cannot agree. Whatever the merit of these criticisms, nothing would give greater heart to the Communist world than to have two old neighbors embroiled in a dispute on how best to defend themselves. There is too much at stake in both countries to allow an attitude of this kind to develop. A responsibility rests upon our leaders, civilian and military, to give greater consideration to Canadian sensibilities and problems in making our defense plans. The two delegations noted in the press statement issued at the conclusion of their deliberations that continuing efforts should be made both by government and by industry in the two countries to encourage a broader public understanding of the interdependent character of the common defense effort in its economic as well as military aspects.

In these brief remarks I have tried to convey something of the spirit and attitude that marked the meetings with our Canadian friends. I have returned from Canada convinced that there are no insurmountable problems between our countries. On both sides I found a willingness to expose, to explore, and to remove irritants before they develop into problems.

It is natural to think of these meetings in the context of relations between Canada and the United States. On reflection I find a larger value. Elsewhere in the world, neighboring states perpetuate or magnify differences between themselves because of inadequate means of communication between themselves except at the highest level. I would commend to them the creation of a level of exchange comparable to that of the Canada-United States Interparliamentary Group. We are not diplomats in the professional sense. But as representatives of our people we talked with frankness, with a sense of responsibility by virtue of our position, and with due appreciation of the views expressed by our Canadian colleagues who reflect the sentiments of their people.

In conclusion I will advise the House that a complete report of the meeting is in preparation and will, along with a financial statement, be made available to the House.

Mr. Speaker, I would like to, at this time, yield to the gentleman from Illinois [Mr. MURPHY].

Mr. MURPHY. Mr. Speaker, I would like to add my personal endorsement to the remarks made by the gentleman from New Jersey [Mr. GALLAGHER]. I find nothing in them with which I can take issue except that his modesty did not permit him an opportunity to dwell on his own contributions to the success of the meetings. I will presume to do that. As all of us can attest, we were tremendously proud when NEIL GALLAGHER spoke. His remarks were to the point and characterized by a plain sincerity that we so much admire in him.

This was my first opportunity to participate in the meetings of the Canada-United States Interparliamentary Group. It did not take me long to realize that these were not just another round of meetings but a serious endeavor to deal with matters of mutual interest in an atmosphere of informality. It is difficult to visualize any other two neighboring nations able to carry on discussions with the amiability and understanding that marked these sessions. As a lesson in what I may call direct diplomacy it was an enlightening experience.

It was my good fortune to serve on Committee III that dealt with matters of boundary waters, tourism, and foreign policy. Every one of these items is a matter of intense interest to the people in my district. I listened attentively to the expressions of concern by the Canadian delegation over the Chicago diversion plan and welcomed the chance to explain the views of my people. Certainly if that issue comes before the House, I feel that I will be better able to participate in the debate.

Tourism is one of Canada's important dollar earners. It is understandable therefore that President Kennedy's request to reduce the duty-free entry privileges of returning Americans from $500 to $100 is a matter of real importance in that country. The U.S. delegation explained this proposal in terms of this country's worldwide balance of payments difficulties, taking care to emphasize that it was not directed against Canada. I think our Canadian friends had a better picture of the problem faced although admittedly they would hope that other solutions would be found.

Perhaps the most heated, but I stress friendly, discussions centered around the issue of the admission of Communist China into the United Nations. Some segments of Canadian opinion are pressing this matter. I think the U.S. delegates made clear the reasons for our country's continued opposition to this proposal. This particular subject opened up the larger one of relations with the Communist bloc and what measures might be pursued to reduce tensions. I found the Canadians very strong in their support of the United Nations.

I have taken these few minutes to lay before the House my personal reaction to the meetings held recently in Canada. It also provides me an occasion to make a public acknowledgment to our Canadian hosts for the warmth of their reception and their unfailing and continuing hospitality at all times.

Mr. GALLAGHER. Mr. Speaker, I wish to thank the gentleman from Illinois [Mr. MURPHY] for his remarks and

for the great contribution he made to the success of this parliamentary group.

Mr. CUNNINGHAM. Mr. Speaker, will the gentleman yield?

Mr. GALLAGHER. I yield to the gentleman from Nebraska [Mr. CUNNINGHAM].

Mr. CUNNINGHAM. Mr. Speaker, first of all I should like to express my deep appreciation to the distinguished gentleman from New Jersey [Mr. GALLAGHER], who was the chairman of our delegation. I think he set the tone for the entire conference so far as we were concerned. Each and every one of us was mighty proud of the way he carried out his responsibilities as the chairman on the House side. Also I want to express my appreciation to the other members of the delegation from the House particularly and also from the other body who I know worked hard and long and took their assignment with a great deal of seriousness. Also I think we should pay tribute to the wonderful staff of our House Committee on Foreign Affairs, Mr. Westphal and Miss O'Brien and others who made the many fine arrangements and worked out so many of the details that were connected with our meeting.

So far as I am concerned, after spending several days in Ottawa, I do not think we have any really serious problem between our two countries. We do have some differences of opinion or differences in our views as we approach the problems of our two countries in national affairs. But I think it is mighty good that the Congress in its wisdom established this relationship between these two great countries because sometimes even though we do not have any major difficulties, as I have suggested, in the sense that we think of them, just by getting together and talking these things over we can forestall any major differences that may lead to unhappy consequences. I think if we could have gotten together with other nations before their problems and differences with us became serious we might not have as many problems in the world as we have today.

Mr. Speaker, I enjoyed my participation as a member of one of the committees. I learned a great deal about what the people of Canada are thinking. I hope I was able to convey to them some of our thinking. I certainly want to pay tribute to the Canadians. They were perhaps the friendliest people I have ever had the pleasure of meeting and working with.

Actually there is an imaginary line that divides us, but in all reality our country and theirs are just one great people. We have similar aims, philosophies, and goals.

I hope that when the officials from Canada come down to Washington next year to participate in the next session we can take care of all of their needs and be as friendly to them as I found them to be with us.

I hope that our colleagues will study this presentation today because it is mighty important that those of us who had the privilege of attending be able to communicate the results of the meeting and the impressions we gained, because we will have problems that will concern both this country and Canada. It does not do too much good for just a few of us to go up there and understand these problems. So I hope that all of our colleagues will take time to read our remarks in the RECORD, as many of them are here listening today, so that when these problems come up we can settle them with the thought in mind that we are two great neighbors, we have the same philosophies, interests, and goals, and that we can as a result of the action we take on proposed legislation remain true and fast friends.

I would conclude my presentation by just one reference to a matter that came up in our committee. I think this is something we could all consider very carefully. We are considering proposals relative to the farm problem. We have a problem of surpluses in this country, and Canada also has a problem of surpluses. As a matter of fact, most of our problems result from surpluses which, even though they are ugly and bad, at least are something that can be solved if we take into consideration each other's views.

The problem I mentioned is that, as I recall it, about 25 percent of all Canadian exports are in wheat. The Canadians are hard bargainers. They sell their wheat on the world market at the world price. This 25 percent of their total exports is very important to the Canadian economy. I think they are a little bit apprehensive that this great Nation of ours often subsidizes our sales of wheat to other countries and perhaps has, now is, or will be giving it away. So I was impressed with their views on this matter, because if we continue to subsidize the price of wheat exported to other countries or give the wheat away, you can see the vast effect it would have on the Canadian economy for the reason that, as I mentioned, they sell at the world price, and if we subsidize the price of wheat or give it away that of course undermines the world price.

May I say again that I was deeply impressed with the kindness and the consideration the Canadians gave us. Again, may I reiterate how proud we all were of the gentleman from New Jersey, our chairman, and the other Members who participated. I hope that I added something that might be helpful.

Mr. GALLAGHER. I thank the gentleman for his remarks. I thank him also for the conscientious job he performed, the knowledge he brought to our meeting, and the quality he gave us in bringing about a very successful conference.

Mrs. KELLY. Mr. Speaker, will the gentleman yield?

Mr. GALLAGHER. I yield to the gentlewoman from New York.

Mrs. KELLY. I take this opportunity to pay tribute to the chairman of the United States-Canadian Parliamentary Group, representing the House side of the group, in this his first year as chairman. I had the honor to serve as chairman during the past 2 years. There is much work involved. He handled himself so beautifully in the work he did that Speaker Michener of the House of Commons, Speaker Drouin of the Senate, and Prime Minister Diefenbaker wrote me personal letters stating how delighted they were to have as the new chairman on the House side the gentleman from New Jersey [Mr. GALLAGHER].

They put special emphasis on his address at the dinner given to us by the Prime Minister.

Mr. Speaker, I do want to bring out one point. The Canadians were very much upset over what appeared in the press of the United States relative to the new agreement between Canada and Cuba on trade negotiations. When that particular issue was before Committee II, dealing in the trade and economic matters, it was brought out very clearly that the new agreement between Cuba and Canada dealt with a small amount of trade in proportion to what our own U.S. businessmen were shipping to Cuba. We, in America, are under the impression generally that when there is an embargo placed on a country by our Government, such as is the case with reference to Cuba, that that immediately cuts off all trade with that nation. It does not.

Mr. Speaker, the President's order specifically exempted nonsubsidized foodstuffs, medicine, and medical supplies. These are broad designations under which it is possible to ship a wide array of commodities. My point is that the concern created in this country over Canada's trade with Castro's Cuba was unwarranted. This leads me to the observation that one of the solid accomplishments of these meetings, as the gentleman from New Jersey stated, is to clear up misunderstandings.

Others of my colleagues have advised this House of the value they attach to the meetings with our Canadian friends. I endorse those views. I think it well to inform this House that the Canadians too hold this association in high regard. May I quote from the remarks made on the floor of the House of Commons by the Right Honorable John G. Diefenbaker, Prime Minister of Canada, upon the occasion of our visit to the gallery of the house. Speaking to his colleagues on the floor, he stated in part:

> Our interdependence cannot be achieved without mutual awareness. There will be problems. There have been problems. We solve them through the instrumentality of discussion and agreement. The removal of misunderstandings is a continuing task with us. We do this in the broad and harmonious perspective of understanding. Unofficial though this organization is, it has already contributed much to understanding between our countries and the solution of problems which have risen, and I know that that function will continue in the years ahead.

These views were endorsed by the leader of the opposition, Hon. Lester B. Pearson, and by Mr. Hazen Argue.

I can only express the hope, Mr. Speaker, that other nations would follow the example that our two countries have developed of discussion and calm reasoning in the matters that divide them. Certainly the world can learn much from the spirit of the deliberations that we had with our Canadian friends.

Mr. GALLAGHER. I thank the gentlewoman from New York for her kind remarks. I believe the conference has been a success due to the great foundation which the gentlewoman provided through her work in the past. It has been my pleasure to serve on the subcommittee chairmaned by the gentlewoman from New York. She makes a great contribution through her understanding in the great field of foreign affairs. I believe if there is any success as a result of the Canadian-United States Interparliamentary Conference, it is because of the great work done by Mrs. KELLY in the past.

Mr. HARVEY of Michigan. Mr. Speaker, will the gentleman yield?

Mr. GALLAGHER. I yield to the gentleman from Michigan.

Mr. HARVEY of Michigan. Mr. Speaker, it was my privilege also to be one of those attending the fourth meeting of the United States-Canadian Interparliamentary Group. I was proud to be a Representative of our U.S. Congress on this occasion for many reasons. First, of course, the citizens of both our countries have every reason to be proud that United States-Canadian relations for almost 150 years have set an example for the rest of the world to follow. It is difficult to imagine that these harmonious relations have been equaled or surpassed by any other two countries in recent world history. Second, however, I was proud to participate in this Interparliamentary Group, for all of its members, both from the United States and Canada, took seriously their responsibility, and as a result, a better understanding, a greater feeling of mutual respect, and much good will between the elected representatives of both countries were created. I was proud also of the leadership of our delegation, of Senator GEORGE D. AIKEN, of Vermont, and of Congressman CORNELIUS E. GALLAGHER, of New Jersey, who so very ably represented all of us on many occasions.

The purpose of these meetings was not to establish policy, nor to reach conclusions, but rather to provide a forum for discussion. It was, in effect, a means of ironing out differences which are bound to occur between any groups of persons who lived side by side with each other. We know that the international situation increases daily the need for complete understanding between our people.

I had the opportunity to participate with the committee discussing trade and economic problems. The citizens of both of our countries should be grateful of one thing for certain, that so many of the economic problems between us come about because both of our countries have an economy of abundance with the creation of surpluses rather than an economy of scarcity. I feel certain that the representatives of both countries came away with a greater respect for the rights of their neighbor and a greater awareness of his problems.

The members of our committee also discussed trade and relations with Communist countries. I feel certain that our Canadian neighbors better understand the feeling of the Members of our Congress toward Red China. They appreciate, I am sure, that we will utterly resist the entry of Red China into the United Nations. On the other hand, the members of our delegation left with a real sense of appreciation for the declared policy of Canada to prohibit the bootlegging of United States goods to Cuba.

In another area of discussion, although not on a prepared agenda, I appreciated the opportunity to discuss with our neighbors the many factors which have contributed to the growth of the Canadian economy in the last decade. For some time, I have been interested in the bracket system of depreciation for plant equipment and machinery which has been used so effectively in Canada since 1949. The Canadians have wisely considered useful life rather than physical life in their depreciation policies, and this has been a tremendous factor in the growth of Canadian industry. It was gratifying to read only recently that President Kennedy recognizes that too much of our industrial equipment in the United States is too old, and that our economy would benefit from a faster writeoff of investments in plant machinery and equipment.

Mr. Speaker, when I arrived in Ottawa for these conferences, I was well aware of the common historical background of our two countries. I was aware, for example, that the first Canadian post office was opened in 1763 by none other than our own Ben Franklin. After the conferences were over, I came away from Ottawa even more impressed with the mutual understanding, respect, and good will that so characterizes the fine relations between our two countries. All of us on the delegation are grateful to our neighbors in Canada for their hospitality and friendship, which made our stay so pleasant and our discussions so productive.

Mr. GALLAGHER. I thank the gentleman from Michigan for his kind remarks. Actually the success of our mission was due to the wonderful spirit of the entire delegation, the gentleman from Michigan, the gentlewoman from New York, and the others who so well represented the intelligence and the wisdom of the Congress and who did so much to assure 100-percent attendance at the subcommittee meetings and who so well expressed the purposes of the delegation to our Canadian counterparts.

Mr. MONAGAN. Mr. Speaker, will the gentleman yield?

Mr. GALLAGHER. I yield.

Mr. MONAGAN. Mr. Speaker, when we think of the foreign relations of this country we seldom think of our great neighbor to the north as being foreign, yet the fact remains that technically Canada is a foreign country. It is a great tribute to the mutual confidence which has existed between these two great countries over the years that we in this country do not think of Canada as foreign but think of this great nation as practically a 51st State of the United States. Unfortunately this attitude to some degree leads us to forget that there are very real, very basic, and very important questions of concern to both countries, questions on which there can be and have been differences of opinion, questions which require consultation and conferences; which require conversations and discussions.

Mr. Speaker, that is the reason why this conference which is the subject of this special order today is of such particular importance at this particular time when the Canadian people with some justice feel that our preoccupation with questions in other parts of the world has led us to disregard the importance of questions that exist between our two countries. So that I would like to congratulate the gentleman from New Jersey and Members of the other body and of this body who served on this conference for taking part in a very vital and important, and I think productive work and also to congratulate the gentleman from New Jersey himself for his leadership in these vital discussions. I am sure they bode well for the future of our relations between our two countries.

Mr. GALLAGHER. I thank the gentleman, who is a member of the Committee on Foreign Affairs of the House, the gentleman from Connecticut, for his very kind remarks.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. GALLAGHER. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, one of the difficulties of being the final speaker in a series is that usually all of the wise and penetrating remarks have already been made. I find myself in that position today. But I would like nevertheless to join with my colleagues in paying tribute to the gentleman from New Jersey, not only for having taken this time today so that we who were privileged to be a part of the delegation on the part of the House to the Canadian-American Interparliamentary Conference might have an opportunity to report to the membership of the House on what transpired there, but also for the leadership which he exercised as chairman of our delegation in making this Conference a success and in contributing very greatly to the achievements which I am sure have flowed and will continue to flow from the informal and very productive sessions which were held in Ottawa and in Quebec as a part of this Conference.

Mr. Speaker, as one member of the delegation, I would like to express, as other members have done before me, my personal appreciation to the Canadians for the most gracious hospitality which they extended to us on this visit. As the gentleman from Nebraska [Mr. CUNNINGHAM] said a moment ago, I do not know of anyone who could be more polite and more hospitable than were the Members of the Canadian House of Commons and the Canadian Senate in receiving us and keeping us busy and in extending to us all of the courtesies that were possible. In fact, Mr. Speaker, they even gave us an opportunity to sample some of the rugged winter atmosphere which has contributed so much, I understand, to the building of the great, rugged

Canadian physique and the strong Canadian spirit, by snowing us in at Quebec with the most serious snowstorm experienced up there in some 18 years. Still, I can't think of a better place to be snowbound than in the historic Hotel Chateau-Frontenac in Quebec where we concluded our deliberations.

Mr. Speaker, while we in this country have always enjoyed the extremely close relationships which have already been referred to with the Canadian people and the Canadian Government, and while we take pride in the unarmed frontier which separates our two countries, in recent years there has been a tendency on our part, I believe, to take these relationships a little too much for granted, particularly in the years since World War II, when we were joined together in fighting against nazism and against totalitarian aggression from the East. In the years since World War II, as we have focused our attention on the threat of communism in Europe, there has been a tendency to take too much for granted the solidity of our traditional relationships both with Canada and with our sister republics to the south. But I think in recent months we have finally begun to realize we cannot take these relationships too much for granted, that there can be festering sores which could have grave consequences. And so it is extremely beneficial that we in America and in Canada should have these opportunities to meet together and discuss the points of difference between us, as we did in this conference; and indeed there are, as has already been pointed out, some differences between us.

But, after all, we found a warm understanding with the Canadian people which makes it possible for us to sit down and talk—I was going to say we talk the same language, but we discovered that our Canadian friends do have a habit in their parliamentary body of relapsing into the second official language of Canada, which is French, of course, and which some of us found a little bit more difficult to follow than English. In fact, they have a number of rather interesting customs in the Canadian House of Commons, Mr. Speaker, and perhaps some might wish to suggest that they be considered for this body. For example, instead of applauding to express their appreciation, they pound on the desk. Of course, we do not have as many desks available for that kind of thing here in this House, which is perhaps desirable, but we were pleased, indeed, and somewhat startled at first at the thumping that took place when our group was introduced to the House of Commons, and also to the Canadian Senate.

Mr. Speaker, as one who had the privilege of serving on the committee dealing with defense problems, I would like simply to say this, that there is no question about the fact that our defense of the North American Continent, our defense of our own country, and ultimately, because we are such an important part of the defense of the free world, the defense of the free world as a whole, does depend on the solidity of the relationship that now exists between Canada and the United States. Looking at a Mercator projection, it appears as if the Communist aggressors are to the east or west of us. But when you look at the globe you realize that the line of attack is to the north, over the pole, and so unless we can have a solid defense arrangement between ourselves and our friends to the north, we will never be able to provide ourselves with protection, the necessary early warning, and some of the other defensive elements vital to the United States. So, for that reason, among others, we must certainly keep the close structure which has existed in the past.

As has already been said, there are differences of opinion. The Canadians feel, for example, and rightly so, that they should have a defense production base in their own country and that this has got to be kept alive, and perhaps there is some responsibility on our part to help them maintain their industrial base. Because of the unemployment situation here in America, this could have repercussions in our own country, but it does seem to me we must recognize the validity of the Canadian feeling in this regard and recognize the overall defense interest that is at issue here.

Reference has already been made to the question of Red China and our attitude toward Red China, and I think, as I have already said on this floor, that that probably is the major issue that could separate our two countries in the future. But, again, I think the opportunity to meet with our friends to the north and the opportunity to express to them as we did in this session our very strong feeling in this body and in the other body against any admission of Red China to the United Nations or any recognition of Red China, is something that is bound ultimately to have an impact on the Canadian point of view as well.

I would like to pay particular tribute to the Senator from Hawaii [Mr. FONG], and the Senator from Connecticut [Mr. DODD], who in a sense took the leadership in trying to present to the Canadians the point of view of the Members of this and the other body on the issue of Red China. I think it was particularly gratifying that an American Senator of Chinese ancestry should have been the one who spoke out most eloquently against the suggestion that we could not even begin to discuss the question of disarmament without recognizing the Red Chinese and including them in our discussion.

I know that Senator FONG's remarks had a profound impact on our Canadian friends who were privileged to hear them.

There is one thing we need to do, as far as these possible areas of difference are concerned, Mr. Speaker. It is to make sure that in the future we in this country sell our ideas to our allies and make sure they understand our point of view. I cannot think of any type of session which would contribute more to that kind of mutual understanding and give us a better opportunity to sell our point of view to our friends to the north, as we in turn can get the opportunity to understand their point of view, than the sessions which we were privileged to attend.

So, Mr. Speaker, I want to express my appreciation for having had the opportunity to take part in these sessions, and again to commend the gentleman from New Jersey [Mr. GALLAGHER] on his distinguished leadership and the eloquent way in which he spoke on our behalf in Canada on the various occasions when he was called upon to speak; and to express again my deep appreciation to our Canadian friends for their courtesy and their hospitality.

Mr. GALLAGHER. Mr. Speaker, I thank the distinguished gentleman from New York [Mr. STRATTON] not only for his remarks but for the great contribution he made in the Subcommittee on Defense, bringing the great knowledge that he has and the experience that he has acquired as a member of the House Armed Services Committee to our Conference.

I would also like to thank our staff, on behalf of all my colleagues; I would like to thank Mr. Westphal, Miss O'Brien, Colonel Lynch, and all those who did all of the work in the background, made sure of the subcommittee meeting on time, and making arrangements for the Conference itself to be successful.

Mr. Speaker, I think one of the things all of us are reminded of as we travel in various countries, perhaps specifically to Canada where they understand us so much better than anyone else, is the fact that regardless of what rank we may have or what our position may be, everyone is an ambassador of the United States. People in some way know that we are Americans, whether it be by our dress, our manner, or our speech. And, Mr. Speaker, you would be surprised how our country is judged on the individual performance of the traveling Americans. I think it is a lesson we can learn from our meetings up there, so that everyone who travels should be conscious of the fact that he is an American and should be conscious of the fact that he is being judged by those people, of other nations, some of whom maybe are in a less fortunate position than we are. It does not take a great deal of knowledge to recognize the fact that our adversary plays up every display of bad conduct that any American may show when he is out of the country. All of us should recognize, as our President has said, that it is not what we can take from our country but what we can put in, that will enable us to survive. All of us in our travels abroad, being Americans, can bring not only character to our job, but make sure we are conscientious in our effort to bring friendship and good will. We want to make it plain that our country wants nothing more for other peoples than that they possess freedom of opportunity and the privileges that we, ourselves, have.

So if we can learn one lesson from our trip it is that Canadians as well as others judge our country by the performance of our country's individuals.

Mr. Speaker, I would like to thank all of the Members who participated in this Conference. I thank the Speaker for the appointment which he made. I thank everyone who made it possible

for us to meet with our Canadian counterparts, to eliminate what misunderstandings might arise, to learn what problems we have and to seek solutions to these problems.

I think on this basis of measurement, all of our Members who participated in the Conference brought to it a conscientiousness which made for a great advancement and for better communication and understanding between our two nations.

As has already been said, our Canadian counterparts could not have been more gracious or more understanding of our problems. I look forward to meeting with them again. Again I thank my colleagues for the great contributions they made to the Conference, and for their kind remarks.

Mr. Speaker, I ask unanimous consent that all Members who desire to do so may have 5 legislative days in which to extend their remarks in the RECORD on the subject matter we have just been discussing.

The SPEAKER pro tempore (Mr. ALBERT). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. TUPPER. Mr. Speaker, as a new Member of the House, it was an unexpected and great privilege to be named to the Canada-United States Interparliamentary Group that met in Ottawa and Quebec City, February 22 through 26.

I have long been aware of the mutual advantages that have accrued over the years to both countries as a result of the friendly regard citizens of the United States and Canada have for each other.

When I was 21 years of age, as a U.S. border patrol inspector, I was assigned to duty in Derby Line, Vt.; and my wife and I resided in Rock Island, Province of Quebec, just across the international border. The border patrol worked closely with the Royal Canadian Mounted Police on many occasions in a spirit of cooperation which would be difficult for two enforcement agencies to duplicate.

The Second Congressional District, which I represent, borders on the Province of Quebec, and quite possibly there are more people of Canadian extraction in my district than any other district in the country.

Maine's tourist business depends to a very large extent upon Canadian vacationists. The Maine Department of Economic Development in cooperation with the Maine Publicity Bureau staff a full-time office in Montreal for the purpose of attracting more tourists.

Many Maine people visit the Canadian provinces of New Brunswick, Nova Scotia, and Quebec each summer and this number is increasing.

It can readily be seen why I am particularly interested in our relationship with Canada.

The cochairmen of the U.S. delegation, Senator GEORGE AIKEN, of Vermont, and Representative CORNELIUS GALLAGHER, of New Jersey, did an outstanding job at this Conference.

Senator AIKEN has attended several similar conferences since 1959 and is held in very high esteem by Canadian Members of Parliament. Congressman GALLAGHER was a credit to the House of Representatives; during the several times he was called upon for remarks, he responded with dignity, wisdom, and a sense of humor that everyone appreciated.

Our meetings for the most part were held in the Canadian Parliament Buildings in Ottawa. The U.S. delegation was greeted in the House of Commons by Prime Minister John Diefenbaker and liberal leader, Lester Pearson. The Prime Minister said that the group was contributing much to understanding between the two countries and to solution of common problems. Pearson, speaking for his party, said that the group was playing an increasingly useful part in "keeping neighborhood fences in good repair." Each member of the U.S. delegation was introduced on the floor of the Canadian Senate.

We were divided into three subcommittees; I was assigned to the group discussing boundary matters, cultural relations, and foreign policy. Among the subjects discussed were the Richelieu-Champlain Waterway, tourist trade between the two countries, Canadian and United States participation in the United Nations, foreign policy problems facing both countries, and United States-Canada relations with other countries in the Western Hemisphere.

There is clearly and understandably a greater spirit of nationalism in Canada than ever before. Canada has tremendous natural resources, much of which has not been tapped. Canadians want to see more industrialization in their country by their own companies.

Canada presently purchases more from the United States than all of Europe combined purchases from our country, or all of South America put together. Canada is our best customer for consumer goods. Although there are approximately the same number of tourists entering the United States from Canada as entering Canada from the United States (about 30 million per year), Canadians spend about $100 million more each year in the United States than Americans spend in Canada. Our State of Maine certainly knows the great value of Canadian tourists to our economy.

There is some disagreement in Parliament as to the role the North American Air Defense Command—NORAD—should perform.

The Progressive Conservative Party believes in the status quo in NORAD. The opposition Liberal Party recently recommended that Canada's role in continental defense be limited to detection, identification, and warning. The minority Commonwealth Federation Party at their last convention called for Canadian withdrawal from both NORAD and NATO. Most Canadians that I talked with feel much the same as most Americans in respect for the need to maintain military superiority while negotiating for international disarmament.

Curiously, there is a great deal of sentiment in all three Canadian parties for admission of the Chinese People's Republic to the United Nations. It was expressed many times that we were not facing the unpleasant facts of life in resisting seating of Red China, and discussions on disarmament are futile without 650 million Chinese being represented. Some of us in the United States delegation pointed out that Red China has not renounced the use of force to accomplish her objectives and, as a matter of fact, looks upon disarmament as a mirage. Also, that Red China would not sit in the United Nations with the Nationalist Chinese on Formosa, in any event.

Canadians generally feel that the United States will be faced with vetoing admission of Red China, and they believe this will embarrass the United States and hurt the cause of the free world more than allowing her to be seated.

The Canadians denied that trade with Cuba was being encouraged from their end—they are not seeking advantage from the break in United States-Cuba relations. They insist that no materials of a military or strategic nature were being licensed for sale to Cuba and say increased volume of trade with Cuba is unlikely.

There are interesting differences between the United States Congress and the Canadian Parliament. In Canada, all Senators are appointed for life—the party in power, through the Prime Minister, fills all vacancies. By removing Senators from political considerations, it is thought that they can take a long second look at legislation without political pressures. All Ministers, corresponding to our Cabinet, must hold a seat in the House of Commons. All Members of the House of Commons are elected. Each day the Prime Minister and all Ministers must at a given time submit to questions from Members of the House of Commons. This is a real departure from anything we find in Washington. I daresay far fewer politicians of either of our political parties would aspire to Cabinet posts if they had to appear daily before the Congress and explain their policy decisions, et cetera. It would no doubt increase attendance in Congress as well. I must confess it would be helpful on occasion to throw a question or two to Cabinet members in a place where equivocation would be difficult.

I talked with a great many Canadians outside of government in Ottawa and Quebec City without identifying myself as a U.S. legislator, and I found no resentment against our Government, or people, in these cities.

The welcome we received officially could not have been warmer. There are obviously many areas where the two countries have differences of opinion. We cannot expect to always agree upon solutions to common problems.

No one can question that there is a more pronounced pro-Canada feeling, but it could only be injurious to confuse this for an anti-United States feeling.

THE TRAGEDY OF HUNGARY

Mr. PRICE. Mr. Speaker, I ask unanimous consent to revise and extend my

remarks in the body of the RECORD, following the special orders for today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. PRICE. Mr. Speaker, March 15 is a day of celebration and of memory for the people of Hungary and for those of Hungarian ancestry who remember the land of their fathers. On this day more than 150 years ago the Hungarian people rose in the revolution of 1848 against the tyranny of their rulers of the time, the Hapsburg dynasty. The Hapsburgs are gone and have been replaced by a new tyranny. The spirit of freedom still burns in the minds and hearts of the people.

In our own time we have seen the evidences of this spirit. The Hungarians rose again in 1956, seeking once again the privilege of creating their own government. They cast out the intruders from the east. In the end, their rebellion was crushed by a massive invasion of a foreign army, and a new regime was imposed from outside.

The whole world watched with horror and fascination as the Hungarians fought their battle, and the rising was finally broken by tanks. The world saw the leaders of the rising destroyed or driven into exile.

The General Assembly of the United Nations has recognized the realities by resolutions calling for removal of Soviet troops from Hungary and the restoration to the people of basic political freedoms. These resolutions have not been implemented. The designated representatives of the United Nations have not been allowed entrance.

Such an anniversary as this should not be allowed to go unmarked in this House, nor should we neglect the record of the immediate past.

For practical purposes there may be little the U.N. can do to aid and assist the Hungarian people. But in this House we have a right to speak up for freedom. At a time when former colonial empires are breaking up, when western nations are swiftly acknowledging the practical right of all peoples to self-determination and self-government, we have a right to note that Hungary remains a captive of a regime imposed by force of arms by the Soviet Union.

The diplomats of the Soviet Union declare themselves the friends of freedom in Asia and Africa. The record shows they are not friends of freedom in Hungary.

Freedom is not divisible into compartments labeled according to the names of continents. Freedom and self-determination are not values to be granted in one area and denied in another by self-proclaimed champions.

The tragedy of Hungary is a reproach to the masters of that land, and it cannot be believed that the situation will remain forever hopeless. We can do our small part today by paying tribute to the people, by celebrating with the Hungarians the great moments in their history, even including the day in which in another century they struck out for themselves for freedom.

HUNGARIAN FREEDOM DAY

Mr. LANGEN. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. WALLHAUSER] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. WALLHAUSER. Mr. Speaker, it is most fitting at this time each year we join in the observance of Hungarian Freedom Day. It proves conclusively to the world that we are solidly in the corner of the freedom-loving people of Hungary.

Yesterday was the 113th anniversary of Hungarian Freedom Day. It should have been a day of great rejoicing, but unfortunately it was not because of the cruel tyrants of Soviet Russia who have placed Hungary and its people under their yoke. They have taken from the Hungarians all of the rights that are inherently theirs.

Yes, the Communist rulers have made it a solemn day and one of sad contemplation rather than one of rejoicing. And, in our observance of Hungarian Freedom Day, it is well to relate some of the history of Hungary so none will ever forget the ruthlessness of the Soviet and its ultimate aim—the placing of the entire world behind the Iron Curtain and making all people of the world its captives and servants.

It was on March 15, 1848, under the leadership of the famed Louis Kossuth, that the patriots of Hungary boldly bid for freedom after being tied to Austria for centuries. It brought freedom and national autonomy to Hungary. Then, in 1945, Hungary found its freedom crushed through occupation by the crawling octupus called Soviet Russia.

Yet, the occupation of its nation by the Communists has not crushed the desires of the Hungarian people for freedom and an independent nation. It burns steadily in their hearts and in their minds. There are many evidences of it.

In the tragic fall of 1956, the Hungarians rebelled against Soviet rule. They demanded freedom and independence and they fought courageously for it. Sadly, the freedom day victory of 1848 was not repeated. Soviet tanks and artillery proved too much for these inspired and dedicated people.

The shocking end of the Hungarian bid for freedom in 1956 cannot and must not be forgotten. Although physically and ruthlessly crushed by Russia's hideous disregard for human rights and the fundamental aspirations and rights of mankind, the patriots of Hungary gave enduring proof that their desire for freedom remains unquenchable.

As we commemorate an earlier era of Hungarian freedom, we honor all Hungarians for their gallant and tenacious longing for liberty and pray together that the day soon will come when the light of freedom and independence again will be burning brightly in their beloved land.

ITALY'S CENTENNIAL—LANDMARK OF FREEDOM

Mr. GALLAGHER. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. ADDONIZIO] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ADDONIZIO. Mr. Speaker, the impressive ceremonies at the State Department auditorium this morning were a fitting observance of the 100th anniversary of Italian unification. The celebration, honored by the presence of the President and Vice President and other dignitaries of our Government symbolized the strong ties that link the United States and Italy. Between the ancient land and the new world exist bonds of affection and understanding that have strengthened the cause of freedom in this critical era.

The history of the Italian people goes far into antiquity. The accomplishments of Rome and its empire are known to every civilized person. The Roman Empire declined and fell although its image survived as a symbol of European unity. Although Rome declined politically her heritage prevailed in Europe all through the Middle Ages. The Italian peninsula was subdivided into small city-states seeking alliances among the strong nations of Europe in order to remain independent.

The fact that the city-states of Italy in the middle ages were small did not stop them from becoming the terminus whence commerce developed and spread all over Europe. Italian commercial cities such as Venice, Florence, Naples, and Genoa were the areas from which the new era of Western civilization began in the 15th century. This new era is known to history as the Renaissance—which means the rebirth—of intellectual and artistic thought in Europe.

The Renaissance of Europe was the beginning of an awakening out of which the age of reason and scientific investigation, or study of the nature of things, came about, with the result that what we today call progress and Western civilization developed. Italian cities, during this period, became the seats of learning for the whole of Europe. The creations of men like Michelangelo and Da Vinci are eternal inspirations to persons with a sense of beauty and harmony.

Although the city-states of Italy contributed so much in bringing about the revival of scientific thought and study, the area remained a geographic expression of many small units fighting petty political battles for the purpose of retaining power and control.

Nevertheless, the spirit and zeal for unity among the Italian people, who had a sense of common nationality, had never ceased to exist. From the middle ages, beginning with Dante, down to the 19th century when the drive for Italian unity finally culminated, there are found men who had tried to bring about this end. Unfortunately for the Italian people, the forces of reaction motivated by selfish

interest of petty monarchs had blocked Italian unification.

The events that popularized the ideas of the rights of man fell upon fertile soil in the Italian peninsula. Patriotic organizations during this period sprang up all over Italy.

The unification of Italy was the accomplishment of its people who after centuries of effort finally realized their dream of seeing their homeland emerge as a national state. Although the unification of Italy was the accomplishment of millions of its people, three men stand out in the minds of all Italians and in the minds of the people all over the world where freedom and democracy are cherished. The men were Cavour, the statesman; Mazzini, the intellectual; and Garibaldi, the fighter.

The struggle for Italian unification amounted to a war of independence. Foreign overlords as well as foreign nations had to be fought against and expelled from the Italian soil.

The first phase of the struggle ended in 1861 when the greatest portion of the Italian peninsula was liberated and united under the royal House of Savoy.

The period of the struggle for Italian unification is filled with patriotic deeds. Battles fought by the Italian regulars such as the battle of Palestro of May 30, 1859, and the exploits of Garibaldi and his volunteers have become legends in the history of Italy's struggle for unification.

Although parts of Italian territory were destined to remain outside of the politically organized state, the new Italian nation was an accomplished fact in 1861, and it took its place among the great nations of Europe.

A 1,500-year-old dream had become a reality.

When one speaks of Italian unification his thoughts are immediately captivated by the role played by one man. The man is Cavour, who as prime minister of Piedmont devoted his whole talents and energies to the cause.

A prominent historian sums up Cavour's work as follows:

On June 6, 1861, he died, worn out in the service of Italy. Italy as a nation is the legacy, the life-work of Cavour. * * * Others have been devoted to the cause of national liberation; he knew how to bring it into the sphere of possibilities; he made it pure of any factious spirit; he led it away from barren Utopias; kept it clear of reckless conspiracies; steered straight between revolution and reaction; and gave it an organized force, a flag, a government, and foreign allies.

This quotation gives a picture of Cavour's abilities and skills as statesman but it does not tell the political beliefs by which he was motivated in his lifelong project. In a letter to the Countess of Circourt, in 1860, Cavour gives his views and his philosophy of government:

I still hope, that we will be able to found our nation on the solid principles of order and liberty. For my part, I have no confidence in dictatorships, I believe that one can do things with a parliament which are impossible with absolute power. Experience of 13 years has convinced me that a ministry which is honest and energetic has everything to gain from parliamentary battles. I have never felt myself weak, except when parliament is closed. Moreover, I am not able to betray my background or to deny the principles of my whole life. If a veil has to be drawn over the statue (of Liberty) it is not for me to do so.

Such are the Italian heritage and traditions in regard to patriotism and political institutions.

These statements of Cavour as to democracy and liberty are prevalent today among the Italian people who are working on the side of the democracies for a better Europe and a progressive world.

SMOKING

Mr. GALLAGHER. Mr. Speaker, I ask unanimous consent that the gentleman from Utah [Mr. KING] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. KING of Utah. Mr. Speaker, because of the grave concern which I have for the health of the American people, and for the adverse impact upon that health of many habits and practices which have now become a way of our national life, I am constrained to raise my voice again, as I have in the past, against the tobacco evil. The commitment which I have made to my constituency is to do everything reasonably possible to call to the attention of the American people the fact that the tobacco habit is robbing us of our health and virility, and is seriously undermining our power to maintain our supremacy among the great nations of the world. Pursuant to this commitment, I should like to call attention to all who read these remarks, some passages from a recent speech made by Dr. Michael Shimkin before the Fourth National Cancer Conference, Minneapolis, Minn. Dr. Shimkin gave these same remarks to a joint meeting for general surgeons and urologists at the American College of Surgeons in Philadelphia on March 8, 1961.

Dr. Shimkin is an associate director of the National Cancer Institute of Health under the Department of Health, Education, and Welfare. He was editor of the Journal of National Cancer Institute for many years. He is one of the foremost authorities in the United States on the subject of cancer. The excerpts from his speech follow:

Our opponent is tough and elusive. Our victories are uncomfortably small and our progress is painfully slow. But there have been indubitable victories, and there is continued progress. Our steps forward empower us to maintain our optimism.

One manifestation of our progress is that our concepts regarding cancer have not remained static. A whole series of changed and changing ideas and approaches has occurred during the past few years, many since the last National Cancer Conference in Detroit in 1956.

This, of course, is not surprising. All of medicine shares in the technological revolution of our times. Discoveries and opportunities are upon us at a rate that exceeds available resources of men, space and time to exploit them. Cancer research certainly is not an exception.

During the 3 days of our conference you will be listening to papers and to discussions that will bring into focus the new additions to our knowledge that underlie our changing, evolving concepts about cancer. Scientific progress, however, depends not only on the acquisition of new knowledge but also on the correction of errors, no matter how authoritative and traditional these errors may be. And progress against cancer requires not only research, but the application of the research findings.

If there exist areas in which our concepts are not changing as rapidly as the facts warrant, and where the application of research findings is lagging, these also deserve our serious attention.

For this conference, every panel has been asked to orient the discussion along the line of four questions: (1) Are our beliefs regarding the subject based on firm facts, or are they only cherished opinions; (2) what are the facts, especially in long-term end results; (3) what new data require modification of our presently accepted concepts; and (4) if we do not possess data that allow us to formulate an answer, what research should be initiated to generate such data?

To these questions I would like to add two more: (5) Are we doing all we can to advance research findings from the laboratory to the clinic, and from the clinic to the whole community; and (6) if not, why not?

SOCIAL ASPECTS OF CANCER

Laboratory research on cancer is sterile unless eventually some of its results can be applied to man. Clinical research also has not been fully developed until its fruits are applied to the whole population. These applications in turn generate problems that need be brought back to the laboratories and clinics. Furthermore, problems of public health, sociology, and economics are as relevant to some aspects of cancer as the chromosomal structure of neoplastic cells, and equally demanding of the use of the scientific method.

Cancer research has made a number of advances for which the dramatic word "breakthrough" is entirely appropriate. But a breakthrough is only potential unless it is exploited. I would like to discuss with you two such areas, in which significant results in the control of cancer could be achieved if our knowledge were more fully utilized.

The second unexploited breakthrough in cancer research is the established fact that tobacco smoking causes a significant proportion of malignant neoplasms of the lung, larynx and oral cavity.

Figure 5 presents data of the classical Hammond and Horn study on the relationship of smoking to mortality among 180,000 men. It is taken from a recent paper by Joseph Berkson that forms a part of a valuable Mayo Clinic symposium on the effects of tobacco smoking in man. His interpretations of the findings, however, are somewhat at a variance with mine. The many statistical investigations, all coming to the conclusion of the association of smoking and lung cancer, the extensive laboratory experiments that establish the presence in tobacco smoke of at least 10 chemicals with carcinogenic activity in animals, the careful pathologic observations of human material and the pathophysiologic studies on the effect of

tobacco smoke on the bronchial epithelium have been so thoroughly reviewed and analyzed by so many national and international committees that it would take another half hour just to recite their unanimous conclusions that smoking causes lung cancer.

It all adds up to this: if tobacco smoking, at least in the form of cigarettes, were terminated, the annual mortality from lung cancer could be reduced by more than 60 percent, a saving of at least 20,000 lives in the United States alone.

Tobacco is considered neither a food nor a drug, and appears to be immune from all regulations except taxation. Therefore, apparently more can be done to protect the population from rat goiterogens in berries and from hepatomas in fish, where the dangers for man are at most theoretical, than from a product with demonstrably deleterious effects for man. Accepting the theory that it is a constitutional right to choose one's poison, does this right extend to children?

The problem is immense, with social and economic ramifications that require the judicious consideration of many elements of our society in addition to the medical profession. But first it requires that it be recognized by physicians and scientists concerned with health to be a serious public health problem and not a stale joke. Our convictions are known by the actions they manifest: not smoking in public and before youngsters may be as important as not driving Cadillacs, and prohibiting smoking in hospitals and clinics, including doctor's lounges, may be powerful medicine.

Tobacco smoking, a one-man self-induced smog cloud, is of course but one component of the many carcinogens in our environment. J. R. Heller will lead a discussion on this topic tomorrow evening. I trust that the speakers will devote consideration to the complex social ramifications that many of the situations generate and that form an integral part of the problems.

The social and economic problems of the cancer patients, however, remain much the same. Two-thirds of all patients diagnosed as having cancer die of or with their disease, after long, expensive treatments that debilitate the purses and the hearts of their families. The lingering death of a cancer patient at home leaves unhealing psychological wounds. The topic of terminal care is important but unglamorous, and requires more attention than it receives.

One approach that would help to alleviate the inevitable problem is the greater use of such patients in research. Perhaps this would also hasten the fulfillment of the promise made by that time-tested prophet, H. G. Wells in 1927: "The disease of cancer will be banished from life by calm, unhurrying, persistent men and women, working with every shiver of feeling controlled and suppressed, in hospitals and laboratories, and the motive that will conquer cancer will not be pity nor horror; it will be curiosity to know how and why."

Our present concepts concerning cancer must remain fluid, susceptible to responsive modification on the basis of new information. Cancer research has no place for fixed concepts, for vested interests, for orthodoxy. But we can stand firm on this: Cancer is a solvable problem, within the capabilities of human intelligence using a human thought and action process we call scientific research.

LATIN AMERICAN POLICY

Mr. GALLAGHER. Mr. Speaker, I ask unanimous consent that the gentleman from Virginia [Mr. HARDY] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HARDY. Mr. Speaker, I applaud President Kennedy's new policy toward our Latin American friends. In his statement of Monday night, he has brought into critical focus the thoughts which many of us have had who have been intimately concerned with this problem. He has outlined a framework within which freedom and dignity can become more meaningful, while the people of the Western Hemisphere achieve maximum economic and social development.

The President's statement is novel in its boldness only to those who have forgotten the American heritage, for the principles he enunciated are the same as those for which our forefathers in both continents fought and died. They echo the high principles of Washington and Bolivar. Inertia, or rejection of these principles as standards for the development of the Americas, can only lead to engulfment of these areas by the Communist doctrine of freedom through slavery.

I am fully aware of the gigantic effort which will be required to translate the architect's drawing into achieved aspirations. The United States cannot, and should not, do it alone. We have not created the problems that exist in Latin America and, although it is both fitting and in our own interest that we should assist in their solution, the major impetus must come from the countries and peoples themselves.

I am particularly pleased to note the emphasis which the President has placed on careful planning in all sectors of the program as a condition precedent to the commitment of U.S. resources. Often in the past the lack of such planning, accompanied by premature commitment and expenditure, has promoted waste and defeated objectives.

I sincerely believe that in the President's plan, properly executed, lies hope for the preservation of our heritage and for the expansion and enrichment of freedom and human dignity throughout the Western Hemisphere.

CAPTIVE NATIONS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from New York [Mr. HALPERN] is recognized for 15 minutes.

Mr. HALPERN. Mr. Speaker, on March 8th of this year I was privileged to join my esteemed colleague from Pennsylvania, DANIEL FLOOD, in the cosponsorship of legislation to create a special committee to deal with the captive nations now in the grip of Red tyranny. Because I feel that the need for this measure is immediate and great I would like to emphasize the arguments in favor of this proposal.

Under the terms of the legislation Congress would set up a committee authorized to deal exclusively with the problems of captive nations now under the yoke of Communist suppression, with a view to ultimately restoring them to freedom and sovereignty.

Surely there is no question but that we are helping ourselves when we look to the interests of these captive nations. They are a potent factor in deterring the Kremlin from the outright aggression that could provoke a nuclear war. Khrushchev realizes he rules over a very unstable and sensitive empire. He knows only too well that the cohesiveness of the Soviet Union is purely a political fiction, a forced alliance of many peoples with past histories of independence, glorious cultures and their own rich folk ways.

Khrushchev knows better than anyone else the repressive measures Russia is required to use to keep the people of the captive nations prisoners. In not one of these countries did the Communists gain control of the government with the consent of the majority nor was the path to power marked by anything but human misery, privation, and death.

The very existence of the captive nations gives the lie to the pretensions of the Communists about the benefits of their brutal system. Stripped of their treasure and forced to bow to military and economic tyranny, the captive nations present a tragic exhibit of what the rest of the world can expect from Communist domination. Their story is a grim warning to the free nations, but it is also a challenge. We cannot let others become captives of the Communists and we must offer every hope to the already enslaved to encourage their adherence to freedom, that they will eventually regain their independence. Just as we undertake to plan strategy to counter Communist efforts here at home and to prevent its expansion abroad, so we must likewise consider how we can best assist the captive nations in their deep seated desire to reachieve their freedom.

I strongly feel that in their hearts the peoples of captive nations are on the side of the free world. Imagine what havoc such a force could inflict on Communist military installations, transportation, and food supplies in an emergency. As strong independent allies the captive nations could be both a deterrent to war and a decisive military sword at the underbelly of the Soviet Union.

The creation of a Captive Nations Committee can serve as a staging area for congressional action. Its main function would be to inform the American people on the state of affairs within the Communist world and to assist the National Government in the general formulation of policy. The investigation and study thus made can be of immeasurable benefit to future policy formulation and provide all of us with a deeper knowledge of the problems and conditions with which the peoples of these nations must cope and the road we must pursue to restore them to freedom and independence.

Let us give heart to the captive peoples and demonstrate to them that they

have not been forgotten and thereby encourage elements within the Communist world to resist their rulers and build up a credit within the fortress of the Communist bloc itself in the event of some future contingency.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. HALPERN (at the request of Mr. LANGEN), for 15 minutes, today.

Mr. ROBISON (at the request of Mr. LANGEN), for 30 minutes, on Monday, March 20, 1961.

Mr. MAGNUSON (at the request of Mr. GALLAGHER), for 20 minutes, on Monday, March 20, 1961.

Mr. GALLAGHER (at the request of Mr. TOLL), for 1 hour today.

Mr. HEMPHILL (at the request of Mr. TOLL), for 1 hour on Wednesday next.

Mr. DENT (at the request of Mr. TOLL), for 1 hour on Wednesday next.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. BAKER and to include an address by A. S. HERLONG, JR.

Mr. WILSON of Indiana and to include remarks made before the Committee on Ways and Means on the new highway program.

Mr. DULSKI.

(The following Members (at the request of Mr. LANGEN) and to include extraneous matter:)

Mr. VAN ZANDT.

Mr. SPRINGER.

(The following Members (at the request of Mr. GALLAGHER) and to include extraneous matter:)

Mr. MOELLER.

Mr. HOLTZMAN.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1. An act to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically distressed areas; to the Committee on Banking and Currency.

S. 900. An act to provide for the striking of medals in commemoration of the 250th anniversary of the founding of Mobile, Ala.; to the Committee on Banking and Currency.

ADJOURNMENT

Mr. GALLAGHER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 33 minutes p.m.), under its previous order, the House adjourned until Monday, March 20, 1961, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

682. A letter from the Deputy Secretary of Defense, transmitting the semiannual report for the establishment or development of installations and facilities required for advanced research projects for the period July 1 through December 31, 1960, pursuant to Public Law 85–685; to the Committee on Armed Services.

683. A letter from the Assistant Secretary of the Interior, transmitting a draft of a proposed bill entitled "A bill to include within the boundaries of Joshua Tree National Monument, in the State of California, certain federally owned lands used in connection with said monument, and for other purposes"; to the Committee on Interior and Insular Affairs.

684. A letter from the Assistant General Manager, U.S. Atomic Energy Commission, relative to reporting that the Atomic Energy Commission had no activities to report for calendar year ending December 31, 1960, pursuant to Public Law 85–804; to the Committee on the Judiciary.

685. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting a copy of the order suspending deportation in the case of Yee Houy, A3112318, pursuant to the Immigration and Nationality Act of 1952; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. COLMER: Committee on Rules. House Resolution 227. Resolution for the consideration of H.R. 5000, a bill to authorize certain construction at military installations, and for other purposes; without amendment (Rept. No. 169). Referred to the House Calendar.

Mr. COOLEY: Committee of conference. Conference report on H.R. 4510. A bill to provide a special program for feed grains for 1961 (Rept. No. 170). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL (by request):

H.R. 5654. A bill to amend the District of Columbia Teachers' Salary Act of 1955, as amended; to the Committee on the District of Columbia.

By Mr. CELLER:

H.R. 5655. A bill to amend the Administrative Procedure Act with respect to the compensation of hearing examiners, and for other purposes; to the Committee on the Judiciary.

H.R. 5656. A bill to provide for reasonable notice of applications to the U.S. courts of appeals for interlocutory relief against the orders of certain administrative agencies; to the Committee on the Judiciary.

By Mr. CHAMBERLAIN:

H.R. 5657. A bill to amend the Budget and Accounting Act, 1921, to provide for the retirement of the public debt by setting aside the first 3 percent of the budget receipts of the United States for each fiscal year for the sole purpose of retirement of obligations counted as part of the public debt; to the Committee on Government Operations.

H.R. 5658. A bill to amend the Internal Revenue Code of 1954 to allow an individual to deduct, for income tax purposes, the expenses incurred by him for transportation to and from work; to the Committee on Ways and Means.

By Mr. DENT:

H.R. 5659. A bill to amend the Housing Act of 1959 to provide a 1-year moratorium on Federal Housing Administration insured and certain other guaranteed and insured mortgages, with the Federal Government assuming the mortgage payments (both principal and interest) and certain other mortgage costs, for mortgagors in areas of substantial unemployment who are unemployed and unable to make such payments through no fault of their own, and for other purposes; to the Committee on Banking and Currency.

By Mr. DEROUNIAN:

H.R. 5660. A bill to amend the Internal Revenue Code of 1954 to provide that certain tuition payments be treated as charitable contributions; to the Committee on Ways and Means.

H.R. 5661. A bill to amend the Internal Revenue Code of 1954 to provide a 30 percent credit against the individual income tax for amounts paid as tuition or fees to certain public and private institutions of higher education and high schools; to the Committee on Ways and Means.

By Mr. DULSKI:

H.R. 5662. A bill to amend the National Labor Relations Act in order to permit supervisors to be considered as employees under the provisions of such act, and for other purposes; to the Committee on Education and Labor.

By Mr. FASCELL:

H.R. 5663. A bill relating to documentation and inspection of vessels of the United States; to the Committee on Merchant Marine and Fisheries.

By Mr. FULTON:

H.R. 5664. A bill to authorize the retraining of persons displaced from their jobs by automation or other technological development, foreign competition, relocation of industry, shifts in market demands, or other change in the structure of the economy; to the Committee on Education and Labor.

H.R. 5665. A bill to amend the Classification Act of 1949 to place in grade 18 of the general schedule the positions of hearing examiners of the Social Security Administration in the Department of Health, Education, and Welfare; to the Committee on Post Office and Civil Service.

By Mr. GIAIMO:

H.R. 5666. A bill to amend section 501 of title 38, United States Code, to provide that under certain conditions, service on the Mexican border before World War I may be included in determining whether a veteran meets the service requirements applicable to the payment of pension; to the Committee on Veterans' Affairs.

By Mr. HALPERN:

H.R. 5667. A bill to amend the Internal Revenue Code of 1954 to provide a deduction from gross income for contributions and gifts to civic organizations; to the Committee on Ways and Means.

H.R. 5668. A bill to amend title 38, United States Code, to provide for the payment of pensions to veterans of World War I; to the Committee on Veterans' Affairs.

By Mr. HARSHA:

H.R. 5669. A bill to increase rates of wartime compensation payable for disability statutory awards by amending section 314 (K) through (s) of title 38, United States

Code; to the Committee on Veterans' Affairs.

H.R. 5670. A bill to increase rates of wartime disability compensation by amending section 314 (a) through (j) of title 38, United States Code; to the Committee on Veterans' Affairs.

By Mr. HOLTZMAN:

H.R. 5671. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to provide that full benefits thereunder, when based upon the attainment of retirement age, will be payable to men at age 60 and women at age 55; and to provide that an individual's entitlement to child's insurance benefits shall continue, after he attains age 18, for so long as he is regularly attending school; to the Committee on Ways and Means.

By Mr. KEARNS:

H.R. 5672. A bill to establish a national merit scholarship program; to the Committee on Education and Labor.

H.R. 5673. A bill to amend the Internal Revenue Code of 1954 to provide funds for educational purposes by providing increased incentives for private giving through the allowance of a tax credit for charitable contributions to educational institutions, and to allow a deduction for tuition and other expenses incurred by the taxpayer or his spouse or dependent at an institution of higher education; to the Committee on Ways and Means.

By Mr. LESINSKI:

H.R. 5674. A bill to extend to employees subject to the Classification Act of 1949 the benefits of salary increases in connection with the protection of basic compensation rates from the effects of downgrading actions, to provide salary protection for postal field service employees in certain cases of reduction in salary standing, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. McSWEEN:

H.R. 5675. A bill to amend the Civil Service Retirement Act to increase from 2 to 2½ percent the retirement multiplication factor used in computing annuities of certain employees engaged in hazardous duties; to the Committee on Post Office and Civil Service.

By Mr. MARSHALL:

H.R. 5676. A bill to authorize the sale of inherited interests in trust and restricted allotted lands and restricted purchased allotted lands in the State of Minnesota, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MINSHALL:

H.R. 5677. A bill to amend the Internal Revenue Code of 1954 to permit the amortization over a 60-month period of certain civil defense facilities; to the Committee on Ways and Means.

By Mr. MULTER:

H.R. 5678. A bill to amend the District of Columbia Alcoholic Beverage Control Act to prohibit certain advertising with respect to price; to the Committee on the District of Columbia.

By Mr. MURPHY:

H.R. 5679. A bill to amend the act to promote the education of the blind, approved March 3, 1879, as amended, so as to authorize wider distribution of books and other special instruction materials for the blind, and to increase the appropriations authorized for this purpose, and to otherwise improve such act; to the Committee on Education and Labor.

By Mrs. PFOST (by request):

H.R. 5680. A bill to amend section 2 of the Small Tract Act of June 1, 1938, as amended by the act of June 8, 1954 (68 Stat. 239; 43 U.S.C., sec. 682b); to the Committee on Interior and Insular Affairs.

By Mr. SMITH of Virginia:

H.R. 5681. A bill to amend the District of Columbia Unemployment Compensation Act to make individuals ineligible for unemployment compensation if they are receiving retirement benefits from the United States or the District of Columbia; to the Committee on the District of Columbia.

By Mr. STAGGERS:

H.R. 5682. A bill to authorize a 5-year program of grants and scholarships for collegiate education in the field of nursing, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 5683. A bill to provide for a program of civil works in economically distressed areas; to the Committee on Public Works.

H.R. 5684. A bill to amend section 103(d) of title 23 of the United States Code so as to authorize the construction of an additional 1,000 miles of interstate highways to be constructed in economically depressed areas; to the Committee on Public Works.

By Mr. BROYHILL:

H.J. Res. 317. Joint resolution designating the week of May 14–20, 1961, as Police Week and designating May 15, 1961, as Peace Officers Memorial Day; to the Committee on the Judiciary.

By Mr. CURTIN:

H.J. Res. 318. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. DIGGS:

H.J. Res. 319. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. STAGGERS:

H.J. Res. 320. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. VAN PELT:

H.J. Res. 321. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. WEAVER:

H.J. Res. 322. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. FALLON:

H. Con. Res. 198. Concurrent resolution designating the week of May 21–27, 1961, as National Highway Week; to the Committee on the Judiciary.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. CONTE: Memorial of the Commonwealth of Massachusetts memorializing Congress on the questions of Federal quotas on imports of residual fuel oil and end-use control of the various fuels serving the Commonwealth; to the Committee on Ways and Means.

By the SPEAKER: Memorial of the Legislature of the State of Idaho memorializing the President and the Congress of the United States relative to ratifying and approving the Columbia Interstate compact, relating to the division, apportionment, and use of the waters of the Columbia River system; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Massachusetts, memorializing the President and the Congress of the United States on the questions of Federal quotas on imports of residual fuel oil and end-use control of the various fuels serving the Commonwealth; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Oklahoma, memorializing the President and the Congress of the United States not to change the present exemption from Federal income taxes of interest paid on State and local indebtedness; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BATTIN:

H.R. 5685. A bill for the relief of Alexandros Dascalakis; to the Committee on the Judiciary.

By Mrs. BLITCH:

H.R. 5686. A bill for the relief of Mrs. Willie Mae Brown; to the Committee on the Judiciary.

By Mr. COHELAN (by request):

H.R. 5687. A bill for the relief of Benjamin C. Ayag; to the Committee on the Judiciary.

H.R. 5688. A bill for the relief of Manuel Padaong; to the Committee on the Judiciary.

By Mr. CONTE:

H.R. 5689. A bill for the relief of Felicja Saulevicz; to the Committee on the Judiciary.

By Mr. CURTIS of Massachusetts:

H.R. 5690. A bill for the relief of Amalia Seresli; to the Committee on the Judiciary.

By Mr. DERWINSKI:

H.R. 5691. A bill for the relief of Libero Colacino; to the Committee on the Judiciary.

By Mr. McSWEEN:

H.R. 5692. A bill for the relief of Nicholas Phillon; to the Committee on the Judiciary.

By Mr. PETERSON:

H.R. 5693. A bill to authorize the Secretary of the Interior to lease certain lands in the State of Utah to Joseph A. Workman; to the Committee on Interior and Insular Affairs.

By Mr. POAGE:

H.R. 5694. A bill for the relief of Elias N. Guillermo; to the Committee on the Judiciary.

By Mr. TOLLEFSON:

H.R. 5695. A bill for the relief of Forrest L. Gibson; to the Committee on the Judiciary.

By Mr. WRIGHT:

H.R. 5696. A bill for the relief of Mrs. Everett Edward Boyd; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

97. By Mr. McCULLOCH: Petition of Bernard Ribley, president, local 1211, UAW-CIO, Lima, Ohio, and members thereof, for the inclusion of the State of Ohio in the experimental food stamp plan, and for the permanent substitution of the food stamp plan for the present plan of distribution of surplus commodities for poor relief; to the Committee on Agriculture.

98. By Mr. STRATTON: Resolution of the City Council of Schenectady, N.Y., favoring the adoption of legislation and administrative rules and regulations which will vest in cities the same rights and privileges now vested in school districts and other nonprofit organizations, with respect to the acquisition of Federal surplus property; to the Committee on Government Operations.

EXTENSIONS OF REMARKS

Increased Appropriation for Forest Service Research

EXTENSION OF REMARKS
OF
HON. WALTER H. MOELLER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 16, 1961

Mr. MOELLER. Mr. Speaker, several official and unofficial statements have recently been made on the subject of this Nation's vital natural resources. These statements—The Final Report of the Kennedy-Johnson Natural Resources Advisory Committee, the President's Special Message to Congress on Natural Resources and the President's Message to Congress on the American Economy, among others—have all acknowledged the urgency of revitalizing our national forestry programs.

I agree wholeheartedly with these statements. To emphasize the necessity for prompt action in this field, I would like to insert in the RECORD a statement I made before the Appropriations Subcommittee this past Monday in support of additional appropriations for Forest Service research.

My statement follows:

INCREASED APPROPRIATION FOR FOREST SERVICE RESEARCH

Mr. Chairman and members of the subcommittee, I am WALTER MOELLER, of Ohio's 10th District. More than three-fourths of my district lies in the hilly southeastern part of Ohio. My appearance here is to discuss briefly my interest in Senator STENNIS' statement before the Senate on January 31, 1961, regarding the "Program for National Forests," as approved by Congress 2 years ago. According to my information, and to Senator STENNIS, some $8 million will be needed to bring the research part of the program up to the goal set for next fiscal year. This extra financing certainly is needed nationwide to place the management of our forest resources on a sounder basis through application of research results.

The situation in my district well illustrates the need for a really adequate national forestry research program. Many of the leading citizens of my district and I have a special interest in the development of our forests because they are the chief renewable resource in some 20 counties of southeastern Ohio's sharply rolling country. Forest improvement is moving ahead as a result of increasing protection against destructive agents and application of cultural practices developed by Forest Service Research. But a depressed economy exists and needs immediate attention. I believe that an investment in a research program designed to increase the output of timber and other forest resources, in perpetuity, is one of the best assurances against a recurrence of present economic conditions.

Early settlers found southeastern Ohio fully covered with some of the finest hardwoods. Now only some 50 to 60 percent of the land remains in forest cover; mostly it is of generally low quality. Much of the land cleared for farm crops has deteriorated and no longer has such value. Progress in the forestation of idle land with pines has been rapid; but the problem of successfully planting deteriorated soils to a valuable hardwood such as walnut is still troublesome.

Other major problems, in the rebuilding of the forests, involve both the establishment of timber stands and the management of them for increased volume and quality. For example, we must have better knowledge of soil characteristics and their relation to the occurrence and growth of our best tree species. This is the very heart of maximum forest use of land, as it is for the best use of farm cropland. When relations between soils and the distribution and growth of different kinds of our best native trees are determined, guidelines will have been established for planting trees in the proper places and managing forests to assure maximum yield and regeneration of new stands.

A further immediate problem is related to production of pulpwood. The hardwood pulp industry is rapidly expanding in the Midwest and increasing its drain on timber stands. There are 19 woodpulp plants in the Midwest; 6 of them are in Ohio. This drain is mostly on good quality trees that are too small for sawtimber. If continued without the guidance that can come from research, pulpwood cutting can be a hazard to our future sawtimber stands. Research is needed to determine suitable methods of managing our forests for production of pulpwood alone, as a special product, and for production of both pulpwood and sawtimber in the same stand. And we need to find the costs and returns available from growing hardwoods for pulp and sawtimber.

The Forest Service is conducting research in my district and in other parts of southeastern Ohio. This work has already made many fine contributions, such as improved forest management methods, better ways to plant trees on old fields, and tree planting methods for coal stripped land. But the program is entirely too small. It ought to be enlarged immediately just as this work should be strengthened in many other parts of our Nation.

I appreciate the time you have given me to review forestry research needs in my district as an example of national needs. Funds appropriated for forestry research are investments that will help, in a constructive way, the economy of depressed areas and assure a more abundant supply of forest resources for the Nation's people and economy. Finally, I want to approve the statements of Senator STENNIS and recommend that we in the House equal his leadership by appropriating an $8 million increase for Forest Service research in fiscal year 1962.

The Constructive Opposition

EXTENSION OF REMARKS
OF
HON. ROMAN L. HRUSKA
OF NEBRASKA
IN THE SENATE OF THE UNITED STATES
Thursday, March 16, 1961

Mr. HRUSKA. Mr. President, there has been much discussion in recent weeks of the role of Republican Members of Congress as the "loyal opposition." I believe a more descriptive phrase is "constructive opposition." All of us, I am sure, feel a strong responsibility as minority Members of the National Legislature to find the most effective means of presenting the views of the constituents who elected us to office. We seek to present those views in a positive manner, in the best interest of our constitutents, and the country as a whole. Despite charges to the contrary, this represents no form of obstructionism but rather is a presentation of what we believe to be the convictions of the majority of the people of our part of the country in the way of Federal programs.

The February issue of the Kiwanis magazine, the publication of Kiwanis International and one of the finest of all service organization periodicals, contains an editorial setting forth this point in thought-provoking and forthright language. It is written by the distinguished Senator from South Dakota [KARL MUNDT]. I ask unanimous consent that the article be printed in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE CONGRESS WILL RESPOND

(By Hon. KARL E. MUNDT, U.S. Senator from South Dakota, past governor, Minnesota-Dakotas District of Kiwanis International)

The 87th Congress is the first in many years to begin operations with a so-called undivided Government. It finds the Democratic Party enjoying control over both legislative Houses and the White House. This fact brings to mind a number of significant questions, not the least of which are: Will this bring about more responsible government? Will it reduce the role of the Republican Party to that of a negative, nagging, antagonistic opposition, and thereby subvert the direction of our national purpose to petty squabbles along party lines?

In attempting to answer these questions, one must, it seems to me, appeal to history. In our own history, the history of America, we find that both systems of government—divided and undivided—have been made to work effectively. Then, too, there have been instances where each has failed. In my own experience of 22 years in the U.S. Congress, I have found that successful government has been attained because of—and not in spite of—sound, responsible party politics.

There can be no doubt that both parties want a better America, a prosperous America, one that continues to move ahead. The differences between the two parties do not really concern goals, but how best to attain these goals; it is a difference not of ends but of means. And, more often than not, much of our national legislation is the result of working out these differences through debate and compromise to achieve good government and a productive, free America.

The key to disagreement in majority-and-minority government is responsibility. When accepted and practiced, responsibility brings to the Nation united effort working for the national good. And responsibility in Government has a peculiar way of making itself felt. It is for this reason that, as the 87th Congress opens with a new President in the White House, I am not seriously alarmed at the prospect of congressional divisiveness along party lines. For when the chips are down on issues of major significance, responsibility will, as it always has in the past, emerge. And it is my conviction that, as usual, it will cross party lines.

This is not to say that there will be no major differences over the role Government

is to play in the future. But, at the same time, these differences do not stand in the way of progressive programs, for responsibility rests with the President as well as with Congress. A President cannot afford to launch programs that are not, so to speak, "in tune with the times." This has, of course, happened, and it has usually been accompanied with a resultant change in the White House. It has also happened in Congress. But here, too, the American voter asserted his responsibility—when the politician has not asserted his—by stepping into the polling booth and removing from public office those officials who trifled with the national interest by playing politics in the legislature.

And here is the main reason why I expect the 87th Congress to be a typical Congress, a Congress that will be responsible. I refer to the voter. Responsibility begins and ends with the voter. It is still the greatest system devised for successful and productive government. For in our renowned check system of government, the voter is the final check. If responsibility is not exercised where laws are made, then it will surely be exercised by private citizens on the home-front where lawmakers are made.

Liberalizing Social Security Act

EXTENSION OF REMARKS
OF
HON. LESTER HOLTZMAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 16, 1961

Mr. HOLTZMAN. Mr. Speaker, I am today introducing in the House of Representatives a bill liberalizing the Social Security Act and providing an essential package break for our older citizens.

The bill provides for three major changes in the act: First, removal of the present limitation on outside income that can be earned by recipients of social security benefits; second, lowering of the retirement age for men to 60 and women to 55 years of age; Third, continued payments to dependent children after age 18 provided the dependent child is actually attending full-time school.

The first revision is the removal of the present limitation on outside income that can be earned by individuals who are receiving social security benefits. We are all well aware of the fact that the cost of living has continued to spiral upward, and it is almost impossible for the majority of our older citizens to live on savings, small pensions, or their social security. Pensions and social security are not that generous, and whatever savings might have been accumulated over the years have been for the most part dispersed for various reasons. In many instances the older folks are forced to become dependent to some degree on relatives or friends, or on the various welfare agencies for the additional help they need. To remove this restriction on the amount of income which they can earn would correct a great inequity in the law and would most assuredly make it easier for them and their families. Wage earners, for whom the act was originally intended, would then be on a par with those who have trust funds, real estate, and other investments, against whom there is no limitation whatsoever.

The second provision would give full benefits to men and women at age 60 and 55, respectively. Early retirement of our older workers has been advocated and encouraged to make way for younger employees who are coming on the labor market in greater numbers each year. After working for a period of 30 to 40 years an individual is certainly entitled to some rest and a relaxation of pace. The fact that he has retired from active full-time employment would not necessarily mean that the benefit of his qualifications and years of experience would be lost and unused. However, his responsibility would be lessened and his burden lightened; yet he would be free to continue to contribute his ideas and know-how, but on a more limited basis.

With regard to provision 3, for many years we have been mindful of a great deficiency in our approach to the educational needs of our people. Literally thousands of young men and women are obliged to forego a full education because of the need to contribute to the maintenance of their home. This provision, if enacted into law, will be a real step forward, not only from the viewpoint of our educational needs, but also from the viewpoint of a parent who has only an average income and wants to provide his child with additional schooling.

The Congress has a substantial responsibility for the welfare of all our citizens. If we are to be practical and realistic we must at this time revise this program to meet the challenge of the times.

Legislation To Give Foremen a Voice and a Vote in Affairs Affecting Their Welfare

EXTENSION OF REMARKS
OF
HON. THADDEUS J. DULSKI
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 16, 1961

Mr. DULSKI. Mr. Speaker, because I feel that the foremen in American industry are presently captives in the "no man's land" of collective bargaining in American industry due to definitions and restrictions contained in the Taft-Hartley Act, I am today introducing legislation which is designed to once more restore to the foremen class of people the status of first-class citizens, or an equal status, with all the rights and privileges of the rank and file worker, with all the protection of the laws of the land, and will be able to take their rightful place at the bargaining table, and have a voice and a vote in affairs affecting their welfare.

In modern industry today, we have strong representation for management at the top level—at the bottom level we have strong representation for the rank and file worker. In the middle, we find a vast number of people called foremen with no representation whatsoever operating in a vacuum as a buffer, and sometimes a whipping boy, between management and union in the economic struggle for survival.

I contend that these people, the foremen of America, have a natural right of association which should not and cannot be taken away from them by administrative definition and interpretation of legal verbiage. I contend that the foremen of America have a natural right to band together to process grievances, protect their job security, safeguard their working conditions, and be human beings—the same as any other group of workers. At the present time, neither the law nor company policy provides proper protection for the foremen class of people, although a foreman in American industry speaks for and acts for management. At the same time, in his personal capacity, he is an employee subject to terms and conditions of employment imposed upon him from above—a matter over which he has no control or no voice.

I find no basis for the argument that foremen, through enjoyment of the benefits and fruits of the collective bargaining process, would impair the effective performance of their duties in behalf of management.

On the claim of divided loyalties, we cannot assume that self-organization for collective bargaining would prove incompatible with the foreman's faithful performance of his duties. Such an assumption has never been proved.

Many foremen groups throughout the Nation have been organized, but not recognized, without detriment to their loyalty or efficiency to management goals. Management's disciplinary powers are adequate to insure faithful and efficient job performance by all of its employees, regardless of title.

The basic argument of the foremen concerns the denial by their employers of the right to participate in the decisions which affect their welfare as employees.

A foreman does not lose his right to serve himself in matters fixing his own wages, hours, seniority rights, or working conditions because he serves his master in others. The foreman is caught in the squeeze between a gigantic mechanized system that can turn the human element, including foremen, into robots—unless the fundamental and basic human principles, one of which is the right of association, are completely respected and tolerated.

My bill proposes to free the shackles that bind the foremen of America in managerial bondage and restore to them their natural rights and privileges to which they are entitled as a matter of plain, simple, common justice.

At this point I wish to include one of many letters that I have received concerning the foremen's situation:

Realizing your interest in the welfare of the working people of your district and being aware of your previous attempts to assist us through legislative channels, we are again bringing our case to your attention.

We are an organization of foremen, employed by a local industry, nameless for our

protection, unable to bargain collectively with our firm's management because of the Taft-Hartley Act. We are hourly paid foremen, not salaried, and are raised in pay only when the rank and file local union negotiates a pay increase, for their members, through collective bargaining. A percentage differential separates us from the top represented employee. Yet management insists that we are supervisors and a part of management.

The following quotes from our company's supervisory training and development manual are illuminating:

"The timing of pay adjustments for supervisory employees has been a subject of discussion by management in our company for many years and there are many different opinions and practices in the industry. Fundamentally, pay increases for supervisory personnel are considered as merit increases, whereas pay increases for represented personnel are negotiated in the light of any and all other benefits that are granted. In order to disassociate the two, it has been the policy at * * * to grant pay adjustments at different times during the year. This should not be construed as meaning that the increases for represented people are not deserved or merited but rather that the cost to the company of other benefits that are granted, must be considered in determining the amount of any general wage increase for the organized force. It should be understood that wage adjustments for the two groups are unrelated and are not dependent on one another."

Clearly management has drawn a sharp line between the hourly represented employees and the salaried supervisors. No mention has been made of the foremen, who are in between the two groups herein discussed, being a part of neither one.

The Taft-Hartley Act bars foremen from collective bargaining, but our employers have put us in the van with the represented or rank and file union worker as far as wage increases and other benefits are concerned. On the other hand they refuse to allow us to bargain collectively, claiming that we are supervisors and thus a part of management.

Therefore, our only hope of ever attaining collective bargaining lies in amending the Taft-Hartley Act to permit the first line of supervision to organize and bargain collectively. We are firmly convinced that our best interest will be served by a separate and distinct organization of foremen, not connected to, or a part of any rank-and-file union.

I trust that early action will be taken on this legislation.

The Power To Tax Is the Power To Destroy

EXTENSION OF REMARKS
OF

HON. EARL WILSON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1961

Mr. WILSON of Indiana. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement made by me before the House Committee on Ways and Means on March 15, 1961:

Mr. Chairman and members of the committee, I am Congressman EARL WILSON, of the Ninth Indiana District.

First, I would like to thank the members of this committee for the opportunity to appear here today. I am happy to appear here on behalf of the Cummins Engine Co., of Columbus, Ind. This industry is vital to our Nation's progress and safety, essential for the forward movement of our transportation industry, and a fundamental factor in the economic progress of my district.

I hope to be able to acquaint this committee with many of the facts pertinent to this proposal which tends to discriminate against an industry through the raising of tax on diesel fuel.

I am sure you gentlemen have heard this quotation by Chief Justice John Marshall many times in the past—"The power to tax is the power to destroy."

Tax proposals contained in the President's highway message would, if enacted, verify the truth of that statement. A vibrant, growing, efficient American industry stands to be seriously harmed if not destroyed once the proposed diesel fuel tax increase is approved.

A very unjust economic hardship will be imposed on the diesel engine industry if the tax raise of 75 percent is enacted. This industry has prospered; not through Government favoritism; but, through its own enterprise and ingenuity. To tax the efficiency and economy achieved by this industry's product, is a direct contradiction of our American principles and is, in fact, an attack against a fundamental idea of American life.

This proposed tax poses the threat of crushing the diesel engine industry if enacted. Furthermore, by placing a penalty on the success of private enterprise we will stifle further diesel development and serve notice that the future success of private enterprise will always be in danger of tax penalties. Actually, diesel motored trucks represent only 2 percent of the entire trucking industry.

This Nation's progress depends upon preservation of historic principles of freedom and private enterprise which have made our country the "land of the free." Any other course is another step toward discouragement of individual initiative, toward socialism and communism.

This proposed tax is a proposal to tax efficiency, industry, and initiative, and discourage development of new and better products, as well as work a hardship on a vital American industry.

For your consideration I summarize below my findings on the subject of the proposed discriminatory fuel differential tax.

1. Taxing diesel fuel at a higher rate than gasoline would result in taxing only 15 percent of the heavy duty trucks, i.e., 26,000 pounds registered gross vehicle weight and above.

2. Differential tax on diesel fuel in effect is a tax on the efficiency of the diesel engine and therefore discriminates solely against the diesel engine industry as compared to its major competitor the gasoline engine industry.

3. The proposed diesel fuel tax increase from 4 cents per gallon to 7 cents per gallon amounts to a 75-percent increase, yet the Bureau of Public Roads, in its own exhaustive studies (table 5, p. 14, H. Doc. 91, third progress report of the highway cost allocation study), found only a 5-percent to 18-percent advantage of diesel trucks over gasoline trucks, making this proposed tax clearly discriminatory.

4. Development of the diesel engine to its present state of superior efficiency has been accomplished by private industry, without Government subsidy in any form.

5. Diesel-powered truckowners already pay substantially higher Federal taxes in the form of excise taxes on new trucks and on engines and repair parts than do the owners of gasoline-powered trucks of equivalent carrying capacity.

6. Federal differential taxation on diesel fuel would encourage every State to apply similar taxation with the inevitable result that diesel engines could be taxed off the highways.

7. Our military defense vehicle dieselization program would be adversely affected through restricting the ability of the diesel engine industry to continue its privately financed research and development programs. (Department of the Army 1960 policy calls for dieselization of all vehicles over 150 horsepower.)

8. The proposed diesel fuel tax would have a primary effect on one company—Cummins Engine Co., in my home district of Indiana, which produces 60 percent of all highway truck diesel engines. Cummins' average employment in 1960 was approximately 4,100, with a total payroll of $29,866,796. In addition raw material and finished products of $27,720,100 were obtained from Indiana suppliers in 1960.

In addition to presenting to this committee the preceding eight major arguments against the proposed diesel differential tax, I wish to comment upon an important point that was raised during the first day's hearing on this subject. You will recall that the Department of Commerce was asked if any studies had been made to determine what effect the proposed tax program would have upon the trucking industry. Their answers indicated that studies of the effect of the taxes on the profits of the industry had not been analyzed.

It was quite surprising to learn that this fundamental question had not been studied prior to recommending this tax program to the Congress. Had the Commerce witnesses been prepared to answer this question, I believe this committee would have been amazed at the unjust discrimination contained therein.

The success of many manufacturers and businesses depends upon efficient and economical truck freight transportation. To continue to provide such services to its many customers the trucking industry must be able to carry out its operations in a profitable manner. American Trucking Association figures indicate the proposed tax program would add $44.1 million per year to the total operating costs of the 1,076 class I and class II common carriers of general freight. Had the proposed tax increases been in effect in 1960, the added cost would have entirely eliminated the $43.7 million before tax net income of these carriers.

This significant fact demonstrates quite clearly that the trucking industry will be unable to absorb any portion of the proposed tax increases. This readily available information answers, at least in part, the earlier question raised by this committee.

Supposedly, the proposed taxes are aimed at the heavy duty trucks (26,000 pounds registered gross vehicle weight and over). Yet when we look into the makeup of this vehicle classification we find that only 135,000 (or 15 percent) of these 900,000 heavy duty trucks are powered with diesel engines. Since the proposed diesel differential tax affects such a small portion of the heavy duty trucks, this tax feature discriminates against a minority of those trucks. This fact is even more clearly emphasized when you consider that diesel trucks use between 13,000 and 18,000 gallons of fuel per year. Under the proposed tax increase their annual fuel costs will be increased by $390 to $540 per truck, with no corresponding increase in the costs of operating competitive gasoline engine powered trucks.

Another key point is that over 43 percent of the 135,000 heavy-duty diesel trucks are located in the mountain and Pacific regions. Yet, only 26 percent of the 40,943 miles of Federal highways will be located in these two regions—and an even smaller percentage of the total program dollars are to be expended in this western area. One can only

conclude that the geographical distribution of this tax burden is unequal and does not follow the fair-share concept.

I am even more concerned about the effect the proposed tax increase program will have upon the suppliers of major components to the trucking industry. In this category, the Cummins Engine Co., the world's largest independent manufacturer of high-speed diesel truck engines, produces 60 percent of all highway truck diesel engines built in the United States. This company, through its own resources, inventiveness, and initiative, has been a leading pioneer in developing the diesel engine to its present state of operating efficiency.

During the past year Cummins has spent about $5 million on research to improve the efficiency of its engines about 4 percent. An additional $7 million is currently being spent for facilities to produce this improved engine. Each 1 cent increase in the differential price of diesel fuel over gasoline decreases the efficiency of the diesel nearly 5 percent. The total proposed tax increase on diesel fuel will have the same effect as decreasing the efficiency of the diesel engine by 14 percent—or nullifying almost fourfold the latest research efforts of this company. Taxing this type of ingenuity and inventiveness is about as logical as placing a penalty tax on the compact car for its superior fuel economy.

In conclusion, I am firmly convinced from my study of this matter that had the justification and effects of the proposed diesel differential tax been adequately studied beforehand, you would not find this feature in the tax program now before this committee. We are not opposed to taxes on motor fuels but we propose that all such taxes be placed across the board. The unjust, discriminatory aspects of this specific tax proposal will be most detrimental to the trucking industry, selected areas of our country, the consumer public, and the diesel engine industry.

Address by Hon. A. S. Herlong, Jr., of Florida, at the 16th Annual Convention of the National Limestone Institute, Washington, D.C., January 18, 1961

EXTENSION OF REMARKS
OF

HON. HOWARD H. BAKER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1961

Mr. BAKER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address by my colleague, Congressman A. S. HERLONG, JR., of Florida, at the 16th Annual Convention of the National Limestone Institute, Inc., January 18, 1961, Washington D.C.:

As a member of the Ways and Means Committee of the House of Representatives it is our responsibility to provide the revenue to meet the spending needs of the U.S. Government. Not only must we do this, but we must do it in such a manner as will be as fair as possible to the greatest number of taxpayers, and without following tax policies that will stifle incentive or hold back economic growth.

Too frequently in the past when the need for money arose, Congress simply took the easy way and raised tax rates.

Because of the fact that there are fewer people in the upper brackets it has been the natural tendency of the man in politics to shift the burden to these few because in so doing there is less fear of political reprisal from great numbers of the people.

It has been pointed out by the chairman of our committee that of all the money presently raised in taxes by the Federal Government, only $4½ billion is raised by surtaxes—that is, personal income taxes on taxable income over $2,000 for a single person and $4,000 for a married couple. Yet the present rates are so steeply progressive that the tax rate on taxable income in the $16,000 to $18,000 bracket is 50 percent and it climbs rapidly from there to 91 percent.

Our country is in the midst of a tremendous population growth. It is estimated that by 1975 the population will be in excess of 225 milion. This means that there will necessarily have to be some 20 million additional jobs provided for these new people. It is further estimated that it costs between $14,000 and $17,000 of investment capital to provide one job. If we are to provide jobs for these new people, we must make more capital available for investment.

The avenue of bond issues and extensive borrowing, or the issuing of stock, is open to the very large business in order that that business might expand. Unfortunately, these same avenues are not open to the small- and medium-size businessman who would like, and who is entitled to, the privilege of expanding his enterprise. There is no justifiable reason why a person whose business is relatively small should be prevented from getting larger.

In my judgment, the only sound and fair way we can provide this capital for people and businesses all up and down the income tax scale is to permit them to retain a larger portion of their earnings. To do this, it would necessarily mean a reduction in our income tax rates from top to bottom.

Your natural question in this regard is: How can we who are so concerned about our national budget being balanced afford to reduce taxes when we have before us an $80-plus-billion spending budget?

Of course, the first answer to this question is that our spending budget doesn't have to be $80-billion-plus. I earnestly hope we will be able to hold it below that figure. In this connection I don't need to remind you that the revenue demands of the U.S. Government are gaged by the amount of money we in the Congress spend. How much we spend is triggered by the demands of you, the people, for Government services, and of course by the requirements of the National Defense Establishment. Until these demands and needs are appreciably reduced, it would be unrealistic to say that we were not going to have to continue to take large sums from our people in taxes.

The answer to the question, then, as to how we can afford to reduce tax rates when we are confronted with this situation is, in my judgment, that the expansion of our economy which would be brought about by the making of additional capital available for investment and creation of more jobs would more than make up the difference in net revenue to the Government. The point I mean to make is that we have reached the point of diminishing returns taxwise. It is a historical fact that in the past when tax rates have been reduced, net income to the Federal Government in succeeding years increased, rather than decreased. It's the old story of the merchant who needs to raise cash. He doesn't raise his prices. He has a sale and lowers them and takes in more money—and, of course, in the process, more net profit. He has created incentive for people to want to buy. The Government can likewise create an incentive for people to want to invest, and can also through reduction in tax rates help provide them with the money to invest.

If this incentive for expansion and the growth which it generates isn't enough to "take up the slack," there is also this fact: Our gross national product normally increases about 3 percent a year. It has been shown that every percentage point increase in our gross national product brings in about a billion dollars in internal revenue. We could, therefore, feel safe in reducing tax rates to a point which would equal $3 billion a year and still, because of our natural growth, not have a deficit. This single factor, however, is contingent, and the contingency is a pretty big "if." We would not have a deficit with such a tax cut if Congress held down expenditures. We cannot continue to spend in the same lavish way we have been spending—increasing our spending budget each year even more than the increase in our revenue—and expect to have a balanced budget. It is important that Congress exercise some restraint. For Congress to exercise this restraint, it will be necessary to the people back home to lower their demands of the Federal Government.

The next question that arises is, is there a comprehensive plan for the accomplishment of this reduction in income tax rates which will result in a rebirth of incentive to invest and expand, and which will promote the growth of our economy without inflation? The answer is in a bill which Representative HOWARD H. BAKER, of Tennessee, and I introduced the other day. I understand we have since that time been joined by a number of other Members of Congress who have also introduced identical legislation.

The basic principle involved in this legislation is a gradual reduction in tax rates over a period of 5 years. Individual income tax rates would be brought down, by the end of the 5th year, from a top rate of 91 percent to 47 percent. The first bracket would be reduced from 20 percent to 15 percent, and there would be a corresponding reduction in all the rates in between.

The top corporate of 52 percent would be reduced from 52 percent to 47 percent by an annual reduction of 1 percent over the 5 years. Almost 85 percent of our total business population, as you well know, is composed of unincorporated firms, and surely they should not be taxed at higher rates than corporations.

There are predictions that by tax rate reform we can raise the annual average family income of the American people from $6,500 annually to $11,500 annually in the next decade and without inflation.

It is my conviction that these steps can be taken without creating deficit spending or a net loss in revenue, even if we are to be saddled with Federal spending at the current level—but no higher—in the foreseeable future. But we must, as I have said, hold down our spending.

I am convinced that we need not continue to spend what we are spending; but even if circumstances compel us to do so, the proposed legislation has a built-in safety valve to protect us against deficit spending, which is so highly inflationary, by the simple formula of postponing rate reductions in any year when an unbalanced budget is threatened. This could stretch out the 5-year reduction period by not more than 4 additional years.

The revenue effect of the Herlong-Baker bill would average less than 3½ billion annually, or the equivalent of a 3.5 percent rate of economic growth.

With new funds for investment and job creating, in this country, we can foresee as much as 5 percent average rate of growth over the next 5 years, with a revenue increase rather than decrease of more than $1 billion annually, above the direct effect of the scheduled reductions and reforms in our legislation.

I believe also that our bill has a built-in virtue that will help convince the American people that tax reform is essential to their future.

Many of you undoubtedly participate in incentive and profit-sharing plans in your plants. Some of you may use a bonus system in creating stable labor forces and loyal workers. I hope that you have found that such plans also reduce waste and costs, for this is one of the pillars on which our tax reform legislation is based.

By promising our 60 million income taxpayers a forward-scheduled tax reduction—where they have a clear choice between a tax reduction or no tax cuts because of increased Federal spending—we will enlist them as individual participants in the war against excess spending and waste.

We offer them a partnership in economy and saving on a national level. If they exercise their right of petition and insist on Federal spending only for those services which are essential at the moment, they will profit during the 5 years in which we propose to establish tax reform. If not, an annual tax saving will not accrue.

This will, as a byproduct, in my judgment have a salutary effect on appropriations, for it will take a brave man in the legislative branch to deny a tax reduction to an anticipating constituency by a last-minute, budget-upsetting spending spree.

We must not lose sight of the fact that tax reduction proposals short of thorough tax rate reform will fail to provide the competitive forces we need in the Nation today to put the brakes on Federal spending.

There is a critical urgency about this business of tax reform. Capital-destroying tax rates are a luxury we can no longer afford. Our excesses in spending and in taxing are producing wrinkles in our economy, just as the excesses of individuals produce their telltale signs on those individuals.

Moderation is good for all of us. It is good in the field of tax reform, which provides for both individual and corporate tax relief.

Our potential for growth is nurtured by the spirit which created our freedom in the first place.

Our pioneer with his wooden plow ventured into the unknown forests and left his monument to courage.

We have improved the tools of our progress vastly since then. The means to build them still better, for the future of the land must not be denied the bold and adventurous today.

Our failure to free the means whereby any one of you can build on your dream of a better missile, a bigger steam shovel, a more tamed atom, could well be catastrophic.

Let us not make that mistake, or allow our Government to make it for us, as we march together toward a new realism in America and the highly competitive world in which we live.

H.R. 5637 Would Protect the General Public and the Transportation Companies in the Event of Accidents Resulting From the Transportation of Nuclear or Other Unusually Hazardous Products and Materials

EXTENSION OF REMARKS

OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1961

Mr. VAN ZANDT. Mr. Speaker, on March 15 I introduced a bill (H.R. 5637) that would authorize the Department of Defense to extend protection to the public by indemnifying transportation companies against public liability arising from the risks involved in the transportation of nuclear or other unusually hazardous products and materials and to limit the liability of transportation companies so indemnified. Before commenting on the provisions of my bill, it seems to me that it is worth while to address myself to some prior legislation dealing with the general subject of indemnification with respect to unusually hazardous risks. Such indemnification is in some instances already provided by law with respect to some governmental agencies and in others has been suggested for governmental agencies.

In an act of July 16, 1952 (66 Stat. 726), a bill was enacted to facilitate the performance of research and development work by and on behalf of the Army, the Navy, and the Air Force. One section of that statute provided that contractors who entered into agreements for research, development, or test facilities could be indemnified, first, against liability on account of claims by third persons, including employees of the contractor, for death, bodily injury, or loss of or damage to property arising as the result of a risk defined in the contract to be unusually hazardous or, second, for loss of or damage to property of the contractor arising as the result of a risk defined in the contract to be unusually hazardous. The act of July 16, 1953, was slightly amended by an act of August 10, 1956 (70A Stat. 134), but the general principles contained in the 1952 act are still applicable.

By an act of September 2, 1957 (71 Stat. 576), the Atomic Energy Act of 1954, was amended to provide protection to the public by providing that the Atomic Energy Commission could indemnify its contractors and licensees to the extent of $500 million in order to indemnify such licensees and contractors against public liability arising out of a nuclear incident. A nuclear incident was defined in the statute as meaning any occurrence within the United States causing bodily injury, sickness, disease or death, loss of or damage to property or for loss of use of property arising out of or resulting from the radioactive, toxic, explosive or other hazardous properties of source, special nuclear, or byproduct materials. The persons indemnified under the amendment to the Atomic Energy Act were to be those with whom an indemnification agreement had been executed and any other person who might be liable for public liability.

In the last Congress the Secretary of Defense submitted to the Speaker of the House of Representatives a bill which would broaden the scope of the indemnification authority contained in the 1952 act to which I have already referred. In submitting that bill to the Speaker, the Secretary of Defense accompanied it with a memorandum in which he stated that the items and materials which in 1952 were in a research or developmental status have now advanced beyond that status. He added that nevertheless the unusually hazardous risks remain, and the Department of Defense would be unable to enter into many supply or construction contracts involving atomic energy systems or weapons, missiles, special propellants, and other projects involving unusually hazardous risks unless it could provide indemnification to its contractors where such unusually hazardous risks were involved. He said that contractors in extrahazardous fields were hesitant about contracting with the Government because of the risk that unexpected accidents in this type of activity might cause them enormous liability and loss and only by assumption of this extra risk, that is, indemnification of such contractors, could Government assure itself of a continuing willingness of defense contractors to participate in such projects. The bill submitted to the Speaker was introduced and carried the number H.R. 4103. It provided that the Secretary of Defense and the secretaries of the military departments would be authorized to enter into agreements of indemnification with contractors and subcontractors of the Department of Defense up to an aggregate obligation of $500 million with respect to any one accident. Indemnification could be provided against liability to third persons including employees of the contractor for death, bodily harm, or loss of or damage to property and loss of or damage to property of the contractor arising from risks which the agreement defines as nuclear or other unusually hazardous risks. Congress took no action with respect to H.R. 4103 and the Defense Department has this year again asked for favorable consideration of such a bill.

I, of course, do not know whether Congress will see fit to pass a bill such as has been suggested by the Department of Defense but I do know that there is at least one area in which prompt action should be taken by Congress. Congress should see to it that the general public and the transportation companies are protected in the event of an accident arising out of the transportation by such carriers of nuclear and other materials which can result in unusually hazardous risks. Obviously, a contractor manufacturing nuclear and other unusually hazardous materials will be doing such manufacturing at a fixed site. That contractor will have full knowledge of the materials he is manufacturing but a transportation company that carries similar materials will, in the normal course of events, have no specific information as to what it is carrying. Further, a manufacturing process carried on at a fixed site obviously permits, to an extent not possible in the area of transportation, establishment of safety practices and precautions designed to reduce the degree of hazard and the possibility of accident. In addition, it is obvious that the general public will be less exposed to an accident involving nuclear or other unusually hazardous materials if those materials are at a fixed site rather than being transported by a carrier. What I mean by that is this: a contractor manufacturing hazardous materials is at one location and the only

portion of the public that could possibly be injured or damaged by an accident involving those materials is that group of people immediately adjacent to the manufacturing plant. On the other hand, when carriers, whether they be trucks, railroads, water carriers, or airlines, transport such hazardous materials, they may carry them for thousands of miles and through many communities, towns, and cities thereby making a much larger portion of the general public exposed to an accident involving such materials. These are the reasons I have introduced a bill that would protect the general public and the transportation companies in the event of accidents resulting from the transportation of such hazardous materials.

I am sure it is well known that transportation companies are now and will in the future be expected to carry nuclear and other materials which involve unusually hazardous risks. It seems clear to me that in order to protect the public and to permit the orderly development, production, and deployment of defense weapons in the interest of the general welfare and the common defense and security the Department of Defense should be given the authority to idemnify the transportation companies in order to limit their liability and to make funds available for the damages suffered by the public as the result of any accident arising out of the dangerous properties of nuclear or other unusually hazardous products or materials. That is precisely what my bill would do. It would define the term "public incident" as meaning any occurrence causing bodily injury, sickness, disease, or death, or loss or damage of property or for loss of use of property arising out of or resulting from the radioactive, toxic, explosive, or other dangerous properties of nuclear or other unusually hazardous products or materials. The Secretary of Defense would define and designate the meaning of the term "nuclear or other unusually hazardous products or materials." The bill would give the Secretary the authority to enter into agreements of indemnification with transportation companies, such indemnification protecting those companies against public liability arising out of or resulting from the occurrence of a "public incident" during the transportation of nuclear or other hazardous materials for the Department of Defense or contractor thereof. The limit of the Government's liability would be in the amount of $500 million for each public incident.

As I have said, the transportation companies of this country are going to transport for the Department of Defense nuclear and other dangerous materials. We are all aware of the so-called Minuteman mobile missile program. It is my firm view that in the event of an accident the public should be protected and the transportation company should be indemnified by the United States. It is my hope that the Committee on Armed Services, to which my bill is being referred, will consider the measure at an early date and take favorable action with respect to it.

The Decatur, Ill., Story

EXTENSION OF REMARKS
OF
HON. WILLIAM L. SPRINGER
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1961

Mr. SPRINGER. Mr. Speaker, this week Look magazine in conjunction with the National Municipal League announced the selection of 10 cities and one county as recipients of this year's All-America Cities awards. The story of the awards, with pictures, will appear in the next issue of Look magazine, to reach the newsstands March 28. The city of Decatur, Macon County, Ill., was awarded the honor of being known as an "All-America City" for 1961. I am proud of Decatur, in the heart of the congressional district I represent. America has grown great and will continue to remain great through individual ingenuity and initiative, self-reliance, and determination, and devotion to community and country. I can think of nowhere where these attributes have been more clearly demonstrated than in the city of Decatur, and I am sure the editors and publishers of Look magazine, and the jury that decided upon the 11 awards from over 100 U.S. cities considered, realized this in making the award to Decatur.

The story of Decatur, the "All-America City" nestled in the Land of Lincoln, is the story of America. It is not only the story of America past and present, but the story of America tomorrow and in all the tomorrows which lie ahead. It is the story of agriculture, of industry, of education, of religious freedom, of culture. It is the story of God-fearing industrious men and women adhering to the high ideals of the past to serve their community in carrying out constructive plans for the physical, spiritual, and cultural advancement of themselves, in their day, and those who have followed after them. And it is the story of the people and leaders of Decatur today following in the same great purposes that those who follow—their children and their children's children and their children—continue to live and work and prosper, in peace.

Perhaps Decatur is a shade more imbued with the high principles that have led America from a hodge podge of 13 Colonies to the world's greatest Nation of 50 States. I say this because the early history of Decatur is intimately a part of the early history of the immortal Lincoln, more than any other man responsible for the might and right of our country, and the spirit of the Great Emancipator has ever been part and parcel of living in this community near the geographic center of Illinois, and today but 100 miles from the center of U.S. population. When one walks the streets of this busy yet friendly city today, one cannot help but feel the impact of its history, the aura of dignity, of majesty humble but real, that is the heritage left by Lincoln.

A tall, gangling young man of 21 brought his ox team to a halt in a muddy clearing surrounded by log cabins, in central Illinois, in March of 1830. This was Lincoln, and the hamlet he had entered was that which has grown into today's city of Decatur, with a population now exceeding 78,000. The spot where Abe then halted is now called Lincoln Square. During the next 30 years, Lincoln became a familiar figure in the area as he and the town grew. And it was in Decatur, in 1860, with Republicans meeting in a tent called the Wigwam, where the city's Millikin Bank now stands, that the railsplitter was first proposed for the Presidency.

But Decatur is not just Abraham Lincoln. Like Abe, the community saw hard times and good times; and like Abe, from the crucible of the changing years, Decatur has emerged strong, resolute, thriving, one whose great purposes augur well for the future not only of itself, its county, its State, but its Nation.

Incorporated as a town in 1836, it now ranks 8th among the cities of Illinois, and 176th in the United States. It ranks 80th in per capita income in the United States and 161st in retail sales. It is a great farm center, the heart of Macon County where farming is big business. Crop production in Macon County is bountiful. Average yields for corn, soybeans, wheat, and oats are above the State averages. Livestock inventories are high and dairy production compares with the best. This is all reflected in the economic pattern of Decatur, the county's chief trade center.

Decatur has its industry, too. While grain milling provides the largest employment, there is heavy employment in metalworking and in the railroad industry. Five railroads serve the city, with a network of over 25,000 miles of track which connect the community with all parts of the country, with division shops where locomotives and freight cars are repaired and rebuilt. The railroads have enabled Decatur manufacturers to develop trade with all parts of the world. Significantly, this has contributed to the growth of the milling and processing plants which depend on the surrounding farmland for soybeans and corn which they turn into hundreds of valuable products, shipped to every corner of the free world's trade, bringing to Decatur the deserved title of "soybean capital of the world."

While Decatur has been growing rapidly during much of its life, it has never forsaken cultural interests. The growth of those things which make life worth while has kept pace. Schools, churches, libraries, recreation facilities, art, drama and music facilities, all these continue to contribute toward making Decatur a more pleasant city in which to live.

Mr. Speaker, too many individuals, too many communities today have forgotten how to think and to act for themselves. Rather do they look toward a paternal Federal Government to think and to act for them. They have lost somewhere the knowledge that the "do-it-yourself" principle is that which has

made and will keep America great. Decatur has never been in this category. The history of this progressive and truly American city speaks for itself, and I submit that history for the Congress and all the country to know.

Before that, however, I want to reiterate that Decatur's citizens of today have not departed from the ways of their forebears. Today's sons follow the example of their forefathers, giving expression to their ambitions and ideals that Decatur remain a busy, livable city and an example to all of America. While adhering to the tried traditions of the past, Decatur does not stand on past accomplishments. It knows that the future, the "great purposes" of tomorrow, can only be one of progress through the meeting and solving of the problems of today.

Today Decatur, as all America, is on the threshold of a new era. There are new industrial and agricultural developments. With these new developments come new responsibilities. I am happy to say that Decatur is facing, and meeting, every responsibility that has come with the past years of its growth, with those of today and those it can foresee in the coming years. Homes are being built, new schools are being built, churches and hospital facilities are being enlarged and new ones built, new factories are going up and additions are being made to many of those that have been long established, improvements are being made in public services, and community and civic problems such as those of water supply, traffic safety, sewage, and others are being met.

Mr. Speaker, we are facing one of the most critical times in our national history. That we may meet the crisis, that we may in solving it, maintain our American system of government and our American way of life. I feel sure that all of our people must reaffirm their faith, rededicate themselves to truly American principles. That this can be accomplished, millions of Americans must be shown the way; they must be told over and over again. And the best way to tell the American story is by example, by the example of Decatur, and her sister cities whose community integrity and devotion, through trial and tribulation, through the long hard pull, have led us from a noble past and, if followed, into an even nobler future.

The path to the fulfillment of "great purposes" and a world at peace is that which Decatur treads and on which in the days ahead must be heard the footsteps of all America.

Yes, Mr. Speaker, Decatur is truly an "All-America City," not just for 1961, for it has been in the past and will continue to be for long years to come.

Mr. Speaker, as quoted in the issue of Look magazine which will carry the All-America Cities Awards, Dr. George H. Gallup, foreman of the All-America Cities jury, states:

> The citations are not given for good government or efficient municipal administration, but rather on the basis of energetic, purposeful citizen effort.

Within this concept, Look magazine says of Decatur, in naming it an All-America City:

> Middle age came early to Decatur. The city's downtown section was traffic clogged. Parking space was scarce. Slums choked the city's choicest sections. Industry grew, but outside city limits. Even worse, water reserves were low.
>
> In 1958, a citizen group campaigned for and won a council-manager government. Later, the reformers elected a mayor and five out of six councilmen. Meanwhile, a $2.5 million street program had been adopted, augmented by State and Federal funds, along with a $5 million plan to raise the reservoir level. Merchants purchased parking sites, and urban-renewal funds were obtained to clear a blighted area of 50 acres. Today, Decatur is a rejuvenated city.

SENATE

MONDAY, MARCH 20, 1961

The Senate met at 12 o'clock meridian, and was called to order by the Vice President.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

God of all grace and glory, unto whom all hearts are open, and from whom no secrets are hid, teach us to pray, for we are keenly conscious that the world in which our common days are spent is poor preparation for communion with Thee. Yet, we need Thee; every hour we need Thee.

We are disturbed by the public menace of our times, burdened by many anxieties, tempted to be cynical because of human evil, and of faint hope because of human folly. We confess that too often we are fretted by small problems and blown off our course by great storms that sweep the earth.

We pray, today, for our divided and violent world, and for ourselves in the midst of it, that we may not increase its dissension by our ill temper and prejudice, but may widen every area of good will our influence can reach.

Give us the strength to carry on, whatever the future may hold, knowing that nothing can befall us as a nation and as individuals that as laborers together with Thee we cannot withstand and master.

So make our hearts strong in the spirit of Christ. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, March 16, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, and withdrawing the nomination of U. Alexis Johnson, to be an Assistant Secretary of State, which nominating messages were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 451. An act to authorize the distribution of copies of the CONGRESSIONAL RECORD to former Members of Congress requesting such copies; and

H.R. 5075. An act to provide temporary extended railroad unemployment insurance benefits, and for other purposes.

The message communicated to the Senate the intelligence of the death of Hon. B. CARROLL REECE, late a Representative from the State of Tennessee, and transmitted the resolutions of the House thereon.

ORDER DISPENSING WITH CALL OF THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the Calendar be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETING DURING SENATE SESSION

On request of Mr. MANSFIELD, and by unanimous consent, the Subcommittee on Housing of the Committee on Banking and Currency was authorized to meet during the session of the Senate today.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

LEGISLATIVE PROGRAM

Mr. KUCHEL. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I am delighted to yield.

Mr. KUCHEL. Will the distinguished majority leader indicate what the program of business today is, and will he

be able to indicate what we may expect during the week?

Mr. MANSFIELD. In response to the question asked by the distinguished acting minority leader, I wish to state that the unfinished business is the so-called educational TV bill, S. 205. There may be some debate on it today, but we shall really get underway with its consideration tomorrow. It is not anticipated that any votes will be taken today.

If the conference report on the feed grains bill is reported to the Senate, it is anticipated that it will be brought up for consideration on tomorrow.

If the Senate is agreeable, it might be possible to consider today Calendar No. 69, House bill 1822, a bill to adjust the amount of funds available for farm operating loans made pursuant to section 21(b) of the Bankhead-Jones Farm Tenant Act, as amended; and Calendar No. 70, Senate bill 1028, a bill to amend the transitional provisions of the act approved August 7, 1959, entitled "Nematocide, Plant Regulator, Defoliant, and Desiccant Amendments of 1959," provided there is no controversy over them. I assure the distinguished Senator that, so far as I am concerned, no votes will be taken today, and Senators can govern themselves accordingly.

APPOINTMENTS BY THE VICE PRESIDENT

The VICE PRESIDENT. Under the authority of Public Law 650 of the 86th Congress, the Chair appoints the following Senators to serve on the United States Constitution One Hundred and Seventy-fifth Anniversary Commission: Senator CLARK, Senator ERVIN, and Senator SCOTT.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

REPORT ON STOCKPILE PROGRAM

A letter from the Director, Office of Civil and Defense Mobilization, Executive Office of the President, transmitting, pursuant to law, a secret report on the stockpile program, for the period ended December 31, 1960 (with an accompanying report); to the Committee on Armed Services.

REPORT OF NATIONAL TRUST FOR HISTORIC PRESERVATION

A letter from the Secretary, National Trust for Historic Preservation, Washington, D.C., transmitting, pursuant to law, a report of that organization, for the calendar year 1960 (with accompanying papers); to the Committee on Interior and Insular Affairs.

REPORT OF CONTRACTUAL ACTIONS TAKEN TO FACILITATE THE NATIONAL DEFENSE

A letter from the Assistant Secretary of Defense (Installations and Logistics), transmitting, pursuant to law, a report on contractual actions taken to facilitate the national defense, for the calendar year 1960 (with accompanying papers); to the Committee on the Judiciary.

REPORT OF ATOMIC ENERGY COMMISSION

A letter from the Assistant General Manager, U.S. Atomic Energy Commission, Washington, D.C., reporting, pursuant to law, that the Commission had no activities to report for the calendar year ended Demember 31, 1960, relating to Public Law 85–804; to the Joint Committee on Atomic Energy.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A resolution of the General Assembly of the State of Rhode Island; to the Committee on the Judiciary:

"HOUSE RESOLUTION 1309

"Resolution memorializing the Congress of the United States to enact legislation which would allow those people who are not able to speak or read English to apply for American citizenship

"Whereas many of our good citizens who have migrated from other lands found refuge in America fleeing from the yoke of tyranny and oppression; and

"Whereas these people have contributed much to the educational, cultural, and economic structure of our country; and

"Whereas the sons and daughters of these people have served bravely and commendably in the military service of their country; and

"Whereas these many people, as a result of economic need were unable to provide for formal education; and

"Whereas the Congress of the United States has recognized this and the Immigration Act provides that those citizens who have been in this country for 20 years and who have attained the age of 50 are eligible to make application for citizenship regardless of their ability to read or write; and

"Whereas these people have an earnest desire to become citizens of the United States: Now, therefore, be it

"Resolved, That the General Assembly of the State of Rhode Island earnestly urge the Congress of the United States to abolish these limitations in the Immigration Act and to enact legislation which would allow those people who are not able to speak or read English to apply for American citizenship; and be it further

"Resolved, That duly certified copies of this resolution be transmitted forthwith by the secretary of state to the Vice President of the United States, to the Speaker of the House of Representatives of the United States, and to each of the Senators and Representatives from Rhode Island in the Congress of the United States, earnestly requesting that each use his best efforts to enact legislation which would carry out the purposes of this resolution."

By Mr. SCHOEPPEL:

A concurrent resolution of the Legislature of the State of Kansas; to the Committee on Public Works:

"HOUSE CONCURRENT RESOLUTION 5

"Concurrent resolution notifying the U.S. Army Chief of Engineers of the desire of the Kansas Legislature relative to water supply features in Milford Reservoir and other authorized reservoir projects

"Whereas the Federal Water Supply Act of 1958 authorizes the inclusion of water supply storage in reservoirs constructed by the Corps of Engineers and the Bureau of Reclamation to meet future needs, provided the Federal Government receives reasonable assurances from the States or their political subdivisions that the water will be needed sometime in the future and that the non-Federal financial obligations for the water supply features will be fulfilled; and

"Whereas the Kansas constitution was amended in 1958 to authorize the State to participate in works for the conservation and development of water resources; and

"Whereas the Kansas Water Resources Board, after thorough deliberation and study, has requested the inclusion of 300,000 acre-feet of water supply storage in the Milford Reservoir on the Republican River, 150,000 acre-feet in Perry Reservoir on the Delaware River, and 34,900 acre-feet in John Redmond Reservoir on the Neosho River to meet future anticipated needs; and

"Whereas the Kansas Water Resources Board has also supported requests by the cities of Independence, Coffeyville, Emporia, and Council Grove for inclusion of water supply features in the Elk City Reservoir on the Elk River and Council Grove Reservoir on the Neosho River; and

"Whereas the U.S. Senate, in its consideration of the public works bill passed by the 86th Congress, recommended that none of the fiscal year 1961 appropriation of $500,000 for Milford Reservoir be used to commence construction until the Chief of Engineers has been furnished a resolution or declaration of policy by the Kansas Legislature recognizing the non-Federal repayment obligation and stating intent to fulfill same at the proper time; and

"Whereas the special report to the 1961 legislature prepared by the Kansas Water Resources Board shows clearly that State assumption of responsibility for obtaining needed conservation storage in Federal reservoirs would be in the best interests of the State of Kansas as a means of making more of the natural water supply available for beneficial future use within the State: Now, therefore, be it

"Resolved by the House of Representatives of the State of Kansas (the Senate concurring therein): That the legislature concurs in the recommendations made by the Kansas Water Resources Board for inclusion of water supply storage in Milford, Perry, and John Redmond Reservoirs, and concurs in the requests made by the cities named in the preamble hereof, which requests have been supported by the Kansas Water Resources Board, for inclusion of water supply in the Elk City and Council Grove projects; and be it further

"Resolved, That the legislature recognizes the non-Federal repayment obligations required relative to the development of water supply features in federally financed projects and does hereby assure the Chief of Engineers that the State or its political subdivisions will fulfill such obligations, prior to the use of the water, as they relate to the above-named projects and as the obligations are described in Public Law 534, 78th Congress (the Flood Control Act of 1944), title III of Public Law 85–500 (the Water Supply Act of 1958), and such acts as may be supplemental or amendatory thereto; and be it further

"Resolved, That the secretary of state is directed to transmit enrolled copies of this resolution to the Chief of Engineers of the U.S. Army Corps of Engineers, each member of the Kansas congressional delegation, the President of the U.S. Senate, the Speaker of the U.S. House of Representatives, the chairmen of the U.S. Senate and House Appropriations Committees, and the Governor of Kansas.

"_____ _____,
"Speaker of the House.
"A. E. ANDERSON,
"Chief Clerk of the House.
"Adopted by the senate March 9, 1961.
"HAROLD M. CHASE,
"President of the Senate.
"RALPH E. ZARKER,
"Secretary of the Senate."

The VICE PRESIDENT laid before the Senate a concurrent resolution of the Legislature of the State of Kansas, identical with the foregoing, which was referred to the Committee on Public Works.

RECREATIONAL FACILITIES IN NORTHERN WISCONSIN—JOINT RESOLUTION OF WISCONSIN LEGISLATURE

Mr. WILEY. Mr. President, the economic crisis confronting the country requires a new look by the people of local, State, and Federal governments for better ways to utilize potential economic resources.

Wisconsin, like other States, is faced with serious problems. The situation is especially acute in our northern areas with unemployment ranging up to 18 percent.

The drastic repercussions of such conditions affect not only the jobless but the economy of whole communities dependent upon the buying power of local people.

In northern Wisconsin, however, we have splendid all-year-round opportunities for recreation.

Currently, these communities, as well as the State government, are trying to find ways to capitalize upon this promising resource. Insofar as it properly can, Uncle Sam, I believe, should lend a hand. The Small Business Administration, as well as other agencies, can, I believe, provide useful assistance to these communities attempting bootstrap operations to improve the economy. Recently, I received a joint resolution adopted by the Wisconsin Legislature on the need for additional Federal help to resolve economic problems. I am bringing this to the attention of the appropriate agencies. In addition, the will of the legislature on this matter deserves the attention of Congress.

I request unanimous consent to have the resolution printed at this point in the RECORD, and appropriately referred.

There being no objection, the joint resolution was referred to the Committee on Banking and Currency, and, under the rule, was ordered to be printed in the RECORD, as follows:

JOINT RESOLUTION 40 A

Joint resolution relating to the need for economic assistance in the winter recreational area of northern Wisconsin

Whereas during the past two decades northern Wisconsin has built a strong reputation as a winter recreational area; and

Whereas during the winter of 1959–60 more than 40,000 people visited a single recreational area in northern Wisconsin; and

Whereas it is estimated that more than a million dollars is expended in that area by visitors during a booming winter season; and

Whereas residents of the northern area have invested thousands of dollars to improve the facilities and attract more visitors; and

Whereas the fickle hand of fortune has, during the current season, disrupted the economic opportunities of the area by shunting all the snow to other parts of the Nation, leaving only a token layer as an attraction to the winter sports enthusiasts; and

Whereas the lack of snow has seriously affected the economic opportunities of those engaged directly in the recreational business and also a larger group of residents who are indirectly concerned: Now, therefore, be it

Resolved by the assembly (the senate concurring), That the legislature recognize that through no fault of their own, the residents of northern Wisconsin have been gravely affected by the peculiarity of the weather, that the snow drought has had as serious consequences to northern Wisconsin as the absence of rain has had to various agricultural areas of this Nation in the past, and that northern Wisconsin is truly in the throes of a disaster; and be it further

Resolved, That the legislature urge the Administrator of the Small Business Administration of the Federal Government to declare the recreational area of northern Wisconsin a disaster area and make available to the residents thereof the financial assistance which is authorized; and, be it further

Resolved, That copies of this resolution be submitted to the Members of the Wisconsin delegation in Congress in order that they may lend their assistance to secure such aid.

D. J. BLANCHARD,
Speaker of the Assembly.
ROBERT G. MAROTZ,
Chief Clerk of the Assembly.
W. D. KNOWLES,
President of the Senate.
LAWRENCE R. LARSEN,
Chief Clerk of the Senate.

ESTABLISHMENT OF A NATIONAL PARKWAY IN UTAH—RESOLUTION

Mr. BENNETT. Mr. President, I present for appropriate reference a resolution adopted by the Five-County Organization of the State of Utah, endorsing the Utah park bill which I introduced some time ago. I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Resolved by the Five-County Organization, an association of county commissioners and other county and city officials and officers of civil groups of the counties of Beaver, Garfield, Iron, Kane, and Washington, in southwestern Utah, in regular meeting assembled, at Cedar City, Utah, this 3d day of March, A.D. 1961, That we heartily endorse U.S. Senate bill S. 808, introduced by Hon. WALLACE F. BENNETT, of Utah, on February 6, 1961, which bill, if enacted, would authorize the Secretary of the Interior to establish a national parkway in the State of Utah; and be it further

Resolved, That we, the officers and members of the Five-County Organization, hereby pledge our full support and effort for said measure; and be it further

Resolved, That a copy of this resolution be spread on the minutes of this association, and that copies of same be sent to the office of Gov. George D. Clyde, the Utah State Road Commission, to the Ogden office of the Bureau of Public Roads, and to each member of the Utah congressional delegation in Washington, D.C., after this resolution has been signed and executed by the officers of this organization.

Done at Cedar City, Utah, this 3d day of March A.D. 1961.

MERRILL R. MACDONALD,
President.

Attest:

D. WAYNE ROSE,
Secretary.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. ROBERTSON, from the Committee on Banking and Currency, without amendment:

S. 712. A bill authorizing the Secretary of the Treasury to coin and sell duplicates in bronze of a gold medal presented to Robert Frost by the President of the United States (Rept. No. 75).

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. JOHNSTON, from the Committee on Post Office and Civil Service:

Richard James Murphy, of Maryland, to be an Assistant Postmaster General; and

Ralph W. Nicholson, of New York, to be an Assistant Postmaster General.

By Mr. JOHNSTON, from the Committee on the Judiciary:

Joseph D. Tydings, of Maryland, to be U.S. attorney for the district of Maryland.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SCHOEPPEL:

S. 1373. A bill for the relief of Giuseppa Lanza Lascuola; to the Committee on the Judiciary.

By Mr. BEALL:

S. 1374. A bill to provide for the advancement on the retired list of certain medical officers of the uniformed services who have served as surgeons general for 5 or more years; to the Committee on Armed Services.

S. 1375. A bill to permit unmarried annuitants under the Civil Service Retirement Act of May 29, 1930, as amended, to elect survivorship annuities upon subsequent marriage; to the Committee on Post Office and Civil Service.

By Mr. BENNETT:

S. 1376. A bill to impose additional individual and corporate income taxes when necessary in order to offset deficits and to provide for systematic reduction of the public debt; to the Committee on Finance.

(See the remarks of Mr. BENNETT when he introduced the above bill, which appear under a separate heading.)

By Mr. BRIDGES:

S. 1377. A bill to authorize the award posthumously of an appropriate medal to Dr. Thomas A. Dooley III; to the Committee on Banking and Currency.

(See the remarks of Mr. BRIDGES when he introduced the above bill, which appear under a separate heading.)

By Mr. BARTLETT:

S. 1378. A bill to provide for transferring from the Secretary of the Navy to the Secretary of the Interior jurisdiction over lands of the United States within the boundaries of Naval Petroleum Reserve No. 4, and abolishing such naval petroleum reserve; to the Committee on Armed Services.

(See the remarks of Mr. BARTLETT when he introduced the above bill, which appear under a separate heading.)

By Mr. SPARKMAN (for himself, Mr. JAVITS, Mr. LONG of Louisiana, Mr. HUMPHREY, Mr. SMATHERS, Mr. MORSE, Mr. BIBLE, Mr. RANDOLPH, Mr. ENGLE, Mr. BARTLETT, Mr. WILLIAMS of New Jersey, Mr. MOSS, Mr. SALTONSTALL, Mr. SCHOEPPEL, Mr. COOPER, Mr. SCOTT, Mr. PROUTY, Mr. CASE of New Jersey, and Mr. KEATING):

S. 1379. A bill to encourage and promote the expansion through private enterprise of domestic exports in world markets; to the Committee on Banking and Currency.

(See the remarks of Mr. SPARKMAN when he introduced the above bill, which appear under a separate heading.)

By Mr. KEATING (for himself and Mr. HARTKE):

S. 1380. A bill to amend section 801 of the act entitled "An act to establish a code of

law for the District of Columbia," approved March 3, 1901; to the Committee on the District of Columbia.

(See the remarks of Mr. KEATING when he introduced the above bill, which appear under a separate heading.)

By Mr. SYMINGTON (for himself and Mr. LONG of Missouri):

S. 1381. A bill to authorize the establishment and development of the Ozark Rivers National Monument in the State of Missouri, and for other purposes; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. SYMINGTON when he introduced the above bill, which appear under a separate heading.)

By Mr. JOHNSTON (by request):

S. 1382. A bill to correct the inequities of the Postal Field Service Compensation Act of 1955; to the Committee on Post Office and Civil Service.

By Mr. KEATING:

S. 1383. A bill to amend section 1073 of title 18, United States Code, the Fugitive Felon Act;

S. 1384. A bill to amend section 3731 of title 18 of the United States Code relating to appeals by the United States;

S. 1385. A bill to amend section 1621 of title 18 of the United States Code to provide for degrees of perjury and for other purposes; and

S. 1386. A bill to amend section 3486(c) of title 18, United States Code; to the Committee on the Judiciary.

(See the remarks of Mr. KEATING when he introduced the above bills, which appear under a separate heading.)

By Mr. MORSE:

S. 1387. A bill to amend section 8(b)(4) of the National Labor Relations Act, as amended; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

RESOLUTIONS

AMENDMENT OF RULE XXV, TO CREATE A STANDING COMMITTEE ON VETERANS' AFFAIRS

Mr. SCHOEPPEL (for himself, Mr. BRIDGES, and Mr. WILLIAMS of Delaware) submitted the following resolution (S. Res. 110), which was referred to the Committee on Rules and Administration:

Resolved, That rule XXV of the Standing Rules of the Senate (relating to standing committees) is amended by—

(1) striking out parts 10 through 13 in subparagraph (h) of paragraph (1);

(2) striking out parts 16 through 19 in subparagraph (1) of paragraph (1); and

(3) inserting in paragraph (1) after subparagraph (p) the following new subparagraph:

"(q) Committee on Veterans' Affairs, to consist of thirteen Senators, five who are also members of the Committee on Finance, four who are also members of the Committee on Armed Services, and four who are also members of the Committee on Labor and Public Welfare. All proposed legislation, messages, petitions, memorials, and other matters relating to the following subjects shall be referred to the Committee on Veterans' Affairs:

"1. Veterans' measures, generally.

"2. Pensions of all wars of the United States, general and special.

"3. Life insurance issued by the Government on account of service in the Armed Forces.

"4. Compensation of veterans.

"5. Vocational rehabilitation and education of veterans.

"6. Veterans' hospitals, medical care, and treatment of veterans.

"7. Soldiers' and sailors' civil relief.

"8. Readjustment of servicemen to civil life."

SEC. 2. Paragraph 4 of rule XXV of the Standing Rules of the Senate is amended by striking out "and Committee on Aeronautical and Space Sciences" and inserting in lieu thereof "Committee on Aeronautical and Space Sciences, and Committee on Veterans' Affairs".

SEC. 3. The Committee on Veterans' Affairs shall as promptly as feasible after its appointment and organization confer with the Committee on Finance and the Committee on Labor and Public Welfare for the purpose of determining what disposition should be made of proposed legislation, messages, petitions, memorials, and other matters theretofore referred to the Committee on Finance and the Committee on Labor and Public Welfare during the Eighty-seventh Congress which are within the jurisdiction of the Committee on Veterans' Affairs.

ENLARGEMENT OF MEMBERSHIP OF SPECIAL COMMITTEE ON AGING

Mr. MANSFIELD submitted the following resolution (S. Res. 111), which was referred to the Committee on Rules and Administration:

Resolved, That the first section of S. Res. 33, Eighty-seventh Congress, agreed to February 13, 1961, is amended (1) by striking out "nine" and inserting in lieu thereof "twenty-one", (2) by striking out "six" and inserting in lieu thereof "fourteen", and (3) by striking out "three" and inserting in lieu thereof "seven".

DEATH OF THE LATE REPRESENTATIVE B. CARROLL REECE, OF TENNESSEE

Mr. MANSFIELD (for Mr. KEFAUVER and Mr. GORE) submitted a resolution (S. Res. 112) relative to the death of the late Representative B. CARROLL REECE, of Tennessee, which was considered and agreed to.

(See the above resolution printed in full when submitted by Mr. MANSFIELD, which appears under a separate heading.)

TAX ADJUSTMENT AND DEBT RETIREMENT ACT OF 1961

Mr. BENNETT. Mr. President, I introduce a bill called "The Tax Adjustment and Debt Retirement Act of 1961."

The purpose of the bill is to provide a practical, self-enforcing method by which the Federal debt may be reduced at a steady rate of at least $3 billion per year in normal peacetime years.

The practical operation of the bill will be to stimulate demands at the grassroots level for fiscal restraint by Congress. Otherwise, the constituents of our national lawmakers will be faced with increased tax burdens—not at some indefinite future time, but now. If a deficit seems likely with a tax increase sure to result, pressure on Congress to prevent or minimize it can be very effective. This is the kind of discipline we often need.

The basic idea behind the bill is simple. It sets as the goal of our fiscal policy not merely a balanced budget, but an annual surplus of $3 billion; and if in any fiscal year we fail to meet that goal, it provides for special 1-year additional personal and corporate income taxes in an amount necessary to make up the difference.

The pattern of the determination and imposition of the tax is also simple, and grows out of the relation of the Federal fiscal year to the calendar year. The existence and amount of any deficit below the desired surplus of $3 billion can be determined soon after July 1, and the amount of the special tax can then be calculated and collected with other taxes due the following April for the taxable year which began, in most cases, with the preceding January. In the case of corporations and individuals with taxable years other than the calendar year, the makeup tax would be payable when the regular income taxes are payable.

In order to calculate this new tax and distribute its burden fairly among all taxpayers, the bill provides that the amount needed to make up the deficit in any fiscal year shall be calculated and announced by the Treasury as a percentage of the total collections from personal and corporate taxes in that same fiscal year.

Of course, the amount thus calculated would never exactly match the previous deficit, because of the difference of the end of the Government's fiscal year and the taxable year of most taxpayers, and because of swings in income. But since our economy is growing, it would tend to exceed the deficit slightly over a span of years. This is good, because any excess would automatically reduce the debt that much more, and this is our essential purpose anyway.

To provide a simple and practical way in which each taxpayer can figure his own 1-year tax, the bill would apply the official percentage to the next tax due as figured under present law. Two extra lines could be added to the tax forms—one showing the percentage to be used for that year with space for the resulting dollar figure of new tax, and on the other the final total of the regular tax plus the 1-year special makeup tax would be shown.

If such a plan were adopted, there would be no need to change the present law with respect to rates, exemptions, exclusions, requirements for withholding, or the present ceiling on the effective rate of tax on a persons' total income—currently 87 percent—and, therefore, no changes in the body of rulings and regulations would be required. Nor would the cost of examination or verification of returns be materially increased.

Another feature of the bill is that it provides for a limit to the makeup tax of 10 percent in any one year, so that if we ever have another large deficit year like fiscal 1959, its effects can be spread forward for a few years and not concentrated into one.

I realize that there are potential variations of the application of this idea which the committees of the House and Senate might like to study, and there may be times when the automatic imposition of the makeup tax would be unwise. Obviously, I have not attempted

to write these into the bill, but such as have occurred to me might well be briefly stated here.

One obvious type of variation might be in the target itself. At the minimum, the target of the bill might be set merely to create a balanced budget with no surplus to apply on the debt. The variations above that point are unlimited. One would be to authorize automatic tax reductions equivalent to the amount of any surplus above $3 billion. I selected the figure of $3 billion because it is slightly more than 1 percent of the debt, though even at this rate it will require at least 96 years of such a surplus to pay off the present debt, to say nothing of the stretchout that will be caused by inevitable additions to the deficit in years of war, or in sterile years when for one reason or another it seems wise to suspend the plan. In war years deficits are probably inevitable, and in recession years they are probably desirable. The bill provides that Congress can suspend the program for any year by an affirmative act signed by the President.

To look at this another way, the fifth generation of our descendants, our great-great-great-grandchildren, would still be paying on this debt, even if there were no additional deficits.

The need for some such program is evident when we look at the record of the past 30 years. In that time we have had only 6 surplus years. In the prewar decade of the thirties, we had a deficit every year, at an average of $3 billion per year. In the post World War II years, our deficits have exceeded our surpluses by a total of $17.5 billion, or an average of $1¼ billion per year. Moreover, never once in this time have we balanced the budget over a business cycle. If we can reverse the process, and pay off $3 billion per year, it will take 5½ years to pay for the debt which had accumulated up to the 1930's, 11 years to pay for the deficits of the thirties up to the World War II, 6 years to pay for our excess spending since 1946. The wartime deficits will require 73 years to repay.

It is encouraging to realize that both Members of Congress and the folks back home are becoming increasingly concerned with our national debt, and are beginning to try to do something about it. In the last Congress 50 bills were introduced, and already this year 27 bills have been introduced whose purpose is to provide a program to reduce the debt. Unfortunately, none of the ideas in these bills are self-enforcing and, therefore, the proposals are little more than expressions of pious hope.

My bill seeks to put a positive force behind the proposal. Either Congress resists excessive spending or its constituents must pay the consequences in higher taxes. The potential effects of this are obvious.

No legal device can ever be a complete substitute for self-control and no program can long operate without support at every level. Debt reduction at a steady rate must become a definite national policy. The President's budget must be planned to produce the necessary annual surplus. Congress must regard it as an obligation to be met by providing adequate revenue by wise taxation, by control of appropriations, and by restraint in legislation creating new programs which require new spending. Most of all, the American people must discipline themselves as to their demands on government and must impose similar discipline on every unit and function of government.

I hope the ideas contained in this bill can prove to be useful steps in that direction and they are offered in that spirit.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 1376) to impose additional individual and corporate income taxes when necessary in order to offset deficits and to provide for systematic reduction of the public debt, introduced by Mr. BENNETT, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Income Tax Adjustment and Debt Reduction Act of 1961".

TITLE I—DETERMINATION OF ADDITIONAL INCOME TAXES

SEC. 101. (a) The Secretary of the Treasury shall, on or before September 1 of each year, beginning with 1961, determine—

(1) the amount of the annual surplus (as defined in subsection (b)) or of the annual deficit (as defined in subsection (c)) for the fiscal year which ended on June 30 of such year;

(2) the total amount of revenue collected during such fiscal year from all taxes imposed by chapter 1 of the Internal Revenue Code of 1954 (other than the taxes imposed by sections 5 and 12 of such Code); and

(3) the percentage which the annual deficit for such fiscal year is of the total amount of revenue described in paragraph (2).

(b) For purposes of subsection (a), the annual surplus for any fiscal year is the amount (if any) by which—

(1) the total receipts of the Government during such fiscal year (other than revenue collected from the taxes imposed by sections 5 and 12 of the Internal Revenue Code of 1954), exceeded

(2) the total expenditures of the Government during such fiscal year, plus $3,000,000,000.

(c) For purposes of subsection (a), the annual deficit for any fiscal year is the amount (if any) by which—

(1) the total expenditures of the Government during such fiscal year, plus $3,000,000,000, exceeded

(2) the total receipts of the Government during such fiscal year (other than revenue collected from the taxes imposed by sections 5 and 12 of the Internal Revenue Code of 1954).

(d) If the annual deficit for any fiscal year exceeds an amount equal to 10 percent of the total amount of revenue collected during such fiscal year from all taxes imposed by chapter 1 of the Internal Revenue Code of 1954 (other than the taxes imposed by sections 5 and 12 of such Code), then—

(1) for purposes of subsection (a)(3), the annual deficit for such fiscal year shall be treated as an amount equal to 10 percent of the total amount of revenue so collected, and

(2) for purposes of subsections (b) and (c), the amount of such excess shall be taken into account as an expenditure for the fiscal year following such fiscal year.

SEC. 102. The percentage determined under section 101 (a)(3) for any fiscal year, or if applicable, the percentage prescribed under section 101(d) for such fiscal year, shall be the rate of tax to be imposed under sections 5 and 12 of the Internal Revenue Code of 1954 for the taxable year in which such fiscal year ended.

TITLE II—IMPOSITION OF ADDITIONAL INCOME TAXES

SEC. 201. (a) Part I of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to tax on individuals) is amended by redesignating section 5 as 6, and by inserting after section 4 the following new section:

"SEC. 5. ADDITIONAL TAX IMPOSED.

"There is hereby imposed, with respect to the taxable income of each individual, for each taxable year in which ends a fiscal year in which there is an annual deficit as determined under section 101 of the Income Tax Adjustment and Debt Reduction Act of 1961, a tax equal to the percentage prescribed by section 102 of such Act for such taxable year of the amount of the tax imposed by this chapter (without regard to this section) on the taxable income of each such individual."

(b) The table of sections for such part is amended by striking out

"Sec. 5. Cross references relating to tax on individuals."

and inserting in lieu thereof

"Sec. 5. Additional tax imposed.

"Sec. 6. Cross references relating to tax on individuals."

(c) Section 6015(c) of the Internal Revenue Code of 1954 (relating to declaration of estimated income tax by individuals) is amended by inserting after "imposed by chapter 1" the following "(not including the tax imposed by section 5)".

SEC. 202. (a) Part II of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to tax on corporations) is amended by redesignating section 12 as 13, and by inserting after section 11 the following new section:

"SEC. 12. ADDITIONAL TAX IMPOSED.

"There is hereby imposed, with respect to the taxable income (or its equivalent) of each corporation, for each taxable year in which ends a fiscal year in which there is an annual deficit as determined under section 101 of the Income Tax Adjustment and Debt Reduction Act of 1961, a tax equal to the percentage prescribed by section 102 of such Act for such taxable year of the amount of the tax imposed by this chapter (without regard to this section) on the taxable income (or its equivalent) of each such corporation."

(b) The table of sections for such part is amended by striking out

"Sec. 12. Cross references relating to tax on corporations."

and inserting in lieu thereof

"Sec. 12. Additional tax imposed.

"Sec. 13. Cross references relating to tax on corporations."

SEC. 203. The Congress reserves the power to suspend, by appropriate action, the application of sections 5 and 12 of the Internal Revenue Code of 1954 (as added by sections 201 and 202 of this Act) with respect to any taxable year.

POSTHUMOUS AWARD OF MEDAL AND CERTIFICATE TO DR. THOMAS A. DOOLEY III

Mr. BRIDGES. Mr. President, I introduce, for appropriate reference, a bill to authorize the President to award posthumously an appropriate medal and certificate to Dr. Thomas A. Dooley III.

The outstanding work of this fine young American physician is so well known that it is unnecessary for me to make any lengthy remarks at this time in support of the bill.

I feel certain that any Member of Congress who has had the pleasure of meeting Dr. Dooley, as I have, would support this measure with enthusiasm. During his lifetime he brought to the peoples of many underdeveloped countries, and principally to those disease ridden persons in the jungles of Laos, an image of a kind and merciful America.

It is fairly well known that Dr. Dooley conducted this work with full knowledge of the probable consequences to his own health. As a result, death came to him last January at the age of 34.

Mr. President, I submit that the recognition of Dr. Dooley's selfless devotion to his fellow man provided by this bill is worthy of expeditious and favorable consideration.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1377) to authorize the award posthumously of an appropriate medal to Dr. Thomas A. Dooley III, introduced by Mr. BRIDGES, was received, read twice by its title, and referred to the Committee on Banking and Currency.

TRANSFER OF JURISDICTION OVER NAVAL PETROLEUM RESERVE NO. 4

Mr. BARTLETT. Mr. President, I introduce, for appropriate reference, a bill to transfer from the Department of the Navy to the Department of the Interior jurisdiction over the public land area within the boundaries of Naval Petroleum Reserve No. 4.

Pet 4, which is the short name for this withdrawal of northwestern Alaska lands, has been continuously reserved from all forms of public entry since 1923. Ordered withdrawn by President Harding, the area remained virtually unexplored until the last 2 years of World War II. Between 1944 and 1953 approximately $50 million was spent to develop the area by the Department of the Navy. As a result of naval efforts no commercial deposits of oil and gas were discovered.

In recent years there has been no important effort to renew military exploration of the petroleum reserve. To the contrary, the Department of Defense has expressed a desire to relinquish control of the area in order to allow further exploration through private investment by the oil industry.

During the last session of Congress I introduced proposed legislation similar to that which I offer today. Although there was no Senate action on my bill, S. 434, the Armed Services Committee was informed that the Department of Defense favored its enactment. The departmental report stated in part:

> Naval Petroleum Reserve No. 4 is located on the Arctic coast of Alaska in the area surrounding Point Barrow. Extremely difficult conditions of weather and terrain prevail in this region. Test drillings have been conducted in the reserve by the Department of the Navy at considerable expense, but no oil or gas pools of commercial value were located. However, these tests in no respect disprove the potential of the area for oil and gas. If the area were opened for leasing, a commercially integrated industry might eventually be created in northern Alaska. The availability of supply from an active oil industry in this area would be of value to the military departments.

The Armed Services Committee also received reports from the Office of Civil and Defense Mobilization and the Department of the Interior. Neither of these reports raised any objection to the enactment of S. 434, but certain changes were suggested by the Interior Department. Some of the Interior Department recommendations are incorporated in the language of the bill I now introduce.

Mr. President, when I introduced S. 434 on January 17, 1959, I briefly summarized the history of Naval Petroleum Reserve No. 4. In order to make this summary readily available to the Senate I ask unanimous consent that my introductory statement be reprinted in the RECORD immediately following my remarks.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the remarks will be printed in the RECORD.

The bill (S. 1378) to provide for transferring from the Secretary of the Navy to the Secretary of the Interior jurisdiction over lands of the United States within the boundaries of Naval Petroleum Reserve No. 4, and abolishing such naval petroleum reserve, introduced by Mr. BARTLETT, was received, read twice by its title, and referred to the Committee on Armed Services.

The remarks presented by Mr. BARTLETT are as follows:

TRANSFER OF JURISDICTION OVER LANDS WITHIN NAVAL PETROLEUM RESERVE NO. 4

Mr. BARTLETT. Mr. President, I introduce, for appropriate reference, a bill for the purpose of turning back to the public lands of the United States a vast area in Alaska now withdrawn and set apart as a naval petroleum reserve.

This withdrawal, known as Naval Petroleum Reserve No. 4—Pet 4, for short—was set aside by President Harding by Executive Order No. 3797–A on February 27, 1923, at a time when his administration was under a searching investigation by a committee of this body for its handling of the then existing naval petroleum reserves. These are the Elk Hills reserve—Naval Petroleum Reserve No. 1—and the Buena Vista Hills reserve—Naval Petroleum Reserve No. 2—both in California, and Teapot Dome—Naval Petroleum Reserve No. 3—in Wyoming.

Criticism of the administration's action in leasing the California and Wyoming reserves obviously was responsible for setting aside of the Alaska reserve which embraces some 37,000 square miles in the great basin lying north of the Brooks Range and extending from the crest of the mountains on the south to the Arctic Ocean on the north and from the Colville River on the east to approximately the 162d meridian of longitude on the west. Point Barrow, the northernmost point of land in Alaska and Barrow Village, the northernmost inhabited settlement in the United States, is approximately in the center of the northern boundary of the reserve.

When set aside in 1923 virtually nothing was known of the geology of the region or of the lithology of the sediments and a great part of the lands had never been explored. The only evidence of the presence of oil or gas was a single seepage near Cape Simpson, where a small amount of oil seeped from a hummock of ice and ran down to cover a small lake with a scum of oil.

I am further advised that in the opinion of informed persons in the Department of the Navy the area is not suitable under present day conditions for a naval petroleum reserve, even if large quantities of oil were known to exist there, primarily because of its location, climate, lack of transportation, and the great expense of exploration and development. In view of the high costs involved it would not be practicable to drill a large number of wells in a proven field in this region and maintain them in a standby status pending potential future need as has been done in the Elk Hills reserve. In Elk Hills, I am told, the Navy by merely turning the valves on suspended wells can turn into the existing pipelines to refineries at San Francisco and Los Angeles in excess of 150,000 barrels daily of additional oil whenever the Congress by joint resolution authorizes its production. This is a real and valuable reserve for the military.

It is well known that the Navy, from 1944 to 1953, endeavored to determine the potential value of its portion of this vast sedimentary basin lying north of the Brooks Range—Pet 4—and expended nearly $50 million in exploration for oil. After drilling 36 test wells and 40 core holes the Navy suspended operations and although no large oilfields were discovered, this meager amount of drilling in an area so large did not disprove the possible existence of large oil and gas fields in the many mammoth geologic structures disclosed by both its geological and geophysical exploration. The Navy did determine the presence of both oil and gas in this geologic basin in which the sediments exceed 20,000 feet in thickness in the deeper parts. Due to budget limitations the Department of the Navy is reluctant to supply funds from naval appropriations for the further development of its naval petroleum reserves and neither the Navy or the Congress has, at this time, any plans for further exploration or use of the lands in this petroleum reserve. A naval petroleum reserve to be of use in time of emergency must be fully developed and ready, as is the Elk Hills reserve, in order to serve its purpose. To hold a vast tract of land, such as that covered by this bill, idle and unused constitutes a waste and serves no useful purpose to the Government.

At the present time there is a great interest by the petroleum industry in the petroleum possibilities of several large sedimentary basins known to exist in Alaska and large areas in each have been leased for oil and gas exploration. Private interests appear now to be interested in the Barrow Basin and ready to carry on the work of exploration so ably begun by the Navy.

The Alaska Petroleum & Gas Co., Inc., has recently obtained leases on the Gubik gas structure, a structure in which the Navy indicated commercial gas reserves may be developed. If further drilling proves that adequate gas reserves exist in the Gubik structure, a gasline will be built to furnish gas to Fairbanks, including the military installations in the area, with the result that great savings can be made in the present fuel costs in the area, both by civilians and the military. High cost of fuel is one of the principal reasons for high costs of living in Alaska, and particularly in the Arctic regions.

At the present time the only region in Alaska which enjoys the use of natural gas for fuel is at Point Barrow, where the Navy discovered the small South Barrow field, which supplies gas to its camp and to other Government installations in the area.

Drilling in this field has not been sufficient to determine accurately the gas reserves.

On the Umiat structure, some 25 miles southwest of the Gubik structure, the Navy found a field of high gravity oil at shallow depth. While the five productive wells drilled in this field did not produce oil in quantities sufficient to warrant its development as a naval reserve, it may well be that further drilling would develop enough oil to warrant laying a pipeline to Fairbanks—particularly if it could be constructed in connection with a gasline from the Gubik field.

This bill is very important to the people of the new State of Alaska, and when passed and approved will enable the petroleum industry to take over and continue the exploration started by Navy. It will enable private interests to develop that part of the Gubik structure within Pet 4 which cannot now be leased and developed; it will permit further exploration of the South Barrow gesfield to the end that it may be possible to furnish gas therefrom to the citizens of Barrow Village and adjacent thereto; it will permit the industry to utilize fully the vast amount of information developed by the Navy in a further search for oil north of the Brooks range. This bill is important to the future economy of the State of Alaska and any oil or gas discoveries made in the region it will open up will add to both the resources of the State and the United States.

In closing my remarks, I want to call the attention of the Senate to a bill, H.R. 298, recently introduced by the Honorable CARL VINSON, chairman of the Committee on Armed Services of the House, which has for its purpose establishment of Naval Petroleum Reserve No. 5 by setting aside for the Navy the islands of San Nicolas, San Miguel, and Prince lying off the coast of southern California. These islands, if found productive of petroleum, can be developed at a reasonable cost and will be far better suited for an oil reserve for the military than is the area which is covered by the bill. Should the bill H.R. 298 ever come before this body for its consideration it will be strongly supported by me and will have my vote.

ENCOURAGEMENT OF EXPORTS BY SMALL BUSINESS

Mr. SPARKMAN. Mr. President, I introduce, for appropriate reference, on behalf of all of the members of the Senate Small Business Committee, a bill designed to encourage and expand the participation of American small business in exporting. This bill is intended to meet and, we hope, solve some of the problems that were presented to the committee at its hearings on "Small Business Exports and the World Market." Those hearings were held last November and December in New York, New Orleans, and San Francisco. I expect to have the privilege of filing the committee's report on its study of small business exports within the next few days.

The bill I am introducing today implements several recommendations that are contained in the draft report now nearing final approval of the full Small Business Committee. It is an amended and amplified version of S. 852, the National Export Policy Act, which was introduced on February 9, 1961, by the committee's distinguished member from the State of New York [Mr. JAVITS]. The present bill, which I think may fairly be called the committee's bill, since all of our 17 members are cosponsors, adds important small business provisions to the proposals for export promotion that were contained in the earlier Javits bill. The Senator from New York [Mr. JAVITS], who served with Senator WILLIAMS of New Jersey as cochairman of the committee's hearings in New York City on November 17, 1960, has welcomed the additions the committee has made to this legislation, and certainly the committee is much indebted to him for the leadership and scholarship that he has given to our work in this important area.

The suggestion made most frequently by the witnesses who testified at the committee's hearings in the Nation's three greatest ports last year was for an improved and expanded program of export credit guarantees, competitive in all respects with the guarantee programs available to exporters of other great trading nations, our competitors in the world market, from their governments, or from private enterprise. Accordingly, the committee's bill will authorize and encourage the Export-Import Bank of Washington to add important new kinds of coverage, including short-term commercial risk guarantees, to its export-credit-guarantee program. I am personally persuaded that the Bank has the statutory authority now to set up the improved and expanded export credit guarantee facilities contemplated by this bill, and it is my hope that it will not await the passage of new legislation to exercise the authority. But the Export Policy Act will make unmistakably clear for all time that Congress intends for the Export-Import Bank to provide this country's exporters with export credit guarantees, against both commercial and political risks in both short- and medium-term transactions, which are competitive in all regards with the best of the foreign credit guarantee facilities.

Second, the bill would establish within the Small Business Administration a new division, the Foreign Trade Division, to be headed by a Deputy Administrator. This provision of the bill is the principal substantive addition to S. 852 made at my suggestion and with the assistance of the Small Business Committee. A Foreign Trade Division in SBA, the small businessman's own agency, would be an invaluable aid, in my opinion, in the urgent job of expanding American exports by expanding the number of American exporters. The division could render explicit services to the small businessman newly entering or considering the entry of foreign markets. In addition, the bill would authorize the Administrator of SBA, through the Deputy Administrator for the Foreign Trade Division, to represent the interests of the small and independent businesses of the United States on interagency committees and at international trade negotiations.

Thirdly, the National Export Policy Act of 1961 would authorize and direct the Department of State to undertake market surveys and other commercial research in foreign countries and to disseminate the information gained thereby to American businesses; to insert institutional advertising for American exports, general and specific, in foreign media; and, in cooperation with the Department of Commerce, to set up U.S. trade information centers at permanent and temporary trade fairs in other countries.

Fourth, the committee's bill would authorize and direct the Department of Commerce to expand export services in its field offices and increase the number of field offices; to insert export promotion advertising in American media; to set up, in cooperation with the State Department, permanent trade centers abroad for the exhibition of U.S. goods; to build warehouses and other support facilities abroad in aid of American exporters; and to increase the number of trade missions sent abroad annually.

Fifth, the bill would create a Council for Export Promotion, made up of sub-Cabinet officers and heads of independent Federal agencies, including the Small Business Administration, to coordinate governmental export services.

And finally, the National Export Policy Act would create an Advisory Committee on Export Promotion, made up of representatives of various sectors of the private business community, to consult with and advise the Council for Export Promotion.

Hence, it will be seen that the bill would expand and accelerate export promotion services on several fronts—by setting up new or expanded programs in the Export-Import Bank, the Small Business Administration, and the Departments of State and Commerce, programs which will benefit small business and all business. In addition, it seeks improved coordination of Government programs through the proposed interagency Council for Export Promotion, which would carry on the work and carry out some of the recommendations of the Interagency Export Promotion Task Force of the last administration. And finally, the bill seeks to keep the entire program close to the needs and desires of the business community through the Advisory Committee.

Within a very few days I expect to file for the committee a report on our study of "Small Business Exports and the World Market." In that document will be found recommendations and conclusions bearing upon the problems with which the bill I am introducing today is concerned. There will also be other recommendations which may furnish a basis for later legislation.

I am proud to announce that every member of the Small Business Committee is cosponsoring this legislation: Senators JAVITS, LONG, HUMPHREY, SMATHERS, MORSE, BIBLE, RANDOLPH, ENGLE, BARTLETT, WILLIAMS of New Jersey, MOSS, SALTONSTALL, SCHOEPPEL, COOPER, SCOTT, and PROUTY.

In addition to committee members, these Senators are on the bill: Senators CASE of New Jersey and KEATING.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at the conclusion of my remarks and those of other Senators concerning the bill.

I also ask that remarks by the Senator from New York [Mr. JAVITS] on this bill be printed in the RECORD, as well as a section-by-section analysis of the legislation.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the text of the bill, together with the remarks of the Senator from New York [Mr. JAVITS] and a section-by-section analysis of the bill, will be printed in the RECORD.

The bill (S. 1379) to encourage and promote the expansion through private enterprise of domestic exports in world markets, introduced by Mr. SPARKMAN (for himself and Senators JAVITS, LONG of Louisiana, HUMPHREY, SMATHERS, MORSE, BIBLE, RANDOLPH, ENGLE, BARTLETT, WILLIAMS of New Jersey, MOSS, SALTONSTALL, SCHOEPPEL, COOPER, SCOTT, PROUTY, CASE of New Jersey, and KEATING), was received, read twice by its title, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Export Policy Act of 1961."

POLICY AND PURPOSE

SEC. 2. The Congress finds and declares that foreign trade represents a strong and vital element in the economic leadership of the United States in the free world. Further, the expansion of exports by and through private enterprise is the most effective and positive answer to the current balance of payments deficit experienced by the United States, and is assuming increasing importance to the economic welfare of this Nation. The largest potential for the rapid expansion of exports resides in opening to smaller manufacturers and businessmen in the United States the great opportunities which exist in foreign markets for United States products and services. It is the purpose of this Act to provide a coordinated and augmented program of Government action to assist United States manufacturers and businessmen to recognize and to develop export markets.

COUNCIL FOR EXPORT PROMOTION

SEC. 3. (a) There is hereby established a Council for Export Promotion (hereinafter referred to as the "Council") which shall consist of the following members, all ex officio: The Under Secretary of Commerce, who shall serve as Chairman of the Council; the Under Secretary of State; the Under Secretary of Agriculture; the Under Secretary of the Treasury; the President of the Export-Import Bank of Washington; the Director of the International Cooperation Administration; the Chairman of the Council of Economic Advisers; and the Administrator of the Small Business Administration.

(b) The Council shall appoint an Advisory Committee on Export Promotion which shall consist of nine members as follows: Two members who are representative of manufacturing industry; two members who are representative of the field of export operations; two members who are experts in international economics and business administration; one member who is representative of the field of banking and finance; one member who is representative of labor; and one member who is representative of agriculture. From the members appointed to such committee the Council shall designate a chairman. Such committee shall meet at the call of the chairman, and shall, from time to time, make recommendations to the Council relative to the carrying out of its duties under this section. The members of such committee shall receive no compensation by reason of their service on the committee, but, while away from their homes or regular places of business may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b–2) for persons in the Government service intermittently.

(c) It shall be the duty and function of the Council—

(1) to coordinate the export services provided to domestic concerns by the various departments and agencies of the Government which are engaged in the promotion of the export trade of the United States, and to promote the speedy and direct extension of the services of such departments and agencies to domestic concerns engaged in the export trade;

(2) to provide for the implementation of pertinent recommendations of the interagency export promotion task force established in 1959, and to review, revise, and augment such recommendations from time to time in the light of changing conditions and needs; and

(3) to undertake a study of the services provided by the Government which are designed to assist or encourage export operations of United States businessmen and manufacturers. For the purpose of carrying out such study the Council may contract with such private groups or organizations as it shall determine without regard to section 3709 of the Revised Statutes of the United States (41 U.S.C. 5) or any other provision of law requiring competitive bidding. Such study shall include specific recommendations for such legislative and administratoive action as may be deemed necessary in furtherance of the policy and purposes of this Act.

(d) The Council is authorized to utilize the facilities, information, and personnel of the departments and agencies of the executive branch of the Government which it deems necessary to carry out its duties under this Act; and each such department and agency is authorized to furnish such facilities, information, and personnel to the Council upon request made by the Chairman.

(e) The Council shall make a report to the Congress, not later than January 31 of each year, on its operations under this section setting forth therein such recommendations as it deems advisable in furtherance of the purpose of this Act.

AMENDMENT TO EXPORT-IMPORT BANK ACT OF 1945

SEC. 4. Section 2 of the Export-Import Bank Act of 1945, as amended (12 U.S.C. 635), is amended by adding at the end thereof a new subsection as follows:

"(d)(1) In furtherance of the policy and purpose of the National Export Policy Act of 1961, the Export-Import Bank of Washington is authorized, in addition to and not in replacement of any other authority conferred by this Act, to guarantee, in the manner and to the extent herein specified, the payment of money due residents of the United States (including corporations, partnerships, and associations organized under the laws of the United States or of any State) from foreign customers for the export-sale of goods or commodities.

"(2) Guarantees under this subsection may be made directly or in participation with others, on such terms and conditions as the Board of Directors of the Bank shall prescribe, subject to the following conditions:

"(A) the person or firm in whose behalf the guarantee is made shall retain a substantial interest (as determined by the Board) in the discourse by his foreign customer of the terms of the contract of sale;

"(B) guaranteeing against the risk of nonpayment by reason of (i) the imposition by a foreign government of an exchange block or other exchange control, or (ii) war, hostilities, rebellion, or civil commotion, preventing the foreign purchaser from transferring funds to the United States to make payment in accordance with the contract of sale, or preventing the delivery of goods, the guarantee assumed by the Bank shall not extend to more than 90 per centum of the total contract price;

"(C) in guaranteeing against the risk of nonpayment for any reason other than the reasons specified in paragraph (B), the guarantee assumed by the Bank shall not extend to more than 85 per centum of the total contract price;

"(D) the aggregate amount of guarantees outstanding at any one time under this subsection shall not exceed $500,000,000; and

"(E) the terms of coverage of guarantees issued hereunder and the fees or charges required in connection therewith shall be established from time to time by the Board of Directors of the Bank with a view to making such guarantees available on a short- and medium-term basis, insofar as practicable, to domestic exporters of all types of goods or commodities on reasonable terms and with a minimum of delay.

"(3) In carrying out the provisions of this subsection the President of the Bank shall, in consultation and cooperation with the Secretary of State, consult with representatives of other countries doing a major export business with respect to export-guarantee programs which are in effect in such countries. The President of the Bank shall also consult with representatives of the private banking and insurance industries and with exporters to assure that the program to be established pursuant to this subsection shall utilize to the utmost extent practicable the facilities of private financial institutions, and that export credit guarantees may be made available to exporters in their own communities, at one place, without requiring in each instance direct correspondence or communication between the exporter and the Bank.

"(4) The Bank shall include in any report submitted to the Congress under section 9 of this Act a complete and detailed summary of operations under this subsection including, whenever practicable, an evaluation of such operations in terms of programs of a similar nature which are being carried out by other countries doing major export business.

"(5) As used in this subsection—

"(A) the term 'State' means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, or any possession of the United States; and

"(B) the term 'contract price' includes any insurance, freight, or other charge paid or to be paid by the exporter, and any charge for services furnished by the exporter as an incident of an export sale."

EXPANSION OF SERVICES BY DEPARTMENT OF STATE

SEC. 5. (a) In furtherance of the policy and purpose of this Act, the Secretary of State is authorized and directed—

(1) to undertake such market surveys and other commercial research in foreign market areas as he determines to be most useful, on a long- or short-term basis, in connection with the expansion of United States export trade, and for such purpose may contract with such private firms or organizations (either domestic or foreign) as he may determine without regard to section 3709 of the Revised Statutes of the United States (41 U.S.C. 5) or any other provision of law requiring competitive bidding:

(2) to disseminate, by direct mail from the Department of State or from other departments or agencies, or by publication, the results of such surveys and research in such form as may be most useful;

(3) to cause such notices or advertisements to be placed in foreign informational media as he determines will be in furtherance of the policy and purpose of this Act,

including institutional advertising of United States products and descriptions of the services and facilities available at United States embassies, consulates, or other Foreign Service posts; and

(4) to establish, in consultation and cooperation with the Secretary of Commerce, on a permanent basis trade information centers in the principal international trade fairs of the world, and on a temporary basis in other trade fairs, whenever he determines this to be advisable in the furtherance of the policy and purpose of this Act.

(b) 39 United States Code, sec. 4154, is hereby amended—

(1) by striking out the word "or" at the end of subsection (b)(7);

(2) by striking out the period at the end of subsection (b)(8) and inserting in lieu thereof a semicolon followed by the word "or"; and

(3) by adding a new clause (9) to subsection (b) as follows: "(9) the results, in such form as may be most useful of market surveys and research conducted pursuant to section 5(a)(1) of the National Export Policy Act of 1961."

EXPANSION OF SERVICES BY DEPARTMENT OF COMMERCE

SEC. 6. In furtherance of the policy and purpose of this Act, the Secretary of Commerce is authorized and directed—

(1) to undertake a program for the expansion of the number of, and the variety of export services provided by, field offices of the Department of Commerce in the commercial centers of the United States;

(2) to cause such notices or advertisements to be placed in the informational media of this country as he determines will be most helpful to domestic manufacturers and businessmen in maximizing their foreign trade opportunities and in utilizing the commercial services available to them through the various departments and agencies of the Government;

(3) to establish, in consultation and cooperation with the Secretary of State, permanent trade centers for the exhibition of goods produced in the United States, in major foreign trade centers, when he determines this to be advisable in the furtherance of the policy and purpose of this Act;

(4) to establish, in consultation and cooperation with the Secretary of State, a limited number of pilot projects in foreign market areas to provide warehousing and other permanent, basic support facilities to aid the export operations of United States businessmen and manufacturers, and to provide for the eventual sale of such facilities to United States business concerns, or to associations of such concerns as authorized by the Act of April 10, 1918 (the Webb-Pomerene Act (40 Stat. 516)), for private operation; and

(5) to increase the level of trade missions to twenty-five or more so that such missions will cover annually, biennially, or triennially, all of the important export markets of the world.

EXPANSION OF SERVICES BY SMALL BUSINESS ADMINISTRATION

SEC. 7. (a) In furtherance of the policy and purpose of this Act, there is hereby established in the Small Business Administration a division to be known as the Foreign Trade Division. The Division shall be headed by a Deputy Administrator who shall be appointed by the Administrator, and shall receive compensation at the rate provided by law for other deputy administrators of the Small Business Administration. The Administrator, acting through the Deputy Administrator in charge of the Foreign Trade Division, is authorized and directed—

(1) to undertake a program for the expansion of the number of, and the variety of export services provided by, regional and branch offices of the Small Business Administration;

(2) to cause such notices or advertisements to be placed in the informational media of this country as he determines will be most helpful to small business in maximizing its foreign trade opportunities and in utilizing the commercial services available to it through the various departments and agencies of the Government;

(3) to cooperate with the President of the Export-Import Bank of Washington, the Secretary of State and the Secretary of Commerce in obtaining for American small businesses the full benefits of, and encouraging the fullest possible participation by American small businesses in, the programs established by sections 4, 5 and 6 of this Act, such cooperation to include, when deemed desirable by the Secretary of State and the Secretary of Commerce, the assignment of personnel of the Foreign Trade Division to permanent or temporary trade fairs and trade centers in the United States and abroad and to advise in the planning of or to accompany trade missions;

(4) to represent the interests of the smaller and independent businesses of the United States at international commercial treaty and other trade negotiations in which the United States Government participates, and on interagency committees, boards or other organizations established within the executive branch to deal with foreign-trade matters;

(5) to revise, prepare, publish and republish directories of private business concerns involved in various aspects of foreign trade, for the purpose of aiding small businesses to find and obtain the most competent assistance in developing and expanding their exporting operations: *Provided, however,* That publications prepared in accordance with the program authorized by this paragraph shall be sold at prices calculated to produce revenues equal to at least one-half the total cost of the program: *Provided further,* That, for the purpose of carrying out the program authorized by this paragraph the Administrator may contract with such private groups or organizations as he shall determine to be best qualified, including but not limited to the making of grant contracts under section 7(d) of the Small Business Act, as amended (15 U.S.C. 636(d)), without regard to section 3709 of the Revised Statutes of the United States (41 U.S.C. 5) or any other provision of law requiring competitive bidding; and

(6) generally, and without any limitation by the foregoing paragraphs of this subsection, to establish, maintain, and operate a program calculated to promote the continued expansion of exports by American small business.

(b) Section 4(b) of the Small Business Act, as amended (15 U.S.C. 633(b)), is amended by striking the word "three" in the final sentence of such subsection and inserting in lieu thereof the word "five."

USE OF FOREIGN CURRENCIES

SEC. 8. Section 104 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), is amended (1) by striking out the colon at the end of paragraph (r) and inserting in lieu thereof a semicolon, and (2) by adding after paragraph (r) a new paragraph as follows:

"(s) For financing, in such amounts as may be specified from time to time in appropriation Acts, programs and projects to be undertaken in foreign countries in accordance with sections 5 and 6 of the National Export Policy Act of 1961:".

AUTHORIZATION FOR APPROPRIATIONS

SEC. 9. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

The statement and analysis presented by Mr. SPARKMAN are as follows:

STATEMENT OF SENATOR JACOB K. JAVITS—REMARKS ON NATIONAL EXPORT POLICY ACT OF 1961

I am very pleased that all members of the Small Business Committee have seen fit to join Senator SPARKMAN and me in sponsoring this legislation which is designed to provide the United States with a smoothly functioning and coordinating export promotion program. The Small Business Committee has added provisions, directed toward improving the machinery for small business, participation in our export drive, to the bill which I originally introduced on February 9. These provisions are in line with the findings of both the original and the present bill which state that "the largest potential for the rapid expansion of exports resides in opening to smaller manufacturers and businessmen in the United States the great opportunities which exist in foreign markets for U.S. products and products and services."

I should like to add briefly to the able presentation of the chairman of the Small Business Committee whose broad grasp and detailed knowledge of the export problems facing U.S. businesses are largely responsible for the promising action we are taking today. This legislation meets the growing awareness of the business and financial community of this Nation that our international economic position as well as our domestic economic needs require a massive effort for expansion of exports.

A prime example of this awareness is the proposal made by Mr. David Rockefeller at the Economic Club in New York on March 7, 1961. This proposal would set up expert credit organizations, privately financed, in the major financial centers of the United States. These organizations would facilitate about $1 billion worth of exports annually, principally in capital goods. This represents about 25 percent of our current annual capital goods exports. These export credit organizations would require the backing of the kind of comprehensive guaranty program under the Export-Import Bank, specifically authorized in the National Export Policy Act being introduced today.

Further proof of this growing awareness of the need for export expansion is found in the testimony at the hearing on "Small Business Exports and the World Market" held last year by the Senate Small Business Committee, and the hearings by the Interstate and Foreign Commerce Committee. Many of the provisions of the instant legislation are drawn from the experience of these hearings which brought us into firsthand contact with the problems faced by the U.S. businessmen in the export field.

Finally, I wish once more to express my gratitude to my respected chairman for the valuable help he has rendered in working out this bill which we join in filing today, and to the other members of the committee who share with me high hopes for this export program.

SECTION-BY-SECTION ANALYSIS OF THE NATIONAL EXPORT POLICY ACT OF 1961

Section 2 finds and declares that foreign trade represents a strong and vital element in the economic leadership of the United States, and that the expansion of exports by and through private enterprise is the most positive means of meeting the balance-of-payments deficit as well as of increasing importance to the domestic economy. Proposes to provide a coordinated and augmented program of Government action designed to assist U.S. manufacturers and businessmen in recognizing and developing the opportunities in export markets.

Section 3 establishes a Council for Export Promotion, under the chairmanship of the Under Secretary of Commerce, and including the Under Secretaries of State, Treasury, and Agriculture, the President of the Export-Import Bank, the Director of the International Cooperation Administration, the Chairman of the Council of Economic Advisers, and the Administrator of the Small Business Administration. Establishes an Advisory Committee on Export Policy, whose nine members are representative of industry, export operations, banking and finance, labor, and agriculture, and includes experts in international economics and business administration.

Provides that the functions of the Council for Export Promotion are to coordinate the export services of the U.S. Government, to promote the speedy and direct extension of these services to U.S. private business, to implement, review, revise, and augment the pertinent recommendations of the Interagency Export Promotion Task Force which was established in 1959, and to undertake a thorough study of the export services provided by Government with a view to making specific recommendations for legislative and administrative action to improve these services. The Council is to make a yearly report to Congress.

Section 4 amends section 2 of the Export-Import Bank Act of 1945, to give specific and detailed authorization to the Export-Import Bank to engage in a program of short and medium term export credit guarantees against both commercial and political risks, giving coverage of up to 80 and 90 percent respectively, with the total amount of guarantees outstanding not to exceed $500 million at any one time. Emphasizes the desirability of participation by private banking and financial institutions at the local level in this program.

(NOTE.—The Export-Import Bank has during the past year instituted a program of short term export credit guarantees against political risks and has implemented its program of medium term credit guarantees against commercial risks. (Medium term guarantees against political risk, now made available by the Bank on an individual basis only, have had little response from the export community. The need is for a general program fully backed by the Congress of complete guarantees for all classes of export credit.) This legislation (the National Export Policy Act of 1961) specifically authorizes the Bank to extend short term guarantees against commercial risks and medium term guarantees against political risks, showing the clear intent of Congress that the Bank round out its present program, thus reenforcing the general authority which the Bank has under the Export-Import Bank Act of 1945.)

The President of the Bank shall undertake a continuous comparison of the operations and effectiveness of the U.S. export credit guarantee program with the programs pursued by other leading exporting nations, and include his findings in his annual report to Congress.

The President is directed to consult with the private banking and insurance industries and with exporters to assure maximum utilization of the possibilities of private financial institutions in local communities.

Section 5 authorizes and directs the Department of State to expand and augment its export services to U.S. businessmen by:

(a) Undertaking market surveys and other commercial research activities in foreign countries and, when necessary, hiring private U.S. or foreign firms for the purpose;

(b) Placing advertisements in foreign news media, in order to provide institutional advertising for U.S. products and in order to describe the services available to potential foreign buyers at U.S. foreign service posts; and

(c) Establishing, with the Department of Commerce, permanent or temporary trade information centers at international trade fairs.

Section 6 authorizes and directs the Department of Commerce to expand and augment its export services to U.S. businessmen by:

(a) Undertaking an expansion of the export services provided by its field offices in the United States.

(b) Placing advertisements in U.S. news media to advertise foreign trade opportunities and export services available to U.S. businessmen.

(c) Establishing, with the Department of State, a limited number of pilot projects in foreign market areas to provide warehousing and other basic support facilities for private U.S. export operations. (These facilities would be permanent and designed for eventual purchase by private U.S. firms or export associations.)

(d) Increasing the number of trade missions going overseas in order to provide for a more thorough coverage of foreign market areas.

Section 7 establishes a Foreign Trade Division, to be headed by a Deputy Administrator, in the Small Business Administration, in order to:

(a) Expand the export services provided by regional and branch offices of the Small Business Administration.

(b) Cooperate with the Departments of State and Commerce, and the Export-Import Bank to assure full benefit from their programs for the small businessman, through active participation in trade fairs and trade missions.

(c) Represent the interests of small business at trade negotiations and governmental interagency committees dealing with foreign trade matters.

(d) Revise, prepare, and publish directories of business concerns involved in the various aspects of foreign trade for the information of small businessmen.

Section 8 amends section 104 of the Agricultural Trade Development and Assistance Act of 1954 to authorize the use of foreign currencies held by the United States for the implementation of the programs in sections 5 and 6 of the National Export Policy Act of 1961.

Section 9 authorizes the appropriation of funds necessary to carry out the purpose of this act.

ABOLITION OF MANDATORY CAPITAL PUNISHMENT IN DISTRICT OF COLUMBIA

Mr. KEATING. Mr. President, on behalf of the Senator from Indiana [Mr. HARTKE] and myself, I introduce for appropriate reference a bill to abolish mandatory capital punishment in the District of Columbia.

Under the provisions of this bill, juries could recommend life imprisonment in first degree murder cases by unanimous vote. This recommendation would be binding on the court. If the jury was unable to agree as to a recommendation, however, the court could sentence the defendant either to death, or life imprisonment. The bill specifically provides that any person sentenced to life imprisonment in a first degree murder case shall be eligible for parole only after the expiration of 20 years from the date he commences to serve his sentence.

Our bill would do away, at long last, with the requirement under the present District of Columbia Code that defendants in all first degree murder cases, regardless of the circumstances involved, be sentenced to death by electrocution. The District of Columbia is the only remaining jurisdiction in the United States with such a nondiscretionary death penalty provision. Enactment of this legislation will close the book, insofar as the American judicial system is concerned, on this rigid, archaic relic of another age.

It should be made clear that this legislation would not abolish capital punishment as such. All it would do is to remove the inflexible, inexorable, unalterable requirement of the present law that every defendant convicted of first-degree murder be sentenced to death. This is not only justice blindfolded—it is justice without judgment. No man's life should be snuffed out by the State without an opportunity to consider all the factors involved in a particular crime.

This measure would not weaken law enforcement in any way. As a matter of fact, the bill is strongly supported by the District of Columbia Law Enforcement Council. It is recognized that the present inflexible laws are self-defeating. First degree murder convictions are rare and are very difficult to sustain on appeal because of the mandatory death provisions. By permitting consideration of mitigating circumstances, this bill should avoid acquittals of guilty offenders for whom something less than the death penalty would be appropriate.

Personally, I believe capital punishment should be retained for those cases in which the reflective moral judgment of the community would be shocked by any lesser penalty, and for those cases in which no other sanction is possible. Such cases fortunately are rare, but they are not nonexistent. Under this measure, all of the aggravating, as well as mitigating circumstances could be given consideration by the judge and jury in passing sentence. I believe that this approach answers the capital punishment problem better than any provisions for automatic death penalties or any provisions for absolute death bars. I have tremendous respect for our jury system and for the judges who serve us, and I have confidence that they would administer this law in a manner which would do credit to the reform it seeks.

Other procedures could be suggested for coping with this problem. Last year I recommended a bill which would permit the court to either accept or reject a jury's recommendation of life imprisonment. Others have suggested that only the death penalty be reviewed by the court. The bill we are offering today, however, is the bill that won the approval of the other body and the Senate District of Columbia Committee during the last session of Congress. This is a tremendous practical advantage. Almost all agree that the present provisions of the District of Columbia Code

are intolerable. Under these circumstances, no one should insist on a particular formula for change at the risk of blocking any change at all.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

Mr. President, I also ask unanimous consent that the bill be on the table for 1 week to permit other interested Senators to join as cosponsors.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD, and lie on the desk, as requested by the Senator from the New York.

The bill (S. 1380) to amend section 801 of the act entitled "An act to establish a code of law for the District of Columbia," approved March 3, 1901, introduced by Mr. KEATING (for himself and Mr. HARTKE), was received, read twice by its title, referred to the Committee on the District of Columbia, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 801 of the Act entitled "An Act to establish a code of law for the District of Columbia", approved March 3, 1901 (31 Stat. 1189, 1321), is amended to read as follows:

"SEC. 801. PUNISHMENT.—The punishment of murder in the first degree shall be death by electrocution unless the jury by unanimous vote recommends life imprisonment; or if the jury, having determined by unanimous vote the guilt of the defendant as charged, is unable to agree as to punishment it shall inform the court and the court shall thereupon have jurisdiction to impose and shall impose either a sentence of death by electrocution or life imprisonment.

"Notwithstanding any other provision of law, a person convicted of first degree murder and upon whom a sentence of life imprisonment is imposed shall be eligible for parole only after the expiration of twenty years from the date he commences to serve his sentence.

"Whoever is guilty of murder in the second degree shall be imprisoned for life or not less than twenty years.

"The provisions of this legislation shall be applicable to all defendants sentenced following the effective date hereof. Cases tried prior to the effective date of this Act and which are before the court for the purpose of resentence shall be governed by the provisions of law in effect prior to the effective date of this Act: *Provided,* That the judge may, in his sole discretion, consider circumstances in mitigation and in aggravation and make a determination as to whether the case in his opinion justifies a sentence of life imprisonment, in which event he shall sentence the defendant to life imprisonment. Such a sentence of life imprisonment shall be in accordance with the provisions of this Act.

"In any case tried under this Act as amended where the penalty prescribed by law upon conviction of the defendant is death except in cases otherwise provided, the jury returning a verdict of guilty may fix the punishment at life imprisonment; and thereupon the court shall sentence him accordingly; but if the jury shall not thus prescribe the punishment the court shall sentence the defendant to suffer death by electrocution unless the jury by its verdict indicates that it is unable to agree upon the punishment, in which case the court shall sentence the defendant to death or life imprisonment."

OZARK RIVERS NATIONAL MONUMENT, MO.

Mr. SYMINGTON. Mr. President, on behalf of my colleague, the junior Senator from Missouri [Mr. LONG], and myself, I introduce, for appropriate reference, a bill to authorize the establishment and development of the Ozark Rivers National Monument in the State of Missouri.

The monument would be comprised of not to exceed 113,000 acres of land along the Current and Eleven Point Rivers in the southeastern part of the State. This is one of the most beautiful and unique areas in the country, still in its natural state, with clear, spring-fed rivers coursing among the Ozark hills. The bill we are introducing today recognizes that the area is an asset that should be preserved and developed for the enjoyment of all Americans.

Today's bill represents the efforts of many persons in the State of Missouri and throughout the country who have been working, over the past decade, to evolve a plan that would best serve the interests of the people of the Current-Eleven Point area and the people of Missouri and the Nation.

In 1950, the State of Missouri urged that steps be taken to preserve the rivers as free-flowing streams, and in 1955 this recommendation was supported by the Arkansas-White-Red Basin Interagency Committee. The following year, the National Park Service prepared a recreational resources plan, recommending that a national recreation area be designated within the watersheds of the rivers. The plan was published by the Missouri Division of Resources and Development, and in January 1959 the Missouri State House and Senate indicated support of this general objective.

At a meeting of State and National officials here in Washington in February 1959, it was decided that further study by the National Park Service would be needed before definite action could be taken. The Congress made funds available for the study during fiscal year 1960, and in January 1960, the Department of the Interior issued a proposal for establishment of the Ozark Rivers National Monument.

The bill we are introducing today is the result of consultation and exchange of views with a wide range of local, State, and National officials and private citizens. The plan has two major objectives: first, to preserve in its natural state one of the most beautiful sections of our country; and second, to develop the recreational opportunities and stimulate the economy of the Ozark rivers area.

Last month President Kennedy stated in his natural resources message:

> America's health, morale, and culture have long benefited from our national parks and forests, and our fish and wildlife opportunities. Yet these facilities and resources are not now adequate to meet the needs of a fast-growing, more mobile population—and the millions of visitor-days which are now spent in federally owned parks, forests, wildlife refuges, and water reservoirs will triple well before the end of the century.

The Ozark Rivers National Monument will help to meet this national need, preserve a magnificent part of our State for the benefit of generations to come, and bring growth and development to the southeastern part of Missouri.

Mr. President, I ask unanimous consent that the text of the bill, the proposal of the Department of the Interior, "Ozark Rivers National Monument," January 1960, the press release issued yesterday announcing introduction of the bill, and House Resolution 19 of the Missouri House of Representatives, January 1959, be inserted at this point in the RECORD.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill, proposal, press release, and resolution will be printed in the RECORD.

The bill (S. 1381) to authorize the establishment and development of the Ozark Rivers National Monument in the State of Missouri, and for other purposes, introduced by Mr. SYMINGTON (for himself and Mr. LONG of Missouri), was received, read twice by its title, referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purpose of conserving and interpreting unique scenic and other natural values and objects of historic interest, including preservation of portions of the Current and Eleven Point Rivers in Missouri as freeflowing streams, preservation of springs and caves, protection of wildlife, and provision for use and enjoyment thereof by the people of the United States, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall designate an area not to exceed one hundred and thirteen thousand acres being generally depicted in the publication by the United States Department of Interior, National Park Service, entitled "Ozark Rivers National Monument," dated January 1960, including submerged land along, near, or beneath the Current River in Missouri, the Jacks Fork of the Current River, and the Eleven Point River, for establishment and development as the Ozark Rivers National Monument (hereinafter referred to as "such area"): *Provided,* That no lands shall be designated within two miles of the municipalities of Eminence, Van Buren, and Doniphan, Missouri.

SEC. 2. The Secretary of the Interior may, within such area, acquire lands and waters, or interests therein, by such means as he may deem to be in the public interest; except that any parcel of land containing not more than five hundred acres, which borders either of the rivers referred to in the first section of this Act, and which is being used primarily for agricultural purposes, shall be acquired by the Secretary in its entirety unless the owner of any such parcel consents to the acquisition of a part thereof. Lands and waters owned by the State of Missouri within such area may be acquired only with the consent of the State. Federally owned lands or waters lying within such area shall, upon establishment of the monument pursuant to section 4 hereof, be transferred to the administrative jurisdiction of the Secretary, without transfer of funds, for administration as part of the monument.

SEC. 3. Any owner or owners, including beneficial owners (hereinafter in this section referred to as "owner"), of improved property on the date of its acquisition by the Secretary may, as a condition to such acquisition, retain the right of use and occupancy of the improved property for noncommercial residential purposes for a term

ending at the death of such owner, or the death of his spouse, or at the death of the survivor of either of them. The owner shall elect the term to be reserved. The Secretary shall pay to the owner the fair market value of the property on the date of such acquisition less the fair market value on such date of the right retained by the owner.

SEC. 4. When the Secretary determines that lands and waters, or interests therein, have been acquired by the United States in sufficient quantity to provide an administrable unit, he shall establish the Ozark Rivers National Monument and shall declare such establishment and designate the boundaries thereof by publication of notice in the Federal Register. The Secretary may thereafter alter such boundaries from time to time, except that the total acreage in the monument shall not exceed one hundred and thirteen thousand.

SEC. 5. (a) In order to provide compensation for tax losses sustained by counties in the State of Missouri as a result of certain acquisitions by the Secretary of privately owned real estate and improvements thereon pursuant to the provisions of this Act, payments in lieu of taxes shall be made to each such county in which such real estate is located, and which has been authorized, under the laws of Missouri, to assess taxes upon real estate to the person who is in possession thereof and to assess taxes upon any present interest in real estate to the owner of such interest, in accordance with the following schedule: For the calendar year in which the real estate is acquired in fee simple absolute, an amount which bears the same proportion to the full amount of tax assessed thereon in such year as the number of days remaining in such year after the date of acquisition bears to the number of three hundred and sixty-five. In any case where an amount in excess of the difference between such proportionate amount and such full amount has already been paid to the county by or on behalf of the owner or owners from whom the real estate was so acquired, payment of such excess amount shall be made as reimbursement to such owner or owners out of such proportionate amount and only the balance remaining of such proportionate amount shall be paid to the county. For the two succeeding calendar years there shall be paid on account of such real estate an amount equal to the full amount of tax assessed thereon in the year of acquisition.

(b) No payments in lieu of taxes shall be made on account of real estate and improvements thereon in which the Secretary has ever acquired less than a fee simple absolute under this Act.

(c) As soon as practicable after real estate taxes have been assessed by such counties in each calendar year, the Secretary shall compute and certify the amount of payments in lieu of taxes due to each of such counties, and such amounts shall be paid to the respective counties by the Secretary of the Treasury out of any money in the Treasury not otherwise appropriated.

(d) The provisions of this section shall not apply to any property acquired by the Secretary after December 31 of the twenty-fifth year following the date of enactment of this Act.

SEC. 6. (a) In furtherance of the purposes of this Act, the Secretary is authorized to cooperate with the State of Missouri, its political subdivisions, and other Federal agencies and organizations in formulating comprehensive plans for the monument and for the related watershed of the Current and Eleven Point Rivers in Missouri, and to enter into agreements for the implementation of such plans. Such plans may provide for land use and development programs, for preservation and enhancement of the natural beauty of the landscape, and for conservation of outdoor resources in the watersheds of the Current and Eleven Point Rivers.

(b) The Secretary shall permit hunting and fishing on lands and waters under his jurisdiction within the monument under such regulations as he may prescribe. The Secretary shall, prior to the issuance of any such regulations, consult with those officials of the State of Missouri and of any political subdivision thereof who, with respect to any lands or waters acquired by the Secretary under this Act, exercised jurisdiction over hunting and fishing conducted thereon prior to such acquisition by the Secretary.

SEC. 7. (a) There is hereby established an Ozark Rivers National Monument Commission (hereinafter referred to as the "Commission"). The Commission shall terminate ten years after the date the monument is established pursuant to section 4 of this Act.

(b) The Commission shall be composed of eleven members each appointed for a term of two years by the Secretary as follows:

(1) Seven members to be appointed from recommendations made by the members of the county court in each of the counties in which the Ozark Rivers National Monument is located (Carter, Dent, Howell, Oregon, Ripley, Shannon, and Texas), one member from the recommendations made by each such court;

(2) Three members to be appointed from recommendations of the Governor of the State of Missouri; and

(3) One member to be designated by the Secretary.

(c) The Secretary shall designate one member to be Chairman. Any vacancy in the Commission shall be filled in the same manner in which the original appointment was made.

(d) A member of the Commission shall serve without compensation as such. The Secretary shall reimburse members of the Commission for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

(e) The Secretary or his designee shall, from time to time, consult with the members of the Commission with respect to matters relating to the development of the Ozark Rivers National Monument, and shall consult with the members with respect to carrying out the provisions of this Act.

(f) It shall be the duty of the Commission to render advice to the Secretary from time to time upon matters which the Secretary may refer to it for its consideration.

SEC. 8. The Ozark Rivers National Monument, when established pursuant to this Act, shall be administered in accordance with the provisions of the Act of August 25, 1916 (39 Stat. 535), and laws supplementary thereto and amendatory thereof.

SEC. 9. There are hereby authorized to be appropriated such sums as may be needed to carry out the purposes of this Act, of which not more than $6,000,000 shall be expended for the purpose of acquiring lands, interests in lands, and improvements thereon.

SEC. 10. If any provision of this Act or the application of such provision to any person or circumstance is held invalid, the remainder of this Act or the application of such provision to any person or circumstance other than that to which it is held invalid, shall not be affected thereby.

The proposal, press release, and resolution presented by Mr. SYMINGTON are as follows:

A PROPOSAL FOR OZARK RIVERS NATIONAL MONUMENT

(By U.S. Department of Interior National Park Service, January 1960)

FOREWORD

Those who know the beauty of the Current-Eleven Point country of southeast Missouri and have seen its clear, spring-fed rivers winding among quiet hills have long cherished the hope that these streams would remain unchanged.

It was encouraging therefore when, in 1950, the State of Missouri took a position urging that certain rivers, including the Current and Eleven Point, be preserved as free flowing streams. The Arkansas-White-Red Basins Inter-Agency Committee supported this recommendation in its report of June 1955.

As followup, the National Park Service under authority contained in the Park, Parkway, and Recreational Survey Act of 1936, and with the cooperation of the interested State agencies, prepared a plan for the preservation and development of the recreation resources of the two rivers. This plan, published in 1956 by the Missouri Division of Resources and Development, recommended that a national recreation area be designated within the watersheds of the Current and Eleven Point Rivers. The Missouri State Legislature recently indicated its support of this general objective. In January 1959, it requested the Congress of the United States to enact legislation which would establish a national recreation area so that these great scenic and recreational values would be perpetually protected from destruction by man-made encroachments.

At a meeting in Washington, D.C., during February of 1959, between representatives of the State of Missouri and the National Park Service, it was decided that a further study of the Current-Eleven Point Rivers country was needed before definite action should be initiated on the proposal. Funds were subsequently appropriated to the National Park Service for the study, the results of which are presented in this report.

THE STUDY IN BRIEF

Only a few miles by today's standards from St. Louis or Kansas City or Memphis lies a portion of the Ozarks still relatively wild and natural. The Ozarks are old—mellow with the beauty of great age—remnants of an ancient mountain range. Uplift and water have molded them. Climate has influenced them.

Today, this particular area houses a unique complex of springs and rivers, caves and sinks, plants and animals. Here are many springs—some giant, some small. Here are spring-fed rivers, the Current, the Jacks Fork, and the Eleven Point—cold, clear, abounding with bass and goggle-eye.

Here are caves created by waters of the past, many containing an unusual variety of multicolored formations, some still uncharted. Here are interesting sinks—ground surface reminders of cave roof fall-ins below. Here are found the shortleaf pine, oaks of many names, the redbud, the red wolf, the osprey, and the pileated woodpecker—overall, a surprisingly varied ecology.

Nearly 10,000 years ago, early man lived beside these same waters. He too must have marveled at the springs and the rivers flowing from them. More recently, the Indian, the Frenchman, the Spaniard, the logger each had his day. Descendants of settlers who came mainly from the Appalachians now people the area. Much of the folk culture and character of early American society remains with them.

For years—largely because of this unusual combination of natural values—there has been interest in preservation of parts of this scene. Four State parks have been established—three along the Current River and one along the Jacks Fork. Two wildlife areas have been set aside by the Missouri Conservation Commission.

As early as 1950, the State of Missouri recognized a need to preserve the natural qualities of the Current and Eleven Point Rivers. As recently as January 1959, the Missouri Legislature asked the Congress of the United States to establish a national recreation area to preserve the free-flowing qualities of these very rivers.

Here in the heart of the Ozark Plateau, lies a unique opportunity to set aside an outstanding type of area—one not now represented in the national park system. Here, too, is the opportunity to preserve still unspoiled rivers with many miles of shoreline.

To preserve this area, establishment of an Ozark Rivers National Monument, as part of the national park system, is now proposed. The monument, consisting of approximately 113,000 acres, would be located along some 190 miles of the Current, Jacks Fork, and Eleven Point Rivers. This area would contain the most important portion of these scenic rivers as well as some 13 named caves, 11 geological sites, more than 40 archeological sites, several fine ecological sites, and many springs and sinks.

Natural concentration of these features in the river valleys makes possible their preservation for public enjoyment in relatively narrow strips of land. It would be difficult to find an area where so much beauty and variety can be preserved by setting aside so little. A sizable block along the Current River has been included to allow preservation of a significant example of typical Ozark topography. Preservation of the area's fragile qualities, while allowing its use, would be the basic objective of all planning, development, and administration.

Here would be an area preserved for use of people—an opportunity to float the Current or the Jacks Fork or the Eleven Point, to watch the osprey at work, to try camping on a gravel bar, to test the boater's or fisherman's skill, to watch the Ozarks renowned fall colors pass by, or perhaps even just to loaf. Hiking along the riverbank or to some remote cave, sink, or site where man of yesterday lived; wandering through little known Powder Mill Cave or into spectacular Jam Up Cave; climbing down a shaded trail to magnificent Greer Spring—all of these and many other opportunities would be available to the visitor. A carefully developed interpretive program would add to his enjoyment and understanding of the area.

Sixteen percent of the land in the proposed Ozark Rivers National Monument is now publicly owned, with administration divided between the Missouri Conservation Commission and the U.S. Forest Service. The remainder is privately owned. Acquisition of this private land might cost in the neighborhood of $5,500,000.

Based on certain premises, the University of Missouri estimated that within 5 years of the monument's establishment, and assuming adequate development, annual tourist expenditures would increase $5,500,000. Applying information contained in the university's report, the National Park Service estimates that assessed valuation on local tax rolls would increase by $8,700,000, and the annual tax return by $300,000. This would more than compensate for the taxes lost due to removal of monument lands from the tax rolls.

THE AREA

Within the most scenic section of the Ozarks of southeastern Missouri lies the area under consideration. Crossed or skirted by several highways, it is readily accessible, and within an easy day's drive for more than 20 million people. It lies only 175 miles from St. Louis, or 250 from Kansas City, yet it remains "off the beaten path."

Here the Current and Eleven Point Rivers flow unimpeded, within a forested landscape. Giant springs, caves, and sinkholes accent an outstanding geological story. Wildlife roams the oak-hickory forest. Here, ancient and modern man have added special color.

Nature's story

Superficially, the Ozarks are a land of rolling hills, rivers, and forests. But more, they tell a complex and fascinating story of interrelated phenomena.

Geology is a basic chapter. The oldest rocks in the area were formed in Precambrian time, more than half a billion years ago. The newest deposits are the sands and gravels of today. For hundreds of millions of years in between, the land was submerged under ancient seas and then raised above them time and time again. Sediments laid down under these ancient seas, now consolidated into sandstones and limestones, form the bluffs rimming the rivers.

Streams played the major roll in wearing down these rocks to form the rolling country of today. Limestone dissolved and great series of underground caverns formed. Water trickling into these caverns joined with other waters, to emerge eventually as huge springs—thence rivers again.

The countryside is mostly rolling with forested hills rising up to 400 feet above the streams. Its surface is irregular, the eroded remnant of an ancient upland. The most rugged areas border the rivers. Valleys are usually narrow, but occasionally widen into alluvial plains. Tributaries cut smaller ravines and valleys throughout the area.

In relief, elevations above sea level vary from 1,320 feet at Thorny Mountain to 300 feet where the Current River enters Arkansas. The Current itself falls 690 feet between Montauk Springs, its source, and the Arkansas line, an airline distance of about 80 miles.

The two major rivers under study—the Current and Eleven Point—are strong, and alive, and clean. Their waters are transparent, varying in color by depth and according to the hour of the day, from sapphire blue through many shades of green. Quiet waters alternate with chutes or rapids. They meander through mile after mile of scenic beauty, for long stretches under towering rocky bluffs.

The Current is the largest of these rivers. It rises at Montauk State Park in southern Dent County and flows 140 miles southeasterly through Shannon, Carter, and Ripley Counties to the Arkansas line. Born of Montauk Springs, it is fed by other giants along the way. Even during the severe drought of 1936, the Current maintained an average flow of 611 million gallons a day past Doniphan. Its major tributary is the Jacks Fork which rises in southeast Texas County and flows easterly about 70 miles into Shannon County, where it joins the Current. Here along the Jacks Fork is perhaps the finest scenery, with a special wild yet intimate quality.

The Eleven Point River with headwaters in the vicinity of Willow Springs in northwest Howell County flows generally southeasterly across Howell and Oregon Counties, thence south, crossing the Arkansas State line to join the Black River about 15 miles below its junction with the Current. Its mean flow, even during 1936, was 130 million gallons a day past Riverton.

The springs are wonderful in themselves. Many are world famous for the immense volume and regularity of their flow. Some issue from rocky recesses; some well up from gravelly beds; some rush forth from caverns; others boil gently up from unknown depths. Their settings often are places of rare beauty.

Of 11 springs in the Missouri Ozarks having an average flow of 65 million or more gallons per day, 6 are in the Current-Eleven Point country—Big Spring, Welch Spring, and Blue Spring on the Current—Alley Spring on Jacks Fork—Greer Spring and Blue Spring on the Eleven Point.

Big Spring is the largest. It has flowed as much as 840 million gallons a day, and for more than 20 years has averaged better than 250 million gallons every 24 hours the year around. The third largest spring in Missouri is Greer. Its two outlets, about 300 feet apart, are located in a beautiful, wild and forested gorge. A mile and a quarter away and 60 feet lower, it enters the Eleven Point River. For over 20 years it has flowed an average of 214 million gallons a day.

Four State parks in this area have been established to preserve large springs and related scenic or historical values. Each bears the name of the spring involved—Big, Alley, Round, and Montauk.

Extensive dissolving of the limestone widespread in this country led to the formation of a vast series of underground chambers. Caves and caverns, springs, sinks, and other associated features all are dramatic demonstrations of the dynamic solution power of underground water.

Scattered throughout the area are numerous caves. They are of varied character—some quite extensive and magnificently decorated with dripstone. Possessing an even temperature, caves are delightfully cool in the summer, and pleasantly warm in the winter.

Some of these caves, such as Jam Up Cave, have no decoration, but the majority exhibit nearly every type of flowstone decoration to be found anywhere in the world. Round Spring Cavern ranks highest among all these. While smaller than Carlsbad Caverns and Mammoth Cave, both preserved in national parks, it equals them in the variety and color of their formations. It is the largest charted cave in the area having over 6,000 feet of passageways. Throughout the cavern are domes, stalactites, columns, and stalagmites of every conceivable form.

Associated with this system of caverns is a large number of sinks and potholes dotting the uplands between the major stream valleys. Some are large elliptical depressions possibly caused by collapse of cavern roofs. Other sinks are funnel-shaped holes resulting from the dissolving of limestone around an opening in the rock, as surface water trickles to the caverns below. They range in size and form from chimneylike shafts 300 feet or more deep, to representative funnel-shaped holes up to 400 feet in diameter and as much as 75 feet deep.

A striking example of sinkhole topography can be seen in "The Sunkland." Here is a great hollow several hundred feet across and nearly a mile long, produced by the successive fall-in of several interconnected underground chambers. It is an almost classic example of this phenomenon.

The "shut-ins" are in great contrast to the general landscape dominated by limestone features. "Shut-ins" are numerous in the Current River Valley east of Eminence. Rocky Creek Falls, a delightfully attractive cascade, is an excellent example. Here masses of ancient dark-pink, granitelike rocks are exposed through which Rocky Creek has cut rugged gorges. The valley is wider above and below, where the stream cut through softer sedimentary rock. Oftentimes where these ancient rocks occur, they appear as relatively flat surfaces. But here the later sedimentary rocks surround, but did not completely bury, knocks of ancient rock that once stood as islands in now-vanished seas hundreds of millions of years ago.

About three-fourths of the land is covered with forest. This forest is almost entirely immature hardwoods, with oaks and hickories predominating. Here and there are a few scattered patches of nearly mature pines, but nowhere similar to the stands of 75 years ago.

Because of variations in soil, microclimate, slope, and exposure within the area, a proper analysis of plant relationships is extremely difficult. For example, within a relatively limited area, such as a sink, marshy pond communities exist within a relatively dry oak-hickory forest.

Despite these fairly complex relationships, four forest types are recognized. The oak-hickory type is the dominant upland forest of the Ozark Plateau. Within the four gen-

eral types, there are other plant associations, each quite different. The above-mentioned marshy pond is one good example. Another distinctive association grows on the drier limestone bluffs. The "shut-ins" contain a still different assortment of plants. Besides the oaks and hickories, other common trees of the forest are maple, shortleaf pine, tulip tree, black tupelo, sweetgum, and birch. Others notable for their flowers or fruit are hawthorn, bittersweet, dogwood, redbud, rose azalea, and bush hydrangea.

In all, 1,500 different kinds of plants are reportedly found here. This great variety is due to several factors, one of the most important being the long period of time that the Ozarks have stood free as land masses. Glaciation, too, brought climatic changes which induced northern plants to migrate south. With the retreat of the ice sheet, southern plants moved northward.

Likewise, due to the area's central location on the continent, plants spread here from both the East and West. Thus cool bluffs contain plants characteristic of the Appalachians; marshes around potholes contain plants similar to those of the South; and dry sites contain plants with a southwestern affinity. The combination of all these characteristics make this an outstanding area botanically.

The forests provide homes for many mammals and birds. White-tailed deer, gray and fox squirrels, raccoon, opossum, and skunk are quite plentiful. Less common are red and gray foxes, bobcat, mink, muskrat, and cottontail rabbit. Badgers are occasionally seen. The rare red wolf is still found here.

Birdlife is abundant. The more common birds to be seen along the waterways are the kingfisher and the little green heron. Numerous songbirds make this area their summer home. Teal and wood duck nest here. Wild turkeys are making a comeback. Perhaps the most spectacular bird of the area is the crow-sized, pileated woodpecker. Many other birds are visitors, pausing here on their northward and southward migrations.

The Current, the Jacks Fork, and the Eleven Point Rivers are among the best smallmouth bass streams left in Missouri. Ninety-three species of fish have been reported from these rivers. Rock and smallmouth bass are the most abundant native game species. Largemouth bass, walleyed pike, and chain pickerel are fairly common. Ozark blindfish would possibly be found if further studies were made in caves where they were once reported.

Man's story

In general, river valleys the world over were logical locations for the development of prehistoric cultures. The valleys under consideration are no exception.

The ever-flowing streams, the springs, and the forests, with their ready abundance of drink, fuel, and food, were irresistible attractions to the prehistoric hunters, fishers, and gatherers. The fertile bottoms attracted those who grew maize, beans, and squash. Here they established camps on the level terraces of the valleys, and sometimes they occupied the inviting caves. Some erected earthen mounds over their dead.

Prehistoric man was living in the Ozarks well before the Christian era, in fact, nearly 10,000 years ago. Limited investigations by archeologists reveal that Indians continuously occupied some sites from about 8000 B.C. down to historic times—running the whole gamut of Mississippi Valley archeology from paleo-Indian (early man) through archaic, woodland, and Mississippi cultures, to historic tribes first seen by De Soto in 1541.

The Ozark Plateau culture, with special manifestations in the Current-Eleven Point region, developed at a crossroads between the Arkansas and the Mississippi valleys, by borrowing some traits from various cultural centers of both areas. This culture is an especially unique expression, combining cultural traits from such sources as the great Cahokia Center of East St. Louis, Ill., yet developing its own variations, such as distinctive serrated spearpoints.

Four prehistoric sites are of special interest. Pigman Mound, by its shape, size, and surface indications, was a ceremonial center of the Mississippian culture. Ashley Cave shows special development of a more northerly culture. Morgan Mound and associated sites provide evidence of early inhabitants. At Round Spring, in Round Spring State Park, Middle Mississippian burials have been found and weapons and tools of early man have been washed to the surface.

The modern history of the region is similar to that of the Ozark country as a whole. This area was originally claimed by the French and Spanish. However, neither left much of an impact on the Ozarks. The region was settled primarily by Anglo-Saxon groups from the eastern uplands. Lumbermen later exploited the region.

No nationally significant historic sites are known. The self-sufficient economy of the people from the mountain sections of the east which readily adapted itself to the Ozarks, has left a dominating imprint on the culture and economy of the region. Other influences such as the recovery of nitrates during the War of 1812, have played their part in the country's development.

Certain features help tell this story—Ashley Cave, with its relationship to nitrate mining, Snider House, which served as a temporary hospital during the Civil War; Turner's Mill, Falling Spring Mill, an interesting overshot type, and Greer Mill operated remotely by a system of long shafts and gears; and the three current-propelled ferries. The Red Mill at Alley Spring State Park has been restored.

The four seasons

Four marked seasons occur, spring—short with delightfully crisp clear days; summer—hot, with occasional extremes but cooler in the hills; fall—a pleasant season, with a gradual decline from the summer highs; winter—cold, with an occasional zero temperature, but with many sunny days.

Weather Bureau records indicate that the Current-Eleven Point River country is warmer during the winter months than either St. Louis or Kansas City, and, except for the lower portion of the Current around Doniphan, cooler during July and August.

Most summer rains come as heavy thundershowers of short duration. Spring rains are lighter and longer. The heaviest snowfall occurs in February. The major source of this precipitation is the result of warm, moisture-laden air from the Gulf of Mexico coming into contact with cold arctic air masses.

In summer, this area is the coolest part of southern Missouri, but periods of high relative humidity make the area uncomfortable at times. On some winter days, temperatures remain below freezing while on many others, they stay above.

THE OPPORTUNITY

Within the last few years, the urgency for setting aside in public ownership portions of rivers still unspoiled and shoreline, whether ocean, lake or river, has received increasing attention. The Current and Eleven Point Rivers represent an outstanding opportunity. These stream valleys contain an unusual variety of features which collectively are of outstanding quality and in some respects unique. Springs, waterfalls, caves, sinks, forests, and wildlife along with the rivers tell a wonderfully diversified story within an area of modest size. A wealth of prehistoric evidence and colorful history add interest.

Surprisingly here in the eastern half of the United States, this area and in particular the rivers and outstanding formations are still relatively unspoiled. The whole setting, in fact, retains an unusual feeling of naturalness and, in places, the quality of wilderness.

This combination of characteristics related as it is to attractive water, a matter of increasing interest, is clearly a resource of value to the country at large. It is judged to be of national significance—a complex not now represented in the national park system. Preservation of these values in public ownership while the opportunity still exists would be in the public interest.

This area now, by modern standards, is within a comfortable 1 day's drive of over 20 million people. It represents a resource rapidly being lost and increasingly needed. It could represent a wonderful heritage for added millions in future generations.

THE PROPOSAL

To preserve outstanding portions of this area, it is proposed that an Ozark Rivers National Monument be established as a part of the national park system.

The objective, under the 1916 act establishing the National Park Service, would be preservation for the public enjoyment of this and future generations, of scenic, scientific, and historical values which are sufficiently outstanding or unique to be of interest to the country as a whole.

The proposal contemplates setting aside in public ownership as one administrative unit approximately 113,000 acres. These are disposed generally as narrow strips along the Current and Eleven Point Rivers and Jacks Fork, with minor extensions to include important features. One centrally located larger block incorporates a fine section of typical Ozark County. It recognizes preservation as basic and proposes a zoned approach, to that end, for public use, management, and development.

Certain planning considerations stand out in arriving at the basic proposal and in considering preliminary ideas for public use and development.

The still relatively unspoiled character of the area, the definite feeling of wilderness in part, and the unusual diversity of outstanding natural features, including some of the finest remaining free-flowing streams, lead straight to preservation as the important consideration.

In determining what should be included, the rivers themselves as the physical, emotional, and recreational backbone of the area carry major weight. Also, by the very nature of geologic processes, springs, caves, rock formations, even the better scenery are concentrated along the major streams. As a result relatively narrow strips can be proposed—sufficient only to protect important values and features and minimize undesirable encroachments. One larger central block to round out the picture of typical Ozark hills is the only exception found necessary. Breaks are left at Van Buren and Eminence to allow elbow room for growth. Montauk, Round Spring, Alley Spring, and Big Spring State Parks, though contiguous to the monument, are not included. These would continue to play a complementary part in providing for public enjoyment and in preserving fine areas and features.

There is increasing need to consider quality of experience in providing for the public's likes and interests. The existing situation, natural and manmade, points to the logic of a zoned planning approach. The distribution of natural values, the degree to which they now remain unspoiled, the ability of the rivers to stand public use without damage to their particular qualities, the distribution of population, towns and highways, all support the soundness of this conclusion. Jacks Fork and portions of the upper Current River, for example, have the wild, intimate,

and fragile qualities suitable for wilderness-type experience with a minimum of intrusive development. Between Van Buren and Doniphan, in contrast, the Current, grown much larger though still very attractive, could absorb greater and more diversified use and development.

"Floating" and "float fishing" will continue to have a special appeal for some. To a degree it will set a pattern of relaxed and pleasant river use.

Public ownership of lands within the national monument is found to be essential to this proposal. This is based on the need to protect important features, exercise reasonable scenic control, guard against possible encroachments, and provide the type and quality of experience the public should have a right to expect now and in the future.

Consistent with National Park Service policy, anticipated developments within the area would be limited to those required for access, for the various types of activity, for a fuller understanding and enjoyment by the public through interpretive programs, plus those needed for control and management. It is anticipated that normal overnight, eating, and shopping facilities would be provided through private enterprise in the nearby communities.

The plan

Shown on the accompanying plate is a preliminary land-use and development plan for the proposed national monument. While the boundaries are tentative, they define the shape and size of an area on the Current and Eleven Point Rivers necessary for the protection of natural values, and adequate for anticipated development.

The proposed monument comprises approximately 113,000 acres of land. Of this, about 16 percent is now owned by either the State or Federal Governments; the other 84 percent is in private ownership. About 190 miles of river are included. Of this, 117 miles would be on the Current—84 miles of it in one continuous stretch—39 miles on Jacks Fork and 34 miles on the Eleven Point. Within these boundaries, would be 13 named caves, 11 interesting geological sites, more than 40 archeological sites, 4 of which may prove important, a number of fine ecological sites, and a great many springs. Six springs, having a flow of 65 million gallons or more per day, are included within the proposed monument boundaries or in adjacent State parks. There are 13 others of considerable size and many smaller ones.

The selection and development of areas for public use and enjoyment will be governed by a number of factors. As tentatively designated on the accompanying drawings, weight was given primarily to the locations of important points of interest—some to be developed for public use, others to be left undisturbed—to river use which might normally be expected to develop, and to an analysis of the distribution of areas which would affect zoning for preservation and use.

As a general pattern, developed areas are distributed about 15 to 20 miles apart. A somewhat heavier concentration is suggested in the central Cardareva section where, because of its location, size and variety of attractions, heavier public use and more diversified development would be logical.

These developed areas would vary in size and scope. Each would probably contain interpretive facilities, campgrounds, picnic areas, boating facilities, and possibly concessions for meals and supplies. Each would probably be served by trails for hiking and perhaps horseback riding. One, perhaps at centrally located Owls Bend, might represent the center for the interpretive program and contain, therefore, a visitor center plus necessary administrative facilities.

Additional access points, in effect minor developed areas in most cases, are scattered generally with an average spacing of 7 or 8 miles. In the more primitive sections, they would be farther apart and with less refinement. In the more heavily used sections, they might be closer together and with simple development providing access, parking, and perhaps for boat landing and picnicking. They would serve also as access to trail systems.

For convenience, more detailed discussion of the plan follows, by section, as covered in the accompanying drawings.

Upper Current Section

This section at the headwaters of the Current River would contain approximately 21,000 acres. It, together with Cardareva section, would provide an uninterrupted publicly owned 90 miles of river from Montauk State Park to a point near Van Buren on the Current and up Jacks Fork to a point near Eminence. The preservation of outstanding scenery and a fine feeling of wilderness would be paramount here. Developments would be kept few and simple. This section incorporates also a number of very fine features—Round Spring Cavern, Ashley Cave, Welch Spring, the Sunkland and Sink, Devils Well, and the Sinks. Each of these would be points of public interest and would require access by trail or road and at least minor interpretive developments. Existing Montauk and Round Spring State Parks, not part of the monument but contiguous to it, would continue to serve the public as major developed areas. Additional development is suggested at Akers Ferry and access at Boyds Creek, possibly with minor facilities.

Cardareva Section

This centrally located section contains the largest block of land for inclusion in the proposed monument, amounting to some 49,800 acres. Here Jacks Fork joins the Current, offering a natural center for river boating. Here too are a variety of interesting sites and the space and topography suitable for more concentrated use—Blue Spring, Rocky Falls, Cardareva Mountain, Paint Rock, Big Creek, and Chilton Creek. Tentatively it appears that major use and development might be at Owls Bend, serving as interpretive and administrative center for the monument. Junction Ferry and Blue Spring are also suggested for development. From these sites also would radiate major trail systems along the rivers and through the wooded hills themselves. Access and minor development as needed would serve the other points of interest—possibly at Big Creek, Cardareva, Paint Rock, and Chilton Creek.

Lower Current Section

Below Van Buren, the Current River broadens into a wider stream and the valley through which it flows for 32 miles takes on a more open character though still highly attractive. For much of this distance, the proposed monument area lies within Clark National Forest in an area where the U.S. Forest Service, recognizing its value for recreation, has zoned it for that purpose. Running between Van Buren and Doniphan as it does, this section offers a natural opportunity for float or boat trips readily accessible and of a length which should prove popular. Because of these characteristics, the river could stand more public use than in the upper reaches and, as a result, would serve in part to relieve pressures on those more fragile and primitive areas. One of the major and well-developed State parks, Big Spring, lies at the northern end of this section and would continue to serve as a major center for public use and enjoyment. An additional development area is suggested near the southern end of the section in the vicinity of float camp No. 7, now developed and managed by the U.S. Forest Service. A third area might be located at Phillips Bay. An existing float camp nearby provides limited picnic and camping facilities. These several areas, plus access and possibly minor development at Cave Spring, Colvin Bay, and Dark Bay would provide a flexible variety of recreation opportunities for large numbers of people.

Jacks Fork Section

Approximately 39 miles of river in 17,160 acres would be contained in this section. Jacks Fork, a branch of the Current River, is probably the wildest and least accessible country within the proposed monument and includes outstanding scenery and a number of fine features. Development in this section should be limited to providing a minimum number of access points necessary for river use plus a few minor-day use areas. In fact, no development of any great consequence would be considered above Alley Spring State Park. The latter will continue to provide for a variety of activities along with preservation of Alley Spring and related Red Mill, now restored. Jam Up Cave, one of the most striking and unique features of the monument, would be a point of considerable public interest. Access and interpretive aids would be provided to make it available to the public. Minor developments are suggested for Blue Spring and near the Highway 17 crossing. Access is suggested in the vicinity of Rymer Ranch-Bunker Hill and at one other point which might serve as a float camp. Preservation of the fragile wilderness quality of this stream and its beautiful setting would be paramount in planning for both public use and facilities.

Eleven Point Section

This section is somewhat separated from the other four, lying in a different drainage which joins the Black River farther south in Arkansas. Upstream, it is quite similar to the Jacks Fork and upper Current and of nearly the same quality. Approximately 34 miles of river and 14,000 acres of land are included extending from a point several miles above Greer Spring downstream to Highway 142. Roughly two-thirds, by river miles, lies within Clark National Forest. No existing facilities for public use have been provided; however, as in the case of the lower Current, the U.S. Forest Service has zoned a stretch along the river for recreation, recognizing that as the primary value.

The Eleven Point section includes a number of interesting spots and features—extremely attractive Greer Spring and Mill, historically interesting Turners Mill about midpoint, and Blue Spring at the southern end not far from the Arkansas line. Development is suggested at Turners Mill because of its location and the surrounding open and relatively level land. The general locations of Greer and Blue Springs also appear logical for development. Minor areas where access and simple development may be desirable, primarily in connection with float trips, include Panther Spring Hollow, a location near Riverton where U.S. Highway 160 crosses the river, and one additional float campsite. Indian mounds at Blue Spring and Pigman Ranch may prove to be of considerable archeological significance. On further investigation, provision of onsite interpretive facilities where this story can be told may be desirable.

Effect on other public areas

The national monument as proposed includes or adjoins certain lands now administered by State agencies or the U.S. Forest Service.

Portions of the lower Current and Eleven Point sections lie within the boundary of Clark National Forest. A total of approximately 2,600 acres in these sections are in Federal ownership and administered by the U.S. Forest Service. Located as they are along or near the rivers, the Forest Service recently gave recognition to recreation as the dominant value of these lands. Under this designation, or zoning, no timber harvest for

commercial purposes would be allowed within 1,000 feet of the river bank.

The corner of Clark National Forest also overlaps the proposed monument along the upper Current; however, no lands in Federal ownership and administered by the Forest Service are involved.

No State park land is included within the proposed boundary; however, Round Spring State Park is surrounded by the monument and three others are contiguous to it—Big Spring, Alley Spring, and Montauk. The Federal and State areas, in this situation, should complement and supplement each other to good advantage in the public interest. Cooperative planning in their respective development, management, and interpretive programs would effectively further this opportunity.

The State conservation commission would be more affected, in a sense, since approximately 15,000 acres of lands they administer are included. These are managed for forestry purposes and comprise a crazy quilt pattern of scattered tracts in the Cardareva section. Peck Wildlife Management Area lies just outside the proposed boundary south of the central Cardareva section. Of the Deer Run Refuge, now administered by the commission for forest management purposes, approximately 200 acres bordering the Current River lies within the proposed monument.

Economic effect

The Current-Eleven Point River country was settled largely in the third and fourth decades of the 19th century, mostly by people of English ancestry from the mountain regions of Kentucky, Tennessee, Virginia, and North Carolina. They hunted, fished, and raised corn on small tracts of land in the river valleys, and were undisturbed by the main stream of westward migration which bypassed them. During the Civil War, the people were divided in their loyalties. As a result, their settlements were plundered by guerilla bands and by Union and Confederate forces alike.

After the eastern forests were depleted, lumber interests turned to the Ozarks for new and untouched sources of timber. Railroads were built, great lumber mills established and the exploitation of the last frontier in Missouri began. Lumbering flourished from 1875 to 1915, but by 1919 the land had been so cut over that the Ozark lumber industry died and with it the economy it supported.

Some people then turned to cutting immature trees and farming the hill lands. Neither of these provided more than mere subsistence. Hill farming was unsuccessful because the topsoil soon eroded away after cultivation, leaving gravelly, droughty soil low in nutrients. Even now, farming is difficult on the bottomlands because mechanical farming equipment just can't be used efficiently in the narrow valleys. As farming becomes more mechanized, the farmers in the Current and Eleven Point River Valleys find themselves in an increasingly poor competitive position. In 1955, the cash income of 40 percent of farm families in this area was less than $1,000. Even so, agriculture is still the major source of income for Carter, Oregon, Ripley, and Shannon Counties. Data from the 1950 census show that the median family income in this area is only 42 percent of the average for the State of Missouri.

Forests cover approximately three-fourths of the land within Carter, Oregon, Ripley, and Shannon Counties. Their quality is somewhat less in the Ozarks than in the remainder of the State, primarily because of the lower productivity of land. Since the establishment of Clark National Forest in 1934 and the State conservation commission's division of forestry in 1938, gradual rehabilitation of the forest has been occurring. As a result of new practices, annual growth rate in the Clark National Forest has increased from 36 board feet per acre in 1946 to 93 in 1956. Cutting timber on a sustained yield basis from large land tracts may be profitable; however, the income farmers get from timber and timber products is negligible. Less than 3 percent of the total farm income in the area is derived from the sale of forest products.

Up to the present time, very little industry has moved into this area. In June 1959, Carter, Oregon, Ripley, and Shannon Counties, containing 97 percent of the monument area, had a total of 27 firms employing 585 persons. Employment opportunities in industry appear limited at the present time.

The population peak for this area occurred in 1910 during the lumber boom. Since then, there has been a steady decline except during the depression years when some unemployed city workers returned to their former homes in the Ozarks. The population now is only about 70 percent of what it was 50 years ago. Also relatively few people of working age live here, having gone to places where employment opportunities are better.

The National Park Service secured the services of the University of Missouri to make an economic study of the current Eleven Point River country and to determine the effect of the proposed national monument upon the local and regional economies. This study was based upon certain premises such as size of area, number of visitors, and time required for development.

Major conclusions resulting from the university study are that 5 years after establishment of proposed monument, assuming adequate development, over 800,000 additional visitors would be attracted to the region annually and they would spend $5,500,000; that new motels, hotels, and other tourist facilities costing $33 million would be required to accommodate the increased number of visitors; and that $10 million of assessed value would be added to the county tax rolls assuming current assessments on urban property in the area are about 30 percent of actual value.

Current assessed valuation of lands within the proposed monument is estimated at $1,300,000. The conclusions of the university, therefore, indicate the tax base for the counties involved would gain approximately $8,700,000, and the annual tax return might increase by $300,000 if the national monument were established.

These estimates appear reasonable after reviewing information developed by the University of Wyoming for the Jackson Hole Chamber of Commerce. It reveals that Teton County depends in large part upon tourists who began visiting in great numbers after Grand Teton National Park was enlarged. Acquisition of lands for the National Park did not destroy the tax base; in fact, additional tourist facilities more than made up for the loss of park lands from the tax rolls.

Lands proposed for inclusion in the monument total approximately 113,000 acres. Of these, 84 percent, or about 95,400 acres are in private ownership. Appraisal sampling indicates a considerable variation in cost. Considerations such as severance values add to the difficulty in making close estimates at this stage. In round figures, a total in the neighborhood of $5,500,000 might be anticipated.

Related planning recommendations

The national monument contemplates one administrative unit and proposes no administrative jurisdiction outside its boundaries. At the same time, obviously, the monument would play one part in the total public land management programs, Federal, State, and local, operating in this general region. Collectively, they have a common goal in sound stewardship of public interests. Clearly therefore, cooperation could pay dividends.

Specifically, for example, at Eminence, Van Buren, and above Doniphan, sections of the river were purposely excluded from the monument proposal to provide space for the growth of towns. In these excluded sections, it is recommended that, through enforced local zoning, river frontage be protected from unsightly or otherwise undesirable developments and from land practices which might cause erosion.

Anticipating increased tourist travel through this region and public enjoyment of travel through the Ozarks, special roadside treatment is considered desirable. It is recommended therefore that the State highway department and other public agencies administering land adjacent to highways give consideration to certain roads connecting units of the monument—State Route 19 between a point 10 miles north of Round Spring State Park and the town of Alton; State Route 106 from a point 5 miles west of Alley Spring State Park to a point 5 miles east of the proposed monument; and U.S. Highway 60 between its intersections with State Highways 17 and 21. This could take the form of widening rights-of-way to minimize unsightly developments, clearing for vista purposes and provision of overlooks at certain vantage points.

CONGRESSMAN ICHORD OF MISSOURI AND SENATORS SYMINGTON AND LONG OF MISSOURI INTRODUCE OZARK RIVERS BILL

WASHINGTON, March 19.—Congressman RICHARD H. ICHORD, of the Eighth District, and Senators STUART SYMINGTON and EDWARD V. LONG today announced introduction of a bill to establish the Ozark Rivers National Monument in southern Missouri. Identical legislation will be introduced in the House and Senate tomorrow.

The Ozark Rivers National Monument would, under the terms of the bill, be comprised of not more than 113,000 acres along the 190 miles of Current, Eleven Point and Jack's Fork Rivers, in Carter, Dent, Howell, Oregon, Ripley, Shannon, and Texas Counties.

The monument will be administered by the Secretary of the Interior "for the purpose of conserving and interpreting unique scenic and other natural values and objects of historic interest," including preservation of the rivers as freeflowing streams.

Sixteen percent of the land in the proposed Ozark Rivers National Monument is now publicly owned, with administration divided between the Missouri Conservation Commission and the U.S. Forest Service. The remainder is privately owned.

An economic survey by the University of Missouri estimated that within 5 years of the establishment of the monument, with adequate development, annual tourist expenditures in the area would increase by $5,500,000.

The Park Service estimated that assessed valuation on local tax rolls in the seven-county area would show a net increase by $8,700,000 in the same 5-year period and the annual tax return would increase by $300,000.

ICHORD, SYMINGTON, and LONG issued the following joint statement:

"We believe establishment of the Ozark Rivers National Monument, which would be authorized by this bill, will mark an important step forward for our State and Nation, with significant growth and economic development for the Ozarks.

"Our purpose is twofold: (1) To preserve in its natural state one of the most beautiful sections of our country, and (2) to develop, in the most effective way, the economy of the Ozark Rivers area.

"With well-planned, intelligent development, the Ozark Rivers section of Missouri can become one of the finest scenic and recreational areas in our country.

"The bill is the result of the joint consultation and exchange of views among the three of us, local and State officials, and citizens of the area involved.

"The Ozark rivers area is one of the great natural scenic and recreation assets of Missouri. Establishment of a national monument, under our bill, will assure its preservation and development for the enjoyment of all Americans."

A section-by-section outline of the Ichord-Symington-Long bill is as follows:

Section (1) authorizes establishment of the Ozark Rivers National Monument, consisting of not more than 113,000 acres along the Current, Eleven Point, and Jack's Fork Rivers. No land within 2 miles of Eminence, Van Buren, and Doniphan, Mo., is to be within the monument.

Section (2) authorizes the Secretary of the Interior to acquire lands for establishment of the monument. Limitations on the power of the Secretary are as follows:

(a) If the Secretary desires to acquire a part of a farm of less than 500 acres, lying along the river banks, he must acquire the entire farm, unless the owner agrees to the acquisition of less.

(b) Lands held by the State must be acquired with the consent of the State.

Section (3) allows an owner of property within the national monument to retain the right to use such land for noncommercial residential purposes for the life of the owner or his spouse.

Section (4) provides that the Secretary of the Interior shall establish the monument whenever sufficient lands have been acquired to provide an administrable unit.

Section (5) compensates for tax losses sustained by the counties in Missouri where land is taken off tax rolls for establishment of the monument. Payments in lieu of taxes are to be made for a 2-year period.

Section (6) provides for cooperation with the State of Missouri and local authorities in evolving plans for development of the monument. It also authorizes hunting and fishing on lands within the monument under regulations to be prescribed by the Secretary of the Interior, in consultation with such representatives of the State of Missouri as the conservation commission and the State park department.

Section (7) establishes the Ozark Rivers National Monument Commission, composed of 11 members appointed for 2-year terms. Seven members are to be appointed by the Secretary of the Interior on recommendation from each county court in the seven counties where the monument is to be established (Carter, Dent, Howell, Oregon, Ripley, Shannon, and Texas); three members to be appointed from recommendations made by the Governor of Missouri; and one member to be designated by the Secretary of the Interior.

The commission is to consult with and render advice to the Secretary of the Interior on matters relating to the monument.

Section (9) authorizes the appropriation of $6 million to carry out the provisions of the act.

Sections (8) and (10) are technical provisions on administration and constitutionality.

HOUSE RESOLUTION 19

Memorializing the Congress of the United States to establish a national recreational area on the Current and Eleven Point Rivers as proposed by the National Park Service and the U.S. Forest Service and to declare the Current and Eleven Point Rivers national streams and to provide for the acquisition of the necessary land without exercising the power of eminent domain.

Whereas there exists, in the Valleys of the Current and Eleven Point Rivers in Missouri, five springs of the first magnitude and many hundreds of smaller springs which provide a constant supply of clear, cold, sparkling water for these rivers; and

Whereas the phenomenon of such large volumes of clear, cold water issuing as springs amid rustic and picturesque surroundings, make places of wonder and rare natural beauty, which offer a lure and inspiration to those who come to view these extraordinary manifestations of nature, and to play, rest, and to refresh themselves in a peaceful and inspiring environment; and

Whereas these springs make a valuable contribution to fishlife in these streams by providing favorable sites for fish hatcheries, and by discharging large quantities of crystal clear water, they become the controlling factor favorable to the propagation and maintenance of game fish and other aquatic life natural to both streams; and

Whereas the State of Missouri and the U.S. Forest Service own vast acreage adjacent to these streams suitable for recreational development and other improvements for the public use; and

Whereas the Current and Eleven Point Rivers are nationally famous for their *John Boat* float fishing trips through this Ozark scenic wonderland; and

Whereas the Arkansas-White-Red Basins interagency committee, recognizing the unique natural qualities of the Current and Eleven Point Rivers of Missouri, and their importance to present and future generations, recommended that appropriate State and Federal agencies prepare a plan to preserve and enhance the natural qualities of this region; and

Whereas a plan was prepared by the National Park Service in cooperation with Missouri State agencies, and was published by the Division of Resources and Development, to preserve and develop the Current and Eleven Point River country, without the exercise of the power of eminent domain; and

Whereas the U.S. Forest Service has indicated a similar interest in the preservation and development of lands adjacent to these streams by recommending the creation of a national forest recreation area in a national recreation plan prepared and adopted in 1936: Now, therefore, be it

Resolved, That the Missouri House of Representatives, in its 70th General Assembly, request of the Congress of the United States, that it establish a national recreation area along the Current and Eleven Point Rivers of Missouri, and that it declare the Current and Eleven Point Rivers as national streams; and be it further

Resolved, That this assembly request that the Congress enact the necessary legislation providing for the purchase and development of the national recreation area as heretofore described, lest the great scenic and recreational values of the Current and Eleven Point Rivers in Missouri, be lost forever to public use by manmade encroachments, and be it further

Resolved, That the chief clerk of the house be instructed to send copies of this memorial to the President of the U.S. Senate, to the Speaker of the U.S. House of Representatives, and to the Missouri Members of the House and Senate.

Mr. LONG of Missouri. Mr. President, I am happy to join with the senior Senator from Missouri in introducing a bill to establish the Ozark River National Monument in southern Missouri.

As Senator SYMINGTON has said, the Ozark River National Monument would be comprised of not more than 113,000 acres along the 190 miles of Current, Eleven Point and Jack's Fork Rivers in Carter, Dent, Howell, Oregon, Ripley, Shannon, and Texas Counties.

I would like to further point out that 16 percent of the land in the proposed Ozark River National Monument is now publicly owned, with the administration divided between the Missouri Conservation Commission and the U.S. Forest Service. The remainder is privately owned.

In addition to preserving the natural state of one of the most beautiful sections of our country, the establishment of the monument will play a big part in the economy of the Ozark River area.

The University of Missouri has estimated that within 5 years of the estabnet increase of $8,700,000 and the annual tourist expenditures in the area would increase by $5½ million. During the same 5-year period, the Park Service estimated that assessed valuation on local tax rolls in the area would show a net increase of $8,700,000 and the annual tax return would increase by $300,000.

But instead of talking in figures, let me emphasize the scenic value of the Ozark River section. This section of Missouri is one of the great natural scenic and recreation assets of our Nation. Establishment of a national monument will assure its preservation and development for the enjoyment of all Americans.

PROPOSED ANTICRIME LEGISLATION

Mr. KEATING. Mr. President, in my opinion, there are too many legislative gaps in our efforts to mount a concerted offensive against organized crime. Despite repeated pleas and overwhelming evidence of need, Congress has failed to respond to the necessity of modernizing our anticrime laws. No serious domestic problem has been neglected more than the constantly increasing menace of crime.

Since this session began I have introduced a number of bills designed to close this Federal law enforcement gap. The most important of these bills is one to punish the use of interstate commerce in furtherance of organized crime. The Department of Justice has been asked for its comments on this and some of the other measures I have proposed.

Today I want to introduce a number of other bills to deal with specific problems which have arisen in connection with our efforts to combat the underworld.

First. The first of these is a general immunity statute permitting the Attorney General with the approval of a court to compel the production of incriminating evidence in exchange for a promise of immunity from prosecution.

Under the present provisions of section 3486(c) of title 18, the Attorney General can only obtain immunity for witnesses in cases involving the national security. My proposal would broaden the provisions of the present law so that in any case or proceeding before a grand jury or court of the United States the U.S. attorney on approval by the Attorney General can apply for an order to compel a witness to testify. The provisions of the present law granting a witness immunity from prosecution after

giving the compelled testimony would be applicable to the broadened scope of my proposal.

In my opinion, this additional authority is essential if we are to successfully combat all of the nefarious activities of national criminal syndicates.

Such a law would have been of tremendous assistance in the prosecution of the participants at the infamous Apalachin meeting held in my State. If the U.S. attorney had been able to grant immunity to some of these underworld lords, there might have been a different outcome to the Apalachin episode. There are many other cases where the grant of immunity would have aided in the apprehension and conviction of racketeers and kingpins of the criminal world.

Two. My second bill would permit an appeal by the Government from lower court decisions suppressing the introduction of evidence. The absence of such a right of appeal under present court rulings has enabled many defendants to escape a trial on the merits of their alleged crimes. The disposition of such motions is almost always based on a question of law before the defendant actually is placed in jeopardy. Appellate review of such decisions before the defendant is permitted to go scot free strikes me as entirely reasonable.

The trial of cases should not be conducted as a game of wits. If the defendant's constitutional rights have been violated then the community must suffer the consequences. But the community certainly has the right to insist that such a determination be made by a court of appeals in controversial cases.

Three. My third bill would establish degrees of perjury under the Federal criminal code. This would make the perjury law applicable to all cases of false swearing in courts or before congressional committees. I believe that perjury should be more severely punished when the false testimony goes to a material issue. But I do not believe that the absence of materiality should relieve a witness from all prosecution for false swearing. This bill would cure the present condition by continuing the felony provisions for giving false testimony on a material issue by adding a misdemeanor penalty for other cases of lying before duly instituted tribunals.

No person who lies under oath should go completely unpunished. Such conduct cannot be condoned without causing serious injury to the integrity and prestige of our trial and hearing processes. This legislation would preclude such challenges to lawful inquiries.

Fourth. My bill would broaden the scope of the existing Fugitive Felon Law—title 18, United States Code, section 1073—by making it applicable to all felonies.

I know of no reason for precluding Federal assistance in any case of flight across State lines. This is a commonsense expansion of a cooperative Federal-State law enforcement activity and it would be very useful in bringing fugitives from justice to trial.

Mr. President, these measures would greatly enhance the effectiveness of Federal law enforcement. They would remove unjustified impediments to the fight against crime without in any way violating constitutional rights.

A concerted drive against crime in America is grievously overdue. There are signs that our official agencies are awakening to the challenge. The Attorney General has indicated that he will recommend new crime legislation in a couple of weeks. This is a job that needs the right tools. Congress has the duty to act, and to act promptly, against this daily threat to the security and welfare of the public.

I hope that the Senate Committee on the Judiciary will bring the record up to date in a new full-scale probe against organized crime. Exposure is not enough, however. The time for action is upon us, and we must not close our eyes to our obligations.

I hope that there will be early hearings on my proposals.

Mr. President, I introduce the bills and request that they be appropriately referred.

I ask unanimous consent that the text of these bills be printed at this point in the RECORD.

The VICE PRESIDENT. The bills will be received and appropriately referred; and, without objection, the bills will be printed in the RECORD.

The bills introduced by Mr. KEATING were received, read twice by their titles, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

S. 1383. A bill to amend section 1073 of title 18, United States Code, the Fugitive Felon Act.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first paragraph of section 1073 of title 18 of the United States Code is amended to read as follows:

"Whoever moves or travels in interstate or foreign commerce with intent either (1) to avoid prosecution, or custody or confinement after conviction, under the laws of the place from which he flees, for a crime, or an attempt to commit a crime, punishable by death or imprisonment for a term exceeding one year under the laws of the place from which the fugitive flees, or (2) to avoid giving testimony in any criminal proceedings in such place in which the commission of an offense punishable by imprisonment in a penitentiary is charged, shall be fined not more than $5,000 or imprisoned not more than five years, or both."

S. 1384. A bill to amend section 3731 of title 18 of the United States Code relating to appeals by the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3731 of title 18 of the United States Code is amended by inserting after the fifth paragraph of such section (relating to appeal by the United States from the district courts to a court of appeals) the following new paragraph:

"From a decision sustaining a motion to suppress evidence."

S. 1385. A bill to amend section 1621 of title 18 of the United States Code to provide for degrees of perjury and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1621 of title 18 of the United States Code is amended to read as follows:

"(a) Whoever, having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed, is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true, is guilty of perjury in the first degree, and shall except as otherwise expressly provided by law, be fined not more than $2,000 or imprisoned not more than five years, or both.

"(b) Whoever, having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed, is true, willfully and contrary to such oath states or subscribes any matter which he does not believe to be true, is guilty of perjury in the second degree, and shall be fined not more than $500 or imprisoned not more than one year, or both."

S. 1386. A bill to amend section 3486(c) of title 18, United States Code.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3486(c) of title 18, United States Code, is amended to read as follows:

"(c) Whenever in the judgment of a United States attorney the testimony of any witness, or the production of books, papers, or other evidence by any witness, in any case or proceeding before any grand jury or court of the United States is necessary to the public interest, he upon the approval of the Attorney General, shall make application to the court that the witness shall be instructed to testify or produce evidence subject to the provisions of this section, and upon order of the court such witness shall not be excused from testifying or from producing books, papers, or other evidence on the ground that the testimony or evidence required of him may tend to incriminate him or subject him to a penalty or forfeiture. But no such witness shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he is compelled, after having claimed his privilege against self-incrimination, to testify or produce evidence, nor shall testimony so compelled to be used as evidence in any criminal proceeding (except prosecution described in subsection (d) hereof) against him in any court."

THE ON-SITE PICKETING ISSUE

Mr. MORSE. Mr. President, last year the Building and Construction Trades Department of the AFL–CIO published an explanation of the so-called on-site picketing issue.

The explanation reads as follows:

It has been generally recognized that the Taft-Hartley Act requires amendment in those areas where the experience of the last 12 years shows need for improvement. The administration of the act in the building and construction industry has disclosed that many of the provisions of the act, which were drafted with the facts of manufacturing and similar industry in mind, do not fit the complex pattern of the building and construction industry.

A principal defect of the act is the inequitable restriction of the economic activity of building and construction unions at the site of building and construction jobs. There

is a solid legislative history dating back to 1954 supporting proposals to correct this injustice by reversing the rule laid down in the case of *Denver Building and Construction Trades Council* (341 U.S. 675).

During the consideration of the Labor-Management Reporting and Disclosure Act of 1959 in the last session of Congress, the House Committee on Education and Labor reported the proposal favorably. The conference committee discussed fully the merits of the reversal of the Denver Building Trades rule but did not include the proposal in the conference report only because a procedural point of order was raised under the House rules. This omission from the conference report was accompanied by a commitment on the part of the majority and minority leaders of the Senate and the Speaker and minority leader of the House that S. 2643 and H.R. 9070 would come to the floor of the House and Senate in the early part of 1960. This commitment was spread on the CONGRESSIONAL RECORD, volume 105, part 14, page 17901, by Senator Kennedy.

The justification for this legislative proposal can be described simply and briefly: The employees of a factory can engage in peaceful picketing in a labor dispute. Construction workers are effectively denied this basic freedom because of a technicality in the law which did not take into account the special facts of the building and construction industry. Section 8(b)(4) of the act forbids, among other things, concerted economic activity by a union where an object thereof is "forcing or requiring any employer to cease doing business with any other person." The typical job in the building and construction industry is not carried forward by a single employer with different departments for different types of work. There are numerous contractors on the single jobsite performing the different types of work required to complete the building or project. Consequently, if the electricians' union pickets a building jobsite because of a dispute with the electrical contractor and the carpenters employed by another contractor concertedly refuse to cross the picket line, it has been held, in the Denver Building Trades case, that section 8(b)(4) is violated because the picketing is said to have as an object the inducement of the contractors on the jobsite to cease doing business with each other. Yet the employees in the electrical department of a factory can picket the factory site, even though the carpenters employed in another department concertedly refuse to cross the picket line. Picketing at a construction jobsite does not constitute a true secondary boycott.

President Eisenhower first recommended the reversal of the Denver Building Trades rule in his message of January 11, 1954. The President stated:

"The true secondary boycott is indefensible and must not be permitted. The act must not, however, prohibit legitimate concerted activities against other than innocent parties. I recommend that the act be clarified by making it explicit that concerted action against an employer on a construction project who, together with other employers, is engaged in work on the site of the project, will not be treated as a secondary boycott."

President Eisenhower repeated this recommendation to reverse the Denver Building Trades rule in his message of January 23, 1958. He urged the Congress to remove certain ambiguities and inequities in the Taft-Hartley Act, including the amendment of "the secondary boycott provisions to make it clear that they do not prevent activity against secondary employers engaged in work on a construction project with the primary employer."

A similar recommendation was made in the Presidential message of January 28, 1959.

Secretary of Labor Mitchell reaffirmed the position of the administration in support of the proposal to recommend the reversal of the Denver Building Trades rule in his telegram of August 31, 1959, addressed to President Gray of the building and construction trades department and in the Secretary's press conference of January 14, 1960.

The broad language of section 8(b)(4) is not consistent with the economic facts of the building and construction industry. These facts have been described in Senate Report No. 1211, 83d Congress, 2d session (1954), as follows:

"Where two or more employers are engaged in operations on the site of a single construction project, each performing some phase of the work necessary for the completion of the project, be it a building, a bridge, a tunnel, or some other structure it cannot be justifiably maintained that they stand in a strictly neutral relationship to each other. Rather, despite their existence as legally independent entities, they must be regarded realistically as partners in a single joint or common enterprise in which the individual interests of each are necessarily dependent on the success of the undertaking as a whole. In such a situation the committee believes that a labor dispute originating between one of these employers and his employees in fact constitutes a dispute with all of the employers just as if all were copartners in the legal sense in a single business enterprise."

The above report of Senate Committee on Labor and Public Welfare, which was filed by Chairman Alexander Smith, of New Jersey, also recommended the reversal of the Denver Building Trades rule.

There have been a number of hearings before Senate and House Labor Committees on this subject. The representatives of the 3 million building tradesmen in the United States have come to Washington each year to petition the Congress for relief. Their case for relief has been presented on the merits of the issue with supporting facts and reasons. The quotations set forth above show the wide measure of agreement that the case has been proved. It is respectfully urged that relief should no longer be denied and that S. 2643 and H.R. 9070 should be enacted.

Because no action was taken last year on this matter, despite pledges of support from both political parties, I am reintroducing the on-site picketing bill, and ask that it be appropriately referred.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1387) to amend section 8(b)(4) of the National Labor Relations Act, as amended, introduced by Mr. MORSE was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

POSTHUMOUS AWARD OF MEDAL TO DR. THOMAS ANTHONY DOOLEY III—ADDITIONAL COSPONSORS OF JOINT RESOLUTION

Under authority of the order of the Senate of March 10, 1961, the names of Senators SYMINGTON, PELL, LONG of Missouri, and CARROLL were added as additional cosponsors of the joint resolution (S.J. Res. 64) to authorize the President of the United States to award posthumously a medal to Dr. Thomas Anthony Dooley III, introduced by Mr. HUMPHREY on March 10, 1961.

NOTICE OF HEARING ON NOMINATIONS OF THEODORE JAFFE, AND EDWARD D. RE, TO BE MEMBERS OF FOREIGN CLAIMS SETTLEMENT COMMISSION OF THE UNITED STATES

Mr. JOHNSTON. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Tuesday, March 28, 1961, at 10:30 a.m., in room 2300, New Senate Office Building, on the nominations of Theodore Jaffe, of Rhode Island, and Edward D. Re, of New York, to be members of the Foreign Claims Settlement Commission of the United States.

At the indicated time and place persons interested in the hearings may make such representations as may be pertinent.

The subcommittee consists of the Senator from Mississippi [Mr. EASTLAND], as chairman, the Senator from South Carolina [Mr. JOHNSTON], and the Senator from Nebraska [Mr. HRUSKA].

NOTICE CONCERNING CERTAIN NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. JOHNSTON. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Robert E. Maxwell, of West Virginia, to be U.S. attorney, northern district of West Virginia, for a term of 4 years, vice Albert M. Morgan;

D. Jeff Lance, of Missouri, to be U.S. attorney, for the eastern district of Missouri, for a term of 4 years, vice William H. Webster, resigned; and

F. Russell Millin, of Missouri, to be U.S. attorney, for the western district of Missouri, for a term of 4 years, vice Edward L. Scheufler.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Monday, March 27, 1961, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearings which may be scheduled.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. ROBERTSON:

Brief description of the principal displays of the numismatic collection, prepared by Dr. Vladimir Clain-Stefanelli, curator of numismatics of the Smithsonian Institution.

TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACT OF 1961—TECHNICAL AMENDMENTS

Mr. BYRD of Virginia. Mr. President, during the consideration of the Tempo-

rary Extended Unemployment Compensation Act of 1961, House bill 4806, on Thursday, March 16, 1961, the Senate adopted an amendment, proposed by the Senator from Delaware [Mr. WILLIAMS], changing the effective date for the four-tenths of 1 percent tax increase, so as to apply with respect to wages paid in the calendar years 1961 and 1962. Through inadvertence, four corresponding changes were omitted in the draft of the amendment sent to the desk. I ask unanimous consent that the bill be further amended by including in the Senate engrossed amendments those four items, so as to make the bill uniform and consistent.

The VICE PRESIDENT. Is there objection to the request of the Senator from Virginia?

Mr. KUCHEL. Mr. President, reserving the right to object—although I shall not object—let the record show that members of the minority on the committee are in complete agreement with what the distinguished chairman of the committee proposes.

Mr. BYRD of Virginia. They are merely technical changes.

The VICE PRESIDENT. Is there objection? The Chair hears none. Without objection, it is so ordered.

GEN. CARLOS ROMULO'S BOOK "I WALKED WITH HEROES"

Mr. COOPER. Mr. President, I ask unanimous consent to have printed in the RECORD three reviews of the book entitled "I Walked With Heroes," written recently by Gen. Carlos P. Romulo, Ambassador of the Republic of the Philippines to the United States. One was written, for the February 19 issue of the Washington Post, by Adm. Raymond H. Spruance, former Ambassador of the United States to the Philippines. The second was written for the New York Times issue of the same day, by Mr. Thomas J. Hamilton, chief of the New York Times United Nations bureau; and the third was written for the Washington Star, by Earl H. Voss.

I hope very much that many persons in the United States will read this remarkable book, which adds a great deal to our knowledge of the history of the Philippines, and at the same time is an autobiography of General Romulo. The reviews state truly that it is difficult to single out for special notice the activities and achievements of General Romulo, for, as Mr. Hamilton says:

> As college professor, newspaper editor, soldier, lecturer, and diplomat, Carlos Romulo has crammed the activity of a dozen men into his 62 years.

We in the United States know and admire General Romulo for many reasons. We know him as an able Ambassador of his country to the United States; as a brave soldier in World War II, when he served as aide to Gen. Douglas MacArthur; and when he was President of the General Assembly of the United Nations, in 1949, the world recognized that he presided over the General Assembly with great fairness, with firm authority, and with the purpose—arising from his work in the United Nations, dating from its formation—that it should be a forum for all countries, both the small and the large, and an instrument against force and for steady progress toward the rule of law and world peace.

General Romulo has been a friend of the United States in the best sense, working for better relationships between the Philippines and our country, and yet a true representative of the interests of his own country. His book should cause us to remember that although the United States kept its promise of independence for the Philippines, the relationships between the two countries are nevertheless not one sided. The early days of our occupation of the Philippines are not happy ones in our history; but no record of valor, of loyalty, of devotion to freedom, and of true friendship for the United States surpasses that of the people of the Philippines. That was notably true during World War II, in which General Romulo served with great bravery; and it has been manifested for 60 years.

In the United Nations, the role of the Republic of the Philippines has not always been an easy one. The Republic of the Philippines has been criticized at times by its Asian neighbors as being too close a friend of the United States; yet the Republic of the Philippines has stood with us against aggression and against Communist subversion. But, Mr. President, at the same time the Republic of the Philippines and its people have adhered to their principles and their dignity, in their fight for true independence, and against colonialism.

In that demonstration of true independence and of loyalty to freedom, General Romulo has been an inspired leader of his own country and for the countries of Asia and other continents seeking equality, independence, and economic progress; and he has been a constructive force in both the United Nations and the world.

We should listen a great deal more to Gen. Carlos Romulo and to the people of the Philippines. On the basis of equality, the United States should make even greater efforts to be of assistance to a true friend, the Republic of the Philippines, and to enlarge the understanding, the friendship, and the associations which have characterized our relationships with the Republic of the Philippines.

Mr. MANSFIELD. Mr. President, will the Senator from Kentucky yield?

Mr. COOPER. I yield.

Mr. MANSFIELD. I wish to join the distinguished senior Senator from Kentucky in the remarks he has just now made about the Ambassador of the Philippines to the United States, Gen. Carlos Romulo.

I had the honor and the privilege—and it was a privilege—of serving with Ambassador Romulo in the House of Representatives. He is the only member of the ambassadorial corps who still has the privilege of the floor of the House and of the Senate—a right which, incidentally, he has never used, because of his recognition of the position he occupies.

He is an outstanding Philippine patriot. He has a great love of his own country, but at the same time he is a great friend of the United States.

We are extremely fortunate to have a man in the middle, so to speak, who can represent his own country so capably and so well, and at the same time understands our country, for which he has much affection and love.

I have read all of Ambassador Romulo's books. I think they will and they can add and give to us a great deal of solace and a great deal of wisdom and sagacity.

On this occasion I am happy to join my distinguished colleague in expressing my admiration of General Romulo and in extending my felicitations and thanks to him for the great work he has done during the years in his own country and in the United Nations and in representing the Philippine Republic in this country.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. COOPER. I yield to the Senator from Wisconsin.

Mr. WILEY. I desire to join the distinguished Senators who have spoken about General Romulo. I became acquainted with him years ago, and for many years served with him in the United Nations. His wife and he are among the loveliest persons in Washington.

I remember speaking with him in relation to his service in the Philippines when he served with the Americans. He is a man of great ability, and not only can use his own language, but speaks fluently the English tongue.

He is a man who has given of his heart and soul in the interest of peace in the Orient. He is, in a great sense, a dedicated individual, because he believes that with America holding the line, in the East, so to speak, we can stop the third world war from bursting into being.

I have not had the privilege of reading his book, but my good friend, the Senator from Kentucky [Mr. COOPER] has told me about it.

I think the Senator from Kentucky has done us a great service today in bringing this whole matter to the attention of the Senate.

Mr. KEATING. Mr. President, I ask unanimous consent that these brief remarks be printed in the RECORD following the tributes to Ambassador Carlos Romulo made earlier today.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New York? The Chair hears none, and it is so ordered.

Mr. KEATING. Mr. President, it is with the deepest sense of personal pleasure that I bring to the attention of the Senate the outstanding success which has greeted the recent publication of "I Walked With Heroes," a work written by one of the acknowledged great men of our time, Ambassador Carlos Romulo. To millions of Americans Carlos Romulo is a symbol of the patriotism, the valor, and the friendship of our traditional and esteemed allies, the nation and people of the Philippines. Above and beyond this role, however, Ambassador Romulo is one of the preeminent protagonists of human freedom on the

broader stage of the entire world community. In particular, he has acted to expose the menace of communism and to alert the free world to the urgent need to fight the creeping attack of the Red armies of infiltration and propaganda with the counterfire of positive action in defense of freedom. The new book he has written is entitled "I Walked With Heroes." Those heroes may well say in return that they, too, walked with a hero when Carlos Romulo was at their side.

The VICE PRESIDENT. Is there objection to the request of the Senator from Kentucky?

There being no objection, the reviews were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 19, 1961]

THE DAYS AND YEARS OF ROMULO

("I Walked With Heroes," by Gen. Carlos P. Romulo; reviewed by Raymond A. Spruance)

This is General Romulo's most recent book and his autobiography. It is easy to read and interesting from cover to cover.

Romulo was born in January 1901 in a small town in Tarlac Province, north of Manila, of an excellent but not wealthy family. His birth coincided with the ending of the Spanish-American War and our entry into the Philippines.

This period saw the beginning of many changes in the Philippines, among which may be numbered the decline in the use of Spanish by the educated elite and the introduction of the use of English for all through the newly established public school system.

Since the young Romulo was endowed with energy, ambition, a phenomenal memory, and a great talent for language, spoken and written, he early added a mastery of English to his Spanish. This led to a career in journalism, which started in his teens while he was attending college in Manila, expanded later to editorships of newspapers and brought him into politics as a devoted follower of Quezon.

In his autobiography, Romulo discusses at some length the question which is variously known as imperialism or colonialism—a very live topic in the world today. In his work with the United Nations, he argued long and hard for the use of independence instead of self-government in the Charter. In the end, both terms were used.

There are so many things of interest in a life as full of activity and achievements as General Romulo's that it is difficult in a brief review of his autobiography to single them out. For example, his life in New York as a student at Columbia University; his courtship and marriage in the Philippines, conducted under the old Spanish conventions; his part in World War II, starting with Bataan and Corregidor, then evacuation, and finally return with General MacArthur to Leyte; the parts played at various times in Philippine public life and politics, and in Washington.

His career is a fine example of what energy, character, and ability can do for a man who is given the opportunity to develop and use his natural talents.

[From the New York Times, Feb. 19, 1961]

A DIPLOMAT'S OWN STORY

("I Walked With Heroes," by Gen. Carlos P. Romulo; reviewed by Thomas J. Hamilton)

As college professor, newspaper editor, soldier, lecturer, and diplomat, Carlos Romulo has crammed the activities of a dozen men into his 62 years. Before reaching his 31st birthday he was made editor-in-chief of the most important newspaper group in Manila, and for good measure was head of the English department and a regent of the University of Manila.

General Romulo became known to millions of Americans during the early years of World War II, when he crossed the country many times over to tell the story of Corregidor and Bataan, where he was MacArthur's aid.

At the United Nations another career opened up, and his great services to the organization were recognized in 1949, when he was elected President of the General Assembly. The prominent role that the Philippines then played in the organization was a direct result of General Romulo, and in particular his limitless vigor in advancing the cause of peace.

For the time being, General Romulo is comparatively idle, and the only job he now has is that of Ambassador to Washington. There he is in charge of negotiations over unsettled war claims, American bases in the Philippines, and other problems that are enough for at least two men. But they have left him the time and energy to write this engrossing autobiography.

General Romulo has some good stories to tell about the United Nations; for instance, the time when Andrei Y. Vishinsky denounced "this small man Romulo with the big voice who spreads noise wherever he goes * * * who represents an insignificant country like the Philippines and dares to attack Russia." The "small man" replied with the story of David and Goliath.

The author continued to hunt "for the glimmer of humanity" in the Russian delegates, and he found it in Vishinsky, who was a different sort from the monolithic Gromyko. When General Romulo took Vishinsky to the Metropolitan Opera it developed that Vishinsky, who happened to be a violinist himself, knew every aria in "La Bohème."

A diplomat's discretion prevents General Romulo from going very deeply into the celebrated events at the United Nations in which he played a leading part. However, the autobiography tells an equally significant story, of the Philippines' fight for independence and the circumstances that led the author to devote his career to advancing mutual understanding between his native country and the United States.

General Romulo was born and brought up in the small town of Camiling, in Luzon, which in those days lacked a bathtub or a telephone or a piece of machinery. His father fought under Aguinaldo against the United States after Dewey's victory had wiped out Spanish control of the Philippines. But after the suppression of the nationalist movement the Romulo family was won over by the schools and other improvements carried out by the United States and by the promise of independence, which was made good in 1946.

Looking back over his busy career, General Romulo writes that the driving force of his life was the determination "to prove I was capable not in spite of having been born a Filipino but because I was a Filipino." He felt that it was up to his generation to demonstrate that everything the Americans were doing for the Filipinos, and what they were doing for their own self-development, was worthwhile.

In pursuit of this goal General Romulo has rendered valuable service to both countries. He has also helped interpret the United States to other Asian countries, and vice versa. Not that he is an uncritical admirer of the United States: On the contrary, he deplores the lack of knowledge in this country of the Philippines, and he feels that race prejudice is our Achilles heel.

General Romulo's own career, however, has done much to counteract such feelings. It is to be hoped that he will long continue as the able representative of the Philippines in Washington.

GENERAL ROMULO'S LIFE IS PLEA FOR PHILIPPINES

("I Walked With Heroes," the autobiography of Gen. Carlos P. Romulo; reviewed by Earl H. Voss)

Carlos P. Romulo is one of those noble men who enrich their environment. Washington has profited from his long, active residence here, and his contributions to world diplomacy.

His autobiography is a masterpiece of charm, pathos, bitterness, and fierce Filipino pride. Of his early years as a skyrocketing student, reporter, playwright, adolescent, lover, he writes with great charm. Of his tempestuous second and third decades in Manila journalism he writes with pathos and understandable pride. Of America's never-quite-suppressed racism, he speaks with sorrow and bitterness.

Of his self-sacrifice of working with Filipino interests in Washington, a devotion which he believes cost him the presidency of his nation, and of his subsequent election as President of the United Nations General Assembly ("President of the world"), he writes with passion and pride.

OUR PROMISES

The scars from his postwar bouts with congressional appropriations committees are bared for all to see. Ambassador Romulo believes the United States welshed on its promises to help the Philippines recover from the Japanese war. He cannot accept our willingness to take Manila for granted while Tokyo and New Delhi are courted with lavish aid.

Americans' occasional expressions of race prejudice against the Filipinos enrage him. "I have another brief memory," he writes, "of a battlefield on Bataan among the dead and dying of hearing an American stretcher bearer call to another, who was about to give aid to a wounded Filipino: 'Hey, take this one first, he's white.' * * * the thoughtless words were spoken under stress, but I remember the hurt in them and the look on the face of the wounded soldier who was left on the ground."

FRIEND OF UNITED STATES

In spite of all these offenses, however, General Romulo, who stood with General MacArthur in Corregidor, marshaled American support for the Philippines in this country in war and peace, and rose to the heights of world diplomacy in the United Nations, remained a passionate friend of the United States who aches for us to be faithful to ideals and to submerge our baser instincts.

He writes of an intention soon to leave public service but disclaims any desire to retire. After six decades of action-packed living he could not if he tried.

LAUNCHING OF FRONTIER I

Mr. BRIDGES. Mr. President, at a period in our history when missiles and rockets are commonplace, a very significant launching has taken place with nary a whisper of recognition.

This vehicle left the pad a few days ago with greater thrust than we have ever witnessed before, and I understand that, once aloft, its capabilities are limitless.

We have seen the launching of Frontier I. And it was unique in the annals of missiles and rocketry.

The launching pad was the Congress of the United States, and the blockhouse which contained the controls and buttons was located 16 city blocks away on Pennsylvania Avenue.

The Frontier I is a three-stage, solid-fuel missile with countless booster rock-

ets which can be fired on command at any given moment.

The first-stage rocket took the form of a feed grains bill which will allow the Federal Government to further subsidize the farmers of the Midwest.

Then the second-stage rocket took over with the passage of an area redevelopment bill which will allow the Federal Government to subsidize the so-called depressed areas of West Virginia, Illinois, and several other States.

Finally, the third-stage thrust which placed Frontier I into orbit was supplied by an unemployment compensation extension bill which will allow the Federal Government to subsidize such States as Michigan, New York, Ohio, New Jersey, and others.

Now that Frontier I is in orbit, adjusting to the usual problems of weightlessness and going around in circles, it can expect periodic jolts from any one of many booster rockets labeled "minimum wage," "urban renewal," "medical care for the aged," "public housing," and so on.

At this point, I might add parenthetically that a Senator from New Hampshire has some explaining to do when asked by his constituents why the Senate, in the space of 1 week, passed three bills which will, first, raise feed grain prices for our dairy and poultry farmers; second, utilize Federal revenues to place other States in a better bargaining position for new industry; and third, take some $3 million of New Hampshire tax money and arbitrarily distribute it in other areas.

Of course, there can only be one answer.

If we continue in this direction long enough, we may drain New Hampshire's economy so much that the Granite State can qualify as a supercolossal, A–1 deluxe, chronically distressed, deficit-employment area. Then all the citizens of New Hampshire will be able to sit back and be subsidized while the Federal Government turns around and soaks other States for our support.

At first this theory is difficult to get accustomed to. But all one has to do is completely reverse his traditional objectives. Instead of striving to get ahead, one must try to get behind in order to qualify for Federal giveaways which will be paid for by individuals and States which stubbornly cling to the old theories of sound progress.

But I should return to the discussion of the Frontier I.

I merely wish to touch upon two more aspects of the flight of this spectacular vehicle.

The first of these is fuel. I have already mentioned that the Frontier I is powered by a solid propellant; namely, great amounts of cold hard cash. But, where this fuel was once very reliable, it has shown signs of marked weakness of late. The fact is that some experts now refuse to place this fuel in the solid classification.

The one remaining problem is that of reentry.

What happens when we try to get it back down to earth? I am afraid the whole business will crumble like so much tinsel.

In the meantime, those of us who wish to keep our feet on the ground and our hands out of our neighbor's pocket will continue, despite repeated defeats in the Congress, to express the feelings of the slim minority with a prayerful hope that our efforts will bear some fruit.

We might feel terribly lonely at times when we appeal for less Federal control and more confidence in the American free-enterprise system. But the loneliness cannot be as severe as the frustration to be experienced eventually by those aboard Frontier I when it develops inevitable malfunctions and starts to flounder in outer space with no signposts to point the way back to earth.

I have stated the situation with which we are confronted in the section in which I live, and the questions which I am being asked every day. For that reason, I think it wise that the people of that section, and the people of the country as a whole, reflect upon the questions.

DEATH OF REPRESENTATIVE B. CARROLL REECE, OF TENNESSEE

Mr. KEFAUVER. Mr. President, it becomes my sad duty to announce the untimely passing of Representative B. CARROLL REECE, of the First Congressional District of Tennessee. Representative REECE passed away yesterday at the naval hospital, in Bethesda, Md. I wish to pay tribute to the life, character, and public service of that great American.

Representative REECE served in the House, beginning in 1920, for more than 36 years, with only two short interruptions.

Representative CARROLL REECE was a man of great courage. In the defense of his country, as a young lieutenant, he commanded the 3d Battalion of the 122d Infantry Regiment in France. He was decorated with the Distinguished Service Cross, Distinguished Service Medal, Purple Heart, and Croix de Guerre with Palm for bravery.

He was also a man of great courage when it came to legislation that would strengthen the defenses of the United States and on issues in which he was interested. In matters affecting the welfare of the United States, and problems concerning the benefit and welfare of Tennessee, he knew no political sides, even though, as we all know, he was a partisan Republican, having served as chairman of the Republican National Committee.

It was my pleasure, over a period of more than 20 years, to work with Mr. REECE on many projects for the welfare of our State; and on all occasions our service together was very pleasant.

Representative REECE had a host of friends, of both political parties, throughout the United States, in the district he served in Tennessee, and both in the House of Representatives and in the Senate.

In 1923, CARROLL REECE married Louise Despart Goff, daughter of the late Senator Guy P. Goff. We all know of the beautiful and delightful companionship which existed between Representative REECE and his wife, Louise.

Representative REECE is survived by Mrs. Reece and also by a daughter, Mrs. George W. Marthens II.

I extend to them and to other members of his family my sincere and deep sympathy.

I feel that the Nation has lost a fine public servant, a man who always kept his word, and a man of exemplary character; and we in Tennessee have lost one of our very best and distinguished citizens.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield to my colleague from Tennessee.

Mr. GORE. Mr. President, it is with sadness that I join my colleague in commenting upon the passing of the late Representative B. CARROLL REECE. I join with him also in extending sympathy to the family.

CARROLL REECE contributed an unusual life and a career of distinguished service which was patriotic, able, devoted and dedicated, both with respect to military matters and governmental matters.

As my senior colleague has said, CARROLL REECE had a distinguished and heroic military record. I believe he was one of the most decorated men of World War I.

Over a span of years he brought to the Congress education, enlightenment, and astuteness given to few men. As national chairman of his party he became a national leader. He was a leader in the Congress of those with kindred views.

The ruggedness of his character and the integrity which was at the core of CARROLL REECE endeared him to many, even to many who, upon occasion, disagreed with his political views.

His passing is a matter of sadness not only to those of us who have served with him but also particularly to his family and to his host of friends. In east Tennessee he has long been regarded as an institution of service.

Mr. KEFAUVER. Mr. President, I should like to yield to the distinguished Senator from New Hampshire, and perhaps to other Senators.

The VICE PRESIDENT. The Chair will recognize any Senator who wishes to speak on the subject in his own right. Ordinarily a resolution is received from the House of Representatives, and any Senator who wishes to be recognized can be recognized.

Mr. BRIDGES. Mr. President, I join the two distinguished Senators from Tennessee in paying tribute to a very able son of Tennessee and a very distinguished Representative, CARROLL REECE, who passed away yesterday. He was a great public servant. He was one of those men who served in the Congress over a long span of years.

I am now serving my 25th year in the Senate. CARROLL REECE was one of those who were in the Congress when I came, and he was one of the first men I met in the Congress.

I personally feel the loss, and I know what a great loss it is to our country and to his native State, particularly to eastern Tennessee, which he has represented so ably and so well.

I join the Senators from Tennessee in paying tribute, and I express my sympathy to his bereaved widow and his daughter.

Mr. KEATING. Mr. President, I join with my colleagues from Tennessee in expressing to the family of CARROLL REECE the sympathy of the rest of us for the great loss which Tennessee has suffered in the death of this outstanding American.

CARROLL had a great capacity for friendship. I have been in his congressional district in eastern Tennessee. The devotion felt by the people for him was quite unusual. It was something which I am sure will remain a cherished memory for his family.

It was my pleasure to serve with CARROLL in the House of Representatives. Frim time to time we would disagree with respect to some issue before the House, but he was one with whom a person could disagree and stil remain a firm and fast friend. He will be deeply missed by all of us in both Houses of Congress. He has had a distinguished career which has served well his district, his State, and his Nation. CARROLL REECE has built a monument of respect and affection in the hearts of all whose lives he has touched.

Mr. CARLSON. Mr. President, I rise to pay tribute to a distinguished citizen who has passed on to his reward. I join my colleagues from Tennessee and other Senators in paying tribute to and expressing sadness at the passing of CARROLL REECE.

I had the privilege of serving in the House of Representatives for six terms with CARROLL REECE. He and I were very close friends. His was a life of service to his State and to the Nation. He rendered outstanding service in the Republican Party. All of us on this side of the aisle worked with him and were closely associated with him for many years. His service was exemplary in this field.

I believe one of the outstanding achievements which will cause us to remember CARROLL REECE is the fact that, as president of the Robert A. Taft Memorial Foundation, he was instrumental in the building of a memorial on the Capitol Grounds.

His was a life of faithful service. He was interested in the problems of his State and interested in the problems of the Nation. The State of Tennessee and our Nation will miss his service.

I express my sympathy to Mrs. Reece and other members of his family.

Mr. COOPER. Mr. President, the news of the death of the Honorable CARROLL REECE, Congressman for the First Congressional District of Tennessee, has saddened all of us. His career, stretching nearly 50 years, was a wonderful one in the service of his country. Born on a farm in eastern Tennessee, one of a large family, he became a great leader of the Republican Party in Tennessee and the United States. But he was also a great servant of his country and his State. CARROLL REECE was an outstanding legislator and leader in the House of Representatives for years. There he fought hard for his principles, because he was a man of conviction.

There were many other sides to CARROLL REECE. Around him was an aura of heroism as an infantry officer in World War I, when he won many decorations of our country and other countries for gallantry and bravery, and suffered serious wounds.

Well educated, he was a man of intellectual quality. But, with all of his experience in national affairs he never lost the warmth, the kindliness, and the understanding which caused the people of Tennessee, and all others who knew him, to hold him in respect and affection. I had the pleasure of knowing CARROLL REECE for 20 years. I shall miss him as a friend. I know that thousands in Kentucky who knew him will feel as I do—that we have lost a great and true friend. I join my colleagues in expressing our sadness today, and in sending sympathy to Mrs. Reece, to his daughter, and other members of the family, and to his many friends.

Mr. SCHOEPPEL. Mr. President, I rise to join in the statements made by the distinguished senior and junior Senators of the great Commonwealth of Tennessee in behalf of their late native Tennessean, CARROLL REECE, who has passed to his great reward. Since I have been in the United States Senate, I have known no man with whom I have been privileged to serve and to be associated and for whom I have had more profound respect and admiration than CARROLL REECE. As has been pointed out, he was a distinguished patriot, soldier, and, above all, a statesman of rare ability and qualification, which he demonstrated in so many ways, not only in the great State of Tennessee, but very far beyond its borders. It was my privilege to serve with him in the political area. No man with whom I have ever served in that respect was fairer to his adversaries and more dedicated in service to his country. Our great Nation and the State of Tennessee have lost one of its great characters. I share with other Senators who have known him the sadness of his passing, and I wish to to extend to the members of his family our deep sympathy.

EARL WARREN, CHIEF JUSTICE OF THE UNITED STATES

Mr. KUCHEL. Mr. President, yesterday the Chief Justice of the United States, Earl Warren, celebrated his 70th birthday, unswervingly dedicated to the preservation of our unique American constitutional system and to the protection of individual liberties which our fundamental charter guarantees to all Americans, however high or low their station. The Chief Justice has brought to the highest judicial office in the land what the Washington Post accurately assesses as a blend of commonsense, compassion, and ardor.

The Chief Justice has termed the Supreme Court the "interpreter and defender of the Constitution."

The Washington Star states:

If through the years the Court's work is well done, he said, "the home of every American will always be his castle—every human life will have dignity and there will forever be one law for all men."

Here is a public servant who is able, honorable, thorough and painstaking, and who has demonstrated over the years an innate dignity in public service that he has rendered to the American people. Americans join in wishing the Chief Justice many, many happy returns of the day.

I ask unanimous consent that there be printed in the RECORD at this point in my remarks an editorial from the Washington Post of yesterday, a column from the Washington Post of yesterday, and a column from the Washington Star also of yesterday.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 19, 1961]

HAIL TO THE CHIEF

When Earl Warren quit the governorship of California in 1953 to become Chief Justice of the United States, he left behind him every vestige of political partisanship and political ambition. But he brought with him, as the product of nearly a quarter century of robust participation in the lively politics of his State, an intimate knowledge of American political institutions and a ripened understanding of human nature, human needs, and the patterns of human adjustment.

He came to the Supreme Court at a moment when it had peculiar need of his harmonizing skills and his political wisdom. Divided internally, the Court faced one of the most dramatic decisions in its history—a recognition that contemporary sociological and psychological insights forbade further reliance on the fiction of half a century that racially segregated public schools can be said to offer equal educational opportunity. The time had come when the Court had to rule that such segregation amounted to a denial of the equal protection of the laws.

Manifestly, the decision demanded a major social readjustment in the United States. That readjustment was fostered by the fact that the Supreme Court was unanimous. The new Chief Justice spoke for the Court in an opinion as simple and comprehensible in language as it was firm and resolute in meaning. Surely the Court's unanimity was a product, at least in part, of his judicial statesmanship; surely his leadership has had much to do with maintaining that unanimity.

On many other matters that come before it, the Court is sharply divided—composed, as it is, of men with strong convictions. The Chief Justice has alined himself for the most part with those of his colleagues who think that the Court should serve as an active champion of individual liberty against the sometimes overbearing power of the state. A tough and vigorous public prosecutor in his younger years, the Chief Justice has always recognized that strict adherence to the rules of fair procedure is an indispensable condition of a free society. His concern for individuals reflects not sentimentality but a conviction that freedom affords the key alike to public welfare and to national security.

Today marks Mr. Chief Justice Warren's 70th birthday. We congratulate him warmly on the occasion and on the vigor with which he faces the useful years that lie ahead. And we congratulate the country on the blend of commonsense, compassion and ardor which he brings to its highest judicial office.

[From the Washington Post, Mar. 19, 1961]

ON DESEGREGATION: HISTORIC OPINION IS WARREN STAMP

(By James E. Clayton)

When Chief Justice Earl Warren was chatting informally with a group of newsmen a

few weeks ago, someone asked him what one thing he has done for which he would like most to be remembered.

"I'd just like to be remembered, now and hereafter, as having done the best I could in the offices I have held," he replied.

It is more likely, however, that in American history, one event will overshadow the quality of all that Earl Warren did in his long political career before he was appointed to the Supreme Court and all else that he has done or may do as Chief Justice.

WROTE DESEGREGATION DECISION

That event came on May 17, 1954, when he announced the decision of the Court in the school desegregation cases. By the chance of fate that the school cases came for decision during his first year on the Court and that he wrote the Court's opinion, Earl Warren has gained a unique place in American history.

No other single decision of the Court in this century has so aroused the Nation. It is unlikely that the Chief Justice will again be involved in so historic a decision regardless of how long he remains on the Court.

How much longer he will be there is, of course, a matter of conjecture. Today is Earl Warren's 70th birthday, but he is still the big, hearty, healthy Californian that newsmen were mentioning as a likely Republican candidate for President as long ago as 1942.

RETIREMENT UNLIKELY

When a reporter asked him last month if he had thought of retiring, the Chief Justice said, "I have given no thought to retirement," and he shook his head emphatically to emphasize what he had said.

This June, Justice Warren will begin his eighth term as Chief Justice. Seven of the thirteen other men who have been Chief Justice served longer than that. All of them left an impress on history of one kind or another; many of them have been the center of vigorous criticism.

At the moment, the Chief Justice is in the middle of a stream of violent criticism. Stanch segregationists have charged that he, and the other members of the Court, are stooges for the NAACP. Some rightwing groups, a few of which are now circulating petitions headed "To Impeach Earl Warren," charge that he is a Communist sympathizer.

The complaint of the segregationists was set off by his opinion in the school cases, an opinion in which all his fellow Justices joined. That decision held that separate school systems for white and Negro children denied the children equal protection of the law.

The criticism of Warren from rightwing groups has come because of his opinions in three cases and because his vote is most often cast on the side of individual liberty when the other side is Government regulation.

THREE OPINIONS NETTLE

The three opinions which have been singled out for criticism, however, are those the Chief Justice delivered for the Court in the Greene, Nelson, and Watkins cases.

In the Greene case, the Court struck down the industrial security program of the Armed Forces as being unauthorized by either Congress or the President, but the Chief Justice's opinion went beyond that to criticize the procedures and attitudes of loyalty investigators.

In the Nelson case the Court said that Congress had taken over the field of prosecuting Communists for sedition, thus outlawing State sedition laws.

In the Watkins case the Court upset a contempt of Congress conviction on narrow grounds, but the Chief Justice went on in his opinion to sharply criticize the activities and methods of the House Un-American Activities Committee.

SOKOLSKY DEFENDS HIM

These opinions plus his general attitude in other cases have brought so violent an attack from the far right that George E. Sokolsky, a columnist representing a deeply conservative position, has spoken out on Warren's behalf several times. Sokolsky disagrees with many of Warren's opinions, but he challenges those who question Warren's motives and integrity.

This controversy, however, seems to affect the Chief Justice not at all. He still regularly walks almost 3 miles down Connecticut Avenue every morning on his way to work despite threats to his life 2 years ago.

AVOIDS SOCIETY

He apparently finds the cloistered life of the Court a pleasant change after 28 years in the political bustle of California. He avoids most of Washington's social life, preferring to spend his evenings with Mrs. Warren in their apartment at the Sheraton Park Hotel.

"I find you either have to stay out of social activities in Washington or go over your head," he explains. "I just can't do this kind of work and be out a number of nights a week at social affairs."

The other reason he avoids them is the embarrassing questions which people ask. The Justices will not talk about their work. "If you went to all these affairs, you'd be in trouble," Warren says. "I don't go."

He did take an active part in the inaugural, swearing in Mr. Kennedy as President and staying to the bitter end in the reviewing stand as the long parade went past.

He said he was "very happy" to be in on the change in administrations but that he has no nostaglic desire to return to politics. "After I had been Governor of California for 11 years, I was ready to do something else," he said.

Before he was appointed to the Court in 1953, the Chief Justice had been Governor and attorney general of California, a district attorney there for 13 years, a candidate for the Republican presidential nomination in 1948 and 1952, and the nominee for Vice President in 1948. That, he indicated, was enough politics for any man.

[From the Washington Star, Mar. 19, 1961]

CHIEF JUSTICE WARREN AT 70: A PORTRAIT OF A MAN WHO DOES HIS BEST

(By Miriam Ottenberg)

The silver-haired Chief Justice of the United States celebrates his 70th birthday today.

For Earl Warren, self-made son of a Norwegian-born railway car inspector, it will be a day like any other Sunday—a day of morning rest, afternoon walk, visiting with friends, an early bedtime.

Other men might think of 70 as a turning point, but not the Chief Justice. He says he has given no thought to the possibility of retiring in 1963, when he will have completed 10 years on the Supreme Court and be eligible for retirement at full pay.

His intention to stay on the job will be greeted with mixed feelings. In the years of his stewardship as Chief Justice, the Court has been under a steady barrage of criticism. Much of the attack has been against him personally since he wrote the 1954 school desegregation decision and subsequent controversial opinions.

Although his political fortunes thrived in California on his easy ability to win friends, in Washington he has scrupulously avoided any public discussion in defense of the Court's positions. He refuses to discuss Court business with any member of the press—not because he wants to stand aloof but because he feels he couudn't do it without involving the Court and himself in discussions which wouldn't help the Court.

When he came to the Court, he termed his brand of liberalism "progressive conservatism." He has been called a "Socialist" and identified with the liberal wing of the Court. A colleague, shying away from labels, said the Chief Justice approaches his work with "basic humanity" and a deep concern for the "predicament of human beings."

PHILOSOPHY OF THE COURT

He stated his own goals in his farewell address to Californians when he called the Supreme Court the "interpreter and the defender of the Constitution." If through the years the Court's work is well done, he said, "the home of every American will always be his castle—every human life will have dignity and there will forever be one law for all men."

To achieve his goal and keep the Court's business running smoothly, he works long hours—but not as long as he did when he was three-time Governor of California.

"It's a hard life to be in politics for a quarter of a century," he commented recently. "I now wonder how I got through some of those years. I'd work until 4:30 p.m., than fly to Los Angeles for a night meeting. I'd get home at 3 a.m. and do the same thing the next day."

In less than a week, his whole life changed. President Eisenhower called him on a Tuesday night and asked him if he could go on the bench the following Monday for the opening of the term. He worked day and night but he reached Washington on Sunday night and went on the bench Monday, October 5, 1953.

ADJUSTING TO A NEW ROUTINE

He admits he found it difficult at first to live as sedentary a life as he now faced. His solution was exercise. He takes some pride in the fact that he weighs almost exactly what he weighed when he came to Washington—currently 202 pounds for his 6-feet-1 height.

Here's his daily routine:

He wakes about 7 a.m. He always sets the alarm but usually wakes ahead of it. He works for an hour and a half to 2 hours before breakfast—the kind of work he can do in bed, reading and studying.

He gets up a little before 9 a.m. and spends 10 minutes on setting up and stretching exercises. Then, he's ready for a light breakfast.

He usually walks downtown with Justice Tom Clark. The conversation deals generally with current events rather than Court business. The Justices stride down Connecticut Avenue from the Sheraton Park Hotel, where the Chief Justice lives, to 17th Street and Constitution Avenue. There, the Warren chauffeur picks them up and drives them on to the Court.

The Chief Justice usually stays at the Court until 6:15 p.m., finding he can get home in 15 minutes at that time and avoid traffic jams.

He and Mrs. Warren have dinner in their apartment and 2 or 3 nights a week look at television. Usually he gets in another hour and a half of work or reading akin to his work before going to bed at 11:30 p.m.

The Chief Justice also works every Saturday, going over correspondence, reading reports on the Judicial Conference and dictating to his secretary.

A FOOTBALL FAN, TOO

On Saturday afternoons, he takes his law clerks to lunch, often at the University Club. If there's a good football game on television, the Chief Justice and his clerks watch it. He is a devoted fan of both baseball and football, with an occasional interest in basketball.

On Sunday mornings, he stays in bed to read the newspapers and go over the work

he had brought home for weekend study. After a noon breakfast, he walks for a couple of hours in the afternoon and visits with friends.

The Warrens go out very little socially.

"I find that either you have to be almost entirely out of social activities in Washington or you must be in almost over your head," the Chief Justice explains. "I can't do this work and be out every night at social affairs."

The Chief Justice, however, thoroughly enjoyed the inaugural festivities and his role in the swearing in ceremonies.

"A change in administration is always an exciting thing for the American people—certainly it is for one who has always been as interested in government as I have been throughout my life. I found it very exciting and I was very happy to do the swearing in."

He acknowledged that "no one could have a background like mine without occasionally having a nostalgic feeling for it, especially when exciting things are happening in the country and in the world." On the other hand, he emphasized that "I'm not one who feels I'm missing out on politics, because I had a great many years of it. After being Governor of California for 11 years, I felt ready to do something else."

DOES SOME TRAVELING

The Warrens have been doing a lot of traveling in the past few years and the Chief Justice expects to be out of the country part of this summer but the rest of the summer he will spend with the Warren children and 10 grandchildren in California.

"We no longer can have them move to us," the Chief Justice explained. "There are so many little ones, so we move to them."

A devoted family man, the Chief Justice is keenly interested in young people.

The Chief Justice is known also as a man of humor who can tell a joke on himself. A colleague recalled this bit of reminiscing: When the Chief Justice was district attorney he came to Washington to argue a case before the Supreme Court. Before he got back to California, Justice Oliver Wendell Holmes retired. His friends kidded him that Justice Holmes had heard him argue and had immediately given up and retired.

His colleagues at the Court rate him a good administrator. He is credited with building up the Court's police force, now at 30-man strength, and insisting that all members of the force go through the Metropolitan Police Training School or the FBI Police Academy.

EFFICIENT AND FAIR

In presiding over the conferences of the Justices, he is considered highly efficient but fair in assuring that each justice has a full opportunity to express himself even though the Justice's opinions may be completely opposed to those of the Chief Justice. He is described as thoroughly objective as presiding officer without retreating from any strong views he may entertain himself on a given issue.

As spokesman for the Court, he welcomes lawyers gaining admission to practice before the Supreme Court. Although he has made the welcoming speech hundreds of times, he still has the ability to say it with meaning and warmth, conveying the impression to the newly admitted lawyers that they are being personally welcomed.

On the bench, whether or not he takes part in the questioning, he always makes a point of expressing the gratitude of the Court to the Court-appointed attorneys who appear without compensation. When he does that, he always thanks the opposing attorneys, too.

This thoughtfulness and consideration is gratefully recalled by one of his younger colleagues. The Chief Justice had his secretary call the new appointee to find out when he was coming to Washington. The secretary explained that the Chief Justice would like to send his car and chauffeur to meet the new Justice and his family. The offer was declined with thanks because the train was due to arrive so early in the morning.

When the sleepy-eyed family tumbled off the train at 6:45 a.m. on a gray October morning, Chief Justice Warren was there to greet the newcomers and welcome them to Washington.

CONSIDERATION FOR OTHERS

His consideration for others has long been a hallmark of his personality and one of the secrets of his long-time political success. His efficiency as an administrator also dates back to his years as Governor and, before that, attorney general of his State.

But Court observers have found some of his attitudes puzzling in view of his past. Early in his career in public life, he attracted statewide recognition as the racket-busting district attorney of Alameda County.

None of his convictions during 13 years as a prosecutor was ever reversed on appeal. But on the Supreme Court Bench, he has often joined such liberal colleagues as Justices Hugo Black and William Douglas in voting to upset convictions particularly in search and seizure cases.

Was this a major psychological transformation for an ex-prosecutor whose own father was a murder victim? Some say yes, but he once made a statement that could be considered a clue.

"Although I fought vigorously in the cases I prosecuted," he once commented, "I invariably felt nauseated when the jury brought in a verdict of guilty."

IN THE LONG RUN

How will his term on the Court be remembered?

Opinions differ, depending on who does the talking. Some observers have noted an increase in judicial legislation—new law created by Court decisions. Some comment on an apparent increase in the number of 5-to-4 decisions, the bitter conflicts reflected in dissenting opinions.

There is a difference of opinion on whether the Chief Justice has done the influencing or been the influenced one. There is considerable agreement that he must have done a great deal of moral persuasion to get a unanimous decision in the school segregation cases.

He knows how he wants to be remembered.

"I'd like to be remembered, now and hereafter," he said, "as having done the best I could in the offices I have held."

JOHN BIRCH SOCIETY

Mr. YOUNG of North Dakota. Mr. President, on March 8, 1961, I had inserted in the CONGRESSIONAL RECORD an article appearing in the Chicago Daily News and one from Time magazine with reference to the John Birch Society. The comments I made with respect to these insertions and the articles themselves caused widespread interest. Some of the members of the John Birch Society were quite irate. I do want to make one apology and that is for referring to the local chapters or units, or whatever they call them, as cells. It was my understanding at the time that this was a term used by this secret or semisecret society in referring to their local units. Apparently this is not the case. This is one of the problems one encounters with an organization operating in a secret manner. The general public is not supposed to know who is the head of this organization in each State, the head of each chapter or unit, any of its members, or how they operate. All this information, I understand, is available to prospective members.

It is generally understood in my State that Mr. J. Blaine Miller, a representative of one of the major oil companies, is head of all John Birch Society units or chapters in North Dakota. I ask unanimous consent to have inserted as a part of my remarks a letter which Mr. Miller had published in the March 15, 1961, issue of the Grand Forks Herald of Grand Forks, N. Dak.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JOHN BIRCH SOCIETY

BISMARCK, N. DAK.—The John Birch Society in North Dakota will welcome an investigation by Senator YOUNG or anyone else. We would suggest that this investigation be thorough and complete and that the results be made public. I sincerely hope that every loyal American will investigate the John Birch Society, for nothing could possibly expand our membership faster.

The purpose of the John Birch Society, as officially stated, is to promote less government; more responsibility and a better world. As unofficially stated and discussed among our members, the purpose is exactly the same. There is no more.

Due to the seriousness and imminence of the threat from the international Communist criminal conspiracy, a great deal of our time is spent fighting anything and everything that will forward the Communist conquest of America. If the fact that an increasing number of North Dakotans are becoming dedicated to these principles is to be deplored, as stated by Senator YOUNG, then God help us all.

J. BLAINE MILLER.

Mr. YOUNG of North Dakota. Mr. President, it will be noted from this letter that Mr. Miller states:

The John Birch Society in North Dakota will welcome an investigation by Senator YOUNG or anyone else. We would suggest that this investigation be thorough and complete and that the results be made public.

Mr. President, I may say in reply to Mr. Miller's challenge, that no committee of Congress, so far as I know, has made an investigation of this society, but several newspapers have. Two of the most thorough investigations of the John Birch Society that have come to my attention are those of the Los Angeles Times, of Los Angeles, Calif.,—a conservative Republican newspaper—and the Santa Barbara News-Press published at Santa Barbara, Calif.—a reputable Democrat newspaper. Mr. President, I ask unanimous consent to have inserted as a part of my remarks an editorial appearing in the Los Angeles Times for March 12, followed by an editorial from the Santa Barbara News-Press for February 26. Following this, I ask unanimous consent that investigations by these respective newspapers be printed as a part of my remarks.

There being no objection, the editorials and articles were ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, Mar. 12, 1961]

PERIL TO CONSERVATIVES

The Times published last week a heavily documented series of articles which defined

the nature and methods of the John Birch Society in the words of its absolute master.

The quotations from Robert Welch, and from some of his lieutenants, nail down the treacherous fallacy that an honorable or noble objective justifies any means to achieve it.

Our fear of the John Birch Society is based on our own findings, on the meticulously researched articles written by Gene Blake. In them it can be read, within quotation marks, that Communists must be fought with their own weapons, smear for smear. Even—and the quotations are brutal—with sedition.

Every conservative must adhere to the general purpose of the society as it is stated by Robert Welch: "to promote less government, more responsibility and a better world."

Every loyal American must agree devoutly with the society's immediate intention of "stopping the Communists and destroying their conspiracy, or at least breaking its grip on our Government and shattering its power within the United States."

And every informed American must agree with the society's tenet that the United States is actually now engaged with Soviet Russia in a struggle for the survival of our system.

With all honorable Americans, this newspaper looks with disgust and dread upon the godless materialism and blood-soaked tyranny of the Communist conspiracy. It is because of our people's disgust and dread that the Communists must seek their ends by secret subversion, by seducing officials, by discrediting our institutions, sowing distrust among us, aggravating union and racial disputes, entering without conscience into any course that will serve the purpose of Moscow.

Then what is likely to happen to the member of the John Birch Society who abandons all the rules by which he has lived his decent life, and adopts instead the techniques and the rules of conspiracy to fight Communists in Communist fashion?

If the John Birchers follow the program of their leader, they will bring our institutions into question exactly as the Communists try to do. They will sow distrust, and aggravate disputes, and they will weaken the very strong case for conservatism.

What are we to think when our last three Presidents, Roosevelt, Truman, and Eisenhower, are accused either of being Communists or Communist dupes?

What are we to think when these charges are leveled against Secretary of State John Foster Dulles, against his brother Allen who heads our vital Central Intelligence Agency, against the Chief Justice of our Supreme Court?

What are to think when the honor and integrity of the Vice President of the United States, the Republican Party's nominee for President, are questioned?

What are we to think when we are told that our Nation's press almost without exception is Communist infiltrated and inspired?

What are we to think when we are told that our churches almost without exception are corroded with active agents of Moscow?

What is happening to us when all loyal Americans are accused of being Communist dupes unless they subscribe to the radical and dictatorial direction of one self-chosen man?

All sincere conservatives must ask themselves these questions. And they must answer them.

The Times believes implicitly in the conservative philosophy. It has challenged all these men and most of these institutions on the soundness of one or more issues. But the Times does not believe that the argument for conservatism can be won—and we do believe it can be won—by smearing as enemies and traitors those with whom we sometimes disagree.

Subversion, whether of the left or the right, is still subversion.

OTIS CHANDLER,
Publisher, the Times.

[From the Santa Barbara (Calif.) News-Press, Feb. 26, 1961]

AN EDITORIAL

During recent weeks, the News-Press has sought to enlighten its readers about a semi-secret organization called the John Birch Society.

We believe that the News-Press has performed a public service by bringing the activities of the society to the attention of the community. Hundreds of our readers have agreed. But a newspaper would be derelict in its duty if it did not express its opinion of the way the society is organized and the tactics it employs.

First, let there be no mistake about this: Communism must be opposed vigorously. Its gains throughout vast areas of the world are shocking. Every American must be alert for Red infiltration. But that does not lead logically to the conclusion that to fight communism at home we must throw democratic principles and methods into the ashcan and adopt the techniques of the Communists themselves, as the John Birch leaders would have us do.

The News-Press condemns the destructive campaign of hate and vilification that the John Birch Society is waging against national leaders who deserve our respect and confidence.

How can anyone follow a leader absurd enough to call former President Eisenhower "a dedicated, conscious agent of the Communist conspiracy"? Those are the words of the national leader of the John Birch Society, Robert Welch, in a manuscript entitled "The Politician," of which photostatic copies are available.

The News-Press condemns the dictatorial, undemocratic structure of the society.

The News-Press condemns the tactics that have brought anonymous telephone calls of denunciation to Santa Barbarans in recent weeks from members of the John Birch Society or their sympathizers. Among victims of such cowardly diatribes have been educational leaders, including faculty members of the University of California at Santa Barbara, and even ministers of the gospel.

The News-Press condemns the pressures on wealthy residents, who fear and abhor communism, to contribute money to an organization whose leader has said that "for reasons you will understand, there can be no accounting of funds."

In the Blue Book, the society's "bible," leader Welch said that the organization needed 1 million members. He also said that the dues are "whatever the member wants to make them, with a minimum of $24 per year for men and $12 for women."

One million members, divided equally between men and women, would bring him $18 million a year. Quite a sum to play with without accountability.

The News-Press challenges members of the society to come into the open and admit membership. A local enrollment in the hundreds is claimed, but so far only a few of those who have joined the organization have been unashamed enough to admit it.

The News-Press challenges the responsible local leaders of the society to make themselves known.

The News-Press challenges them to tell their fellow citizens exactly what they are up to and specifically what program they have in mind for Santa Barbara.

The John Birch Society already has done a grave disservice to Santa Barbara by arousing suspicious and mutual distrust among men of good will. The organization's adherents, sincere in their opposition to communism, do not seem to understand the dangers of the totalitarian dynamite with which they are tampering.

The News-Press challenges them: Come up from underground.

And if they believe that in being challenged they have grounds for suit—let them sue. The News-Press would welcome a suit as a means of shedding more light on the John Birch Society.

[From the Los Angeles Times, Mar. 5, 1961]

CORRECTED QUOTATION IN SERIES

Through a typographical error in Sunday's first installment of the John Birch Society series, a quotation from Robert Welch's "The Politican" was given incorrectly.

The quotation, from page 267 of Welch's manuscript, should have read as follows:

"While I too think that Milton Eisenhower is a Communist, and has been for 30 years, this opinion is based largely on general circumstances of his conduct.

"But my firm belief that Dwight Eisenhower is a dedicated, conscious agent of the Communist conspiracy is based on an accumulation of detailed evidence so extensive and so palpable that it seems to put this conviction beyond any reasonable doubt."

[From the Los Angeles Times, Mar. 5, 1961]

THE JOHN BIRCH SOCIETY: WHAT ARE ITS PURPOSES?

(By Gene Blake)

On a wintry day a little over 2 years ago, a dozen men gathered in Indianapolis at the invitation of a retired Massachusetts candy manufacturer, Robert Welch.

They were influential, busy men. One came from Oregon, one from Kansas, one from Missouri, two from Wisconsin, one from Illinois, one from Indiana, one from Tennessee, one from Virginia, and two from Massachusetts.

These men weren't exactly sure why they were there, except that they all shared the same concern over the menace of international communism, its influence in America and the fate of this Nation.

TWO-DAY EXPLANATION

For 2 full days they listened to Robert Welch set forth his views of the problem and what he thought should be done about it. Out of that meeting of December 8 and 9, 1958, came the John Birch Society.

Within a year there were working chapters in New Hampshire, Massachusetts, Connecticut, New York, Virginia, South Carolina, Florida, Tennessee, Michigan, Illinois, Wisconsin, Iowa, Louisiana, Texas, California, and Washington. There were also members of the home chapter—sort of at large members—in about 40 States.

Now, after another year, the list of States with from 1 to more than 100 working chapters has grown to 34, plus the District of Columbia, and there are home chapter members in all 50 States.

MAKES VOICE HEARD

Organized and developed quietly at first—almost secretly—the society is now making its voice heard and no longer shuns the spotlight. By the end of the year the national membership is expected to reach 100,000. The goal is a million.

There are several thousand members in scores of chapters throughout southern California today, according to Paul H. (Tex) Talbert, Beverly Hills insurance executive who is a member of the society's national council.

They are hard at work attacking the Communist menace as they see it on the home front, either directly or through other organizations—PTA's, social and civic groups, study clubs, church societies.

Talbert won't hazard a guess as to how many working, hard-core, live Communists

there are in southern California. But he and his fellow John Birchers do not believe that is the crux of the problem.

TAKES ONLY A FEW

"Even though there are relatively only a few Communists," Talbert said, "for every one there are 10 people standing behind ready to do their bidding and for each of these there are another 10—the do-gooder type—willing to go along with them.

"It would take only a few hundred Communists to upset the balance from a political standpoint. In Russia, less than 3 percent of the 200 million people are Communists and in any country they have taken over there have been no more."

Talbert sees Communist influences working directly here in front organizations, infiltrating political organizations and college campuses. But more than that he sees Communist objectives being furthered by certain newspaper writers, in motion pictures, in church pulpits and in all levels of government.

AIMS ARE SAME

"It is sometimes necessary to differentiate between socialism and communism, although their aims are the same—leading to the destruction of our Constitution and private enterprise," Talbert said.

"There are a lot of things going on in city, county, State and Federal Government that are certainly driving us into the arms of socialism. If we continue on the road to socialism, it will be just an overnight shift to communism."

John Birchers in southern California and throughout the country are trying to alert the public, according to Talbert, through concentrated letterwriting campaigns, circulating petitions, speaking before various groups, showing anti-Communist films and distributing anti-Communist literature—under the overall leadership of founder Robert Welch.

POINT TO BOOK

Who is the man who brought this about and what is his purpose?

Detractors are quick to point out that Robert Welch is the man who wrote several years ago, in a manuscript called "The Politician" by some and the "Black Book" by others, that former President Eisenhower and top members of his administration were Communists or tools of the Communists.

"While I too think that Milton Eisenhower is a Communist and has been for 30 years," Welch wrote on page 267, "this opinion is based largely on an accumulation of detailed evidence and so palpable that it seems to put this conviction beyond any reasonable doubt."

Welch also wrote of Dwight Eisenhower on page 268 in "The Politician":

"There is only one possible word to describe his purpose and actions. That word is 'treason.'"

"HIS BOSS"

And on page 210:

"In my opinion the chances are very strong that Milton Eisenhower is actually Dwight Eisenhower's superior and boss within the Communist Party. For one thing, he is obviously a great deal smarter."

Others listed by Welch in "The Politician" as part or tools of the Communist conspiracy included former Presidents Roosevelt and Truman, Chief Justice Warren, the late Secretary of State John Foster Dulles, and his brother Allen, head of the Central Intelligence Agency.

"The Politician," distributed confidentially to a limited number, has caused some discomfort among members—but by no means all of them.

Some obviously agree with it, or at least feel there is sufficient evidence to believe that Welch's charges might be true. Others may temper the charges by stating that Mr. Eisenhower and some of the others were or are merely unwitting tools of the Communists.

CLUE TO PROGRAM

At any rate, this gives a clue to the general tenor of the society's charges: Communists have been and still are in control of high places in the U.S. Government, the Armed Forces, the courts, the schools and universities, the press, radio, television and motion pictures, unions, the United Nations, the private foundations and the churches.

Unless the public wakes up, the society fears, it is only a question of time before the United States falls without a struggle into worldwide Communist dominion ruled from the Kremlin.

Welch, of course, is just one of many who have preached this doctrine of imminent Communist domination to some degree for years. One was the late Senator Joseph McCarthy, who has become almost a patron saint of the John Birch Society.

But Welch appears to have had success greater than any other man in welding his followers into a cohesive force with a program of action. It is a program of fighting fire with fire, openly using some of the tactics that have proved successful for the enemy.

FARMER ANCESTRY

Welch was born in 1899 on a North Carolina farm. His ancestry, mainly farmers and Baptist preachers, is traceable to one Miles Welch, who came to this country from Wales in 1720.

He was educated for 4 years at the University of North Carolina, 2 years at the U.S. Naval Academy, and 2 years at Harvard Law School. He moved to Boston in 1919 and has been in the candy manufacturing business all his adult life.

For many years he was vice president in charge of sales and advertising of James O. Welch Co., with factories in Cambridge and Mansfield, Mass., and in Los Angeles, as well as its subsidiary sales corporations in Atlanta, Pittsburgh, Chicago, Los Angeles, and Seattle.

WAS NAM DIRECTOR

He has served as a director of a bank and several other business corporations. He was a member of the board of directors of the National Association of Manufacturers 7 years, regional NAM vice president 3 years, and chairman of its educational advisory committee 2 years.

Welch also has been an extensive world traveler, speaker, author, editor, and publisher. His books include "The Road to Salesmanship" (1941), "May God Forgive Us" (1952), and "The Life of John Birch" (1954).

For 5 years he has edited and published a monthly magazine, American Opinion. In 1957 he gave up most of his other business responsibilities to devote nearly all his time and energy to the anti-Communist cause.

Welch chose the subject of one of his books as the name for his society because he felt this young man symbolized all that the society should stand for.

John Birch was a fundamentalist Baptist preacher from Georgia who became a missionary in China and then an intelligence officer with Gen. Claire Chennault's forces during World War II. He helped Gen. James Doolittle escape from China after the famous raid on Tokyo.

But 10 days after V–J Day, Captain Birch was shot and killed in a Chinese village near Hsuchow. Five years later, former Senator Knowland charged in a Senate speech that he was murdered in cold blood by Chinese Communists.

AIMS AT EXPOSÉ

Welch's book purports to be a documentation of that charge, as well as an exposé of a "coverup" by the U.S. Government in a policy of appeasement toward Red China.

"It is clear that the Communists, high and low, recognized John Birch as standing for America, for Christianity, and as the very embodiment of those qualities and forces which were in their way," Welch wrote.

"He was the first, or very nearly the first, casualty in American uniform in a war still being waged. * * * With his death and in his death the battlelines were drawn, in a struggle from which either communism or Christian-style civilization must emerge with one completely triumphant and the other completely destroyed."

[From the Los Angeles Times, Mar. 5, 1961]

A REPORT TO THE PUBLIC

Any national organization with a political purpose is of paramount interest to the general public.

Any such organization, methodically yet semisecretly organizing to influence public opinion, is the public's business.

The John Birch Society is such an organization.

On this page the Times publishes the first of five articles reporting on the founding, the purposes, and the operations of the John Birch Society. These articles quote verbatim from the writings of Robert Welch, founder of the John Birch Society, including his manuscript, "The Politician," of which photostatic copies are available although it was distributed confidentially to a limited number. The articles also quote extensively from the society's Blue Book, currently used as the society's guide for action, and from leaders of the organization here in Los Angeles.

At the conclusion of this series of articles the Times will publish its editorial opinion of the purposes and activities of the John Birch Society. We suggest in the meantime that each of you, as a free American citizen, read these articles carefully.

NICK B. WILLIAMS,
Editor, the Times.

BLUE BOOK GUIDES ANTI-RED SOCIETY—REQUIRED READING FOR MEMBERS OF BIRCH GROUP MINCES NO WORDS

(By Gene Blake)

Communism has Karl Marx's "Communist Manifesto," nazism had Adolf Hitler's "Mein Kampf," and the John Birch Society has Robert Welch's "Blue Book."

This 182-page booklet, a transcript of Welch's 2-day presentation when he and 11 men founded the society in Indianapolis a little more than 2 years ago, is required reading before anyone can join.

And well it should be, for Welch did not mince words about the authoritative control he would impose and the loyalty he would demand.

"The John Birch Society is to be a monolithic body," he said. "A republican form of government or of organization has many attractions and advantages, under certain favorable conditions. But under less happy circumstances it lends itself too readily to infiltration, distortion, and disruption.

DECEPTIVE PHRASE

"And democracy, of course, in government or organization, as the Greeks and Romans both found out, and as I believe every man in this room clearly recognizes—democracy is merely a deceptive phrase, a weapon of demagogery and a perennial fraud."

Here are a few more excerpts:

"The John Birch Society will operate under completely authoritative control at all levels, it is imperative that all the strength we can muster be subject to smoothly functioning direction from the top.

"The men who join the John Birch Society during the next few months or few years are going to be doing so primarily be-

cause they believe in me and what I am doing and are willing to accept my leadership anyway.

"We are not going to be in the position of having the society's work weakened by raging debates. We are not going to have factions developing on the two-sides-to-every-question theme.

"Those members who cease to feel the necessary degree of loyalty can either resign or will be put out before they build up any splintering following of their own inside the society."

Several thousand southern Californians have joined the society on these terms and it anticipates that the national membership will reach 100,000 by the end of this year. They are organized into scores of small chapters throughout the Southland.

It isn't just a matter of fighting hard-core Communists who may be relatively few in number in southern California, explains Paul H. (Tex) Talbert, Beverly Hills insurance executive and member of the society's national council.

"It is the society's aim to expose and counteract what it believes to be forces at work in almost every phase of community life and government which are furthering the Communist cause and leading this Nation steadily toward domination by the Kremlin," Talbert said.

Evidence of this right here in southern California can be seen, according to Talbert, in the motion picture industry, the newspapers, the schools and universities, churches, political organizations, and local government.

In the belief that we are in a war for survival on the homefront, members of the John Birch Society attend monthly meetings, engage in concentrated letterwriting campaigns, circulate petitions and anti-Communist literature, speak and show anti-Communist films to various groups, exert influence whenever they can in other organizations.

In doing so, they are carrying out a program laid down by Welch in his Blue Book or in the the monthly bulletins he sends from his Massachusetts headquarters.

HAS VISITED HERE

Welch himself has visited here to speak to society members or other groups. On December 8, 1959—the first anniversary of the society—he addressed the Freedom Club of the First Congregational Church, 535 South Hoover Street.

The Freedom Club was founded in 1952 by the church minister, Dr. James W. Fifield, Jr., and has grown to several thousand members. It now has chapters in churches, civic groups and veterans organizations in many cities throughout the country.

Many nationally known speakers have addressed the club. Its declared purpose is devotion to the promotion of world peace, liberty, honesty in government, the principles of free enterprise and exposure of forces that work against freedom.

The purpose of the John Birch Society, as stated in Welch's Blue Book to be both the official one and the one unofficially described and discussed among members, is "to promote less government, more responsibility, and a better world."

Its immediate objective is described in the Blue Book as "stopping the Communists and destroying their conspiracy, or at least breaking its grip on our Government and shattering its power within the United States."

Few could quarrel with those aims.

"We are out to get a million members truly dedicated to the things in which we believe," Welch said in the Blue Book. "For we need disciplined pullers at the oars, and not passengers in the boat."

Welch himself admitted this is reminiscent of the Communist principle of "the dedicated few" as enunciated by Lenin.

"And we are, in fact, willing to draw on all successful human experience in organizational matters," he said, "so long as it does not involve any sacrifice of morality in the means used to achieve an end.

WHERE THEY DIFFER

"But the Communists have asked their followers to devote to the cause 'the whole of their lives.' We assuredly do not. That is exactly the kind of collectivism, of submerging the individual in the whole, against which we are fighting."

Almost half of Welch's Blue Book is devoted to his appraisal of the growth of the international Communist conspiracy, the rise of collectivism in this country, the loss of faith by Americans and a statement of his own religious faith.

"Unless we can reverse forces which now seem inexorable in their movement," he said, "you have only a few more years before the country in which you live will become four separate provinces in a worldwide Communist dominion ruled by police-state methods from the Kremlin."

Welch charged then—in 1958—that the Communists were one-fourth of the way toward achieving their third and final step—the takeover of the United States—and therefore were two-thirds of the way toward carrying out their total program—the takeover of the world.

ACCUSES OFFICIALS

This has been accomplished, he said, with the deliberate and treasonable help of officials of our Government and of almost every phase of American life. Some highlights:

"The first great break for the Communist conspiracy came in 1933, with our formal recognition of Stalin's regime. * * * Their second break came with the beginning of World War II, which was largely brought on through the worldwide diplomatic conniving of Stalin agents.

"At the time of Pearl Harbor * * * it would have been absolutely fatal to Franklin D. Roosevelt and George Catlett Marshall for the part they had played in bringing on that catastrophe to have become known to the American people. * * * For the real facts * * * constituted plain unadulterated treason on the part of both Marshall and himself * * *

"* * * there are at least 30 huge Communist espionage rings operating in this country today against the only 2 or 3 that have been only partly exposed * * * but scores of known Communist sympathizers have been restored, by Supreme Court rulings, to their former jobs within our Federal Government.

"Communist sympathies and even actual Communist subversion are daily made more respectable by the actions of our Government, our great universities, much of our press, and by the complacency of our people.

"The unions which control our shipping and many vital parts of our economy are Communist-ruled or Communist-dominated.

NUMBERS LESSEN

"The true fundamentalists in our midst, whether Catholics, Protestants or Jews, are the moral salt of the earth but their number grows smaller every year; fully one-third of the services in at least the Protestant churches of America are helping that trend; some actually use their pulpits to preach outright communism.

"For years we have been taken steadily down the road to communism by steps supposedly designed, and presented to the American people, as ways of fighting communism. The whole foreign aid program is an excellent example.

"Although our danger remains almost entirely internal, from Communist influences right in our midst and treason right in our Government, the American people are being persuaded that our danger is from the outside, is from Russian military superiority.

"The directive under which some of the very largest American foundations have been secretly but visibly working for years, is so to change the economic and political structure of the United States that it can be comfortably merged with Soviet Russia.

"Until the intended Communist internationale now called the United Nations has been wiped out or made over from the bottom up, our attitude toward so-called internationalism is made clear and uncompromising by the stated purpose of the society.

"The only thing which can possibly stop the Communists is for the American people to learn the truth in time, the domination of our press, television, and radio by Communist influences is now so great that you simply are not allowed to learn or be reminded of the real nature of the beasts to whom we are losing."

BIRCH SOCIETY'S PROGRAM OUTLINED—MEMBERSHIP OF MILLION SET AS GOAL IN PLANS OF ORGANIZATION

(By Gene Blake)

When Robert Welch of Massachusetts offered himself 2 years ago "with great humility" for the dynamic personal leadership needed to direct the John Birch Society's war on communism, he also laid down a 10-point program of action.

The program is set forth in the Blue Book, the 182-page "bible" and manual for the society's thousands of members throughout the country. They are hard at work putting it into action.

Required reading before anyone can join the society, the Blue Book is a transcript of Welch's 2-day discussion at the organizational meeting of 12 men in Indianapolis December 8 and 9, 1958.

Tape recordings and films of Welch's eloquent presentation also are made available for chapter meetings.

MEMBERSHIP GOAL

Welch has set a goal of a million members organized at the local level into small chapters under tight control and direction from above.

And in his program of action, he admittedly has adopted a trick or two of the Communists. Here is the program:

1. Establish small and inexpensive reading rooms, which also would serve as rental libraries, stocked with a nucleus of 100 approved anti-Communist books and the best anti-Communist periodicals.

RIGIDLY CONTROLLED

"They would be extremely selective instead of exhaustive as to the books available," he said. "How many books each of these reading rooms would have, especially which books, and under what arrangements, would of course have to be tightly controlled from headquarters."

2. Expand the circulation of the conservative periodicals, particularly Welch's own monthly magazine American Opinion.

"With the metropolitan press and big circulation general periodicals not only largely denied to us, but in many cases either consciously or blindly promoting the Communist line, we need to use every feasible channel to get more of the truth over to more of the American people," he said.

Welch suggested putting the National Review in every college library and fraternity house, the Dan Smoot report in every doctor's office, Human Events and American Opinion in every barbershop.

WIDEN AUDIENCE

3. Support, maintain, increase the number of stations used and widen the audience of such radio programs as those of Fulton

Lewis, Clarence Manion and dozens of local broadcasters.

4. Institute organized planning and control to make full and effectively coordinated use of the powerful letterwriting weapon.

"There should be a continuous overwhelming flood of letters, not just to legislators or the executive departments in Washington, but to newspaper editors, television and radio sponsors, educators, lecturers, State legislators and politicians, foundation heads, and everybody else whose opinions, action, and decisions count for anything in the ultimate total actions and decisions," Welch said.

"It should be definitely planned, ordered, and the amount and promptness of participation constantly checked and evaluated by a central headquarters or director. It is the leadership that is most demanding, most exacting of its followers, not the one which asks the least and is afraid to ask more, that achieves really dedicated support."

5. Organize fronts—little fronts, big fronts, temporary fronts, permanent fronts, all kinds of fronts.

"We are surfeited with organizations which have the general purpose of fighting communism," Welch said. "They will never stop the Communists."

FRONTS PROPOSED

He suggested such fronts as a Committee for Withdrawal of Recognition (of Russia), a Committee To Protest the Firing of Medford Evans (reportedly fired from a southern college for his anti-Communist stand), a petition to impeach Earl Warren, a Committee To Investigate Communist Influences at Vassar College and Women Against Labor Union Hoodlumism.

Petitions on "everything under the sun," such as one headed, "Please, Mr. President, Don't Go"—to protest summit meetings were advocated.

6. Start shocking the American people into a realization of what is happening.

BEST WAY

"The best way to do this is by exposure, which is why the Communists just had to get rid of McCarthy, and went to such extreme lengths to do so," Welch said.

He suggested that his magazine could be used for this purpose, using the technique of putting devastating questions to suspected Communists, and talked hopefully of building his circulation to 200,000.

"The question technique, when skillfully used in this way, is mean and dirty," Welch admitted. "But the Communists we are after are meaner and dirtier, and too slippery for you to put your fingers on them in the ordinary way."

NUISANCE SUITS

Welch also mentioned the risk of nuisance libel suits, and, as "our courts have by no means been immune to Communist infiltration," they might have more than nuisance value. But he said the publicity value might outweigh the risk.

7. Silence Communist speakers masquerading as anti-Communists by using the question technique before audiences.

8. Line up a large group of speakers to carry a strong anti-Communist message to small audiences such as church clubs, and PTA groups, although talking on other specific subjects.

9. Extend the society into other countries eventually, but in the meantime set up revolutionary committees and governments-in-exile out of the anti-Communist refugees from the satellite nations.

REVERSE SURRENDER

10. Reverse by political action the gradual surrender of the United States to communism.

On the last point, Welch argued that it could not be done by the Republican Party alone, nor merely under the political leadership of someone like Senator GOLDWATER, whom he hailed as the most acceptable candidate for President.

"It [the party] cannot win unless it has strong help and backing from forces outside of the straight political organization—such as the Democratic Party has on the other side in Walter Reuther's Committee on Political Education (COPE)," he said.

NIXON EVALUATION

Speaking of presidential candidates (this was 1958), Welch had this to say about Richard Nixon:

"He is one of the ablest, shrewdest, most disingenuous and slipperiest politicians that ever showed up on the American scene * * *

"He can use the tremendously overrated and overpublicized but actually highly cautious part he played in the Alger Hiss exposure, to hang onto the hopeful loyalty of the vigorous anti-Communists, at the very time when he is insinuating to put Warren on the Supreme Court as part of the deal, Taft would have been nominated at Chicago in 1952.

"It is almost certain that Taft would then have been elected President by a far greater plurality than was Eisenhower, that a grand rout of the Communists in our Government and in our midst would have been started, that McCarthy would be alive today, and that we wouldn't even be in this mess that we are supposed to look to Nixon to lead us out of.

"And in appraising Richard Nixon's character, nobody should overlook the vicious undercover knifing of Bill Knowland by Nixon's men in California in the campaign just finished (1958).

"I think Nixon could become a very patriotic anti-Communist if we could create circumstances in which it would be smart politics to be one; whereas I think Nelson Rockefeller would fight for further movement toward the internationalist left under any and all circumstances.

ONE-WORLD PLAN

"I think Nelson Rockefeller is definitely committed to trying to make the United States a part of a one-world Socialist government, while I don't think Nixon is committed to anything other than the career of Richard Nixon."

And could anyone mistake the subject of this passage by Welch about the "amoral man" he considers the greatest danger?

"You will usually find him in church on Sunday morning, maybe even a Catholic Church," Welch said.

NOMINATION CHANCE

"But as a Member of the United States Senate, running for the Presidency, and smart enough to know the strong Communist support behind the scenes which he will have to get in order to have any chance of being nominated in 1960, such an amoral man can do a tremendous amount of ball carrying on behalf of the Communist aims here in the United States; and he can do an almost equal amount of damage to anti-Communist morale in other parts of the world, by his well-publicized speeches against Chiang Kai-shek or in favor of the Algerian rebels.

"Or an amoral man, as head of a great so-called Republic, may have no slightest scruples or concern about getting himself into the good graces of the left by quietly knifing McCarthy.

"He has been a rider of waves, so far as public support was concerned, without caring whether the particular wave at any given time was moving left or right; and a manipulator, of uncanny skill, behind the scenes.

"But for the dirtiest deal in American political history, participated in if not actually engineered by Richard Nixon in order to make himself Vice President (and its fate or the fate of other nations, in the face of Communist conquest and of the cruel tyranny of their rule).

"And any similarity of characters in this story to any living persons is not coincidental."

[From the Los Angeles Times, Mar. 7, 1961]

BIRCH PROGRAM IN LOS ANGELES OUTLINED—THOUSANDS REPORTEDLY BELONG TO CHAPTERS IN SOUTHLAND

(By Gene Blake)

Members of the John Birch Society—reportedly several thousand strong in southern California—are busily at work on a myriad of activities which may not necessarily bear their own label.

They are organized into small local chapters of from 12 to 20 members each—8 in Pasadena, Los Angeles, Beverly Hills, Santa Barbara, and scores of other communities. If a chapter gets too large, a new one is formed.

The chapters meet monthly, usually in the chapter leader's home, to discuss the program for the ensuing month.

PHASE OF PROGRAM

This usually is some phase of the 10-point program laid down by founder-leader, Robert Welch in his Blue Book 2 years ago, or specific projects outlined in the monthly bulletin he sends out from his Massachusetts headquarters.

But John Birchers may also be members of 1 or more of the 139 other specifically anti-Communist organizations, although the society is not officially connected with any of them.

And in many instances they are members of organizations which do not specifically bear an anti-Communist label—PTA's, social and civic groups, study clubs, church societies. Many John Birch Society projects thus may be undertaken in the name of some other organization.

PTA TAKEOVER

For example, in his bulletin for last September, Welch urged society members to take over the PTA's.

"Join your local PTA at the beginning of the school year, get your conservative friends to do likewise and go to work to take it over," he wrote.

"You will run into real battles against determined leftists who have had everything their way. But it is time we went on the offensive to make such groups the instruments of conservative purposes, with the same vigor and determination that the liberals have used with the opposite aims.

"When you and your friends get the local PTA group straightened out, move up the ladder as soon as you can to exert a wider influence. And don't let the dirty tactics of the opposition get you down."

SOCIETY HAS HIERARCHY

The John Birch Society also has a hierarchy above the chapter leaders consisting of volunteer coordinators, salaried staff coordinators, major coordinators and a national council of nearly 30 substantial citizens from all parts of the country.

Council members from southern California include Paul H. Talbert, Beverly Hills insurance executive; Ralph E. Davis, president of General Plant Protection Corp., Los Angeles; and Dr. Granville F. Knight, Santa Barbara physician.

Among the nationally known council members are T. Coleman Andrews, former U.S. Commissioner of Internal Revenue; Spruille Braden, former Assistant Secretary of State and Ambassador to several Latin American countries; Clarence Manion, former dean of Notre Dame Law School; and Col. Laurence E. Bunker, former personal aide to General MacArthur.

"These are men of good standing with lots of courage and they have been attacked miserably," Talbert told the Times in a recent interview.

Talbert would not disclose the number of chapters or members in southern California—Welch has laid down a rule against giving out such information.

SEVERAL THOUSAND HERE

But he said there are "several thousand" members in the Southland and the national membership is expected to reach 100,000 by the end of the year. After that, he added, the goal of a million should be attained in short order.

"The chapters are growing rapidly," Talbert said. "We have a growing-pains problem. A coordinator is coming from Massachusetts to go into the matter of getting districts set up and distribution of authority.

"We've grown too fast. In the Houston area they've had to call a halt.

RUGGED INDIVIDUALISM

"All conservatives are rugged individualists. This is the nearest they've come to coordinating their activities."

Talbert, who was head of the Americans for Goldwater movement here last year said the society is nonpolitical and there is no direction as to which candidates to vote for.

"It is 100 percent anti-Communist, along the line that we are in a fight for survival," he said. "It is tied in very much with Christianity—atheists and agnostics are not welcome—but we are not excluding Judaism or any religion."

What, specifically, does Talbert believe to be the nature and scope of the Communist menace in southern California?

The items he ticks off could be classified roughly under the headings of direct action by Communist or Communist fronts, the fellow travelers, the "do-gooders" and the "dupes."

"One of the biggest Communist fronts in this area is the Citizens Committee To Preserve American Freedoms, at 617 North Larchmont Boulevard," Talbert said. "That's where Frank Wilkinson directed his campaign to abolish the House Committee on Un-American Activities."

Talbert said Robert W. Kenny, former State attorney general, also is associated with the committee. Wilkinson, former city housing authority official, last week lost his fight in the U.S. Supreme Court to escape a jail term for contempt for refusing to testify before the Un-American Activities Committee.

After attending a meeting of the American Civil Liberties Union here, Talbert said he came away feeling that "they are for everything the Communists are for."

Talbert said the best example of direct Communist action was the riot of so-called students at the House Un-American Activities Committee hearing in San Francisco last May. He said the FBI has developed incontrovertible proof the riot was inspired, directed, and participated in by known Communists.

UCLA PAPER ARTICLE

He next referred to an article in the UCLA Daily Bruin about a Marxist study group formed by students at the Westwood campus to "clear up rumors spread by the capitalist press." (The article later was branded inaccurate and the study group was dissolved for lack of a faculty sponsor.)

At Santa Monica City College, Talbert said, a teacher asked students to turn in a paper on "Why I am against the loyalty oath." When a student objected, he said, the teacher told him he would be flunked if he did not comply.

Questionnaires given school pupils, Talbert continued, contain such questions as, "Is it worse to spit on the Bible than on the American flag?

INFILTRATION CHARGED

"I have been told that Communists have infiltrated the Democratic clubs and I understand orders have gone out to infiltrate all clubs, including Republican," Talbert said.

"There is no question about Communists at work in the churches here," he continued.

"Episcopal Bishop James A. Pike opened a diocesan convention by warning against the 'revival of McCarthyism.' He named 'smallfry, would-be leaders' as Fulton Lewis Jr., Gerald L. K. Smith, William F. Buckley Jr. and Representative Francis E. Walter, chairman of the House Un-American Activities Committee.

CHURCH REQUEST

"The National Council of Churches has stated that Red China should be recognized and admitted to the United Nations and that we should do away with atomic testing."

Talbert's criticism of the motion picture industry was centered on the movie "Spartacus," based on a book by Howard Fast, produced and starred in by Kirk Douglas and scripted by Dalton Trumbo, one of the "Hollywood 10" convicted of contempt for refusing to testify before the House Un-American Activities Committee.

"The City Council of Los Angeles gave an award to Kirk Douglas based on the fact that he had the courage to make a picture in the United States instead of Europe," Talbert said.

FILMED IN SPAIN

"The fact is that a large part of the picture was made in Spain and Kirk Douglas has made other pictures in Israel, Spain, Norway, France and Italy. This one was written by a Communist and rewritten for the movie by a Communist.

"The Beverly Hills Chamber of Commerce gave its Will Rogers Memorial Award of the Year for the outstanding person in entertainment to Kirk Douglas. It should have been given posthumously to Ward Bond or to someone like John Wayne."

Asked about influences of which he disapproves in newspapers here, Talbert said one has only to look at the editorial pages of the Times.

WRITERS COMPARED

"While Barry Goldwater, Morrie Ryskind, Holmes Alexander, and Raymond Moley are all right, look at some of the others whose writings indicate a sympathy toward one-world collectivism—Max Lerner, James Reston, and Walter Lippmann," he said. "Lippmann is a Socialist from 'way back."

These are just a few examples, Talbert said, of the dangerous forces at work right here in southern California which the John Birch Society feels are giving aid and comfort to the Communists and leading this country steadily into the camp of the Kremlin.

On the national scene, the society's principal targets are Chief Justice Warren and his "pro-Communist" Supreme Court decisions, the "soft" foreign policy toward Communist nations, summit meetings, internationalism, the United Nations and big spending, big government in general.

LETTERWRITING

One of the most potent ways in which the society has made its voice heard in southern California has been through the organized and directed letterwriting campaigns urged by Welch in his Blue Book. His monthly bulletins suggest topics and source material.

Scathing missives on a particular subject from the Network of Patriotic Letter Writers descend like a horde on newspaper editors, Government officials, and anyone who might have some effect on decisions and actions.

Mrs. Joseph Crosby who founded the first South Pasadena chapter of the John Birch Society and is starting the fifth there says the Network of Patriotic Letter Writers has no official connection with the society.

HOW IT STARTED

Her explanation of how it started, however, gives some insight into how the society works.

Mrs. Crosby is also a member of the Tuesday Morning Study Club which she says was formed only for the purpose of informing members. Some of the women wanted to get busy and do something actively, she said, and out of that stemmed the Network of Patriotic Letter Writers.

The network has branched out through southern California and now includes hundreds—perhaps thousands—of members who loose a bombardment of letters simultaneously.

CIRCULATED PETITION

It was the Network of Patriotic Letter Writers that circulated the recent petition to impeach Chief Justice Earl Warren—a petition that was suggested by Welch when he founded the John Birch Society more than 2 years ago.

Another project of society members, Mrs. Crosby said, has been a campaign to discourage patronage of motion pictures such as "Spartacus" and "Exodus," both scripted by Dalton Trumbo.

GREATEST SUCCESS

As a result partially of the Tuesday Morning Study Club's campaign, C. C. Trillingham, county superintendent of schools, has called the box office promotion of "Spartacus" linked to schools to the attention of all school districts in the county.

Talbert said he believes the concentrated letterwriting technique had its greatest success when Congress was considering repeal of the Connally reservation to U.S. participation in the World Court. A "flood of mail," he said, kept the measure in committee.

But the project that is really hitting the target, he declared, is the showing to various groups of the film "Operation Abolition," depicting the alleged Communist riots to disrupt the House Un-American Activities Committee meeting in San Francisco last May.

"That is communism in action," Talbert said.

In line with Welch's Blue Book instructions, the society is working to broaden the audience of such commentators as Manion, Dan Smoot and, locally, Ed Delaney.

Smoot, a former FBI agent with headquarters in Dallas, also publishes weekly reports which are circulated by society members in support of the rightwing viewpoints.

Delaney, who says he is not a member of the society, is sponsored on a small Burbank radio station by the Pasadena Anti-Communist League. He was a broadcaster on Berlin radio for the Nazi Foreign Office early in World War II and was indicted for treason in this country, although the indictment later was dismissed.

He says he was only a factual broadcaster and quit as soon as the United States entered the war against Germany.

In keeping with Welch's program to make approved anti-Communist literature available in reading rooms and rental libraries is Poor Richard's bookshop at 5403 Hollywood Boulevard. Talbert said it has been doing a business of $150 to $200 a day.

[From the Los Angeles Times, Mar. 7, 1961]

BIRCH MEMBERS REPLY TO CRITICS—FOUNDER'S EARLY WRITINGS CALLED NOT CONNECTED WITH SOCIETY

(By Gene Blake)

Many charges have been leveled against the purposes of the John Birch Society, charges which have been branded by society members as part of an organized "smear" campaign apparently Communist inspired.

Foremost among attacks has been publications of excerpts from founder-leader Robert Welch's "The Politician" in which he labels former President Eisenhower and top members of his administration as Communists and traitors.

The manuscript was confidential and had limited circulation. But Paul H. Talbert, Beverly Hills insurance executive who is a member of the society's national council, says he has read it and admits such charges were made.

WRITTEN BEFORE FORMATION

He deplores the fact that it is being linked to the John Birch Society, pointing out that it was written long before the society was formed and has no connection.

On the other hand, he says "The Politician" also contained a wealth of evidence on Mr. Eisenhower's conduct which might lead anyone to wonder about him.

"I'm not going to debate publicly whether Mr. Eisenhower is a Communist," Talbert said, "but he's sure done them a lot of good turns."

SIX-PAGE REPLY

Dr. Granville F. Knight, Santa Barbara physician who also is a member of the society's national council, has issued a six-page reply to criticism made in that city.

"Robert Welch's alleged statement that high Government officials, including former Presidents, were tools of the Communist conspiracy, deserves comment," he said.

"This analysis was made 7 years ago in a confidential communication with limited circulation, 4 years before the J.B.S. was formed. It was not for publication.

"RIGHT TO OPINION

"Neither Mr. Welch's letter, nor his opinion form any part of the materials or opinions of the John Birch Society. While it is difficult to accept some of his conclusions, Mr. Welch has a right to his opinion, and an analysis of the events of the past 30 years leaves no doubt that something is radically wrong with the policies pursued by top echelons of our Government."

Another charge heard is that the authoritative control at all levels of the society indicates it is a "Fascist" organization bent on setting up a Nazi-type dictatorship in this country.

"The charge of fascism is perfectly silly," replied Dr. Knight. "The John Birch Society stands for less government, more individual responsibility, and a better world. This is the antithesis of fascism, as typified by Hitler and Mussolini.

"DEDICATED LEADER

"Robert Welch is a dedicated and dynamic leader, but no dictator. He works closely with a five-man executive committee, in addition to a council. The latter is composed of many prominent men whose backgrounds are above reproach and whose names are well known.

"Since members carry out only suggestions of which their consciences approve, and since they may resign at any time, the charge of fascism is ridiculous. The society has been so designed as to prevent infiltration by Communists or fellow travelers, who always attempt to destroy anti-Communist organizations. Such precautions are essential.

"Welch's definition of democracy was quoted to suggest that he is a Fascist. Here it is: 'Democracy is merely a deceptive phrase, a weapon of demogogery and a perennial fraud.' And so it is.

"MIND CONDITION

" 'Democracy' is a slogan that has been used to condition the minds of people. To most Americans it means the ideal form of government and brings to mind the thought of fairplay, government by the people, regard for the common man.

"This word has been repeated so often that few citizens are aware that the word 'democracy' does not appear in our Constitution. Nor do they remember that our Government is a constitutional republic and not a democracy.

"A pure democracy, through majority rule by pressure groups which are easily swayed by propaganda, can become just as cruelly oppressive as a dictatorship. Those who are interested should investigate further.

"BASED ON WRITTEN LAWS

"A republic is based on written laws such as our Constitution. Elected representatives are relied upon to use their best judgment for the good of the Nation as a whole. A democracy simply responds to the will of the majority. Pure democracy has worked successfully only for small homogeneous groups. New England town meetings are an example."

Dr. Knight points out that the Communist Manifesto of December 6, 1960, states that "whatever form of the dictatorship of the proletariat is established, it will always signify an extension of democracy."

"This is a battle for men's minds," Dr. Knight said. "There is no 'behind the front' any more. The facts are incontrovertible. The only question is whether or not we shall be brainwashed into cooperating in our own destruction."

MEMBERS ON OWN

Talbert also ridicules the idea that the society is monolithic or Fascist, pointing out that many projects are undertaken by members on their own not necessarily under direction from Welch.

"Welch says if this is against your conscience, don't do it," Talbert points out. "If you get to the point where you don't want to do anything suggested, get out."

Mrs. Joseph Crosby, organizer of society chapters in South Pasadena, agrees.

"We're all in it because we think it's right," she said. "The minute we think it's not, we can get out."

While some vague suspicions that the society is anti-Semitic have been voiced, there is absolutely nothing in any of the society's available literature or in the utterances of its members to bear this out.

The Anti-Defamation League of the B'nai B'rith has found no such evidence. On the contrary, while Christianity is stressed, the emphasis is on belief in some spiritual ideal and members of any religion—including specifically Jews and Catholics, are welcome.

"Far from founding a religion," Welch said in his "Blue Book" 2 years ago, "we are merely urging Protestant, Catholics, Jews, or Moslems to be better Christians, better Jews, or better Moslems, in accordance with the deepest and most humanitarian promptings of their own religious beliefs."

OPPOSING CONSPIRACY

"We are not beginning any revolution, nor even a counterrevolution, in any technical sense; because, while we are opposing a conspiracy, we are not ourselves making use of conspiratorial methods. Yet our determination to overthrow an entrenched tyranny is the very stuff out of which revolutions are made."

In his reply to the criticism, Dr. Knight listed 23 questions "in an attempt to get people thinking and wondering whether or not something is not radically wrong high in our Government."

The questions pertained to what the society believes has been a step-by-step surrender to the international Communist conspiracy. It is to the reversal of this trend and the defeat of the Communists with every moral means at its disposal that the society professes to be dedicated.

Talbert said the danger was summed up by FBI Director J. Edgar Hoover in a recent speech, something like this:

"We are at war, we are invaded, we are losing."

THE NEWS-PRESS STAND ON JOHN BIRCH SOCIETY

The editor and publisher of the News-Press is in his 85th year. His entire life has been spent in this community. His memory takes him back many years and his reading even further. He lived when conditions were rugged. When West was West and men were men. He lived during periods when if a man or a group of men openly by word of mouth, or the printed word, called our President, our Vice President, our Secretary of State, the President's brother, members of the Supreme Court, and others at the head of our Government, traitors, they were made to answer. Such slanders often called for a visit from a courageous and irate group which brought with them a barrel of tar and a few feathers. And such instances were particularly likely to occur if the slanderer came from New England. He lived when men were considered cowards when they hid behind their women's skirts and clothed their identity through anonymity.

It is in the light of this background that the News-Press tells where it stands on the John Birch Society.

[From the Santa Barbara (Calif.) News-Press, Jan. 22, 1961]

JOHN BIRCH SOCIETY: WHAT IS IT, WHY?

(By Hans Engh)

The John Birch Society, whose self-appointed leader called President Eisenhower "a dedicated, conscious agent of the Communist conspiracy," was formed in Indianapolis December 9, 1958. It began its semi-secret existence in Santa Barbara about a year ago.

What is this organization, which has become established in many parts of the country and whose members, among other things, are urged to "take over the PTA's"? In Santa Barbara, questions about it are being asked with mounting frequency. Literature about the society is being circulated. Rumors are flying.

STUDY GROUPS

Locally, the society is reported to have several chapters with the membership running into "the hundreds." The chapters meet once a month in private homes as study groups. Members hear tape recordings, view motion pictures, discuss aspects of the "Communist conspiracy," listen to book reviews, discuss tactics, and in general make themselves better equipped, so they believe, to meet what they term the challenge of communism.

That meeting in Indianapolis was called by Robert Welch of Belmont, Mass., a retired candy manufacturer, who in January 1957 left the business world, he said, to devote his time, money, and energy to the anti-Communist cause.

He told the 11 men present that the society, which would function almost entirely through small local chapters usually of from "10 to 20 dedicated patriots," would promote "less government, more responsibility, and a better world."

The statement that Welch considers Eisenhower an agent of the Communist Party is contained in a 302-page manuscript called "The Politician." Originally written as a letter in 1954 and added to from time to time, it was intended as a confidential document outlining Welch's opinions regarding the progress of communism, particularly in the United States.

Welch told the Boston Herald that he "added to it every time I got requests for it." He said: "By 1956 it had grown to 6,000 words. By 1958 it was up to 80,000. At that point I decided to reproduce it by offset."

Copies of the book were distributed to some of the top leaders of the John Birch

Society, but Welch said that he is trying to withdraw each copy, and "get it out of circulation as quickly as possible."

MILTON TOO

In "The Politician," Welch said: "While I too think that Milton Eisenhower is a Communist, and has been for 30 years, this opinion is based largely on general circumstances of his conduct. But my firm belief that Dwight Eisenhower is a dedicated, conscious agent of the Communist conspiracy is based on an accumulation of detailed evidence so extensive and so palpable that it seems to me to put this conviction beyond any reasonable doubt." He also said of Eisenhower that "there is only one word to describe his purposes and actions. That word is 'treason.'"

"The Politician" also describes former Presidents Roosevelt and Truman as tools of international communism, along with the Dulles brothers and various other high Government officials, including Chief Justice Earl Warren.

Dr. Granville Knight, Santa Barbara physician and a member of the 28-man national council of the society, said in an interview that he has read "The Politician." He said that the book is a confidential document, that it contains Welch's personal opinions, that it was written before the formation of the society, and that it now has been withdrawn.

DON'T AGREE

Asked whether the statement about the President appears in the book, Dr. Knight answered: "I don't say whether it does or not. It is unfortunate if it does." Other local society members who also were asked about the book said that they have not read it, and that they do not agree with Welch that Eisenhower is a Communist.

Attorney General Stanley Mosk said in Santa Barbara recently that "from the nature of this organization, as reported to me and as indicated by the press, I would consider it to be clearly subversive in nature. Certainly, the indication that the President of the United States is a Communist, and the assertions that his purpose and actions are treasonable, would constitute criminal libel under the laws of California. If such an organization is attempting to gain foothold in this State, I would urge prosecution under our criminal libel statutes by local law enforcement agencies."

TAKEOVER

In his bulletin for September of last year, one of the many publications put out by Welch, he urged the members to take over the PTA's. "Join your local PTA at the beginning of the school year, get your conservative friends to do likewise, and go to work to take it over," he said.

"You will run into real battles against determined leftists who have had everything their way. But it is time we went on the offensive to make such groups the instruments of conservative purposes, with the same vigor and determination that the liberals have used the opposite aims. When you and your friends get the local PTA group straightened out, move up the ladder as soon as you can, to exert a wider influence. And don't let the dirty tactics of the opposition get you down," he said.

Believing that the war between communism and the free world is being fought on the political and educational level and alleging that democracy is merely a deceptive phrase, a weapon of demagoguery and a perennial fraud, Welch in his "Blue Book," has outlined areas of endeavor for society members.

He urges the establishment of reading rooms which also can serve as rental libraries. He suggests that the circulation of various publications be expanded, that members embark upon letter-writing campaigns, that they organize fronts assigned to certain purposes, that they start shocking the American people, and that they obtain and feature appropriate speakers.

Welch was born December 1, 1899, on a farm in Chowan County, N.C. He attended the University of North Carolina for 4 years, the Naval Academy at Annapolis for 2 years, and Harvard Law School for 2 years. He moved to Boston from North Carolina in 1919, and has lived in Belmont for the past 20 years. He has been active in Republican politics in Massachusetts.

CHINA ACCOUNT

He took the name for his society from John Birch, a Christian missionary from a farm near Macon, Ga. Birch, according to Welch, was in China when the United States entered World War II. On July 4, 1942, he officially joined Chennault's forces in Chungking as a volunteer, and rose to the rank of captain in the U.S. Army.

Ten days after V–J Day, while in uniform and reportedly on a peaceful mission for the U.S. Government, he was killed by the Chinese Communists. Welch calls him the first casualty in the third world war, between the Communists and the ever-shrinking free world.

[From the Santa Barbara (Calif.) News-Press, Feb. 26, 1961]

STATEMENT OF PRINCIPLES

We recognize that communism's advance threatens democratic institutions throughout the world.

We believe—

That democratic institutions can be endangered as much by extremists of the right as by those of the left.

That democracy can be strengthened only through open discussion of issues, in the spirit of the Constitution and Bill of Rights—that secret or semisecret political organizations have no place in our society.

That our democratic institutions are sound enough to withstand the give and take of open political discussion and examination of all ideological beliefs.

That democracy suffers when fear of communism leads to irresponsible, unsubstantiated charges of treason or evil connivance against our political, religious, educational or cultural leaders.

That traitors should be dealt with by the courts, not by vigilante groups.

We condemn—

The adoption of totalitarian organization or tactics to fight the Communist danger, for as totalitarianism flourishes, democracy dies.

The spreading of slanderous generalities, without basis in specific fact, to cast suspicion on the loyalty or character of citizens whose views differ from those of the majority.

Let us keep our balance in what we do. Let us not, in the intensity of our convictions, nullify the rights of others to hold and voice their own beliefs.

[From the Santa Barbara (Calif.) News-Press, Feb. 26, 1961]

THOUGHTS ON THE BIRCH SOCIETY

(EDITOR'S NOTE.—This well-reasoned sermon on the John Birch Society was delivered last Sunday by the Reverend John A. Crane, minister of the Unitarian Church of Santa Barbara. The News-Press commends it to its readers.)

(By John A. Crane)

"Communist influences are now in almost complete control of our Federal Government."

"When an elected government succeeds in attracting an overwhelming majority behind it for any length of time, its mob instincts make it the most tyrannical of all forms of social organization."

"I am proposing the formation of the John Birch Society under completely authoritative control at all levels. We mean business every step of the way."

"We are out to get a million members truly dedicated to the things in which we believe."

"Future history is always determined by minorities who really know what they want."

These are scattered quotations from the writings of a man named Robert Welch, who lives in Massachusetts, and who 2 years ago organized a semisecret group called the John Birch Society. It appears to have grown rather rapidly in size, spread and influence throughout the country.

It is hard to say exactly how large the society is now, for the group is vague in speaking about the size of its membership. However, in August of last year, the Boston Herald reported Welch as saying that the society then had organizations in some 20 States, with about 25 chapters in the Boston area alone. He went on to say that membership is strongest in Tennessee, Texas, and southern California. The Herald guessed that membership must have been then "in the low hundreds of thousands."

We here in Santa Barbara seem to be in a fairly unique position to observe the work of the John Birchers, for it apparently is more open here. We are recognized around the country as being one of its seats of power, so much so indeed that two national magazines have asked two of our local writers to do articles on the society.

We ought, I think, to try to understand the movement as well as we can, for it is hard at work in our community, pressing our acts and thoughts in the direction the society feels they ought to move. The Birch group represents, I think, the most extreme form of the violently anti-Communist school of thought.

To develop some acquaintance with the outlook of the Birch Society, let us consider a book written by Welch called "The Politician." The Blue Book (the society's Bible, the wellspring of its inspiration) can be had easily enough from the society's bookshops, but it is almost impossible to find a copy of "The Politician" now. It was distributed only to top leaders in the movement. However, the Milwaukee Journal gave some quotes from it.

In the book, Welch charged that Presidents Roosevelt and Truman were extensively used by the Communists, Mr. Truman knowingly so. Then, on page 268, Welch made an observation that has caused his society considerable embarrassment. He said that "in my opinion, the Communists have one of their own actually in the Presidency. For this third man, Eisenhower, there is only one possible word to describe his purposes and actions. That word is treason."

Birch group leaders in Wisconsin had copies of "The Politician," and when questioned would not disavow its contents. One leader, when asked directly if he really thought Mr. Eisenhower was a Communist, replied, "I only know that if he is not he might as well be. The results of his administration are the same." Later on he contradicted himself somewhat when he added that "I don't think Eisenhower is bright enough to be permitted to be one of the party."

This sentiment was echoed by Welch himself, when questioned by the Boston Herald last August. When asked if he thought Ike was a Communist, Welch replied in some confusion: "I never felt that way enough to say it in print. Now I don't know what to think. Eisenhower may be too dumb to be a Communist." This suspicion of Mr. Eisenhower's loyalty also appears in the Blue Book, where, on page 65, Welch begins to discuss "the millions who either are, or pretend to be, non-Communist,"

among whom you find what he calls "the amoral man," one of the greatest dangers to our survival. The paragraph concludes with an only slightly veiled allusion to Mr. Eisenhower, when Welch says that "an amoral man, as the head of a great so-called Republic, may have no slightest scruples or concern about its fate or the fate of other nations, in the face of Communist conquest and of the cruel tyranny of their rule. And," Mr. Welch adds, "any similarity of characters in this story to any living persons is not coincidental." In short, the Birch Society leader concludes here, that whether or not Mr. Eisenhower is a Communist, he is at best an amoral man, unconcerned about the spread of Communist influence. Welch doesn't say exactly that Ike is a Communist, but on the other hand he cannot affirm that Ike is not a Communist. This, incidentally, is a fairly typical example of Welch's logic.

Another outstanding example cropped up in this month's issue of the Birch Society Bulletin. Under the heading, "Agenda for the Month," you find yourself engulfed in these muddy waters. "Our major demand on your time and energy," the article begins, "is still in support of the movement to impeach Earl Warren." Mr. Welch points out that in the campaign last summer to have the summit meeting called off, the society "put a total of some six hundred thousand pieces of mail into the effort." This, he thought, was a good showing, and helped save America from further steps of surrender. Now, he goes on, we are asking you to send a barrage of letters to your Congressmen urging the impeachment of Chief Justice Warren.

Welch confesses that there has been some opposition to this movement. He cites as an example the syndicated column of George Sokolsky, which on January 14 charged that the movement to impeach Warren was nonsense. Mr. Welch found this quite hard to take, for he had always regarded Sokolsky as a friend: Did he not stand all the way with Joe McCarthy? Nevertheless, while Sokolsky may think the Warren movement nonsense, Welch just bet that Earl Warren won't think so by the time the movement is over.

Sokolsky is quoted as saying that "no matter what can be said of Earl Warren, it cannot be said * * * that he has been subversive." Surely, comments Mr. Welch, Sokolsky can't be "as innocent or ignorant as he sounds." Welch said he carefully avoided accusing Warren of subversion or treason. "We thought—and still do—that the development of any such charges was unnecessary and would merely complicate what is basically a very simple issue of misbehavior in office." Besides, he adds, plenty of well informed people have labeled the Warren Court subversive—the Legislature of the State of Georgia, for example.

Furthermore, "Communist influences are now in almost complete control of our Federal Government." If we are going to stop them, there must be a showdown. "What better time, or place, or issue could we have than the impeachment of Earl Warren? Warren's decisions and actions, however he may have sugarcoated his own purposes for his own conscience, have definitely become a most important part of the whole advancing Communist front." By working to impeach Warren, we can meet the Communist influences behind him head on.

Hence, Chief Justice Warren both is and is not a Communist. He may not exactly be a Communist, but by stopping him we can stop communism. Welch shows real genius at this shifty logical technique. So racy is his rhetoric that he can, at the same time, affirm that a statement is both true and untrue.

Now you may be inclined to think, on the basis of the examples I have so far given of Welch's work, that the man is so completely irrational as to be absurd and harmless, that his chances are so wild and baseless as to be beneath our notice. This, in fact, was my own feeling until this past week, when I spent a good deal of time poring over the Birch Society's literature. I will confess that I was deeply impressed—and disturbed. When you hear Welch's charges out of context, as you have heard them here, their absurdity is plain enough; but when you come upon them in the publications of the society, surrounded and supported by Welch's rich, flowing language and ideas, their absurdity is well concealed.

The man is a marvelously gifted demagog, a natural speaker and writer with, I think, a strong lust for power and leadership; and he is convinced that it is his mission to save the world from the ravages of communism. He will go to any lengths to achieve this mission. He openly confesses that he will even use the very methods of the Communist to defeat them. He means business.

There is another factor apart from the magic of Robert Welch that lends power to the movement. One thing we ought to be entirely clear about is that both Welch and his people are genuinely afraid. They are driven by an almost wild fear of a persistent and pervasive sort. Because of the peculiar nature of their understanding of what it means to be an American, everywhere they look, in our society, they see signs of an incredibly devious subversion. Even the President of the United States, even the Chief Justice of the Supreme Court is not above suspicion. The only thing they can really place their trust in is the John Birch Society itself. Everywhere else there is treachery—in the highest places. Communists are on every hand, disguised, looking, just like anybody else, like a friend or a brother or a teacher.

It is their understanding Americanism that twists the perceptions of the society's members so seriously, I think. It is the key to an understanding of their philosophy. Welch outlines this powerfully in the early sections of the Blue Book.

Perhaps his most fundamental premise is that democracy has nothing to do with the real essence of Americanism. It is, he says, not democracy that made America great, that defines her nature. Indeed, it is not the form of a government that matters, but its quality. In reality, what led to America's greatness was the fact that in the early years of its development it had so little, so weak a government. That government is best which governs least. This is the important quality.

However, as our country grew in size and wealth, the Government began to intervene in more and more areas of the Nation's life, and as it did so it moved inevitably down the road toward collectivism and communism. Hence, as Welch and his people see the world, every act of the Federal Government carries with it the menacing threat of communism. When the Government forced integration in the South, this was clearly communism at work. Or consider the social security system—obviously Communist. Likewise the income tax. Such a view makes it easy for Welch to say in the introduction to the Blue Book: "The Communists are much further advanced and more deeply entrenched than is realized by even most serious students of the danger among anti-Communists."

Democracy has nothing to do with the real essence of Americanism. Accept this fundamental premise, and the rest of the Birch-type logic follows nicely. Now this premise may sound absurd to you, but as a matter of fact it reflects the deep feelings of a great many of our people. They can't seem to escape feeling that there is something un-American about the ideals of equality and freedom, something dangerous and destructive. Anybody who talks much about them is suspect. Anybody who insists upon them is a radical. Robert Welch, in his genius, got hold of something big here. He managed to articulate, in vigorous language, the dumb feelings of large numbers of our people.

Democracy has nothing to do with Americanism. This is the mainspring that drives the John Birch Society. It is what makes the society so tragically, so fearfully un-American. It is what makes it at least as serious a menace to our way of life as the Communist Party itself.

Consider Welch's answer to what he sees as our country's gravest problems. In section 4 of the Blue Book, he sets out to answer the question, what can be done to meet the frightening spread of communism in America? First, he points out that the threat is not so much military as political and educational. Then he poses a striking hypothetical possibility. Suppose, he says, that I was chosen to be the savior, the "man on the white horse," and suppose I had plenty of resources and over a million dedicated supporters; and suppose I could coordinate this mass of material into a force as positive and efficient as the Communist machine; and suppose, even though I was recognized as undisputed leader of this dedicated organization, that I had the advice and help of an executive council made up of the ablest anti-Communists in the country. If all this were so, what would I then do to fight communism?

Set up reading rooms all over the country stocked with carefully selected anti-Communist literature: the selection would of course have to be tightly controlled from headquarters. Then I would expand the circulation of conservative magazines such as American Opinion and National Review and the Dan Smoot Report. I would increase the radio audience of speakers like Fulton Lewis and Clarence Manion and others of their sort. I would instigate massive letter-writing campaigns to influence government and private agencies, both local and national. I would organize dozens of front organizations, one after the other, such as the Committee of One Million which has helped a great deal in keeping Red China out of the U.N.: another possibility here is a petition to impeach Earl Warren, or the Organization for the Repeal of the Income Tax, or the Committee To Investigate Communist Influences at Vassar College. Then I would set about making Americans aware of subversion by exposing Communists. (How would I know who to expose? Well, there wouldn't be time or money to do a complete research job on every suspect, but enough material could be gathered to make a good guess in any case. The charges could be leveled in our magazines, and if done often and forcefully, would create wonder and doubt in the entire population. To be sure, these are drastic steps, but this is no cream-puff war we are in. It's not a pillow fight. We could expect to get a lot of smearing in return, and a lot of nuisance libel suits; but even this would help, for it would mean further publicity.)

Then I would "line up a large list of speakers" who would talk to small audiences on strong anti-Communist topics; and I would set up a list of churches, PTA's and the like for speaking engagements. They are always looking for speakers. Finally, I would use political action to reverse the trend of America toward communism, I would "move in on the elections," and get our kind of men in office.

This was the program that Welch proposed to a group of 11 businessmen who met at his request in Indianapolis on December 9, 1958. This is the program that is now in operation all over the country. This is the work of the John Birch Society.

"I am not suggesting any ephemeral organization of loose ties and uncertain loyalties," Welch said at the first meeting. "The John Birch Society is to be a monolithic body." A republican form of organization or government "lends itself too readily to infiltration, distortion and disruption. Democracy is merely a deceptive phrase, a weapon of demagoguery, and a perennial fraud. The John Birch Society will operate under completely authoritative control at all levels. We mean business every step of the way." I have a sensitive and accurate nose for smelling out Communists. I will locate them. The society will not be frustrated by indecision in this area. Those who join the society will do so "primarily because they believe in me and what I am doing and are willing to accept my leadership."

Consequently, Welch concluded in the Blue Book, you must either join the John Birch Society, and give freely of yourself to it, or in a few years you will be devoting all of the maintenance of a Communist slave state.

Finally, on page 169 of the Blue Book there comes this dreadfully sinister example of Welch's logical squirming, the kind that allows him to say that a statement is both true and not true. He says passionately that although the Birch Society is not really starting a revolution, yet our determination to overthrow an entrenched tyranny is the very stuff out of which revolutions are made.

All this, I think, suggests that the John Birch Society is an unmistakable menace to America. It is frankly, even blatantly antidemocratic. Such movements crop up from time to time in the best of countries, for they seem somehow to have a profound appeal to the blacker side of our human nature. It's a great pity. It means that good men must turn themselves to the task of containing the eruption. But human nature is not perfect. It will, I fear, continue to break out in boils like this occasionally for a long time to come. When this happens, it is important that we rise quickly to check the infection.

We will, I suppose, have to depend upon our law enforcement agencies and our magazines and newspapers to carry the main burden of meeting the menace of the Birch Society. I hope they will be alert. I hope they will watch closely for the first overt steps toward action. Still, we must remember that even people like Robert Welch have civil rights here. He is free to speak, even to speak his un-American message; but his ambitions apparently have created in him a vision far beyond merely speaking. He dreams of something that is and is not revolution. Our officials must watch for the first signs of it.

Meanwhile, we private citizens also have a job to do. There are no doubt many good, earnest people in the John Birch Society. We may well find that some of our friends and acquaintances are among them. This is awkward. It poses an ethical question. How shall we respond to them? Shall we order them out of our homes, cut ourselves off from them? I think not, I think it is important, though it will be trying, to keep the lines of communication open between us.

We ought to try not to hate them, be disgusted with them, shout and snarl at them, for this will only drive them deeper into their relation with the group, for there they will find acceptance and confirmation.

We ought to be as patient as we can, realizing that the people are doing what they feel they must do. They are as much to be pitied as censured. They are terribly frightened. Everywhere they look they see Communists. They don't know whom to trust, to depend on.

Don't condemn them. Don't threaten them. Let them talk about their views. Question them closely. Sometimes just hearing their own words spoken in the presence of someone who is calm and rational will help them to feel their absurdity.

Be patient. Be firm. This too will pass, if we are alert and watchful.

[From the Santa Barbara (Calif.) News-Press, Jan. 23, 1961]

BIRCH SOCIETY MEMBERS DISCUSS ANTI-RED AIMS

(By Hans Engh)

Even though Dr. Granville Knight, Santa Barbara member of the 28-man national council of the John Birch Society, declined to divulge the identity of the local leader as well as other society members, some of the members themselves discussed their participation in its activities.

Mrs. Rose H. Bradbury, 2 Rosemary Lane, said, "I think it's a very fine organization. I've never missed a meeting." The first local chapter was formed a little over a year ago after Robert Welch, founder and president of the national organization, spoke at a meeting for specially invited persons at the Biltmore Hotel.

Mrs. Bernard R. Foy of San Marcos Trout Club said that she is a member. Asked whether she had been informed that the society is secret, she answered "No," but that it is "not too public either."

EXCELLENT PLAN

Saying that she highly approves of the society, Miss M. B. Phillips, 209 W. Micheltorena Street, said that she has been a member for nearly a year. She said that she believes that Welch has an excellent plan, but that she does not necessarily agree with every statement he has made.

Mr. and Mrs. Henry C. Goodnow, 700 Park Lane, said that they are proud to be associated with such an organization. Asked if they subscribe to Welch's opinion that President Eisenhower is a dedicated agent of international communism, they said that they would not call him (the President) a Communist. "If he is one, he doesn't know it," they said.

Kirke Connor, 4395 Via Esperanza, also said that he is a member, describing the society as a "fine movement." However, he said that he could hardly believe that Welch had called Eisenhower a Communist, and that he would not agree with that sort of statement. When contacted, other persons believed to be active in the society said that they had no comment to make.

The semisecret structure of the society is shown in one instance by a San Marcos high school teacher who is known to have passed around among other teachers a question-and-answer letter on why the John Birch Society is what responsible citizens have been waiting for. Yet when asked about his interest in the society, he said that he had no comments about it. He said that he had been to one meeting and that he was planning to attend another.

Dr. Knight said that the society has not sought publicity, and that membership is by invitation only. In addition, since study groups are part of the organization's setup, the presence of antagonistic members could completely disrupt such meetings, he said. "The society has been criticized for not making public the names of members," he said. "This is to protect those who do not wish to be disturbed by nuisance tactics." He said that the membership here runs into "the hundreds."

In his Blue Book, the society's "bible," Welch not only discusses what he believes are communistic leanings of high Government officials. Writing about the Nation's clergy, he says that "one-third of the ministers are not true believers in the divine names or the divine history and divine teachings to which they give lipservice as they go through their conventional motions on Sunday morning." He claims that some of them are using their pulpits to preach outright communism.

WORD ABOUT PRESS

He also has a word or two about the press, saying in one of his bulletins, circulated among society members, that "a well-intentioned management has no conception of how far the termites have crept into the solid-looking framework of their news gathering and newswriting."

Welch told the men attending the organizational meeting in Indianapolis 2 years ago that the time had come for this country to get out of the bed of a Europe that is dying with the cancer of collectivism, and breathe "our own healthful air of opportunity, freedom, and enterprise." Then, he said, the cancer that we already have, even though it is of considerable growth, can be cut out.

He told the group that his society would operate under complete, authoritative control at all levels. Describing himself as a hard-boiled, dictatorial, and dynamic boss, Welch said that "the men who join the society are going to do so because they believe in me and are willing to accept my leadership." He said:

"Whenever differences of opinion become translated into a lack of loyal support, we shall have shortcuts for eliminating both without going through any congress of so-called democratic processes."

COUNCIL MEMBERS

In addition to Dr. Knight, the following are some of the members of the national council: Dr. N. E. Adamson, Jr., a Boston surgeon; Thomas J. Anderson, editor and publisher of Farm and Ranch; T. Coleman Andrews, former Commissioner of Internal Revenue; Spruille Braden, former U.S. Ambassador; Col. Lawrence E. Bunker, former personal aid to Gen. Douglas MacArthur; James Simpson, Jr., former Congressman, several businessmen, and Adolphe Menjou, the actor.

The purpose of the council is to give "your founder the benefit of the council's advice and guidance, both in procedural and organizational matters, and in substantive matters of policy" and "to select, with absolute and final authority, a successor to myself as head of the John Birch Society, if, and when, an accident, suicide or anything sufficiently fatal is arranged, for me by the Communists—or I simply die in bed of old age and a cantankerous disposition."

Regarding the organization of local chapters, Welch says in the Blue Book that each shall have a chapter leader, appointed by headquarters, which is in Belmont, Mass., or appointed through officers of the society, in the field, who have themselves been duly appointed by headquarters.

Stressing that it takes money "to do wonders in adding new courage and new confidence to the anti-Communist fight," and that $1 million and 1 million members are needed, Welch said that the dues are "whatever the member wants to make them, with a minimum of $24 per year for men and $12 for women." A life membership may be bought for $1,000, which may be paid in two installments of $500.

OUR READERS' COMMENT

PROUD OF HIS NEWSPAPER

EDITOR, NEWS-PRESS: You are to be commended for the forthright stand you have taken on the Birch Society issue which clouds our fair city. The first time we came to Santa Barbara for an interview at Raytheon 15 months ago, we liked the city, but after reading your paper, I was sold. We tell friends in New York, Phoenix, and San Diego about your fine newspaper.

All I can say is what my mother would say to those she liked and respected: "God bless you, and may you have many more fruitful years."

RALPH SANDHAUS.

GAVE GREAT SATISFACTION

EDITOR, NEWS-PRESS: I have never had anything give me greater satisfaction than your stand on the John Birch Society in your News-Press of this morning.

My husband and I are 100 percent in agreement with you and very thankful for your courage.

ROSAMOND EDDY.

COVERAGE HAS BEEN FAIR

EDITOR, NEWS-PRESS: Congratulations on your courageous stand on the John Birch Society. Your entire coverage has been fair and your editorial in Sunday's paper was magnificent.

MARGARET R. BENHAM.

MORE BOMBS ARE URGED

EDITOR, NEWS-PRESS: Bravo. Bravo. Bravo.

Just a line to say congratulations and a sincere thank you for your stand on the John Birch Society. I only hope you will continue to bombard this repulsive menace right out of existence.

S. S. FRANKLIN.

A SERIOUS, HONEST JOB

EDITOR, NEWS-PRESS: I read today's issue and was happy to see your stand on the John Birch Society. I believe you are doing a serious and honest job in reporting news and opinions on matters concerning the defining of constitutional rights. Your coverage of the issues related to the House Committee on Un-American Activities continues to be honest and forthright.

Your stand in today's paper has convinced me that I must subscribe to the News-Press. My $2 is enclosed.

DONALD O. JOHNSON.

SMEARING IS DEPLORABLE

EDITOR, NEWS-PRESS: May I express my accord and congratulate you on your courageous and forceful statement regarding the John Birch Society.

The smearing of our officials, churches, and institutions with unproved charges is deplorable.

I believe that your timely statement will do much to cause all thinking people to demand proven facts and to restore confidence.

Your leadership in a campaign to bring this into the open is appreciated.

DON W. WOODS.

OUR HEARTY CONCURRENCE

EDITOR, NEWS-PRESS: We wish to congratulate you on your positive "Statement of Principles," and heartily concur with your editorial on the John Birch Society.

Dr. and Mrs. CHARLES M. CAMPBELL.

COMPLIMENTS NEWS-PRESS

EDITOR, NEWS-PRESS: Re Sunday's issue about John Birch Society. Wonderful, wonderful, wonderful. Thank you.

SPENCER BLICKENSTAFF.

LET HUAC PROBE BIRCH

EDITOR, NEWS-PRESS: I would say from a rather careful reading of the record that it is high time the John Birch Society was investigated by the House Un-American Activities Committee.

CAMPBELL GRANT.

CONTRIBUTION FOR JUSTICE

EDITOR, NEWS-PRESS: My warm and sincere congratulations upon your magnificent editorial in yesterday's News-Press with the added emphasis of publishing the superb sermon by the Reverend John A. Crane on the John Birch Society.

In the interest of freedom and justice, you have made a big contribution, for which you will always be remembered by all who share your deep concern over our country's safety and future.

With deep admiration and appreciation.

MYRA P. GALLERT.

STATEMENT MASTERPIECE

EDITOR, NEWS-PRESS: Thank you for your terrific, complete and illuminating coverage on your John Birch story of Sunday. I have been saying these very things these past 2 months when asked about the Birch Society, and cannot understand the thinking of an ex-Notre Dame law school dean and a New England cardinal.

Everyone should follow my example and frame your "Statement of Principles." It is a masterpiece.

To me, this is your outstanding accomplishment of the decade and I would like to see every newspaper in the country copy it.

EDWARD TOBIN.

EYES OPENED TO DANGER

EDITOR, NEWS-PRESS: I wish to thank you for your stand on John Birch Society. You have opened the eyes of many loyal Americans.

Some may say Robert Welch is just another crackpot, but they can be dangerous. His insidious way of calling some of the finest leaders in our country Communists is not only evil but leaves a stigma on their characters for the rest of their lives.

Is Robert Welch carrying on where the late Joe McCarthy left off? It is so true that "the evil that men do lives after them."

We are trying hard to find peace for the world, while men like Robert Welch are doing their best to divide our Nation. What grist for the Communist mill.

(Mrs.) MARGARET LORD.

CHALLENGE WELL PUT

EDITOR, NEWS-PRESS: Congratulations on your editorial in this morning's paper.

Good for you. Let them come forth and say what they mean. The idea of trying to smirch the reputation of a man like General Eisenhower and afraid to sign their names.

Many thanks for your fine editorial and challenge.

LECIA R. PORTER.

Mr. YOUNG of North Dakota. Mr. President, I ask unanimous consent to have printed as a part of my remarks an Associated Press story appearing in the Washington Star for March 18 entitled "Nixon Assails Birch Society."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Evening Star, Mar. 18, 1961]

NIXON ASSAILS BIRCH SOCIETY

LOS ANGELES, March 18.—Former Vice President Nixon, in a letter to the Los Angeles Times, has endorsed the newspaper's editorial stand against political techniques advocated by the John Birch Society, an anti-Communist organization.

Mr. Nixon wrote in part:

"I can well understand how many well-intentioned people, who are justifiably concerned about the threat which subversive groups present to our free institutions, tend to reach the conclusion that the only effective way to fight such organizations is to use the same evil methods they employ. * * *

"But there could be no more dangerous fallacy. One of the most indelible lessons of human history is that those who adopt the doctrine that the end justifies the means inevitably finds the means become the end."

The Times, in a front-page editorial March 12, said, "Every loyal American must agree devoutly with the (John Birch) society's immediate intention of 'stopping the Communists and destroying their conspiracy, or at least breaking its grip on our Government and shattering its power within the United States.'"

But, the Times said, it could not go along with the methods of the society to fight Communists in Communist fashion.

The editorial described Robert Welch as the society's "absolute master" and said quotations from Mr. Welch and his lieutenants "nail down the treacherous fallacy that an honorable or noble objective justifies any means to achieve it."

Reached at his home in Belmont, Mass., Mr. Welch said he had not yet seen Mr. Nixon's comments, but said he had no comment anyway.

The society is named after an American priest executed as a spy a few years ago by the Red Chinese. The society, which says it seeks to stop the spread of communism, has attracted some adherents of the late Senator Joseph McCarthy, Republican, of Wisconsin. Opponents claim it is using totalitarian methods to fight communism.

Mr. YOUNG of North Dakota. Mr. President, among many good letters I have received from members of the John Birch Society is one from Mr. Robert D. Love, a Wichita, Kans., businessman. Enclosed in his letter was one he had written to Mrs. George Angle, of Wichita, Kans., in which he outlined his views as a member of the John Birch Society. I have received many letters from supporters of the John Birch Society, but I believe this letter of Mr. Love's gives more detailed information in support of the society than any. I ask unanimous consent that this letter be printed as a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

LOVE BOX CO.,
November 1, 1960.

MRS. GEORGE ANGLE,
70 Stratford,
Eastborough, Wichita, Kans.:

Mrs. Angle, the tone of your letter to the editor was such that it deserves an answer. Most letters to the editor are so violent or full of complete untruths, that to answer them would be a waste of time. You have indicated, however, a desire to learn the truth and this you will have, if it is in my power to give it to you.

I have known Mr. Robert Welch for 8 years. I have more confidence in his knowledge and ability than any man in the United States, with the exception of J. Edgar Hoover. Of course, Mr. Hoover is not available for consultation. Back in 1954, Mr. Welch wrote a letter to a friend; in that letter, he laid down certain facts which could not be disputed. He spent some time in outlining the background on how we had arrived at such a dangerous position with the Communist menace. Then, in the last portion of his letter, he came to the conclusion that President Eisenhower must have known what the Communists were up to; because the President did know and did not arouse people to the dangers, he must be involved in some way, Mr. Welch concluded. At the outset, I must say that very few people have ever read this particular letter and Mr. Welch's confidence was betrayed when the story was made public. It was never intended to be made public and was strictly a private opinion held by Mr. Welch. I am sure you would agree with me that we are all entitled to our own opinion, no matter how wrong someone may think we are.

Personally, I disagreed with this conclusion at the time I read the letter in 1955. Many people will remember I worked for President Eisenhower's election in 1956 and I was chairman of the Eisenhower appreciation dinner here in Wichita in February of 1960.

I am sure this will show you my background in supporting President Eisenhower. I have disagreed with Mr. Welch on various occasions, but, I repeat, I know of no one better informed on the tactics of the Communists and the actual espionage and insidious inside attack they are now carrying on.

The fact that Mr. Welch wrote a personal letter to a friend should not, in my opinion, eliminate this man's usefulness to us in combating the forces of the conspiracy. The John Birch Society was started in late 1959, and it has absolutely nothing to do with Mr. Welch's conclusions on President Eisenhower. The society operates by a manual called the Blue Book, which is available to you at your request. There is nothing secret about it, and anyone who is truly interested in fighting communism is a welcome member. We do not solicit members in the sense of other organizations, because we do not want people in the organization who are not convinced there is a problem. We do not have time in our meetings to debate whether or not there is an international conspiracy by the Communists to take over the world. The charge that John Birch is a disbeliever in the democratic form of government and we are all ruled by Mr. Welch from Massachusetts, is too ridiculous to be given credibility. These statements have been pulled completely out of context and made to smear something which could help to inform people of the true dangers of communism.

Regarding "Communism on the Map," it again has no connection whatsoever with the John Birch Society, except that some of us who are John Birch members have used this film presentation as an ideal way to acquaint people with some of the problems of communism and what we face in the world. The film was originally brought to Wichita by people other than John Birch members, and the John Birch Society, as such, does not take an official stand one way or the other on the film. I personally have shown the film many times and I personally am a member of the John Birch Society. This is as far as the connection goes. I do not know whether Mr. Welch and the governing board of the society would agree with everything in the film, or whether they would make some correction.

I would say to you that we had better make a few mistakes on the side of overestimating the Communists than to sit around and be completely uninformed, because we will not get a second chance with this insidious conspiracy. We have never faced anything so completely deadly as the intrigue, the deception, and the overpowering nature of international communism.

Those who have been most critical of the John Birch Society are those who are completely uninformed. For instance, I might ask how many books have you read in the last 10 years since Senator Joe McCarthy and others brought up the true facts concerning Communist infiltration in this country? Have you read J. Edgar Hoover's statement of May 1960, "Exposé of Soviet Espionage?" Have you read General Wedemeyer's report on China? Have you read General MacArthur's stories? Did you read how our State Department and others have betrayed us in South Korea, Poland, et cetera? Did you know that it was our Government who insisted that Hungary, Rumania, Czechoslovakia and others all admit Communists to their cabinets so there would be a coalition government? And, did you know in each of the cases where our Government insisted this happen, the Communists have finally taken over?

Someday there will be a good many people in this country tried for treason, if we still have courts by that time. The Supreme Court has riddled our internal security laws to the point that you cannot convict a man of being a Communist. It is impossible. Therefore, we are allowing the Communists to operate against our ideologies without fear of successful prosecution.

The Communist is using our Constitution, our freedoms, our very democracy to subvert us. He has no intention of ever allowing freedom of religion, freedom of speech, and our other great American heritages to exist after he takes over. These are not just my thought; these are facts. As the great French philosopher said as he spoke of the totalitarian and how he tries to operate, "When I am the weaker, I will cry freedom from you, because freedom is one of your principles. But when one day I am the stronger, I will strip you of your freedom, because stripping people of their freedom is one of my principles." This is exactly what the Communists are saying to you today. There are many people in high Government offices who should be tried for treason. Maybe they are unwitting dupes. Maybe they are part of the conspiracy. The question is a moot one, however, because the results speak for themselves. We have lost practically every battle with the Communists since 1945. More and more people are going behind the Iron Curtain. We are in the process of losing Africa and South America, and it appears to many of us who have endeavored to astutely observe and study the encroachment of communism, that we will lose more ground there shortly. The experts are predicting the Dominican Republic will go Communist within 6 months, when it has been one of our strongest allies for a good many years. Why has our State Department and our President, as well as our other elected officials, failed to inform the American people?

Mrs. Angle, if you and your friends will become really informed you will come to some very startling conclusions on what has been happening in your country during the last 15 years. But, without this background information, it is not possible for anyone to understand Mr. Welch's conclusions. Most assuredly and certainly, I refuse to blindly follow anyone without careful study.

To conclude; I disagreed with Mr. Welch's conclusion in 1954, and I worked for President Eisenhower in 1956 and 1959. However, I still say I have confidence that Mr. Welch is better informed than any of us and, for that reason, I want to be a part of the John Birch Society. It would be impossible for us to locally have the information which Mr. Welch has available—material he has spent a lifetime studying. We could only stumble around in confusion, without some form of ligated, well informed leadership. The John Birch Society is a voluntary organization of people banded together to fight communism. We do not restrict anyone else by our activities. We do not intend to have a mass movement of any kind. But, we are spending our time getting ourselves better informed so that we can recognize communism and its infiltration when we see it. There would be those who would call us American patriots. After all, communism will not come as communism. It comes in the form of ever increasing centralized government and control being taken away from the individual.

Please feel free to give me a ring any time.

ROBERT D. LOVE.

THE EAST-WEST CENTER

Mr. LONG of Hawaii. Mr. President, Mr. Peter Edson, of the Scripps-Howard newspapers, recently wrote about the most exciting story in Hawaii today—the new East-West Cultural Center. I feel that Members of the Senate would be interested in reading Mr. Edson's observations on this exciting project. I ask unanimous consent that the article be printed in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HAWAII'S EAST-WEST CENTER

(By Peter Edson)

HONOLULU.—The most exciting story in Hawaii today is not the building boom that is turning Waikiki into another Miami Beach or the new Honolulu office building with the one-complete-revolution-per-hour restaurant built like a mushroom penthouse.

It is the new East-West Center at University of Hawaii.

It has only 100 foreign students enrolled now. Its projection is to have 2,000 by 1965–66, with 1,000 new students admitted every year for 2-year courses of study.

There will be 1,600 from as many countries of Asia as possible. Mixed with them will be 400 from the United States.

For the purpose of the center is not just to teach Asiatics the American way of life. Equally important will be teaching the Americans the Asiatic way of life—language, customs, problems, solutions—in a real, two-way interchange.

In this respect the center here will differ greatly from Moscow's Friendship University, whose purpose is to sell the Communist way of life.

At the East-West Center, there will be no segregated international students' house. They will all be thrown together to create an international community.

In the final 3 to 9 months of the course, the plan is to have the Asian students come to the American mainland for a look around in their fields of special interest. And the American students will be sent to Asia for the same purpose.

The center is so new it doesn't as yet have a head. Dr. Ralph Bunche is being suggested for the job. Dr. Murray Trumbull of University of Hawaii is acting head, and has done much to get it started. The faculty isn't complete, but it is being recruited from all over the world.

Policies for the center will be developed by University of Hawaii's board of regents, which has just been reconstituted with new and younger blood, brains, and ideas.

Idea for the center was born in Hawaii about 3 years ago. Hawaii put up 40 percent of its cash surplus—about a million dollars—to get it started.

But the idea was too big for one State to handle.

Right out of the blue, in 1959, Democratic Senator LYNDON JOHNSON, of Texas, picked up the idea and made a speech in favor of the East-West Center for Hawaii. Whatever else Mr. JOHNSON has done or hasn't in his political career, this idea could well be his greatest monument.

Congress appropriated $10 million to get it on its feet and send it on its way.

The plan now is for three main programs:

First is the undergraduate student program, outlined briefly above. Each scholarship will be for about $9,500 a year. This will cover everything—travel, tuition, living.

Second will be a senior scholar program organized on the ratio of one Asian to one Westerner. They will be recruited to train teachers for new courses, to think, to plan educational development, and to do multinational research on such problems as birth control.

This research may be conducted at other universities—London School of Economics, Leyden, Tokyo, or wherever a job can best be done.

The third program will be technical training of specialists, and here Hawaii has unique advantages to offer.

It is a rural State. Its development and underdelevopments are assets. It is highly mechanized in sugar and pineapple culture fieldwork. But it also has many "mud"

farmers, tilling small tracts of an acre or two, as in Asia.

This is the place where Peace Corps recruits can best be trained.

Hawaii is like a small country. It can show how to combat tuberculosis or organize police forces, or collect statistics and study the effects of particular reforms.

Asiatic students can be made to feel at home in multiracial Hawaii, where they might be lost in Stanford, Wisconsin, Harvard, or MIT.

THE PIONEER SPIRIT OF AMERICA

Mr. WILEY. Mr. President, there has come to my desk a letter from Mr. Hilbert S. Kleeber, of Reedsburg, Wis., which enclosed a clipping from the Capital Times, of Madison, Wis., relating how the people at Reedsburg took hold of the situation when the woolen mill in that town was about to be shut down. In these days of Government aid and assistance, it is good to see instances of the old pioneer spirit where people get on their own feet and do things.

The article I am referring to has one complaint, and that is that "President Wirth feels that the Government has gone too far in furnishing the latest textile machinery to competitors in Germany, Italy, and Japan."

The article mentions that there are three woolen mills left in Wisconsin—in Reedsburg, Rock River, and my hometown, Chippewa Falls.

As I read of this incident, it brought to my mind something which happened in my own life. When I was a young man, just graduated from law school, I went back to my hometown of Chippewa Falls. There we had a logging industry, in which about 600 men were employed, in two mills, the planing mill and the other mill. The old lumber mill was on its last legs because there was no timber left in the State. All over town we heard people say, "The old town is going to the dogs."

The mill went out, but not the town. Why? Because there were a couple of Polish boys in that town, named Andrejeski and Piotrowki, who were shoe peggers. In other words, they were shoe repairers. The people of the town got together and started a shoe factory. Pretty soon there were three shoe factories. All of that was the result of the personal initiative, or, as it has been called, some "go-getism" which those people had. The town grew and grew, and it has been better than ever. No money was provided by the Government. No money was forthcoming from the State. It was a situation in which the pioneer spirit got into action. The people were the sons and daughters of pioneers, who had learned to help themselves. No one furnished the money.

From these two incidents a lesson can be learned all over America. The clipping from the Capital Times clearly indicates what the people of Reedsburg did. They dug down into their pockets. They did not run out and say, "Uncle Sam, you must do something for us." The same thing happened in my hometown.

The result was, as is now apparent in Reedsburg, that the old town is going places. Perhaps in these two instances there is a lesson to be learned all over America, not the lesson of the New Frontier, of "letting George do it," but the lesson that we need a rebirth of spirit that says, as it said in our father's day. "We can do it. We will rebuild. We will break through the barriers that seem to exist."

I ask unanimous consent to have printed in the RECORD at this point the article from the Capital Times to which I have referred.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SLUGGISH WOOLEN MARKET WORRIES REEDSBURG FOLKS—EMPLOYEES AIDED IN SAVING FIRM

(By Harry Johnson)

REEDSBURG.—There's something heroic about the struggle of the old woolen mill here to survive despite stiff competition from modern automated plants down south and in foreign lands.

The Reedsburg Woolen Mills is one of three in the State still making woolen cloth. The others are at Rock River and Chippewa Falls.

This mill was rescued from complete breakup 8 years ago. That's when the parent company, the Appleton Woolen Mills, decided to close it down.

But the employees, the community, and President Ralph Wirth raised $235,000 to buy the plant and keep it going.

Profits have been used to purchase more efficient machinery and to build additions to the plant.

Average employment was 165 in 1953 but was increased to 220 under the new setup and production grew from 700,000 yards of cloth a year to over a million yards. The annual payroll was $700,000 over a 5-year period.

But the entire textile industry has been in a deep depression during the past year and the Reedsburg Woolen Mills has had to lay off more than 30 employees. The management hopes for a pickup in a couple of weeks that will put everyone back to work. The whole community is watchfully waiting.

Local industry seems more important than ever now with the growth of distressed areas elsewhere in the country and the return of young men who formerly worked at Kenosha, West Allis, Janesville, and Racine.

"We can buy foreign fabric delivered in Reedsburg for 40 to 50 cents less per yard than what it would cost us to make it," says President Wirth, who feels that the Government has gone too far in furnishing the latest textile machinery to competitors in Germany, Italy, and Japan.

He adds that the new trade policy of the administration seems to show more consideration for fabrics manufactured in the United States and that those mills still operating should be greatly benefited. Prospects are considerably brighter now, he thinks, than they were last fall.

He hopes that the new tariff on low cost woolen imports that went into effect January 1, 1961, will help. But it is the high quality of their cloth and individual attention to styling for their regular customers that brings the business to Reedsburg.

Wirth is not only a trained textile engineer who knows every phase of the plant operation—he is also a designer and stylist. Cloth from the Reedsburg mill is usually a little ahead of the latest style. It is rushed by air to clothing manufacturers in big cities throughout the United States.

Right now they are busy turning out material in new designs that will be seen in ladies' sportswear next spring.

Ralph Wirth learned his trade during 4 years as an apprentice and at the Textile College of Cottbus in Germany near Frankfurt am Main.

His first job in the United States was with the Knight Woolen Mills in Utah and he later worked for the original Utah Woolen Mills at Salt Lake City.

Wirth came to Reedsburg in 1930 and married the former Ruth Reuter, a teacher in the Reedsburg schools. A daughter, Louise, a registered nurse, is now Mrs. Ernest Eckelman, Columbus, Ohio. Another daughter, Susanne, attends St. Olaf's College, Northfield, Minn.

Wirth was president and superintendent of the Reedsburg mill for the Appleton company until he was elected to represent the new stockholders from the community who took over in 1953.

Once upan a time almost every city of any size in Wisconsin had its own woolen mills.

With so many closed down—even the Merrill mill has quit making garments—the few that remain hope to have a better chance for survival.

The Reedsburg mill has built a new brick front, along the main street where their goods are carefully inspected in a well-lighted room before shipment to their many customers. The old mill was put up in 1876.

President Wirth's office is still a cubbyhole in the old building where he worries about conditions and phones customers in New York, Chicago, and San Francisco for the immediate orders needed to keep the mill operating.

He shares the room with Walter Pieplow, plant manager, and Emanuel Link, chemist and plant engineer. A retail store adjoins the office where area women come to buy skirt material and woolen remnants.

If employee effort, community support, and management know-how can determine the future of Reedsburg's biggest industry, then the town has nothing to worry about.

But with storm clouds gathing on the horizon everyone wonders when the laid-off employees will be called back to work.

High hopes predominate, however, for Reedsburg's own woolen mills.

PROVIDING SURPLUS GOVERNMENT EQUIPMENT FOR VOLUNTEER FIRE DEPARTMENTS

Mr. WILEY. Mr. President, across the Nation, one of the outstanding examples of selfless public service—protecting property and life—is the work of our volunteer fire departments.

In Wisconsin, we have over 700 such departments, with more than 22,000 volunteer firemen.

Day and night, these volunteers respond to calls of distress from their friends and neighbors.

I feel it is important that, insofar as possible, we try to be of all possible assistance in enabling them to carry out their tasks.

Over the years, the volunteer fire departments have felt they should be entitled to Government surplus equipment—such as is now made available to schools, hospitals, forest protection services, and others.

Personally, I feel that Congress should give sympathetic consideration to their request for eligibility for such materials.

Currently, measures are pending in the House of Representatives before the Donable Property Subcommittee of the House Government Operations Committee. As yet, no action has been scheduled on them. Congress, I believe, should take expeditious action on this legislation.

Today, I received a letter from President Lawrence Larkin, of the West Central Wisconsin Firemen's Association, urging enactment of legislation for providing such equipment to volunteer firemen.

I ask unanimous consent to have the letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WEST CENTRAL WISCONSIN
FIREMEN'S ASSOCIATION,
Black River Falls, Wis. March 14, 1961.

Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.

DEAR SENATOR WILEY: We of the volunteer fire service have in the past 2 years asked the Senate to pass bill S. 1210, companion to bill H.R. 3733 sponsored by Senator HUBERT HUMPHREY and passed by Congress last year.

Each year this bill has never been brought up for a vote, which I am sure would pass if given any consideration. We believe the volunteer fire departments should be entitled to such Government surplus as well as schools, hospitals, Forest Protection Service, and many others. Many items of firefighting equipment and accessories are declared surplus by the armed services each year and are of no value to any other of the qualified agencies.

Congressman LESTER JOHNSON has assured us that he will again sponsor this bill in the House as has been done in the past 2 years and passed by a large majority, and then to receive no action in the Senate.

In our State of Wisconsin we have nearly 800 fire departments. Of this number, 700 or more are volunteer and in most cases not too well equipped. Wisconsin has over 22,000 volunteer firemen. We are asked to be a part of civil defense, which, in case of disaster, would require equipment for suppression of fires of many types of flammable liquids, gases, etc. No area is safe from these hazards even in peacetime as these liquids and gases are transported daily over our highways by truck tankers in every direction.

I have had the privilege of working with fire safety men in several States in the past years and recently attended the 4 days of meetings of the Fire Department Instructors Conference at Memphis, Tenn., where we were told of the many new dangers confronting the fire service. This seminar was well attended by firemen from large and small departments from 46 States—over 3,000 men.

I do hope the Senate will give our request some consideration.

Respectfully yours,

LAWRENCE LARKIN,
President.

EXPANSION OF SOCIAL SECURITY COVERAGE

Mr. WILEY. Mr. President, the task of providing our citizens with economic security in their senior years continues to be a serious problem confronting the country.

For this purpose the social security program, as well as private retirement plans, have been created and are now serving the people.

Unfortunately, these programs—even though they are many—do not serve all the people; nor in many cases do they meet even what should be considered minimal needs of our citizens. Consequently, we need to continually reexamine and attempt to revise and improve such programs, as well as the overall needs of the more than 16½ million people over 65 in the country.

Recently, I was privileged to receive a letter from the Kenosha County Deputy Sheriffs' Association outlining recommendations for lowering eligibility requirements under the social security program.

This fine association recommends that individuals engaged in protective occupations, such as law enforcement, personnel, firemen, game wardens, and others, be given an opportunity to receive full benefits at an age less than 65—recommended in the message as 60.

Why? Because age and physical vigor in such occupation are so important they often present difficult problems for continued employment.

The concern of the association, I believe, deserves the consideration of the Senate, particularly of our colleagues on the Senate Finance Committee, who will soon be considering the revision of the social security laws.

I ask unanimous consent to have a copy of the letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

KENOSHA COUNTY DEPUTY
SHERIFFS' ASSOCIATION,
Kenosha, Wis., March 14, 1961.

To the Honorable SENATOR ALEXANDER WILEY:

The Kenosha County Deputy Sheriffs' Association, after a thorough study of the protective agencies in our State, feel that a revision should be made in the OASI (social security) for all individuals working in the protective occupations, not only in Wisconsin, but throughout the United States. This is a momentary thought, but only after listening to many groups involved in the study of retirement problems. It is our studied opinion that the OASI should be changed so that individuals engaged in protective occupations throughout our country should be able to receive full benefits at age 60, rather than 65.

The reason that personnel in the protective occupations presents a special problem in providing retirement benefits, is that the duties of protective agencies require that employees in such agencies maintain a standard of physical and mental vigor which enables them to meet emergency conditions. There is an age beyond which such standards of physical and mental vigor cannot be maintained. To retain personnel in these organizations beyond the age of required physical and mental vigor is to jeopardize the public interest.

Our department and many, many other departments cannot, and do not, have available the positions to absorb the personnel on regular patrol duties into an office position. No informed person believes that employment of any major fraction of the personnel in these agencies should be continued to age 65.

These agencies exist for the sole purpose of providing safety for the public. The nature of their work requires physical vigor at all times. When an employee in the agencies, because of age or other cause, no longer meets the accepted standard of physical vigor he must of necessity, in the public interest, be retired.

That the corroding effect of time is not uniform among men cannot be denied, still age is in general a significant qualifying factor in these protective agencies.

Therefore, we as a group of officers involved in this type of work, believe that the age for full benefits under OASI for these agencies should be 60.

We also realize it is a waste of valuable experience to retire some of our officers and men at an early age when they could do so much good in an office position or in a supervisory position. We again stress, our department and many, many others cannot and do not have available the positions to absorb the personnel. So we feel these, or at least some of them, should be given the opportunity to retire at an earlier age.

We would appreciate any comments pro or con on this subject. Feel free to question us if you wish.

ROBERT L. WALLACE.

PROPOSED SALE OF CALCINES UNDER SENATE BILL 1116

Mr. LONG of Missouri. Mr. President, due to the lateness of the hour last Thursday, March 16, and not desiring to further delay the adjournment of the Senate, I did not make a statement in favor of S. 1116 at the time it was passed by the Senate. I have prepared a short statement in support of this bill, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR LONG OF MISSOURI

On February 28, I joined the senior Senator from Missouri in the introduction of S. 1116 to authorize the sale, without regard to the 6-month waiting period prescribed, of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stockpiling Act.

During World War II, the Federal Government owned a refinery for lead and copper concentrates near Flat River, Mo. Several thousand tons of byproducts known as calcines accumulated from this refining process.

After the war, the National Lead Co. leased this refinery from the Government, and continued to operate it in the refinement of nickel and cobalt from byproducts of the extraction of lead. The lead mining operation was discontinued in February 1961, and without lead mining, no more calcines are being produced.

The National Lead Co. has enough calcines to sustain operation until March 30, 1961. Unless calcines are secured between now and that date, 140 employees will lose their jobs. Flat River, Mo., is an area of chronic unemployment where the personal sufferings and hardships recall too vividly the conditions that existed during the days of the depression.

The passage of S. 1116 does not guarantee the sale of the surplus calcines to the National Lead Co. The company would have to compete against any other possible purchasers. If the National Lead Co. is successful in acquiring these materials, it will permit them to operate for a period of 6 months beyond March 30, 1961.

I am grateful to the Armed Services Committee and to the Senate itself for the expeditious manner in which this matter was handled. All of us in Missouri are thankful for anything to stop further unemployment.

Mr. KUCHEL. Mr. President, is there further morning business?

The VICE PRESIDENT. Is there further morning business?

ADJUSTMENT OF FUNDS AVAILABLE FOR FARM OPERATING LOANS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate

proceed to the consideration of Calendar No. 69, H.R. 1822.

The VICE PRESIDENT. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 1822) to adjust the amount of funds available for farm operating loans made pursuant to section 21(b) of the Bankhead-Jones Farm Tenant Act, as amended.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. HOLLAND. Mr. President, this is a very simple bill. It would merely change the figures in the second sentence of section 21(b) of the Bankhead-Jones Farm Tenant Act, as amended, by striking out "10 percent" and inserting in lieu thereof "25 percent." I think a brief explanation of the bill should suffice, because the bill comes to the Senate by a unanimous report of the Committee on Agriculture and Forestry.

Section 21(b) of the Bankhead-Jones Farm Tenant Act, as amended, provides that not to exceed 10 percent of the funds appropriated annually for operating loans under that act may be used for making loans to borrowers whose operating loan indebtedness would exceed $10,000. The amendment made by the bill would increase that limitation to 25 percent.

The cost of farming has increased rapidly and substantially in recent years and, as a result, there are more and more farmers whose operating credit needs exceed $10,000. Whereas the 10-percent limitation on the use of funds for these larger loans was adequate when the law was enacted, it is inadequate for present farming operations and credit needs. In 1960, the limit was reached in early May and, although general loans funds were available, no further loans of this size could be made for the balance of the fiscal year. The Department of Agriculture reports that for the current year the 10-percent limit was reached about March 1st so that the need for an amendment permitting a larger percentage of the loan fund to be used for loans of this type is urgent.

Mr. President, I wish to read one paragraph from the approving letter of the Secretary of Agriculture, as follows:

> As of December 31, 1959, only 33 percent of the amount of funds available within this limitation had been used, whereas on December 31, 1960, approximately 71 percent of the funds available under the limitation had been used. It is anticipated that the 10-percent ceiling prescribed by the present act will be reached within a few weeks. Unless the proposed legislation is enacted, many present borrowers and applicants for initial loans will be unable to obtain the credit needed for the operation of farms this year. The enactment of this proposed legislation would enable the Farmers Home Administration to assist many worthy applicants with funds available for such loans during the remainder of this fiscal year.

A question was raised in the committee as to whether or not the Farm Credit Administration felt that the passage of the bill would in any way interfere with its operations. We inquired of the Farm Credit Administration and received the affirmative statement from them that, in their judgment, the passage of the bill would not interfere with the normal function of the Farm Credit Administration.

I ask that the bill be passed.

Mr. SYMINGTON. Mr. President, Senate approval of H.R. 1822 is a recognition of the rapid and substantial increase in the cost of farming in recent years.

Today's amendment to the Bankhead-Jones Farm Tenant Act will provide that not to exceed 25 percent of the sum made available by the annual appropriation for operating loans may be used for making loans to borrowers whose operating loan indebtedness would exceed $10,000.

The present ceiling is 10 percent, and all loans allowable under the present law were made by March 1 of this year.

Passage of this amendment permits the Farmers Home Administration to make further loans during the current fiscal year to many farmers who are otherwise eligible and in need.

Mr. MANSFIELD. Mr. President, I urge the passage of the bill.

The VICE PRESIDENT. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 1822) was ordered to a third reading, read the third time, and passed.

REGISTRATION OF CERTAIN NEMATOCIDES, PLANT REGULATORS, DEFOLIANTS, AND DESICCANTS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 70, S. 1028.

The VICE PRESIDENT. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 1028) to amend the transitional provisions of the act approved August 7, 1959, entitled "Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959."

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Agriculture and Forestry, with amendments, on page 2, at the beginning of line 6, to strike out the comma and "if an extension to March 5, 1961, has been granted for such product under this paragraph (a)", so as to make the bill read:

> *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That paragraph (a) of section 3 of the Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959 (Public Law 86-139, 73 Stat. 286, 287) is amended by deleting the comma and the word "or" appearing at the end of clause (1) and adding at the end of such clause a colon and the following: *"Provided,* That with respect to any nematocide, plant regulator, defoliant, or desiccant whose use results in residue remaining in or on a food at the time of introduction into interstate commerce and which use had commercial application prior to January 1, 1958, the Secretary may prescribe a date beyond March 5, 1961, on the basis of a determination that such action will not be unduly detrimental to the public interest and is necessary to avoid hardships: *Provided further,* That such date shall not be extended beyond (i) the date on which an order with respect to the use of such product under section 408 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a) becomes effective or (ii) the date on which any extension granted under paragraph (b) of this section is terminated, or".

Mr. HOLLAND. Mr. President, I think a brief explanation of the bill would be in order. The chairman of the Committee on Agriculture and Forestry, the distinguished Senator from Louisiana [Mr. ELLENDER], had expected to make a statement, but was called from the Senate Chamber a few minutes ago. He asked the Senator from Florida to make a statement about the bill in the event he had not returned by the time the bill was called up.

The Committee on Agriculture and Forestry unanimously passed upon the measure, reported it favorably, and asked that it be approved with a small amendment, which will be stated at the proper time.

The bill would extend the time within which certain nematocides, plant regulators, defoliants, and desiccants may be continued exempt from certain provisions of the Federal Insecticide, Fungicide, and Rodenticide Act until such time as the Pesticide Chemicals Amendment to the Federal Food, Drug, and Cosmetic Act is made fully applicable to such products. It was requested by the Department of Agriculture and, with the committee amendment, is identical to H.R. 4662, as reported by the House Committee on Agriculture.

In 1959, when the original act was passed, bringing nematocides, plant regulators, defoliants, and desiccants under the Insecticide Act, and under the Pesticide Chemicals Amendment of the Federal Food, Drug, and Cosmetic Act, provision was made deferring certain effects of the Insecticide Act until tolerances could be established under the Pesticide Chemical Amendment. As to many of the new chemicals, the act is already applicable, because the research has been completed, and the tolerances have been declared by the Food and Drug Administration, and have been applied to those particular chemicals. However, as to other chemicals, the research has not yet been completed, and the passage of the bill would permit the Secretary of Agriculture to defer certain effects of the Insecticide Act until a determination of the facts by the Food and Drug Administration has been made, so that the particular chemicals which are now being used, and have been used without any serious results to anybody, could continue to be used, provided that the Secretary of Agriculture must in each case determine that such action will not be unduly detrimental to the public interest and is necessary to avoid hardship.

Industry studies to obtain residue and toxicological data necessary in obtaining registration of some of these products

under the Federal Insecticide, Fungicide, and Rodenticide Act are now underway, but were not completed by March 5, 1961, which was the terminal date of the present exemption. The bill would authorize the Secretary of Agriculture to extend beyond March 5, 1961, the effective date of the registration and enforcement provisions of the Federal Insecticide, Fungicide, and Rodenticide Act with respect to these particular products.

Under the bill, extensions would be authorized for any products only upon a determination by the Secretary of Agriculture that such action would not be unduly detrimental to the public interest and is necessary to avoid hardships and upon extension by the Secretary of Health, Education, and Welfare of the time within which such products are not fully subject to the pesticide chemicals amendment. Such extension by the Secretary of Health, Education, and Welfare depends upon the enactment of additional legislation now pending before the Congress. Thus the bill would allow the continued use of these products only where no substantial public health risk is involved, by making it possible to provide additional time to complete the the necessary scientific investigations, which, by the way, are underway in the most urgent fashion and manner possible.

I know of no objection to the bill. I think it would be administered with due regard to the health of all the people of the United States and with fair treatment to the manufacturers of the chemicals in question.

I ask that the committee amendment be considered and agreed to, and that the bill as amended be passed.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The VICE PRESIDENT. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1028) was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I move the Senate reconsider the vote by which the bill was passed.

Mr. HOLLAND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PRESIDENT KENNEDY IS PRAISED; REPLY IS GIVEN TO REPUBLICAN CRITICISM

Mr. RANDOLPH. Mr. President, yesterday the Washington Post published an article containing remarks by a Republican Party spokesman. Those remarks rank among the least informed and most partisan political statements I have ever read.

I refer to an attack by Republican District of Columbia Chairman Carl L. Shipley characterizing the Kennedy administration as showing "promise of being the greatest 'do nothing' administration in the history of our Republic."

I ask unanimous consent that the article entitled "Shipley Slaps 'Do Nothing' of Kennedy," published in yesterday's Washington Post, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SHIPLEY SLAPS "DO NOTHING" OF KENNEDY

District Republican Chairman Carl L. Shipley said yesterday the Kennedy administration "has been losing the cold war on all fronts."

He made the charge at a convention of the District Young Republican College Federation at American University.

"The sober truth" is how he characterized his statement that the President "is exercising no leadership, he is doing nothing, and the Kennedy administration gives promise of being the greatest 'do nothing' administration in the history of our Republic."

Shipley said that college students should constructively criticize the administration and "I will tell you a good place to start today.

"A few days ago President Kennedy launched another of his schemes in the great Kennedy giveaway sweepstakes, which seeks to solve every problem by creating a new Government bureau and asking Congress for more money to launch another program. His latest is a request for $500 million for Latin America."

Shipley apparently was referring to the President's request for $500 million for the Inter-American Fund for Social Progress. Most of the money will be handled by the Inter-American Development Bank, created by the Act of Bogota during the Eisenhower administration.

Mr. McGEE. Mr. President, will the Senator from West Virginia yield?

Mr. RANDOLPH. I yield to the Senator from Wyoming.

Mr. McGEE. Is it not conceivable that Mr. Shipley wanted to get such a statement into the RECORD this early because the Kennedy administration has begun to act so fast that he was afraid that if he waited any longer his statement would be so completely out of reality that there would be no point in issuing it?

Mr. RANDOLPH. The Senator from Wyoming makes a cogent observation. There is much truth in what he says.

I suggest that Mr. Shipley's party zeal is matched only by his disregard for events. Whatever criticisms may be fairly leveled against President Kennedy and his administration—and there are precious few to date—that of being a do-nothing administration is certainly not one of them.

President Kennedy has been in office just 2 months. During that time, he has sent to Congress—according to the count of our esteemed colleague, Senator BRIDGES, who is chairman of the Senate minority policy committee—29 messages on legislative matters. I consider my friend from New Hampshire a much more authoritative source of information on the level of activity of this administration than some local Republican Party official who is unduly biased.

It is worth observing also, Mr. President, since Senator Kennedy's campaign remarks were blamed for the outflow of American gold, that the flow ceased and the international market for gold was stabilized within 6 weeks of President Kennedy's inauguration. In all fairness to the campaigner, Senator Kennedy, and now to President Kennedy, this happier state of affairs must be attributed in large measure to the restoration of confidence in the American economy which has emerged from the actions of this administration.

Without emphasizing any invidious comparison between the actions of this administration and those of the preceding one, I would invite the Members of this body—and Mr. Shipley—to note the difference between the most recent negotiations with West Germany regarding the relationship between the dollar and the deutche mark, and the unfortunate results of the highly publicized Anderson mission to Bonn in the twilight hours of the Eisenhower administration. Both administrations had essentially the same instruments at their disposal, but there was a world of difference between their use of these instruments.

Finally, Mr. President, Mr. Shipley's rancor seems to have been particularly reserved for what he terms "the great Kennedy giveaway sweepstakes—his latest is a request for $500 million for Latin America." Presumably Mr. Shipley refers to the $500 million authorized by the 86th Congress—at the request of President Eisenhower—for the Inter-American Fund for Social Progress.

On March 14, President Kennedy sent to the Congress his message asking for the appropriation of the previously authorized $500 million and the $100 million which at the same time was authorized for the rehabilitation of southern Chile. However, I would emphasize that President Kennedy set forth in explicit terms in his message the conditions for a new approach to foreign aid, one which establishes self-help, progress, and social reform as the goals which American foreign aid will seek to achieve.

Under the conditions set forth in this message and in President Kennedy's companion remarks on the general topic of foreign aid, I have no hesitancy in asserting that there will be less waste and undirected giveaway activity on the part of this administration's foreign aid program than at any time in the past decade.

Mr. President, we are accustomed to the claim, from the other side of the aisle, that the Republican tent is large enough to admit all views. While I admire such genial hospitality, it would not seem to be asking too much to request that those who seek admission to the tent must register some fidelity to the facts of life. I do not believe such fidelity has been maintained in Mr. Shipley's comments, which border on carping criticism.

While I must confess to some difficulty in recognizing the world I know as the same one portrayed on the popular weekly serial telecast under the name of the "Ev and Charlie Show," I find the portrayal at least entertaining and spiced with humor. Although our esteemed colleagues who preside on that

occasion sometimes blur the lines between fact and fiction, they are eventually brought back to reality by the discipline of the legislative process itself.

Unfortunately, this discipline does not operate on some of their party colleagues outside the Congress. Yet, the position of a State or District of Columbia party chairman carries its own responsibilities; and the first of these, even before one's adherence to his party, is the understanding of the democratic process itself and commitment to the rules of reason.

The record is clear, Mr. President, that although the present administration is entering only its third month, it has moved on every front—in domestic and in foreign affairs—with vigor and effectiveness.

Mr. McGEE. Mr. President, I wish to commend the Senator from West Virginia for his forthright comments in regard to the shallowness and the irresponsibility of some attacks which have appeared in the press. I believe it would be appropriate if we would include at this point in the RECORD the observations, not of a District of Columbia Republican chairman, but of a foreign observer, who is interested, regardless of party in passing along his judgment in regard to the new American scene.

So, Mr. President, I ask unanimous consent to have printed at this point in the RECORD a very excellent article by James Morris, of the Manchester Guardian. The article is entitled "An English View: Kennedy Rekindles the Fires of Purpose."

In the course of the article, Mr. Morris states:

John Kennedy has restored some of the decency to patriotism, regenerated some warmth in our reluctant alliance, and, above all, for all our poor sakes, revived a little of the romance of America.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Chicago Sun-Times, Mar. 19, 1961]

AN ENGLISH VIEW: KENNEDY REKINDLES THE FIRES OF PURPOSE

(Here is a look at the New Frontier in Washington from the shrewdly perceptive viewpoint of a noted British journalist. James Morris is a world-roving correspondent for the Guardian of Manchester, England.)

(By James Morris)

WASHINGTON.—I met an acquaintance of mine in Washington the other day, looking distinctly haggard in an elevator, and asked him what the trouble seemed to be. He gave me a wan brave smile, like an arthritic cowboy. "It's just these New Frontiers, I guess," he replied with a sigh "I'm getting too old for the Injun country."

For Mr. Kennedy's capital flaunts, after only a few buoyant weeks of the new administration, a punishing new sense of gusto, flair, and enthusiasm.

The frontier climate that he demands for the new America already exists, with a tang, a string, and a hat held on. The temper of the President's approach to office, the novelty and apparent frankness of his character, the scholarly distinction of his advisers, the sex-appeal of his wife, the frilly charm of his daughter Caroline, tricycling through the White House—all these fresh, young, eager phenomena have wonderfully revivified Washington, au fond perhaps the most ineffably boring city on the planet.

Already the fading image of Mamie Eisenhower, with her homely tastes and comfortable shoes, seems wildly out of context, and all the old bumbleheads of Eisenhower's last years, with their lame excuses and their prickly hackles, seem to have vanished into the limbo of ignominy.

Today's Washington is like a woman who has switched from horn rims to contact lenses: there is a new gleam in her eye, but whether it is gaiety or glass only the optician can say.

HOW LONG WILL IT LAST?

How lasting? How genuine? How deep-rooted? Only an oaf or a Government spokesman would proclaim this a Nation rejuvenated overnight. The notorious fickleness of the American reputation will still depress you, as you remember the undying loyalties of yesteryear; the most forlorn figure in the United States today is Adlai Stevenson, who once commanded a devotion almost fanatic, but can now scarcely put a foot or a phrase right.

The absurd snobbery and sycophancy of the Americans will still make you squirm, as you wade through the adulatory gossip columns, observe the Jacqueline hairdo's following each other down the sidewalk, or hear yet again about dinner with the President up at Joe's house. The national streak of the catty and corrupt will still wrinkle your nose when they whisper the secret love lives of the newly great. The bluster and flagwagging of the American way seem more tiresome and old fashioned than ever at this moment of national catharsis.

Yet even the world-weary European, shrugging his shoulders on the edge of neutralism, can hardly escape some prods of stimulation upon Mr. Kennedy's New Frontiers. Today the arteries of American thought feel loosened again, the springs of innovation are released. There is tolerance and flexibility in the air. You can talk without a qualm about State medicine, the recognition of China, Chiang Kai-shek, homosexuality, the Germans—all subjects which, a year or two ago, were all too often armored in taboo and bigotry.

EGGHEAD IN HIS OWN AGAIN

The egghead, Stevenson's forlorn underdog, has come striding into his own again, wiping the steam from his spectacles, so that nearly every new official seems to be a kind of Ivy League existentialist or a prizeman from Harvard Law School.

You have to go to Washington to grasp the degree and nature of the change, the most convulsive of the democratic processes. It is not merely that the administration stems from a different party and appoints its own servants; even the jokes of the Capital seem new, the gossip, the cut of the cocktail suits, the very face and flavor, and pith of the place.

It is not, I suspect, an administration of style. The President, seen at least from an inquisitive distance, is extremely personable, highly intelligent, very ambitious, probably rather ruthless, with a nice wry humor, and a comforting touch, or perhaps affection, of shyness.

He does not in the least express, for all his hatless informality, the perennial simplicity of America that was reflected so exactly, and sometimes so pathetically, in Eisenhower's good but groping personality. Nor has he the magic of a Roosevelt, the command of a De Gaulle, the earth of a Churchill.

He looks to me the kind of a man who does not age much, does not experience that wrinkling and shading of the spirit that partners less calculating minds toward senility: The Kennedy we see now, I feel, is more or less the Kennedy we shall always see, until at last he topples, full of years and dignities, into the family mausoleum. He seems to me like a skilled technician, a plumber come to stop the leaks, with his able and openminded company of mates, his eclecticism, his stamina, and his persuasive eyes; but instinct tells me (for what that old imposter's hints are worth) that his stamp upon American history, though it will unquestionably be of honor and value, will not be ineffaceable.

A FRESH START OFFERED

This is, though, an impertinent quibble. A genius or a visionary is not what the Presidency needs just at the moment. What is wanted is a clean sheet and a fresh start, and these John Kennedy has bravely offered. Whatever you may think of the new administration's profundity, you can certainly never patronize or snigger at it, as the world sheepishly sniggered at Mr. Eisenhower and his Hagerty.

There can be few governments on earth to equal it in energy, youth, and education; indeed, with its new sense of serious dedication, its preoccupations with Asia and Africa, its correspondence courses in quick reading, Swahili and the diffuse nebulae, its sudden spate of intellectuals and Presidential portraits, Washington today reminds me disconcertingly of a brighter and breezier Moscow. (Though even the irreverent young Russians would hardly nickname a proposed national shrine, as the Washington wits have dubbed the monolithic design for a Roosevelt memorial, "instant Stonehenge.")

Nor is this an irresponsible comparison, though I say it myself. The Soviet Union, for all its fustian horrors, remains an exciting country, because it is working to an idea, transforming a nation, always on the move. The United States, too, sprang to greatness upon the wings of a notion, an ideology if you like, but lately she has lost her sense of purposeful idealism and floundered miserably from one confusion to another.

It is Mr. Kennedy's first, and brilliant, claim to admiration that in a few short weeks of office he has done so much to revive the sense of American mission. I do not know who writes his speeches, but since his inauguration they have glowed to a discernible inspiration with their clear calls to duty, comradeship, and generosity.

I do not know how long his New Frontiers will last or whether my friend in the elevator will ever be able to retire again into his muffled retreats of apathy; but for one skeptical alien at least, John Kennedy has restored some of the decency to patriotism, regenerated some warmth in our reluctant alliance, and, above all, for all our poor sakes, revived a little of the romance of America.

RESPONSE TO PEACE CORPS REFLECTS AMERICAN SPIRIT OF SERVICE

Mr. YOUNG of Ohio. Mr. President, the tremendous response among Americans to the newly organized Peace Corps disputes the frequently expressed belief that selfishness and grasping greed have supplanted the spirit of service in our Nation. It proves that Americans are still a vital people, still receptive to creative new ideas, still, as always, deeply concerned with the welfare of less fortunate people.

I assert that the widespread enthusiasm for President Kennedy's Peace Corps plan embodies the spirit that moved this country to greatness. The pioneering spirit of America still prevails.

Mr. President, no right-minded person can question the sincere motives which inspire this completely new venture in

international relations. It was proposed by a President of the United States who recognizes the deep importance of person-to-person contacts among peoples of different lands.

It is enlisting Americans of all ages who properly feel the obligation of the well fed to the hungry, the skilled to the unskilled, the comfortable to the needy.

Americans will go to distant lands, not in condescension, but in concern. They will go, not only to teach, but also to be taught, for the Peace Corps is not one-sided. In the lands where they are welcomed, Peace Corps volunteers will learn to respect and appreciate cultures different from our own. They will spread that respect to other Americans.

They will learn by living among their host people, eating what they eat, living as they live, speaking their language.

Surely, Mr. President, for the understanding and mutual respect it will foster, the cost will be small and the achievement for good will and enhanced prestige for America might be great.

Mr. President, reaction to the Peace Corps plan has not been unanimous. It has its detractors. They feel, apparently, that we are "rushing in blind" without adequate planning. I feel confident that a great deal of sober planning has been done—and more will be done before the Peace Corps becomes operable.

The plan's detractors—some of them, anyway—are trying to make it appear that grandiose claims have been made for the potential of the Corps which were, in fact, never made.

No one has suggested that in the Peace Corps we have found the answers to the deep, tangled problems that complicate our position in the world in this grim period of cold war and aggression. No one has hinted that any group of hundreds of Americans in Latin America and in Africa or the Far East can replace economic aid, military readiness, and normal diplomatic negotiations of this Nation.

All that has been claimed for it is that the Peace Corps will give opportunity to hundreds of Americans to serve their Nation in a new, exciting, and constructive way, in the spirit and tradition of our American missionaries, and that, in a limited but important way, these dedicated Americans will help people in other lands who need help.

Those, I assert, are reasons enough for the Peace Corps.

Mr. MANSFIELD. Mr. President, is morning business concluded?

The PRESIDING OFFICER (Mr. HICKEY in the chair). Is there further morning business? If not, morning business is closed.

UTILIZATION OF TELEVISION FACILITIES FOR EDUCATIONAL PURPOSES

Mr. MANSFIELD. Mr. President, I move that the Chair lay before the Senate Order No. 65, S. 205, and that it be made the unfinished business.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 205) to expedite the utilization of television transmission facilities in our public schools and colleges, and in adult training programs.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate resumed the consideration of the bill (S. 205) to expedite the utilization of television transmission facilities in our public schools and colleges, and in adult training programs.

ORDER FOR ADJOURNMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate concludes its deliberations today, it stand in adjournment until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, March 20, 1961, he presented to the President of the United States the enrolled bill (S. 451) to authorize the distribution of copies of the CONGRESSIONAL RECORD to former Members of Congress requesting such copies.

DEATH OF THE LATE REPRESENTATIVE B. CARROLL REECE OF TENNESSEE

The PRESIDING OFFICER. The Chair lays before the Senate a message from the House of Representatives which the clerk will read.

The legislative clerk read as follows:

H. RES. 228

Resolved, That the House has heard with profound sorrow of the death of the Honorable B. CARROLL REECE, a Representative from the State of Tennessee.

Resolved, That a committee of twelve Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral.

Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect the House do now adjourn.

Mr. MANSFIELD. Mr. President, on behalf of the Senators from Tennessee [Mr. KEFAUVER and Mr. GORE], I submit a resolution and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. The resolution will be read for the information of the Senate.

The resolution (S. Res. 112) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Honorable B. CARROLL REECE, late a Representative from the State of Tennessee.

Resolved, That a committee of two Senators be appointed by the Presiding Officer to join the committee appointed on the part of the House of Representatives to attend the funeral of the deceased Representative.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

The PRESIDING OFFICER, under the second resolving clause, appointed the Senators from Tennessee [Mr. KEFAUVER and Mr. GORE] the committee on the part of the Senate to attend the funeral of the deceased Representative.

ADJOURNMENT

Mr. MANSFIELD. Mr. President, as a further mark of respect to the memory of the late Representative B. CARROLL REECE, I move that the Senate stand in adjournment until 12 o'clock noon tomorrow.

The motion was unanimously agreed to; and (at 1 o'clock and 25 minutes p.m.) the Senate adjourned, under the previous order, until tomorrow, Tuesday, March 21, 1961, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 20, 1961:

COAST AND GEODETIC SURVEY

Subject to qualifications provided by law, the following for permanent appointments to the grades indicated in the Coast and Geodetic Survey:

To be lieutenant commanders

Edwin K. McCaffrey
Richard H. Houlder

To be lieutenants

Robert W. Franklin
Sidney C. Miller
Ronald M. Buffington

To be lieutenants (junior grade)

Clifford W. Randall	Arthur H. Goldberg
David F. S. Galloway, III	Paul D. Montjoy, Jr.
	Charles H. Nixon
Renworth R. Floyd	Melvin E. Jones
Richard I. Greene	John T. Maldari
Richard F. Dudley	Melvin J. Umbach
Joe P. Pennington	Ernest E. Brown
Robert L. Sandquist	Meinrade H. Schilly
Jerome M. Slackman	Anthony J. DeLuzio
James S. Midgley	Jim L. Piter
Claude B. Carter, Jr.	J. Austin Yeager
James G. LaBastie	W. Paul Yeager
John M. Doherty	John D. Bossler
Larry L. Wilkerson	James H. Blumer
Billy M. Keltner	Charles W. Mathisson

To be ensigns

Richard P. Bertocchi	William C. Page
Paul A. Chernoff	Palmer W. Randall
Jimmy D. Clark	Richard L. Sampson
Albert T. Fulco	Dewaine Seets
Frederick P. Kapinos	Horstas A. Uzpurvis
George Mavridis	

IN THE NAVY

The following-named (Naval Reserve Officers Training Corps candidates) to be permanent ensigns in the line of the Navy, subject to the qualifications therefor as provided by law:

Richard V. Aamodt	Elwyn G. Allyn
Lawrence I. Abrams	Charles E. Alsip
Joseph H. Adams	Robert A. Amann
James C. Adkins	David H. Anderson
Anson B. Albree, Jr.	Eugen C. Andres III
Robert W. Aldinger	John W. Andrews
Frank L. Alexander	James R. Armstrong
John L. Alexanderson	Melvin R. Armstrong

William K. Arnold, Jr.
Robert I. Ash
Charles F. Ashurst
Robert B. Atwater
James D. Austraw
Andrew W. Bachofen
Vernon W. Bacot
Robert S. Badgett
Norris R. Bagley
David L. Bailey
Henry A. Bailey, Jr.
James P. Bailey, Jr.
David C. Baker
John G. Baker, Jr.
John L. Baker
John T. Baker
Marvin C. Baker
Stephen K. Ballard
Jeffrey N. Ball
John I. Bandy, Jr.
Keith A. Barnes
Roger W. Barnett
Gary L. Barr
Thomas H. Barr
Robert W. Barrett
Franklyn S. Barry, Jr.
Avery W. Bates
Jack E. D. Batson, Jr.
Douglas C. Bauer
David J. Bauhs
Patrick M. Beatie
Troy Beatty
Eugene L. Beaulieu
Thomas T. Beeson
James F. Bell, Jr.
John W. Benepe
Charles W. Bennett
Richard D. Bennington
Paul C. Berkebile, Jr.
Harold I. Berliner
Philip G. Berndt
Charles L. Berry, Jr.
Robert K. Best
Grant L. Bigelow
Richard A. Bina
Jon A. Bird
Lloyd L. Bird
Karl T. Bjorn
William J. Blackmon
Douglas D. Blaha
Robert D. Blake
William D. Blake
David G. Blaker, Jr.
Alan F. Blanchard
John W. Blatt
Peter A. Bleyler, Jr.
Verne E. Blodgett
William G. Blunt
Francis X. Boes, Jr.
Francis W. Boufford
Thomad D. Bounds, Jr.
John V. Bowers
Alfred E. Bowman, Jr.
Paul D. Bowman
James S. Boyd

Dudley E. Cass
Donald P. Covill
Jimmie "K" Coward
Charles C. Cox
Milton E. Davis
Robert B. Desens
Lawrence E. Erickson
Thomas D. Eubanks, Jr.
David E. Farlow
Ernest E. Gehrdes
Gerard W. Guerin
Harold M. Heggestad
Mark P. Horst, Jr.
Kenneth M. Johnson
George R. Johnston
Charles D. Judy
William D. Kisch
William E. Knight
Roy E. Lawton
Billy J. Leming
Gordon R. Mansfield
Gene C. Michael
Granval L. Morrow
James R. Nagel
Eugene D. Newton
Roger A. Nichols
Ronald G. Patterson
Lonnie J. Perry
Carl E. Poulsen
Ernest E. Ross
Frank J. Silvey
William A. Stinson
Douglas E. Story
Frank H. Taylor
William C. Trimble
George W. Uffmann
Miles E. Walborn
Donald E. Waltman
Carl E. Willman

The following-named officer candidates to be permanent ensigns in the line of the Navy, subject to the qualifications therefor as provided by law:

Albright, Robert E.
Anderson, Chase D.
Bortis, Jon H.
Burke, Gary L.
Capie, Donald J.
Challender, Jack L.
Clemenger, John W.
Cook, Roy H.
Cowart, John M.
Diehl, Robert W. J.
Fields, Billy J.
Frick, Frederick M.
Gaines, William A.
Hardy, James C.
Harper, Francis A.
Harris, Robert H.
Haskins, Toner C., Jr.
Howell, Robert L.
Hurley, Robert F., Jr.
Jackle, Rudolph E.
Kunsky, David A.
Lee, Joe R.
Lombardo, Stephen W.
Martin, Edward F., III
Mason, Henry B.
Massanari, Gerald J.
Mikolajczyk, Ronald J.
Pierce, Sidney R.
Reynolds, Franklin E.
Riess, Joseph R., Jr.
Schenck, William H.
Short, Travis E.
Siemer, John R.
Stevens, Paul L.
Streit, Dennis N.
Sutphen, Patricia C.
Van Allman, Alfred C.
Wallace, James J.
Wernert, Lawrence A.
Wilbur, Robert E.

The following-named officer candidates to be permanent ensigns in the Supply Corps of the Navy, subject to the qualifications therefor as provided by law:

Davee, Francis W.
Grim, James W.
Helmuth, Robert A.
Hunt, George A.
Johnson, Thomas L.
King, William D.
Morris, John D., III
Quinn, Kenneth J.
Rittenhouse, Ferness L.
Voyles, Clyde W.

The following-named enlisted personnel to be lieutenants (junior grade) in the Navy, limited duty only, for temporary service, in the classification indicated, subject to the qualifications therefor as provided by law:

Willard Cochrane, of Minnesota.

U.S. ATTORNEYS

F. Russell Millin, of Missouri, to be U.S. attorney for the western district of Missouri for a term of 4 years, vice Edward L. Scheufler.

D. Jeff Lance, of Missouri, to be U.S. attorney for the eastern district of Missouri for a term of 4 years, vice William H. Webster, resigned.

DEPARTMENT OF STATE

U. Alexis Johnson, of California, a Foreign Service officer of the class of career minister, to be Deputy Under Secretary of State.

WITHDRAWAL

Executive nomination withdrawn from the Senate March 20, 1961:

The nomination of U. Alexis Johnson, of California, a Foreign Service officer of the class of career minister, to be an Assistant Secretary of State, which was sent to the Senate on February 28, 1961.

HOUSE OF REPRESENTATIVES

MONDAY, MARCH 20, 1961

The House met at 12 o'clock noon.

Rabbi Israel Gerstein, Passaic Park Jewish Center, Passaic, N.J., offered the following prayer:

Our gracious Father in heaven, for the privilege of witnessing another spring we thank Thee, and for the faith that it inspires in us that the world is not old and worn, headed for decline and oblivion, but that under Thy kind providence it is undergoing perpetual rebirth and renewal, and that the most glorious chapters of man's life are in the days ahead.

May this season of renewal move these chosen spokesmen of the people to renew their fervor and rekindle their sense of mission so that they will labor ever more zealously for a world in which

hurts will be healed, hopes sustained, the weak and the worn assisted, human dignity and decency upheld, the blight of war and the specter of annihilation banished, and peace in freedom prevail among all Thy children everywhere, with none to make them afraid.

We praise Thee for the services of one of our consecrated colleagues who has been recalled to Thee. Send the healing balm of Thy consolation to the members of his family, and may his memory ever inspire us to noble living. Amen.

THE JOURNAL

The Journal of the proceedings of Thursday, March 16, 1961, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 5075. An act to provide temporary extended railroad unemployment insurance benefits, and for other purposes.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 4806. An act to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes.

The message also announced that the Senate insists on its amendments to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BYRD of Virginia, Mr. KERR, Mr. LONG of Louisiana, Mr. SMATHERS, Mr. WILLIAMS of Delaware, and Mr. CARLSON to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1116. An act to authorize the sale, without regard to the 6-month waiting period prescribed, of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act.

LEGISLATIVE PROGRAM

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that business in order under the rules today may be in order on tomorrow.

Mr. ROGERS of Texas. Mr. Speaker, reserving the right to object, may I ask the majority leader if that includes the sugar bill?

Mr. McCORMACK. Yes.

Mr. ROGERS of Texas. Mr. Speaker, I regret that I am in the position that I have been put in. We have been refused the right to be heard before the Committee on Agriculture on this bill. The Committee on Rules has been circumvented on it. It places me in the position where I have no choice except to object.

Mr. McCORMACK. Mr. Speaker, will the gentleman reserve the right to object?

Mr. ROGERS of Texas. Yes.

Mr. McCORMACK. That presents the leadership with this problem: When a sitting Member dies, the House always adjourns out of respect for that Member.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I am glad to yield to the gentleman.

Mr. HALLECK. I do not know who has the floor, whether the gentleman from Massachusetts or the gentleman from Texas, under the reservation, but the Speaker called me this morning, as was perfectly proper, and spoke to me about having these matters go over until tomorrow. The gentleman from Texas knows that one of our most esteemed and respected Members has passed away. For a long time it has been the custom for the House of Representatives to adjourn out of respect to the memory of a departed colleague. That is what is being proposed at this time. I do not know what may transpire, if the gentleman insists on this objection. It might be that the majority leadership might find it necessary to see fit to go ahead with the business today.

I am sure the gentleman from Texas would not want that to happen.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. ROGERS of Texas. I yield.

Mr. McCORMACK. May I say if the gentleman insists on his objection I shall offer a motion to suspend the rules and make in order on tomorrow the business under the rules today.

Mr. HALLECK. Frankly, I would vote for that motion, but again I do not think even that sort of action should be had on the floor ahead of the things that will be said about the life and character of our departed colleague.

So I respectfully ask the gentleman to withdraw his reservation of objection.

Mr. ROGERS of Texas. No one regrets the position I have been placed in more than the gentleman from Texas. I realize the situation with which we are faced today, but the matter that I am addressing myself to is a matter that could have been brought up before the Rules Committee. It could have had hearings in the Committee on Agriculture. We were denied a hearing in both committees. However, in view of the situation that has developed out of respect to my good friend, CARROLL REECE, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. McCORMACK]?

There was no objection.

SPECIAL ORDERS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the special orders heretofore entered for today be transferred to tomorrow and be put at the head of the list.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

RULES COMMITTEE

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file a report.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

FEED-GRAINS PROGRAM

Mr. COOLEY submitted a conference report and statement on the bill (H.R. 4510) to provide a special program for feed grains for 1961.

GENERAL LEAVE TO EXTEND REMARKS

Mr. McCORMACK. Mr. Speaker, without establishing a precedent, I ask unanimous consent that all Members who may desire to do so may be permitted to extend their remarks in the CONGRESSIONAL RECORD and include therewith extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 5075. An act to provide temporary extended railroad unemployment insurance benefits, and for other purposes.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 451. An act to authorize the distribution of copies of the CONGRESSIONAL RECORD to former Members of Congress requesting such copies.

BILL PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H.R. 5075. To provide temporary extended railroad unemployment insurance benefits, and for other purposes.

THE LATE HONORABLE B. CARROLL REECE

The SPEAKER. The Chair recognizes the gentleman from Tennessee [Mr. BAKER].

Mr. BAKER. Mr. Speaker, it is with deep sadness and profound sorrow that I inform the House that our beloved colleague, CARROLL REECE, departed this life

on yesterday, Sunday, March 19, 1961, at 7 a.m.

BRAZILLA CARROLL REECE was born at Butler, Tenn., December 22, 1889, and was reared on a farm in a big family. His initial education began in the public schools and Carson Newman College of Tennessee, and was continued in New York University and the University of London. He holds honorary degrees from a number of institutions of higher learning, including Cumberland University, Tusculum College, and Lincoln Memorial University.

He was first elected to the 67th Congress and was its youngest Member. He was subsequently elected to the 68th, 69th 70th, 71st, 73d, 74th, 75th, 76th, 77th, 78th, and 79th Congresses, when he retired from Congress to serve as chairman of the Republican National Committee. After relinquishing his post as national chairman, he was elected to the 82d, 83d, 84th, 85th, 86th, and 87th Congresses, in all of which sessions he served with loyalty and untiring zeal.

He served his country with honor and gallantry in World War I, being decorated with the Distinguished Service Cross, Distinguished Service Medal, Purple Heart, Croix de Guerre with Palm, and cited for bravery by Marshal Petain, General Pershing, General Edwards, General Hale, and Colonel Lewis.

CARROLL REECE's life was filled with achievements in public service, and he served with marked distinction in many other fields as a humanitarian and industrialist.

In recent years he has been a member of the Rules Committee of the House.

At the time of his passing he was Republican national committeeman and State chairman of the Republican Party in Tennessee.

CARROLL had a heart of gold, filled with understanding, wit, and humor. He will long be remembered and his memory cherished by each of us.

He married Louise Despard Goff, whose father and grandfather served in the U.S. Senate. His only daughter, Louise, is married to Col. George W. Marthens of the U.S. Air Force. They have four children. CARROLL REECE was a devoted husband, father, grandfather.

I know that each of you join in extending to Mrs. Reece and the daughter, Louise, and all members of his family, our deepest sympathy in their great loss in which we share.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. BAKER. I yield to the distinguished minority leader.

Mr. HALLECK. Mr. Speaker, the death of B. CARROLL REECE has taken from the congressional scene a man of truly remarkable character.

The story of his achievements may well serve as an inspiration for future generations of Americans.

Certainly few men it has been my privilege to know have made more of their God-given talents than did CARROLL REECE.

Early in life the bulldog tenacity that was so characteristic, was reflected in CARROLL's determination to get for himself a fine education in spite of financial handicaps.

The tremendous personal courage we associate with our departed colleague was reflected in his magnificent combat record during World War I.

The keenness of his intellect was reflected in the success he enjoyed as a lawyer, banker, journalist, and legislator.

My friendship with CARROLL REECE goes back to my earliest days in this body.

I came to know him well as a fellow member of the great Committee on Interstate and Foreign Commerce, on which we both served some 20 years ago.

Later, we worked together in the cause of the Republican Party, he as chairman of the national committee and I as chairman of the congressional committee.

As has been reported, it was under CARROLL's leadership that we won control of the 80th Congress, a further testimonial to his energy and genius.

CARROLL REECE was an honest conservative who believed wholeheartedly in the virtues that have made this the great country it is today.

His career was a personification of the success story that is still the birthright of every American willing to meet the challenges of life with courage and determination.

I feel a deep sense of personal loss in the death of this wonderful friend.

In offering my heartfelt sympathy to his family, I hope they may find some consolation in their bereavement from the distinguished record of service CARROLL REECE performed for his party, his district, and his native land.

He will be sorely missed by all of us.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. BAKER. I yield to the distinquished majority leader.

Mr. McCORMACK. Mr. Speaker, the death of CARROLL REECE is a sad loss to the House and to his countless friends and admirers everywhere. He was profoundly respected for the fine qualities he possessed.

CARROLL REECE was an outstanding and dedicated legislator; he was a great Congressman, a man of firm convictions and of intellectual honesty. He courageously served his district, his State, and the Nation in this body in accordance with his judgment and his conscience. He served the people of his district in a manner that reflected great credit upon them.

We shall miss CARROLL REECE very much.

To Mrs. Reece and her daughter and their loved ones I extend my deep sympathy in their great loss and sorrow.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. MARTIN].

Mr. MARTIN of Massachusetts. Mr. Speaker, it is with infinite sadness I join in these services for a great American, B. CARROLL REECE, whose friendship I have been privileged to enjoy for 40 years.

CARROLL REECE won distinction as a dedicated, courageous, and able American leader in many fields of activity.

As a young man, he joined the American Expeditionary Forces in France in World War I. From the hills of Tennessee, which have contributed many talented persons to the Nation, he went into action with the 26th Division, the so-called Yankee Division, which was composed of troops largely from New England. When the war was most intense, he commanded the 3d Battalion of the 102d Regiment, which was a part of the Yankee Division. He was a young lieutenant who had risen from the ranks. Among the high general officers who cited Lieutenant REECE for bravery was Gen. Clarence R. Edwards, who commanded the 26th Division and who was known affectionately to his troops as "Daddy" Edwards.

CARROLL's charm, persuasiveness, courage, and resourceful leadership won him the admiration and lasting respect of his soldier comrades from New England.

In the field of politics, through his talent, and ability, he climbed the ladder until he was Republican national chairman in 1946. He was the inspiring leader of that campaign. I can never forget his efforts because they resulted in the election of the first Republican Congress since 1928, and my selection as Speaker of the House in the 80th Congress.

That campaign, fought as it was with very limited funds, marked the beginning of a new era in American political life. This campaign was but one instance of CARROLL's contribution to the Republican Party. He long served as the Republican leader of Tennessee and as its member of the national committee.

He was an outstanding Member of the Congress and contributed greatly to our legislative deliberations. He was first elected to Congress in 1920 and that service was interrupted on only two occasions; first by a party division in 1930 and again upon his election as Republican national chairman, he retired for 2 years.

Long interested in the veterans of our country, he was the author of the legislation which created the Veterans' Committee of the House. He was an early advocate of the establishment of the Army Air Corps and he served with great ability in wrestling with national problems as a member of the Interstate and Foreign Commerce Committee, foreign affairs, and armed services. At his death, he was a member of the Rules Committee.

He was a conservative in politics and yet he had the vision to embrace whatever policies he thought would be helpful to the Nation. To him, what he believed to be best for America came first. In the field of business, CARROLL made notable contributions as a publisher, as a banker, and businessman.

He was married to Louise Goff, daughter of Senator Guy Goff, of West Virginia, and granddaughter of Nathan Goff, Secretary of the Navy in the Harrison Cabinet. His devoted wife, intensely interested in the political life of the country, was a wise counselor and constant coworker in all his endeavors.

The death of CARROLL REECE is a distinct loss to the Congress, his State of Tennessee, and the Nation. He contributed greatly to the enrichment of

American life and we are all better off for his able service.

Although he has departed from this life, his works and deeds will long linger in the memories of his associates in Congress; his comrades in arms; and the people of the State he loved and served so well.

Personally, his death comes as the loss of one of my closest and most beloved friends.

To his good wife and family, I join with all of you in extending my deepest sorrow in this hour of their bereavement.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Tennessee [Mr. DAVIS], the dean of the Tennessee delegation.

Mr. DAVIS of Tennessee. Mr. Speaker, many of us knew that CARROLL REECE was dangerously ill, but none of us was prepared for his sudden passing. His district has lost a splendid representative; this House an outstanding legislator, and the country a very useful citizen. He was highly respected and esteemed in the State of Tennessee. Each member of the Tennessee delegation has lost a warm personal friend.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Ohio [Mr. BROWN].

Mr. BROWN. Mr. Speaker, it is with a heavy and a very sad heart I rise to join in the tributes being paid to my old friend and beloved colleague, CARROLL REECE. I knew, of course, of the seriousness of his illness. CARROLL knew, too, because he told me so. I shall always cherish the talks we had in the last 2 or 3 months since he was stricken, because again I saw demonstrated during those crucial hours the courage and character that came as his birthright from the mountains of Tennessee, and the strength he drew from those mountains. One of 13 children in a poor but a proud family, he went forth into the world from those mountains to become nationally, yes, even internationally, known for he proved his valor, his courage, and his patriotism on the field of battle as few men have ever proven theirs, and was decorated for heroism by his own and many foreign governments.

Our lives, CARROLL'S and mine, have been intermingled for more than a third of a century. We served together for many years on the House Committee on Interstate and Foreign Commerce. We also sat next to each other on the Committee on Rules for a long, long time. Both of us have been members of the Republican National Committee for many years. We worked together in the past campaigns of Senator Taft for he was one of the Senator's warmest friends.

During his national chairmanship—and I had the pleasure and the honor of nominating him for that position—I served as chairman of the executive committee of our party. I worked with CARROLL during the 1946 campaign as the campaign director of that year. Somehow or other our lives have been closely tied together all these years.

Mr. Speaker, I knew, as I said in the beginning, of the seriousness of CARROLL'S illness, yet when word came to me early yesterday that he had passed on—and I am thankful that he slept away—I was not prepared for the shock which came from the news.

CARROLL REECE has proven to all of us that a man from lowly beginnings can reach the highest place in life; that he can contribute in many ways to the welfare of his beloved State, of his party, and of his country.

He leaves behind him to his wife, his daughter, and his grandchildren the priceless heritage of a good name. He leaves to those of us who knew him and called him friend many precious memories which will live as long as we live.

My sympathy, my condolences, go out to his wife, Louise, to his daughter, and to the grandchildren. It is my hope and prayer that divine providence may sustain them in the great loss that has been theirs.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. BAKER. I yield to the distinguished gentleman from Illinois, the minority whip.

Mr. ARENDS. Mr. Speaker, once again we stand on this floor in sorrow to pay our respects to a departed colleague—a true, loyal, and loving friend of many years. At times like these, words seem meaningless and empty; but the words spoken today I know come from the hearts of those of us who were privileged to know CARROLL REECE, our friend.

In the many, many years of my association with him in the House, this bond of friendship grew and grew. Not only did this friendship grow in a political way, for our political views coincided so much, but rather sincere and warm personal friendship developed, which I shall forever cherish.

CARROLL REECE was an extraordinary man in many respects. There was a depth of sincerity about him that everyone did not know or appreciate. Not only did he have intense loyalty to his country, as proven by his brilliant service in World War I, but this loyalty carried on to an unblemished and outstanding record during his many years of service in Congress. Not only did he serve well his district, his State, and his party, but from early manhood to death he nobly served the Nation he loved.

He will be missed by those of us who served with him from day to day. His counsel and friendly advice was so much appreciated by those of us who worked with him. He was a man of great character and integrity, a devoted family man, and a public-spirited citizen, who has indeed left his footprints on the sands of time.

To his devoted wife and family, all of us extend our heartfelt sympathy.

As emphasized in the poem I am about to read, CARROLL REECE was a stepping-stone for his fellow men. So much of his life was devoted to helping those who needed help. For all this, he will never be forgotten:

A BAG OF TOOLS

Isn't it strange
That princes and kings,
And clowns that caper
In sawdust rings,
And common people
Like you and me
Are builders for eternity?
Each is given a bag of tools,
A shapeless mass,
A book of rules;
And each must make,
Ere life is flown
A stumbling-block
Or a stepping-stone.

—*R. L. Sharpe.*

Mr. AUCHINCLOSS. Mr. Speaker, will the gentleman yield?

Mr. BAKER. I yield to the distinguished gentleman from New Jersey.

Mr. AUCHINCLOSS. Mr. Speaker, the Members of the House of Representatives have lost a great friend and the country an outstanding citizen in the death of CARROLL REECE, of Tennessee. The impact of his devoted service to his country; his loyalty to what was true and honest and of good report will endure for a long time to come. He was a man with a big heart that won him many friends.

It was my privilege to have known CARROLL REECE pretty well, especially in the past few years. He served for 3 years as president of the Capitol Hill Club and under his guidance and inspiration the club prospered. He had a wonderful sense of humor and there was no bitterness ever in his heart toward those who did not agree with him. If there was ever a gentleman in the truest sense of the word, it was CARROLL REECE. The charm of his manner, the warmth of his friendship and his simple, straightforward character inspired confidence and courage. He gave of himself without reserve and he was unafraid.

CARROLL REECE was a man of many attainments in addition to his being a legislator of no mean ability. He was a student and teacher, holding a number of honorary degrees; a banker and newspaper publisher; a lawyer and soldier with a most distinguished record of combat service. And he was an administrator of outstanding merit, trusted and respected by all.

Together with many others, I have lost a dear friend and though he will be missed his influence over our lives will be present always. We can face the future stronger and braver because of his example and his strong spirit.

My most sincere sympathy goes to his loved ones. His death leaves a great void in their hearts and I pray that the good God of love and compassion may give them His blessing and bring them peace.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Mississippi [Mr. COLMER].

Mr. COLMER. Mr. Speaker, I am one of those Members of this House who had the privilege of not only the acquaintance but the friendship of CARROLL REECE. We all recognize, I am sure, that in the busy schedule that Members of this House have to maintain we have very little opportunity to know, really know, and understand our colleagues, unless we have the opportunity and the privilege to serve with them on a committee. I was doubly blessed in this capacity, because CARROLL REECE and I have served on the Committee on Rules for many years. In addition to that, he served on the Postwar Economic Policy Committee, on which I served.

I got to know him very, very well. The more I knew him, the more I appreciated him. He was a party man, but without partisanship. He always had the best interest of his country at heart. I got to know him in the capacity of a legislator. I admire his record as a soldier and as a statesman. Beyond that, I had an affection for him as a true friend. CARROLL REECE's death is a distinct personal loss.

This House, Tennessee, and the Nation have lost a truly great servant. I join my colleagues in extending to the surviving members of his family, and particularly his devoted wife, my deepest sympathy.

Mr. HOEVEN. Mr. Speaker, the sudden passing of our good friend and colleague B. CARROLL REECE comes as a shock to Members of the House of Representatives, especially to those of us who have known CARROLL for so many years.

There are only seven Members in the House of Representatives today who have served longer than CARROLL REECE, he having first become a Member of the House at the beginning of the 67th Congress. Throughout his long service, CARROLL REECE distinguished himself for his honesty and integrity and his devotion to those fundamental principles of real Americanism which have kept this country on an even keel. CARROLL REECE believed in the Constitution and his oath of office to preserve and protect the Constitution of the United States was not taken lightly. There was never any doubt as to where CARROLL REECE stood on legislation. He never played both ends against the middle.

A sturdy oak has fallen in the untimely passing of our beloved colleague. His passing is a great loss to the State of Tennessee and the congressional district which he served so ably and well for so long a time. We who remain behind shall miss him too. We take much consolation in the fact that CARROLL REECE served well his day and generation. I extend my deepest sympathy to Mrs. Reece and all members of the family.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Tennessee [Mr. BASS].

Mr. BASS of Tennessee. Mr. Speaker, the great State of Tennessee has had her share of men who have left their marks in political circles. Many of her sons have served with distinction and honor in the great body, the House of Representatives. In the passing of CARROLL REECE, one has departed from the scene who served with great distinction in this body, one who has served longer in the House of Representatives than any other man in history from the State of Tennessee. As a Tennessean, he was known as Mr. Republican because of his outstanding work in his party, his devotion to his party, and his keen interest in its development. He was also known as Mr. East Tennessee because, throughout the years, he took a great interest in the political developments as well as the historical development of east Tennessee. As a member of his party, probably no man in the history of the State of Tennessee, with the exception of Andrew Johnson, has been any better known than CARROLL REECE. In his passing from the scene at this time, his State and his Nation have lost an able soldier, statesman, and a great political figure. I extend my sincere condolences and sympathy to his wife and to the other members of the family.

Mr. BAKER. Mr. Speaker, I yield to the distinguished gentleman from Virginia [Mr. SMITH].

Mr. SMITH of Virginia. Mr. Speaker, I served for many years in this House with CARROLL REECE. I did not come to know him well until I came in close contact with him in the years that we both served on the Committee on Rules of the House. Then I came to know him as a great man and a great character. He was a person who was modest, retiring, and unassuming, one who never pressed himself on other people or on the House itself. But, when you came to know CARROLL REECE, you came to know him as a lovable character, one who never had a mean thought—one who never did a small act. He was a great legislator because he thought deeply and patriotically. He was a man who stood by the things he believed in, and had the courage to advocate them out in the open. I know the committee on which he served so faithfully has lost a valiant member and a sound counselor in its deliberations. The House has lost one of its outstanding Members. I extend my sympathy to his bereaved family in this hour of their great trial.

Mr. BAKER. Mr. Speaker, I yield to the gentlewoman from New York [Mrs. ST. GEORGE].

Mrs. ST. GEORGE. Mr. Speaker, it was my privilege to know our late colleague, Congressman CARROLL REECE, long before I came to the Congress. I also knew him when he was the national chairman of my political party. He was indeed a man of courage, as has been said. He was also a man of the people, who knew the people. He knew the people in all walks of life. He helped a candidate with loyalty and again with courage. His superb record in war and in peace will remain with us all as a memory, a challenge, and an inspiration.

To his devoted wife—Mr. and Mrs. Reece were married for 37 long and happy years—I extend my heartfelt sympathy. Also to his daughter and to all of his loving family. They were a devoted family, a typical American family.

As they go back to those hills of Tennessee where they are going, as they think of the strength that was given to him, they can say in the words of the psalmist, "I will lift up mine eyes unto the hills from whence cometh my strength."

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Tennessee [Mr. EVINS].

Mr. EVINS. Mr. Speaker, it is said that as men grow older they look with equanimity upon the approach of death—I do not know whether this is true but, if true, I certainly have not reached that stage in my own life where I can look with equanimity upon it, insofar as I am concerned or insofar as my friends are concerned.

I was shocked and saddened to hear of the passing of our esteemed colleague and friend, Congressman REECE, of Tennessee.

Although we knew that he was ill I could not look but with expectation that he would be back here with us in the House.

Only last week I received a letter from him in which he said:

> I will be seeing you when I get down on the Hill for the votes.

And so, Mr. Speaker, I say we are saddened by the news of his passing.

CARROLL REECE was eighth Member in point of seniority of service of the entire membership of this House—only seven Members have served longer. He was elected 18 times by the people of his beloved First District of east Tennessee. His constituency elected and returned him to Congress for 36 years of service—and they would have elected him again had he lived for other elections—for CARROLL REECE knew and had a hold on the hearts and affections of his people—as few Members have with their constituencies.

I had occasion to be in his district last fall visiting, while my mother was hospitalized, for a time in Johnson City in CARROLL REECE's hometown.

And, everywhere there I met people, who loved CARROLL REECE—not only in the banks and in the business community, but with people in the shops and stores—the barbershops and the man on the street—each spoke of their neighbor and friend with genuine affection—and admiration.

His people admired him as a man who arose from humble beginnings to heights of success in business and politics and in many endeavors.

He received many honors in his lifetime, but none of which I believe he particularly appreciated more than the dedication of a post-office building in his hometown which the Department designated "The Carroll Reece Branch of the United States Post Office."

Congressman REECE gave generously of his means to many charities and many worthy causes. He was especially interested in Carson-Newman and Tusculum Colleges in his district, which he supported.

One only has to read the brief recital of facts in the Congressional Directory to realize the breadth of the talents, interests, and activities of our late colleague and friend.

Farmer, schoolteacher, lawyer, businessman, banker, newspaper publisher, philanthropist, party leader and GOP committeeman, delegate to many Republican conventions and national chairman of his party, lecturer and legislator, distinguished Congressman, and soldier with a distinguished war record.

And with all his attainments he was a devoted father, husband, and family man. He possessed a warm and friendly personality.

Through service in World War I and service in Congress during World War II, he fought and labored for the ideals and principles of government in which he believed with devotion.

He was a stalwart member of his party, yet a partisan in the finest sense

of the term because he knew how to work and cooperate with others.

He was always kindly and courteous and behind his unfailing courtesy was a strength and astuteness few men possess.

Commonsense was his prime counselor and the Constitution his unfailing lamp.

His party faith was reflected in the many honors given him by his party, including the chairmanship of the Republican National Committee during the years immediately preceding the Republicans' returning to power in 1952 with the election of General Eisenhower as President.

With all his attainments he remained as friendly and as considerate a soul as ever gave gentle companionship to his fellow man.

One who did not know our colleague, CARROLL REECE, might have thought of him, because of his business and financial success in business and political life, as an aloof and austere man—but such was not the case. CARROLL REECE was a warm and friendly person. He was never lured from the realities of human fellowship.

Like Kipling's lines, he talked with crowds and walked with kings but never lost the common touch.

The Republican Party has lost a faithful and effective leader—Tennessee and the Nation a devoted and distinguished son, and I humbly add, that I have lost a cherished friend.

I extend my deepest sympathy to Mrs. Reece and members of his family.

Sunset and evening star,
And one clear call for me.
And may there be no moaning of the bar
When I put out to sea.
But such a tide as moving seems asleep,
Too full for sound and foam,
When that which drew from out the boundless deep
Turns again home.
Twilight and evening bell
And after that the dark.
And may there be no sadness of farewell,
When I embark;
For tho' from out our bourne of time and place
The flood may bear me far,
I hope to see my Pilot face to face
When I have crost the bar.

Mr. BAKER. Mr. Speaker, I yield to the gentlewoman from Ohio [Mrs. BOLTON].

Mrs. BOLTON. Mr. Speaker, years back when I was the wife of a Congressman, it was my privilege to know CARROL REECE in the give and take of social understanding. He was always gracious; he had what we northerners had come to feel to be the chivalry of the South, and he was delightful in every respect. Then, when I came into the House he welcomed me warmly as the wife of an old friend, and I have always deeply appreciated it. I have always wished I might have seen more of him and known him better.

May I read something from James Martineau:

We seem to have given him back to Thee, dear God, who gavest him to us. Yet, as Thou did'st not lose him in the giving, so we have not lost him by his return.

Not as the world giveth, giveth Thou, O Lover of Souls. What Thou givest, Thou takest not away. For what is Thine is ours always, for we are Thine. And life is eternal; and love is immortal; and earth is only a horizon; and a horizon is nothing save the limit of our sight.

I send my heartfelt understanding sympathy to his wife and family.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Tennessee [Mr. FRAZIER].

Mr. FRAZIER. Mr. Speaker, it was with a distinct feeling of loss that I was informed yesterday morning of the death of our colleague, CARROLL REECE.

I was privileged to know CARROLL for many years before I came to this House. I knew him better after I was elected and had the privilege of serving with him.

CARROLL REECE was a courageous soldier. Almost immediately after his return from his service in World War I he was elected to this body, and for practically 35 years, with two short exceptions, he had continuously served as a Member of this House. To me that demonstrates the appreciation his constitutents had for him and the great service he rendered to the people of the First Congressional District of Tennessee. He was a great legislator, a loyal friend, and one who served not only his district but also his State of Tennessee and the Nation. He was an outstanding Member of this great body. His death is a great loss to Tennessee and the Nation.

I extend my deepest sympathy to his beloved wife and daughter.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Ohio [Mr. AYRES.]

Mr. AYRES. Mr. Speaker, in life many tributes and honors were bestowed on CARROLL REECE. Today in death those tributes and honors are being continued.

A great man once said: He who remains humble in glory shall be great in his eternal reward. This I believe to be true regarding CARROLL REECE. He was good to me.

It must be gratifying to Mrs. Reece that those who knew her husband will feel that the earth has lost a visitor and the Heavens have gained a permanent guest. We shall miss him, but those he joins shall greet him.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Tennessee [Mr. EVERETT.]

Mr. EVERETT. Mr. Speaker, it is with deep regret that I appear here today to make my first remarks since becoming a Member of this body to pay tribute and honor to the late CARROLL REECE. When I first came to Washington in 1945 as an administrative assistant to Senator Tom Steward, of Tennessee, I came to know CARROLL REECE and in working with him on projects that affected his congressional district in the State of Tennessee I have never seen a man with more loyalty to his congressional district, to his State, and to the Nation.

When I served as administrative assistant to the Governor of Tennessee I had other dealings with Mr. REECE in connection with projects on the State level that he was interested in.

Since I have been a Member of Congress for the past 3 years he has certainly been an inspiration to me in knowing the people of his congressional district, in knowing what they think of him for his loyalty and for his honesty. It has been said he knew how to talk to anybody, how to give aid and assistance to them in whatever problem they might have.

We in our congressional district have a heavy heart today at his passing. Truly our congressional district has lost a great friend, the State of Tennessee has lost a valued friend, and the Nation as well.

To Mrs. Reece, the daughter, the grandchildren, and the son-in-law I extend my condolences and say that he by coming our way has meant much to all of us.

Mr. BAKER. Mr. Speaker, I now yield to the distinguished chairman of the Committee on Interstate and Foreign Commerce [Mr. HARRIS].

Mr. HARRIS. Mr. Speaker, it was with deep sorrow I learned yesterday morning of the passing of our beloved colleague and friend, CARROLL REECE; the grim reaper has again visited this great body.

It was my good fortune and privilege to come to know CARROLL REECE very soon after I came to this body in 1941. When I became a member of the Committee on Interstate and Foreign Commerce, CARROLL REECE was a member. He became a member of the committee, I believe, at the time that our beloved Speaker assumed the chairmanship of the committee in 1933. He served continuously on the committee until the 79th Congress and the records of the committee show the great contributions he has made to the welfare of the country as a member of the Committee on Interstate and Foreign Commerce during the 14 years he served on it.

It was from that committee and the House that he left and became chairman of the Republican National Committee, I recall very well that even though we, as Democrats and Republicans alike, regretted to see him leave the committee, we did have a degree of pride in the fact that a man who had served on the committee so long and faithfully was being recognized by his own party for the highest position within the party's power to give.

It is rather interesting that during the time CARROLL REECE was a member of the committee, the Committee on Interstate and Foreign Commerce after considerable discussion, hearings, and long consideration, reported to this body, and the Congress approved, an amendment to the Public Health Act providing for cancer research.

Now we find that our colleague, who had given so much of his time to a program that would try to solve the mysteries of this dreaded disease, was stricken by it himself.

Yes, Mr. Speaker, for CARROLL REECE it is finished, but his life and character will continue to live, particularly with those of us who knew him so long and among his many faithful friends here, as well as the United States itself, and certainly the great State of Ten-

nessee. Certainly, we know it can be truly said "Well done, thou good and faithful servant."

To his beloved wife and the other members of the family I join in extending for Mrs. Harris and myself our deepest sympathy in their bereavement.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from North Carolina [Mr. JONAS].

Mr. JONAS. Mr. Speaker, it is always sad to lose a colleague, and we have now suffered the loss of three in the last few weeks. But it is especially distressing to lose not only a colleague but a warm personal friend.

I first came to know CARROLL REECE many years ago when he and my father served together in Congress. That friendship quickened over the years when they served together as members of the Republican National Committee, and it became a close and personal one during the years we served together as Members of this House since 1953.

It so happens that two counties of North Carolina's 10th District which I have the honor of representing here in Congress, adjoin the 1st District of Tennessee which was so ably represented by CARROLL REECE for 36 years. This means that CARROLL and I had many interests in common and we had many, many mutual friends. I have visited frequently in his district and he in mine. It has been a privilege and a pleasure for me to work closely with him over the years on problems common to both of our districts, and during this intimate association I came to regard him not only as a friend but also as a counselor.

It would be difficult, Mr. Speaker, to think of anything to say on this sad occasion that has not already been so well said by the many colleagues who have preceded me today. I would simply say this, in addition to associating myself with all of the remarks that have been made, that the privilege is not often given to one man to carve out for himself so many distinguished and outstanding careers. We have heard today, and indeed I have known for years, of the courage and patriotism CARROLL REECE displayed so well on the combat battlefields of France. His brilliant record as combat soldier was recognized when he was awarded the Distinguished Service Cross, Distinguished Service Medal, the Purple Heart, and the Croix de Guerre with Palm for bravery.

CARROLL REECE compiled an equally outstanding record in the business life of east Tennessee, and for years has been one of the most respected and admired business leaders of that great section of our country. His outstanding service to the Republican Party has been referred to by almost every speaker today. Mere mention of the fact that he served for many years on the national committee from Tennessee and then as chairman of the national committee when the Republicans gained control of Congress for the first time in 16 years speaks for itself. Few men in our time can claim credit for such accomplishments. And we are all familiar with the outstanding and distinguished record he made for himself here in the House of Representatives.

CARROLL REECE was not only a distinguished American in war and peace, but he was a man of strong political convictions with the intellectual honesty and courage to proclaim them on all occasions. The old saying that a prophet is not without honor except in his own country certainly did not apply to him. Repeated victories at the polls is indicative of the esteem and affection he enjoyed at home in his beloved east Tennessee hill country.

In the untimely passing of CARROLL REECE, east Tennessee has lost one of her finest sons, our country has lost a distinguished statesman, this House has lost one of its most useful and respected leaders, and I have lost a warm and personal friend.

I hope that it may be of some comfort to his bereaved widow and daughter to know that thousands of his countrymen today are mourning with them over the passing of this great man. I should like to be included among that number.

Mr. RAYBURN. Mr. Speaker, will the gentleman yield to me?

Mr. BAKER. I yield to the distinguished Speaker of the House.

Mr. RAYBURN. Mr. Speaker, the passing of CARROLL REECE touches me very deeply. He and I were real personal friends. He came from those pine-clad and rugged hills of east Tennessee where I was born, in the district of the distinguished gentleman from Tennessee [Mr. BAKER]. It has always seemed to me that there was something in the elements there, in those hills of east Tennessee, that caused men to grow into rugged stature. The soil and its vegetation put something in the flesh and bones of the people of those hills that is found in few other places.

CARROLL REECE and I had a lot of fun together. We were alumni of a great Tennessee institution, Tusculum College; I think the oldest one west of the Allegheny Mountains. Degrees were conferred upon us that we had fun about, saying that if we had taken an examination we would not have passed, but the generosity of that great college made us both proud in conferring upon us each an honorary degree.

I have been in his district quite a lot. Of course, the Democrats there knew they could not defeat him, and some of the most distinguished Democrats of that section were among those who were most enthusiastic about CARROLL REECE; because he had the elements in him that made people love him, that made people trust him. He gave friendship freely and he received it in great amount. So today I wanted to say this word in tribute to a friend, a real personal friend, a splendid legislator, a great citizen of the hill country of Tennessee, a great citizen of that State, and a great citizen of our beloved country.

To his family I express my deepest and sincerest sympathy, because I think the papers back in east Tennessee today will probably say that the body of CARROLL REECE is coming home to stay.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Tennessee [Mr. LOSER].

Mr. LOSER. Mr. Speaker, it is a great privilege to me to join my colleagues here in the House in paying tribute to the memory of one of Tennessee's most distinguished sons. While I do not come from the hill country, I know of its many stalwart sons, and CARROLL REECE stood among those at the top of that long list of men and women from Tennessee who have contributed so much to the welfare of that great State and of the Nation.

I was privileged to know CARROLL REECE for many years, but during my tenure here in the House I came to love and admire and respect him for his forthrightness. I am sure that CARROLL REECE, as he entered the portals of the Great Beyond, heard the welcome words of the Judge who sitteth as the Judge Supreme, "Well done, good and faithful servant. Enter thou into the joys of thy Lord."

I join my colleagues here today in extending to the wife and family of CARROLL REECE my deepest sympathy.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Colorado [Mr. CHENOWETH].

Mr. CHENOWETH. Mr. Speaker, I am sure all of us were moved by the eloquent tribute just paid to our departed colleague by our beloved Speaker, Mr. RAYBURN. I was deeply saddened yesterday when I first learned of the passing of CARROLL REECE. I join my colleagues in extending our sympathy to the members of the Tennessee delegation. Not only the State of Tennessee, but the entire Nation has suffered an irreparable loss in the passing of CARROLL REECE. I knew he had been critically ill, but I was hoping he would recover.

I first knew CARROLL REECE when I came to the House some 20 years ago. At that time he was one of the most beloved and outstanding Members of the House. Everyone had great affection for CARROLL REECE, and everyone liked him. He always had the same gracious disposition and spread happiness and good will wherever he went.

I had the great pleasure of serving on the House Committee on Rules with CARROLL REECE, and I know of his devotion to his duties and his work in the House. He made a most valuable contribution to the deliberations of this body, and his judgment was always respected.

When CARROLL REECE was chairman of the Republican National Committee he made several trips to the State of Colorado. I know that I speak for the people of our State when I express their sympathy here today. The people he met in Colorado had great affection for CARROLL REECE. He was always given a warm welcome when he came to our State. We were most happy to see Mrs. Reece and CARROLL whenever they could find time for a visit.

Mr. Speaker, the passing of CARROLL REECE is a grievous loss to this body, I feel that I have lost a most valued friend and the House will not be the same without CARROLL REECE. We need more men like CARROLL REECE in public life today. It is not possible to replace a man like CARROLL REECE, with his distinguished background and long experience in Congress. We know of the

high esteem in which he was held by the Members of this House on both sides of the aisle.

Mr. Speaker, I recall that CARROLL REECE was active in organizing the Robert A. Taft Memorial Foundation, and that it was largely through his efforts that the Robert A. Taft Memorial was erected. He presided at the dedication ceremonies in April 1959. I shall never hear the carillon bells in this memorial without being reminded of CARROLL REECE, and of the great privilege of serving with him in this body.

Mrs. Chenoweth joins me in extending our deep personal sympathy to Mrs. Reece and the daughter, and to the other members of the family

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Ohio [Mr. McCULLOCH].

Mr. McCULLOCH. Mr. Speaker, my heart is filled with sorrow at the loss of my good longtime, loyal friend, B. CARROLL REECE. He was a courageous soldier and a brilliant young officer. He was a constructive, convincing, and successful newspaper publisher. He was an able businessman-banker who has left his mark on the State he knew and loved so well.

CARROLL REECE was a resourceful and inspiring party leader, and an able, constructive, and effective legislator. While he left us far too soon, the good that he has done will live long after the return of his body to those rugged hills he loved so well. His entire family has our deepest sympathy.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from West Virginia [Mr HECHLER].

Mr. HECHLER. Mr. Speaker, I join in paying tribute to the late Honorable CARROLL REECE, a great soldier, teacher, banker, businessman, newspaper publisher, political leader, statesman, colleague, and friend.

West Virginia was a second home for CARROLL REECE. Our beloved Speaker has mentioned the strength which comes from the hills of east Tennessee. One measure of CARROLL REECE'S wisdom is the fact that he married a lovely, wonderful, and gracious West Virginia girl, Louise Despard Goff, whose father and grandfather served in the U.S. Senate from the State of West Virginia. So he showed great political acumen and became that much greater by joining the strength of the hills of West Virginia with his own hills of Tennessee.

Congressman REECE and his gracious wife frequently attended functions of the West Virginia State Society, and they have a host of friends in the Mountain State who mourn the passing of a great and good man.

I also recall something else about my longtime friendship with CARROLL REECE which has not yet been mentioned. He was once a teacher, as I was. Many times I would bring groups of students to Washington to visit him at the Republican National Committee while he was chairman. He inspired young people to think more clearly and to take a more active part in public life.

America has lost a towering political figure, and also a great human being and a sincere friend of all of us.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Ohio [Mr. ASHBROOK].

Mr. ASHBROOK. Mr. Speaker, I consider it an honor to associate myself with the statements that have been made regarding our great friend, the late CARROLL REECE. I am particularly happy that the gentleman from West Virginia [Mr. HECHLER] brought out a point on which I want to amplify, and that is about Mr. REECE'S interest in young people. It is certainly appropriate that we leave the eulogies as to his great public service to those who knew him so much longer than I did. Our good colleague, the gentleman from Massachusetts [Mr. MARTIN], spoke of 40 years of close friendship. My distinguished senior colleague from Ohio [Mr. BROWN], spoke of a third of a century, and our Speaker spoke of a lifetime of personal friendship. For my part, I can speak of but 5 years of close personal friendship with Mr. REECE. However, in that time I believe I became an expert and an authority on at least one facet of this great man's life and that is his genuine concern and interest in young people. Those of us in politics who are among the young know quite often we find very few friends, very few who will give encouragement such as he gave. We had no one—no champion on our side, and, of course, Mr. REECE was a party man—we had no champion who so encouraged young people as did this great man. Many of us will recall in 1948, it was Mr. REECE who, through his own energy and through his own efforts, succeeded in having a resolution passed at the national convention at Philadelphia which made the Young Republican National Federation a distinct and an integral part of our Republican Party. Up to that time for one reason or another, there had been a rather loose connection and young people were not a real part of the party organization. Mr. REECE did this because he truly believed in young people. He truly believed they belonged in politics, and that their participation was important. Those of us on both sides of the aisle know that those who labor in behalf of party politics are actually working in the public service, because we so believe in our two-party system.

Mr. Speaker, it was my honor in 1957 to 1959 to serve as chairman of the Young Republican National Federation, the very organization to which I referred a moment ago, which was made an official part of our party in 1948.

I know Mr. REECE took personal pride in the fact that one of his secretaries, Miss Jerrie Kent, who also lives in Johnson City, Tenn., was from 1957–59 the cochairman of the federation, which now possesses a membership of some 500,000 young people in the United States. During those 2 years I came to know Mr. REECE to a greater degree than before. I learned of the many efforts he made in behalf of the young people. I can say that most of us in politics in the "young" category find very few champions and very few friends that would equal the late CARROLL REECE. I know I had a personal relationship with him which was more like father and son; not so much as colleague and personal friend, as others have mentioned, but in that category of people to whom Mr. REECE gave so much time and effort.

To his family I shall speak for the many thousands of young people throughout the country whom he aided and encouraged, that we have truly lost a champion and friend.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from New York [Mr. DEROUNIAN].

Mr. DEROUNIAN. Mr. Speaker, 8 years ago when I first came to this House, one of the few men I went to for advice was CARROLL REECE. I shall be eternally grateful for his wisdom. He was a true Christian, whose charitable contributions were quietly donated. One never read of his gifts in the newspapers. He was a man dedicated to principle. I know we all recall that a month and a half ago he left a sickbed, which we now know was his deathbed, to come to the floor of this House to vote against what he thought was an assault on the independence of this House. He was not a man of political expediency which is becoming such a bad habit today.

The Nation has truly lost one of the great soldiers of the old frontier.

I offer my sympathy to his family.

Mr. BAKER. Mr. Speaker, I yield to the gentleman from Florida [Mr. CRAMER].

Mr. CRAMER. Mr. Speaker, it was with a heavy heart that I learned of the untimely death of CARROLL REECE and it is with a feeling of deep sorrow that, on this occasion marking his passing, I join with the remarks of my colleagues concerning the truly outstanding and highly significant service that CARROLL REECE rendered to the people of his district, State, and Natiion.

There is little I can add to the fine tributes made by other Members of this body who knew him much longer than I. There stands in my memory, however, a landmark of deep gratitude and grateful appreciation for the help and support given my first victorious election to Congress by CARROLL REECE. There are few men who contributed more to my victory than did he.

And, it followed, that when I first came to Congress he was the Member I called upon most often for help and advice. He gave it freely, for one of the outstanding characteristics of CARROLL REECE was his willingness to give of his time and his efforts to his friends, to the people of his district, and to the Nation.

Likewise, my district has felt a close friendship for CARROLL REECE and his family for a number of years. His brother has resided in my district for many years, and CARROLL REECE and his wife, on many occasions, visited Clearwater and St. Petersburg on the west coast of Florida. His passing, therefore, will be considered a great personal loss to the people of my district as well as to his own. I am certain, also, that his passing is considered a great loss to the people of the entire Nation for never was there a more dedicated man than CARROLL REECE, nor a more valiant fighter for the things in which he believed.

I join in the expressions of sympathy to his wife, his daughter, his brother, and to his family.

GENERAL LEAVE TO EXTEND

Mr. BAKER. Mr. Speaker, I ask unanimous consent that all Members may have 3 legislative days within which to extend their remarks at this point in the RECORD in honor of the memory, life, and public service of the late Congressman REECE.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. CONTE. Mr. Speaker, I join my colleagues of the saddened body, to pay tribute to one of its most outstanding and distinguished Members, the late BRAZILLA CARROLL REECE of Tennessee. By his passing, the Nation has lost a great citizen and a dedicated legislator.

During World War I, he distinguished himself for bravery and gallantry on the field of battle, with the same fervor and spirit of noble sacrifice which were to mark his long career in public life.

The many years, as legislator, attest to his devotion to our great Nation and to the well-being of its citizenry. He was motivated by the highest principles of representative government of which he was a part. He translated his firm belief in the basic tenets of democracy into actions which benefited the Nation, his State, and constituency. To this great legislative body, he gave completely of his great personal wisdom and of the balanced reasoning born of his long experience as a public servant.

To the Republican Party, whose principles and philosophy he represented so well, he gave the same unstinting efforts and great abilities which characterized all of his activities, during his term as its chairman.

The long public life of this great legislator is marked by the exemplary virtues of personal integrity, dedication to the highest principles, and unselfish motivation. Indeed, this House and our Nation are grateful for the devoted service of this great patriot.

While we mourn his irreplaceable loss, it is well to remember that he has bequeathed examples which shall remain as his monument in the history of our Nation and of this body, always.

To his family, I join my distinguished colleagues in an expression of profound sympathy and sincere condolences in this moment of bereavement.

Mr. LIBONATI. Mr. Speaker, the death of Representative B. CARROLL REECE marks the passing of an American who cultivated the chivalric virtues of public life—love of combat in statesmanship, practical acceptance of the standards of party loyalty, high sense of honor, and acceptance of political life as a game to be played according to the rules.

His early life, steeped in the trying problems of financial adversity, presented a challenge to him. He knew no compromise. He developed a strong moral standard for reasoned justice. He fought against liberal and precise doctrines, regardless of popular acceptance. His only change was in judging the plight of the poor and the needy.

His instincts and reasoning pitted him against the beneficent proposals of his fellow statesmen that the world could be redeemed from chaos, or saved through the indiscriminate expenditures of American dollars.

His life experiences, as lawyer, banker, and statesman, dictated an ultraconservative approach to relieve the economic ills of depressed nations of the world.

He advocated reforms within the national economic structures of these ailing nations themselves that would stimulate the creative talents of the people to thus realize their own economic salvation through the realistic development of the principles of freedom of enterprise. People must accomplish these things through their own efforts. He was highly critical of open charity. He asserted that this type of aid breeds indolence and kills individual ambition.

Mr. REECE became a Republican leader with power and authority. He was the last word in the acceptance of party decisions—his policy of conservatism was stamped on every national platform. He was the recipient of appointments to every high office within the inner circle of the party. His every act or utterance personified the principles of true republicanism.

We have lost a great patriot, honored by his Government in battles—World War I—with many decorations.

He authored much of the legislation affecting veterans' interests, that is, the resolution creating the House Committee on Veterans' Affairs. As a member of the powerful Rules Committee, he functioned as a leader of his party.

His work, now done, can be emblazoned upon the significant historical records of our time.

We, his colleagues from the State of Illinois, extend to his dear wife, Louise, and to his family, our heartfelt condolences with our prayers—the Nation, the Congress, and the great State of Tennessee have lost a dedicated statesman, leader, and patriot.

Mr. HEMPHILL. Mr. Speaker, I join with my distinguished colleagues from Tennessee, and other Members of the 87th Congress, in paying my respects to the memory of Congressman REECE, and saluting the exemplary life that he led.

Mr. REECE was of an older generation than I, and our paths did not cross so often as to make our association intimate, or channel our efforts in such similar directions as would cement a close or strong friendship. Therefore, like many other Members here, I know him for what he was, the example he set, the integrity of his statue and image as a Member of Congress.

Mr. REECE brought to the Congress a life of example and inspiration. All of us admire a man who has served in battle, and earned such high recognition as the Distinguished Service Cross. All of us admire success in business, and what greater asset can a man bring to Congress than the fact that he has been successful in his business and profession and then bring that pattern of successful application to the Congress? All of us admire education and knowledge and no one could hear Mr. REECE debate without admiring the wealth of education and the strength of knowledge that he tapped so freely for his country.

My association with him, except in one or two matters in which we were both vitally interested, were as Members of Congress, but in those matters in which we were vitally interested, I found him to be untiring, dedicated, and a man of leadership and ability.

The Congress of the United States, and the Nation, has suffered a loss in the passing of this man.

To his family I extend my deepest sympathy.

Mr. PELLY. Mr. Speaker, again the flag is at half mast over the Capitol. Another Member of the House of Representatives has been permanently retired by the Almighty from public service.

Those of us who were serving with CARROLL REECE are sorely grieved, not alone because this Nation has suffered a grievous loss, but personally because an effective and lovable friend is gone. CARROLL was one of those leaders in this House one could always turn to for help and you knew it would be forthcoming.

I admired CARROLL REECE as a Republican leader long before I had the honor to serve with him. He served his political party well and under our system that is public service to all. It is a contribution to all the people—not just those of us who were on his side of the political fence.

It is sad that our friend has been taken away. He was so much himself—his normal cheerful self—when he came away from the hospital and was here on the floor the other day. I had heard he would not recover, but I kept hoping against hope because his loss to the Nation and Congress and his friends was not easy to contemplate.

All I can say now, Mr. Speaker, is the Lord's will be done—and that in the face of stern and unchangeable fact I am grateful for the more than 8 years of friendly association. I am thankful for that and a lasting recollection of an able and honorable leader.

Finally, I extend for my wife and myself deepest sympathy to the wife and family of our beloved friend and colleague CARROLL REECE.

Mr. TAYLOR. Mr. Speaker, I join with my colleagues in this great Representative body in paying tribute to the memory of the late Honorable B. CARROLL REECE, whose untimely death yesterday deprived this House and our country of the services of a devoted and outstanding public servant.

His district in Tennessee joins my district in North Carolina and though I have been in Congress less than 1 year, Congressman REECE and I have shared an interest in several projects, especially projects concerning the development of the Great Smoky Mountains National Park which means so much to North Carolina, Tennessee, and the Nation.

Despite his grave illness, Congressman REECE in his latter days often disregarded his personal well-being and left his sickbed to be present for important House and committee votes.

Truly, the State of Tennessee, as well as the Nation, has lost a distinguished citizen of courage and conviction.

I extend my sincere condolences to his family on their great loss.

Mr. BRAY. Mr. Speaker, this body relies greatly on the experience and wisdom of some of our most senior Members. Those who have the honor of serving for long periods of time frequently help to put us on the right track and assist us from their extensive legislative background.

Such a man was B. CARROLL REECE, loved and respected on both sides of the aisle for his keen ability to get to the heart of matters. His contributions to the work of this body were many and will long be remembered.

His life was distinguished not only in the Congress, but also in his remarkable military record—as great as that of any Member of the House, and also his record in the fields of politics, business, and civic leadership was outstanding in our Nation. However, despite his great responsibilities and positions of leadership, he was alway most considerate, kind, and helpful to anyone who came to him for consultation regarding problems of government, legislation, or politics. It was these qualities, among many others, which led the people of his district to return him to the House so many times.

I served with him briefly on the Committee on Armed Services, and in this body for the past 10 years. I deeply valued his friendship. I realize the loss to his country and to his party is great.

Mr. TRIMBLE. Mr. Speaker, I join with the delegation from Tennessee and others in deep sorrow at the passing of CARROLL REECE from our membership. He was a devoted legislator, a loyal friend, and a great American. We served on the Committee on Rules together. He will be greatly missed in this Chamber.

To Mrs. Reece and their daughter I extend my sincere sympathy.

Mr. ROONEY. Mr. Speaker, I was saddened this morning when I learned of the passing of our distinguished colleague the Honorable B. CARROLL REECE, of Johnson City, Tenn.

I had been aware, of course, of CARROL REECE's recent illness but somehow had the impression he would recover since he had always impressed me as being a very rugged and healthy person. His rapid decline and death only added to the shock I received.

During his long career in this body, CARROLL REECE enjoyed the admiration and respect of his colleagues on both sides of the aisle. He spared neither time nor effort in endeavoring to serve the people of his district and State. He will be sadly missed.

I extend my deepest sympathy to his wife and daughter.

Mr. FISHER. Mr. Speaker, the Grim Reaper has taken from our ranks a friend and colleague whose loss will be felt not only by the Members of this body but by the entire Nation.

During my 18 years of service in this body, I can hardly think of a man with whom I have served who exceeded in patriotism and devotion to his country the life that was lived by CARROLL REECE.

He was one of those statesmen who always put the country first. He was a great defender of the free enterprise system. His voting record in Congress speaks loudly in favor of good government and the preservation of our democratic institutions.

CARROLL REECE was the sort of person who was guided by principal rather than expediency. His courage was equalled by few. He is one man who seemed to never falter in following a consistent course of moderation and dedication to his beliefs. I only wish this Congress could have the service of more men like CARROLL REECE. The country would be better off, its future would be more secure, and its survival as a democracy more certain.

Mr. HORAN. Mr. Speaker, I wish to join with my colleagues in paying tribute to our departed Member, B. CARROLL REECE, who was one of our Nation's stalwart men.

I was shocked to learn of his passing. I had had a very nice visit with CARROLL in his room at the Bethesda Naval Center just 2 weeks ago. He looked well, and I am sure was looking forward to returning to the Congress where he had served so well and so faithfully for nearly 40 years.

We all will miss him, for CARROLL REECE meant a great deal to this country. His approach to every consideration in the Congress was unaffected by provincial considerations and the influence of local considerations. We shall miss his great abilities on the Rules Committee, and the Nation will suffer his passing.

Mrs. Horan and I wish to join with others in paying our respects and in expressing our sincere sympathy to Mrs. Reece and their devoted daughter.

Mr. MEADER. Mr. Speaker, I want to join with those who have expressed their deep sense of loss and have extended their condolences to the family of our late colleague, the Honorable B. CARROLL REECE, of Tennessee.

It was my privilege to serve briefly with CARROLL REECE on the Committee on Government Operations and its Subcommittee on Foreign Operations under the chairmanship of the Honorable PORTER HARDY, JR., of Virginia. Both in that service and in our other contacts in the House of Representatives I developed a high regard for CARROLL'S gracious manner, his sunny disposition, his wit and friendly humor and his steadfastness to the political and economic principles and institutions which are the pillars of our American system.

CARROLL REECE'S career in public service was a healthy contribution to American progress during the 3½ decades of our rapidly changing times through which he served. We are grateful for his contribution and will miss him sorely in the difficult decisions which lie before us.

Mr. HOFFMAN of Michigan. Mr. Speaker, others have spoken of the helpful, constructive record made by our colleague who left us Sunday morning.

Not only did he serve his country with distinction in war as well as in peace, but he was an able, faithful servant to his district and his State.

In addition, he rendered loyal, effective service to the party of his choice.

While he was with us in the Congress, it was my privilege to serve under him. He was always helpful, always kind, always courteous, always forbearing, especially of unjustifiable criticism which came to him when serving as chairman of a special committee.

When I was at Bethesda last Thursday morning, in his wheelchair he came to the office of the doctor I was consulting. He was cheerful and, although he had been confined to the hospital for several weeks, he gave no visible indication either in his appearance or by his talk that the end was near. He was his usual cheerful, encouraging self, and expressed hope for my comparatively minor physical trouble.

His passing once more gives us notice of the uncertainty of when or how we shall be called.

Mr. DORN. Mr. Speaker, CARROLL REECE was a loyal, true American. He was a national figure in the traditions of Andrew Johnson, Cordell Hull, Speaker Joe Byrns, Andrew Jackson, and other distinguished sons of Tennessee.

CARROLL REECE was as rugged and courageous as the great Smoky Mountain area he represented. He was truly one of the great statesmen of our times. Our free enterprise, opportunity system had no greater champion than this forthright statesman from Tennessee.

Those of us who served in Congress with him regardless of party, admired and loved him. His integrity, warm personality, and patriotism will influence those of us who served with him for many years to come.

Mrs. Dorn and the people of South Carolina join in my deepest sympathy to Mrs. Reece and the family.

Mr. HARVEY of Indiana. Mr. Speaker, our loss in the passing of my colleague from Tennessee, CARROLL REECE, is real and sincere. He was not only an able Congressman, he was also a great patriot and defender of his country. To my own expression of sorrow I would like to include the remarks of our mutual friend, ex-Governor Gates, of Indiana, who asked that his sentiments also be incorporated expressing his sympathy and sorrow:

COLUMBIA CITY, IND.,
March 20, 1961.

HON. RALPH HARVEY,
State House, Washington, D.C.:

The many friends of Hon. B. CARROLL REECE in Indiana are deeply grieved by his death. During his public service of more than a third of a century he demonstrated his great devotion to the fundamentals of our Nation, his loyalty to Senator Robert A. Taft. His ideals endeared him to all of us. America has lost a great leader and splendid American.

RALPH F. GATES,
Republican National Committeeman.

Mr. MADDEN. Mr. Speaker, all Members of the House were grieved to learn of the passing of B. CARROLL REECE. I have enjoyed his friendship during my 18 years as a Member of this body, and especially over the last 12 years while we both served on the Rules Committee.

Congressman REECE possessed an outstanding personality, and an ability to emphatically state his opinions on legislative problems, and at the same time, respect the views of others who disagreed with him. He was held in high esteem and liked by all Members of Congress on

both sides of the aisle. His congressional district, State, and Nation have lost an outstanding and experienced legislator.

The Members of the Rules Committee will certainly miss the pleasant and optimistic remarks of Congressman REECE during its future hearings on various matters before the committee.

I wish to extend to his wife and family my deepest sympathy in their bereavement.

Mr. VAN ZANDT. Mr. Speaker, I was shocked and grieved on Sunday evening when I learned of the death of my good friend, B. CARROLL REECE.

Years ago when I was commander in chief of the Veterans of Foreign Wars of the United States it was my privilege to meet and become acquainted with the gentleman from Tennessee, whom I learned to know as a quiet, kindly man but at the same time a dedicated individual and a very capable legislator.

CARROLL REECE was not only a great American but an outstanding soldier, having served his country in the U.S. Army during World War I. As a young lieutenant, he commanded the 3d Battalion of the 122d Infantry Regiment in France and was decorated with the Distinguished Service Cross and the Distinguished Service Medal for bravery in action against the enemy. In addition, he was awarded a Purple Heart, having been wounded in action, and finally the French Government decorated him with the Croix de Guerre.

In 1920 our late colleague was first elected to the House of Representatives and from that time until his death he could always be found among those striving to make America a better place to live, as well as protecting his country against our enemies without and within.

As a Member of the House of Representatives, he authored much important legislation, including the resolution creating the House Committee on Veterans' Affairs as well as the bill which helped to establish the Army Air Corps.

CARROLL, as he was commonly known, loved his favorite game of politics and many of us recall when he resigned his seat in the House of Representatives to serve the Republican Party as its national chairman for the period from 1946 to 1949. Under his keen and able direction, the Republican Party captured control of the Congress in 1946. From the time of his reelection to the House until his death, his interest in his party was always a subject of conversation with his many friends.

I mourn his great loss and offer my heartfelt condolences to Mrs. Reece and their daughter, as I pray to God for His blessing and deliverance to everlasting life.

Mr. MICHEL. Mr. Speaker, all of us are saddened today as we pay tribute to our departed colleague, CARROLL REECE. I cannot help but recall my days in school when I first heard and read about CARROLL REECE as a most distinguished Member of this House and as a former chairman of our Republican National Committee.

It was a memorable day for me when I came to Washington for the first time and had the privilege of meeting CARROLL. I remember so distinctly how disarming he was and how much time he was willing to give me in conversation on the occasion of our first meeting. Subsequently, after I was elected to Congress, there were many more opportunities for me to talk with CARROLL and counsel with him. His was always a wise and considered judgment, and I know of no one who was so gifted with the ability to see the good in people rather than their faults. He was always quick with a quip or an anecdote if the occasion called for it, and likewise he could be so forceful and stirring if need be.

I will never forget one of my first public appearances here in Washington after being elected to Congress and sharing the speaking honors with CARROLL. My remarks for the occasion were so inadequate, while his were so profound and appropriate. Nevertheless, he asked me to come to Tennessee to make several speeches there, and regardless of where it may have been in the State of Tennessee everyone knew and spoke most highly of CARROLL. While I respected him from the very first meeting, I learned to love him as well. He had such a vast reservoir of experience and I learned much from him.

We will miss CARROLL so much on the floor of this House, and I would want his wife and family to know this heavy burden of sorrow is being borne and shared by a host of us who have come to know CARROLL REECE as a dear friend. This House loses one of its most fearless and yet gentle Members, and the country suffers the loss of a great soldier and patriot.

Mr. PHILBIN. Mr. Speaker, I was greatly shocked and very deeply grieved by the passing of our dear friend, beloved and esteemed colleague, Congressman CARROLL REECE, of Tennessee.

Few, if any, of the men I have met in or out of the public service, in my journey through life, could compare with him, and none could excel this noble son of Tennessee.

In his basic integrity, he was as rugged and solid as the hills of his beloved, native State, and in his broad, active mind only noble thoughts found lodgement. In his alert brain, great ability moved this proud Tennessean into many orbits of constructive interest and action for his district, State, and country.

In his great heart, there abided feelings of brotherhood, tolerance, and compassion for all men, especially for those who were less favored and less fortunate in coping with the vicissitudes of life.

A man of vital and sterling patriotism, who demonstrated on the battlefields in one of the Nation's greatest wars, his superb courage, his personal bravery, his complete fearlessness of danger, and his consuming love of country. CARROLL REECE was truly in the vanguard of great fighting heroes.

While he was a most highly decorated soldier and received many plaudits and honors throughout his career that might have changed the outlook of one less rugged and real.

CARROLL REECE was known for his humility, his modesty, and his down-to-earth personality, a man who never lost the common touch.

A successful businessman of genius and foresight, he well understood the financial business and economic problems of the Nation, and was greatly concerned about them. But he never swerved from his fundamental purpose of serving his country in the broadest sense with all his heart. When he passed on, this House lost one of its greatest, most distinguished, most famous Members, and those of us who knew and loved him lost one of our dearest, most loyal friends.

Obviously, it will not be possible to fill the great void which has been left by the untimely passing of this great American. The memory of his beaming personality, genial nature, high exploits, and splendid contributions to the Nation and people of America will long be remembered here and wherever the name of CARROLL REECE is known.

He was truly one of God's noblemen, one of America's first citizens, and his name will go down in history honored and revered for his heroism, his magnificent, unselfish service, his noble character, and his greatness of heart.

I express my deepest and most heartfelt sympathy to his devoted, gracious wife, his loving daughter and all of his family, his friends and constituents for the irreparable loss which they have sustained. With a sad heart, indeed, I join them in mourning his passing and extend to them from the very bottom of my heart sincerest condolences and prayers that the good Lord may lighten their heavy burden of sorrow and out of the consciousness of his great life, good works, and generous heart, bring them assuaging comfort and resignation.

The memory of CARROLL REECE will long live in these halls and in this Nation. It is my devout prayer that he may find peace, rest, and eternal reward in his heavenly home.

Mr. MILLER of New York. Mr. Speaker, I am sure that the immense personal loss I feel at the passing of our beloved colleague from Tennessee, CARROLL REECE, is shared not only by the Members of the House and those who, in the past, were privileged to serve with him, but by all Americans who are concerned with the welfare of our Nation to which he was so dedicated.

For more than 40 years, Mr. REECE served his country—on the battlefields of France in World War I, as a Member of Congress, and as leader of the Republican Party. Although he was the most decorated Member of Congress, CARROLL REECE'S wartime awards are more than matched by the accolades from literally thousands of persons whom he helped personally or as a Member of the House of Representatives. His generosity, kind understanding, personal courage, and willingness to give his immense personal energies and thought to the problems of all men, both great and small, made him unique in this age of cynicism and self-interest.

For he was more than just a soldier and a statesman. CARROLL REECE was a

humanitarian, a gracious and courteous gentleman whose kindness was extended in many forms to all who required it. His wisdom was as freely imparted as it was sought and his generosity was unbounded. But even more important, he was a friend whose loyalty brought him the reverence of all with whom he came into contact. Those of us who have had the arduous political task of campaigning for Republican candidates for Congress can appreciate fully his magnificent accomplishments as chairman of the Republican National Committee from 1946 to 1949 when he did perhaps more than anyone else to gain for his party the majority in this House.

The void he leaves in the Congress and on the American scene cannot be filled through the simple application of the electoral process, but will remain for years to come as a reminder to us all of the true qualities of Christian charity and kindness.

I am sure I am joined by everyone here and all other Americans in saying to the bereaved family of our beloved colleague: "Your loss is shared and your grief is, in part, our grief. Although we cannot return that which has been taken by the Almighty, our heartfelt sympathy is given you as freely as your husband and father gave of himself to others. The stature he attained in life cannot but become greater in death, as the humane acts he so long shielded in anonymity at last come to light.

Mr. WIDNALL. Mr. Speaker, the Nation has lost one of its great men, with the passing of our colleague B. CARROLL REECE, distinguished Representative of the First Congressional District of Tennessee.

CARROLL REECE's long career of public service is well known to all of us. It spanned nearly 40 years and included an outstanding World War I record, followed by some 36 years of selfless service in the House of Representatives.

CARROLL REECE was a happy man because he was a good man. He possessed a rare blend of strength of character and gentleness. He was firm in pleading his convictions, but always temperate in his dealings with others. He was truly a gentleman.

It was my privilege to serve with CARROLL REECE in the House for 10 years. During this time I grew to know, admire, and respect him as one of the outstanding Members of Congress. He will be sorely missed by his colleagues in both House and Senate, all of whom join in expressing profound sympathy to Mrs. Reece and the members of his family.

Mr. KEARNS. Mr. Speaker, I join all of my colleagues in the House in their grief over the loss of our friend, CARROLL REECE.

CARROLL REECE not only served his constituents well but all Republicans while national chairman of the Republican Party.

His passing will be felt keenly by his own State of Tennessee and by the entire country to which he gave so much of his time and ability as one of the ablest spokesmen of the conservative cause that this Nation has ever produced.

My heartfelt sympathy goes to Mrs. Reece and the family in their great personal loss.

Mr. BAKER. Mr. Speaker, I offer a resolution (H. Res. 228).

The Clerk read as follows:

Resolved, That the House has heard with profound sorrow of the death of the Honorable B. CARROLL REECE, a Representative from the State of Tennessee.

Resolved, That a committee of 12 Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral.

Resolved, That the Sergeant of Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The resolution was agreed to.

The SPEAKER. The Chair appoints as members of the funeral committee the following Members on the part of the House: Mr. HALLECK; Mr. ARENDS; Mr. DAVIS of Tennessee; Mr. MURRAY; Mr. EVINS; Mr. FRAZIER; Mr. BAKER; Mr. JONAS; Mr. BASS of Tennessee; Mr. LOSER; Mr. SMITH of California; and Mr. EVERETT.

The Clerk will report the remainder of the resolution.

The Clerk read as follows:

Resolved, That as a further mark of respect the House do now adjourn.

The resolution was agreed to.

ADJOURNMENT

Accordingly (at 1 o'clock and 21 minutes p.m.) the House adjourned until tomorrow, Tuesday, March 21, 1961, at 12 o'clock noon.

REPORT OF EXPENDITURE OF FOREIGN CURRENCIES AND APPROPRIATED FUNDS INCURRED IN TRAVEL OUTSIDE THE UNITED STATES

Mr. BURLESON. Mr. Speaker, section 502(b) of the Mutual Security Act of 1954, as amended by section 401(a) of Public Law 86-472, approved May 14, 1960, and section 105 of Public Law 86-628, approved July 12, 1960, require the reporting of expenses incurred in connection with travel outside the United States, including both foreign currencies expended and dollar expenditures made from appropriated funds by Members, employees, and committees of the Congress.

The law requires the chairman of each committee to prepare a consolidated report of foreign currency and dollar expenditures from appropriated funds within the first 60 days that Congress is in session in each calendar year. The consolidated report is to be forwarded to the Committee on House Administration which, in turn, shall print such report in the CONGRESSIONAL RECORD within 10 days after receipt. Accordingly, there is submitted herewith, the consolidated report of the House Committee on Merchant Marine and Fisheries:

Report of expenditure of foreign currencies and appropriated funds of the Committee on Merchant Marine and Fisheries

[Expended between Jan. 1 and Dec. 31, 1960]

Name and country	Name of currency	Lodging		Meals		Transportation		Miscellaneous		Total	
		Foreign currency	U.S. dollar equivalent or U.S. currency	Foreign currency	U.S. dollar equivalent or U.S. currency	Foreign currency	U.S. dollar equivalent or U.S. currency	Foreign currency	U.S. dollar equivalent or U.S. currency	Foreign currency	U.S. dollar equivalent or U.S. currency

MARCH 16, 1961.

HERBERT C. BONNER,
Chairman, Committee on Merchant Marine and Fisheries.

REPORT OF EXPENDITURES OF FOREIGN CURRENCIES AND APPROPRIATED FUNDS INCURRED IN TRAVEL OUTSIDE THE UNITED STATES

Mr. BURLESON. Mr. Speaker, section 502(b) of the Mutual Security Act of 1954, as amended by section 401(a) of Public Law 86-472, approved May 14, 1960, and section 105 of Public Law 86-628, approved July 12, 1960, require the reporting of expenses incurred in connection with travel outside the United States, including both foreign currencies expended and dollar expenditures made from appropriated funds by Members, employees and committees of the Congress.

The law requires the chairman of each committee to prepare a consolidated report of foreign currency and dollar expenditures from appropriated funds within the first 60 days that Congress is in session in each calendar year. The consolidated report is to be forwarded to the Committee on House Administration which, in turn, shall print such report in the CONGRESSIONAL RECORD within 10 days after receipt. Due to the fact that the former chairman of the Committee on Education and Labor is no longer in Congress, there has been some delay in the filing of the following report and its subsequent transmittal for printing in the CONGRESSIONAL RECORD:

Report of expenditure of foreign currencies and appropriated funds of the Committee on Education and Labor

[Expended between Jan. 1 and Dec. 31, 1960]

GRAHAM A. BARDEN,
Chairman, 86th Congress, Committee on Education and Labor.

MARCH 3, 1961.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

686. A letter from the Director, Office of Civil and Defense Mobilization, Executive Office of the President, transmitting copy No. 2 of the Statistical Supplement, Stockpile Report to the Congress, for the period ending December 31, 1960, pursuant to section 4 of the Strategic and Critical Materials Stock Piling Act, Public Law 520, 79th Congress; to the Committee on Armed Services.

687. A letter from the Secretary of the Army, transmitting a draft of a proposed bill entitled "A bill to authorize the Secretary of the Army to reconvey to the town of Malone, N.Y., certain real property heretofore donated by said town to the United States of America as an Army Reserve center and never used by the United States"; to the Committee on Armed Services.

688. A letter from the Under Secretary of the Navy, transmitting a draft of a proposed bill entitled "A bill to amend title 10, United States Code, to permit members of the Armed Forces to accept fellowships, scholarships, or grants"; to the Committee on Armed Services.

689. A letter from the Comptroller General of the United States, transmitting a report on a review of expenditures for selected maintenance and construction projects at the Army Chemical Center, Edgewood, Md.; to the Committee on Government Operations.

690. A letter from the Administrator, General Services Administration, transmitting a draft of a proposed bill entitled "A bill to repeal section 409 of the Public Buildings Act of 1949, requiring the submission of a report to the Congress concerning eligible public building projects"; to the Committee on Public Works.

691. A communication from the President of the United States, transmitting amendments to the budget for the fiscal year 1962, involving increases in the amount of $442,429,000 for the Department of Agriculture (H. Doc. No. 112); to the Committee on Appropriations and ordered to be printed.

692. A communication from the President of the United States transmitting amendments to the budget for the fiscal year 1962, involving an increase in the amount of $40,668,000 for the Department of the Interior (H. Doc. No. 113); to the Committee on Appropriations and ordered to be printed.

693. A communication from the President of the United States, transmitting amendments to the budget for the fiscal year 1962 involving an increase in the amount of $11 million for the U.S. Information Agency (H. Doc. No. 114); to the Committee on Appropriations and ordered to be printed.

694. A communication from the President of the United States, transmitting amendments to the budget for the fiscal year 1962 involving a decrease in the amount of $130,000 for the Department of State (H. Doc. No. 115); to the Committee on Appropriations and ordered to be printed.

695. A letter from the Assistant Secretary of Defense (Installations and Logistics), transmitting reports of contractual actions taken in calendar year 1960 to facilitate the national defense, pursuant to Public Law 85-804; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. RIVERS of South Carolina: Committee on Armed Services. H.R. 4349. A bill to place Naval Reserve Officers' Training Corps graduates (Regulars) in a status comparable with U.S. Naval Academy graduates; without amendment (Rept. No. 171). Referred to the Committee of the Whole House on the State of the Union.

Mr. RIVERS of South Carolina: Committee on Armed Services. H.R. 5400. A bill to provide for more effective participation in the Reserve components of the Armed Forces, and for other purposes; without amendment (Rept. No. 172). Referred to the Committee of the Whole House on the State of the Union.

Mr. McMILLAN: Committee on the District of Columbia; H.R. 258. A bill to amend the District of Columbia Sales Tax Act so as to increase the rate of tax imposed on gross receipts from certain sales, and for other purposes; with amendment (Rept. No. 173). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BARING (by request):

H.R. 5697. A bill to provide for the establishment of a national cemetery in the State of Nevada; to the Committee on Interior and Insular Affairs.

By Mr. BECKWORTH:

H.R. 5698. A bill to extend the apportionment requirement in the Civil Service Act of January 16, 1883, to temporary summer employment, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BETTS:

H.R. 5699. A bill to amend section 584 of the Internal Revenue Code of 1954 to qualify certain types of charitable accounts for participation in common trust funds maintained by banks; to the Committee on Ways and Means.

By Mr. BYRNES of Wisconsin:

H.R. 5700. A bill to amend the Tariff Act of 1930 to permit contract carriers by motor vehicle to transport bonded merchandise; to the Committee on Ways and Means.

By Mr. CLARK:

H.R. 5701. A bill to amend title 38, United States Code, to provide for the payment of pensions to veterans of World War I; to the Committee on Veterans' Affairs.

By Mr. FINO:

H.R. 5702. A bill to extend benefits under the Federal Employees' Compensation Act to certain individuals injured while engaged in Federal civil defense activities during World War II, and for other purposes; to the Committee on Education and Labor.

By Mr. FOGARTY:

H.R. 5703. A bill to amend the Uniform Code of Military Justice; to the Committee on Armed Services.

H.R. 5704. A bill to establish standards for hours of work and overtime pay of laborers and mechanics employed on work done under contract for, or with the financial aid of, the United States, for any territory, or for the District of Columbia, and for other purposes; to the Committee on Education and Labor.

H.R. 5705. A bill to facilitate the unity of families, and for other purposes; to the Committee on the Judiciary.

By Mr. FOUNTAIN:

H.R. 5706. A bill to amend section 314 of the Public Health Service Act of 1944; to the Committee on Interstate and Foreign Commerce.

By Mrs. DWYER:

H.R. 5707. A bill to amend section 314 of the Public Health Service Act of 1944; to the Committee on Interstate and Foreign Commerce.

By Mr. GALLAGHER:

H.R. 5708. A bill to create a U.S. Academy of Foreign Service; to the Committee on Foreign Affairs.

By Mr. HALPERN:

H.R. 5709. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for expenses incurred by a taxpayer in making repairs and improvements to his residence, and to allow the owner of rental housing to amortize at an accelerated rate the cost of rehabilitating or restoring such housing; to the Committee on Ways and Means.

By Mr. HARRIS:

H.R. 5710. A bill to amend subsection (e) of section 307 of the Communications Act of 1934 to permit the Commission to renew a station license in the safety and special radio services more than 30 days prior to expiration of such license; to the Committee on Interstate and Foreign Commerce.

By Mr. HOLLAND:

H.R. 5711. A bill to amend the National Labor Relations Act, as amended; to the Committee on Education and Labor.

By Mr. ICHORD of Missouri:

H.R. 5712. A bill to authorize the establishment and development of the Ozark Rivers National Monument in the State of Missouri, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. KEOGH:

H.R. 5713. A bill to amend the Internal Revenue Code of 1954 with respect to exportation of imported distilled spirits, wines, and beer; to the Committee on Ways and Means.

By Mrs. MAY:

H.R. 5714. A bill to authorize the Secretary of Agriculture to grant easements for road rights-of-way over national forest lands and other lands under the jurisdiction of the Department of Agriculture, and for other purposes; to the Committee on Agriculture.

By Mr. PHILBIN:

H.R. 5715. A bill to provide for the issuance of a special postage stamp to commemorate the Military Order of the Purple Heart; to the Committee on Post Office and Civil Service.

By Mr. POWELL:

H.R. 5716. A bill to provide that the unincorporated territories of the Virgin Islands and Guam shall each be represented in Congress by a Territorial Deputy to the House of Representatives; to the Committee on Interior and Insular Affairs.

By Mr. RAINS:

H.R. 5717. A bill to amend, clarify, and make certain the applicability of section 4233 of the Internal Revenue Code of 1954, relating to exemptions from tax imposed under section 4231 of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. RIEHLMAN:

H.R. 5718. A bill to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of interstate enterprises engaged in retail trade, to increase the minimum wage under the act to $1.15 an hour, and for other purposes; to the Committee on Education and Labor.

By Mr. ROBISON:

H.R. 5719. A bill to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of interstate enterprises engaged in retail trade, to increase the minimum wage under the act to $1.15 an hour, and for other purposes; to the Committee on Education and Labor.

By Mr. SAYLOR:

H.R. 5720. A bill to amend part I of the Interstate Commerce Act to permit certain common carriers to give free transportation to their agents; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. SPENCE:

H.R. 5721. A bill to amend the Federal Home Loan Bank Act and title IV of the National Housing Act; to the Committee on Banking and Currency.

By Mr. STAFFORD:

H.R. 5722. A bill to provide for denial of passports to supporters of the international Communist movement, for review of passport denials, and for other purposes; to the Committee on Foreign Affairs.

By Mr. TEAGUE of Texas:

H.R. 5723. A bill to extend the veterans' guaranteed and direct home loan program and to provide additional funds for the veterans' direct loan program; to the Committee on Veterans' Affairs.

By Mr. WATTS:

H.R. 5724. A bill to amend section 584 of the Internal Revenue Code of 1954 to qualify certain types of charitable accounts for participation in common trust funds maintained by banks; to the Committee on Ways and Means.

By Mr. WESTLAND:

H.R. 5725. A bill to provide for the assessing of Indian trust lands and restricted fee patent Indian lands within the Lummi Indian diking project on the Lummi Indian Reservation in the State of Washington, through drainage and diking district formed under the laws of the State of Washington; to the Committee on Interior and Insular Affairs.

By Mr. DOOLEY:

H.J. Res. 323. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. PELLY:

H.J. Res. 324. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. FARBSTEIN:

H. Con. Res. 199. Concurrent resolution expressing the sense of the Congress with respect to the establishment by the United Nations of an Economic Aid Coordinating Committee, which shall serve as a central clearinghouse of information concerning economic aid furnished other nations; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Kansas, memorializing the President and the Congress of the United States relative to notifying the U.S. Army Chief of Engineers of the desire of the Kansas Legislature relative to water supply features in Milford Reservoir and other authorized reservoir projects; to the Committee on Public Works.

Also, memorial of the Legislature of the State of Rhode Island, memorializing the President and the Congress of the United States to enact legislation which would allow those people who are not able to speak or read English to apply for American citizenship; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FINO:

H.R. 5726. A bill for the relief of Isidor Margulies; to the Committee on the Judiciary.

By Mr. GIAIMO:

H.R. 5727. A bill for the relief of Antonio Giamei; to the Committee on the Judiciary.

By Mr. HUDDLESTON:

H.R. 5728. A bill for the relief of Konstantinos Stellaros; to the Committee on the Judiciary.

By Mr. KING of California:
H.R. 5729. A bill for the relief of Mrs. Chew Sheung Tai; to the Committee on the Judiciary.

By Mr. NORBLAD:
H.R. 5730. A bill for the relief of Masako Ishiguro; to the Committee on the Judiciary.

By Mr. PHILBIN:
H.R. 5731. A bill for the relief of Peter T. P. Sun; to the Committee on the Judiciary.

By Mr. SANTANGELO:
H.R. 5732. A bill for the relief of Vincenzo Leone; to the Committee on the Judiciary.

By Mrs. WEIS:
H.R. 5733. A bill for the relief of Bernard Heroux; to the Committee on the Judiciary.
H.R. 5734. A bill for the relief of Yung-sen Tseng; to the Committee on the Judiciary.

By Mr. WESTLAND:
H.R. 5735. A bill for the relief of Steven Mark Hallinan; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII:

99. The SPEAKER presented a petition of Joseph J. Cooley, city clerk, Buffalo, N.Y., petitioning consideration of his resolution with reference to requesting passage of H.R. 3647, relating to the Federal excise tax levied against motor vehicles, which was referred to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

This May Be the Answer to the Problem of Federal Aid to Education

EXTENSION OF REMARKS
OF
HON. CARROLL D. KEARNS
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. KEARNS. Mr. Speaker, on March 16, 1961, I introduced two bills, H.R. 5672 and H.R. 5673, which offer an eminently sound and fair solution to the growing controversy over loans to private education. These bills would: First, establish $1,000 a year scholarships in all fields for needy students winning a national competition; second, grant taxpayers an additional deduction from taxable income for expenses incurred by him, his spouse, or his dependent or dependents, while attending college; and third, provide an optional tax credit for contributions to education which may be chosen by the taxpayer in place of the deductions now allowed. This feature extends to all taxpayers the tax advantages now available only to taxpayers in the top-income brackets who make contributions to education.

H.R. 5672 and 5673 include many of the ideas and recommendations of the country's leading educational organizations. Increased private giving to education is supported by leaders in both public and private educational fields. Such powerful and respected organizations as the Association of American Colleges, which represents over 1,000 public and private colleges, the American Association for the Advancement of Science, the Council for Financial Aid to Education, and the U.S. Chamber of Commerce support private giving to education. Loans to private education may be the issue which defeats the administration's Federal aid to education proposals. But no one can honestly object to steps to encourage private giving to education.

A resolution adopted by the Association of American Colleges declares:

> The American people must give consideration to the more adequate support of higher education from both public and private funds. The traditional friendliness of government to education in America through its tax structures needs to be continued through the modernization of that tax structure.

H.R. 5673 would update and modernize the Internal Revenue Code of 1954.

The administration's program for American education ignores the fact that the Congress has taken a number of concrete steps in recent years with the support of all segments of American education to encourage private giving to education. It is remarkable that the Democratic administration has made no recommendations regarding the updating of the tax structure to encourage private giving to both public and private education, though its leaders surely know very well that such a step would have overwhelming support in the Congress, and throughout the country.

For many years I have been advocating—as have many others—that the tax dollar be kept at home where it does the most good. Many people are surprised when they learn what a large share of the tax dollar is required to administer it in Washington. My theory is that if private giving to education were increased, the pressure for huge appropriations by the Federal Government would be correspondingly reduced. Thus, the $6 billion Federal aid to education programs of this administration could easily be reduced by as much as 2 to 3 billions of dollars if private gifts of that amount were forthcoming.

The Congress obviously intended to encourage private giving to education when, in 1952, it raised allowable deductions of adjusted gross income from 15 to 20 percent, and in 1954 raised the allowable deductions to 30 percent for such purposes. These steps had bipartisan support in the Congress and were taken while President John F. Kennedy was a Member of the Congress. They had the support of leading Members of both parties in both Houses of the Congress at that time.

H.R. 5673 is based on the sound theory that private giving to education would greatly increase if the tax deductions for philanthropy now allowed persons in the top-income bracket were extended to all taxpayers. At the present time the taxpayer with a moderate income pays $80 out of his own pocket for each $100 he gives to education. At the same time, the wealthy taxpayer in the 91 percent bracket pays only $9 out of his pocket for each $100 gift he makes to education. The bill, H.R. 5673, ends this unfair treatment of the American taxpayer and makes it possible for everyone to make gifts to education.

Members of the House and Senate who believe in private giving to education, both public and private, and who are seriously interested in a sound legislative solution to the problems facing American education, may find the Kearns' proposals worthy of sponsorship and support. I would be pleased to hear from you.

America Loses a Distinguished Gentleman

EXTENSION OF REMARKS
OF
HON. JAMES F. BATTIN
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. BATTIN. Mr. Speaker, Zales Nelson Ecton, a former U.S. Senator from Montana from 1946 to 1953, passed away in Bozeman, Mont., in early March 1961.

Senator Ecton was born in Iowa and moved to Gallatin County, Mont., as a boy where he attended public schools, as well as Montana State College. He later attended the University of Chicago Law School.

During World War I he served as a private in the infantry, and from 1921 to 1946 he was a successful rancher in the Treasure State.

He had a useful and worthwhile career in public life, having served in the Montana House of Representatives from 1933 to 1937 and in the State senate from 1937 to 1946.

Senator Ecton was well liked by the people of Montana and by the Republican Party, for he served as chairman of the Republican Central Committee from 1940 to 1944.

Zales was a good father, a good husband, and a good American. He believed in the rights and dignity of man and during his career in public life he fought to preserve our American system.

Though I did not know him well personally, I did know him by reputation, and I am sure that his wife and family will have pleasure in knowing in the years to come that he was revered, not only by the people of Montana, but by his colleagues and friends in the Congress of the United States.

My wife and I join in extending our deep sympathy to his wife, Vera, and to his daughter and grandchildren.

Camp Fire Girls Birthday

EXTENSION OF REMARKS
OF
HON. HERBERT ZELENKO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. ZELENKO. Mr. Speaker, the week of March 19 to 25 has been designated as "Camp Fire Girls Birthday Week." Campfire Girls are to be congratulated on the observance of their golden jubilee celebration started last November. They are to be especially praised for their 2½ year golden jubilee conservation project which has been of inestimable value all across the Nation, not only to people living today, but to generations who will follow us in populating this great country.

Only recently President Kennedy appealed to Americans to develop and preserve the Nation's natural resources, as he dedicated the new building of the National Wildlife Federation, and only last month he outlined in a message to Congress his plans for protecting our natural resources. It is stimulating to know that we have a President who is vitally aware that "we draw our strength and sustenance from our earth." It is equally inspiring to know that 2½ years before these great addresses were delivered by President Kennedy, the Camp Fire Girls had launched a grassroots program which answered his appeal for help in protecting and developing the Nation's resources of water, power, forests, and wildlife.

The U.S. Department of Agriculture printed "Soil and Water Conservation Activities, a Guide for Leaders of Camp Fire Girls." And to guide the girls in their work, the Camp Fire Girls national headquarters published a beautifully illustrated book "Conservation," suggesting a program so flexible that each member could select an activity which appealed to her, while meeting the needs of her community. As a result, more than a million trees have been planted in the past 2 years, many raised from seeds by the girls themselves. Vast acres of burned over or abandoned areas have been reforested, with Camp Fire Girls working together in small teams to do the planting. A census of trees has been taken throughout entire cities, and diseased or dead trees replaced.

Recreational areas have been improved by the addition of many new parks and children's forests. In some cases, Camp Fire Girls raised money to purchase the land which they developed into parks and then turned over to the community. In other instances, the Government gave them land from which they created the parks. Tremendous cleanup campaigns have been undertaken to improve both rural and urban areas.

Conservation of wildlife has been achieved by participation in many activities which affect the soil, improve the quality of water, and foster better planning for land use. Ponds have been freed of choking vegetation. Cold water for trout has been supplied by a new deflector dam. Pheasant eggs have been hatched by chickens and raised by members for restocking. All forms of new wildlife housing have gone up, including 15,000 bluebird houses built by the Blue Birds, youngest members of the Camp Fire Girls family.

Camp Fire Girls have made speeches, conducted dedication ceremonies, designed display posters, and enacted plays to inform communities of the need for wise use of natural and human resources. In some States Camp Fire Girls restored historical monuments and sites as a part of the conservation program.

Significant as these facts are, they form only a partial picture of the Camp Fire Girls conservation program for the past 2½ years. The completed report will be made to the Nation at an early date following the close of the golden jubilee celebration.

Conservation, however, is not new to Camp Fire Girls who have made notable contributions in other years, including the planting of 700,000 trees throughout the Nation 34 years ago. It is a fine example of the law of the Camp Fire Girls in action, and has called into play all eight tenets of their law, which is: "Worship God, seek beauty, give service, pursue knowledge, be trustworthy, hold on to health, glorify work, be happy." Our hats are off to the Camp Fire Girls.

The Unification of Italy

EXTENSION OF REMARKS
OF
HON. EDNA F. KELLY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mrs. KELLY. Mr. Speaker, the liberation of Italy from the yoke of alien rulers and its unification in 1861 is one of the great events of 19th-century European history. It marked the culmination of the fight for freedom which the people of Italy had carried on for centuries against their foes. Until the historic and memorable year 1861, Italy was divided among her conquerors and lay prostrate at their feet. In the 1850's most of the country was under the Austrian monarchy, and all earlier efforts on the part of the people of Italy to free themselves from foreign domination had been unsuccessful. But when they renewed their war for freedom in 1859, they had France as their ally, and they were most ably led by three great Italians, Victor Emmanuel, Cavour, and Garibaldi.

In the war Italy was victorious, and in the subsequent peace her freedom assured and independence recognized. By early 1861 all liberated provinces had joined hands, and by proclaiming Victor Emmanuel as their king they founded the Kingdom of Italy. That was exactly 100 years ago, the centenary of which is being celebrated throughout Italy and in all parts of the free world. I am indeed happy in joining this great centenary celebration on the 100th anniversary of the unification of Italy.

Grants-in-Aid for Public Health Services

EXTENSION OF REMARKS
OF
HON. L. H. FOUNTAIN
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. FOUNTAIN. Mr. Speaker, I have today introduced, for appropriate reference, a bill to implement recommendations made recently by the Advisory Commission on Intergovernmental Relations for the purpose of simplifying and improving the administration of Federal grants-in-aid for public health services. The gentlewoman from New Jersey [Mrs. DWYER], who represents the House so ably as my colleague on the Advisory Commission, joins me in this action.

The Advisory Commission was created by Congress in September 1958 as an instrument for bringing together public officials from all levels of government for the consideration of common problems, including feasible methods for achieving greater coordination and simplification in programs requiring intergovernmental cooperation. Earlier this month I introduced H.R. 5155 relating to the first of the Commission's legislative recommendations seeking to increase the coordination and effectiveness of Federal-State programs. That bill deals with Federal and State taxation of estates and inheritances.

The bill which I have introduced today is intended to accomplish two objectives. First, it would amend the Public Health Service Act of 1944 to permit States, at the discretion of the Governor concerned, to transfer up to one-third of the Federal funds granted in any one category to one or more of four other public health categories. It is proposed that this flexibility apply to the following five categorical grants: general health assistance, cancer control, heart disease control, tuberculosis control, and venereal disease control. The bill would not affect the remaining health categories of mental health, maternal and child health, and crippled children's services.

It is believed that the transfer provision would allow the States sufficient flexibility to apply the Federal funds to the categories of the greatest need within the particular State, while at the same time providing assurance to the Congress that in terms of the Nation as a whole the categorical areas would receive the relative emphasis placed upon them by the Congress in annual appropriations.

Second, the bill would establish a uniform allotment and matching formula for Federal grants to States in the special categories listed above. A number of differing formulas are now applicable to these five categories. The Advisory

Commission believes this diversity is of doubtful value and causes unnecessary complexity at both the National and State levels. It is the Commission's view that a combination of population, as a general indicator of relative program need among the States, and per capita income, as an indicator of financial ability, would be fair to all the States.

The Commission has not yet been able to study the general question of the extent to which Federal grants should be used to equalize variations in State fiscal resources. However, since the Hill-Burton formula has come into general use in other Public Health Service grant programs, such as the hospital construction program, the Commission recommends that a formula patterned generally along the lines of that formula be applied to the disease-control grants in place of the present diverse requirements.

Smithsonian Institution Numismatic Display

EXTENSION OF REMARKS
OF
HON. A. WILLIS ROBERTSON
OF VIRGINIA
IN THE SENATE OF THE UNITED STATES
Monday, March 20, 1961

Mr. ROBERTSON. Mr. President, we read in the Bible that the love of money is the root of all evil. That statement illustrates a historic fact as well as a grave human weakness. The historic fact is that more than 2,000 years ago money was used as a medium of exchange throughout the Roman Empire. The human weakness is the fact that even since King Midas struck off gold coins men have loved money, and some have loved it to the extent of losing their souls in its acquisition.

In a sense, the history of money is the history of civilization. Savages did not have money, and even today savage tribes of north Africa have no coinage of their own. The Romans were the first to mint coins with milled edges, which would easily indicate whether or not they had been defaced, because all money prior to that period represented so much in weight of gold, silver, copper, or iron, and ignorant people would be cheated by the moneychangers who would take a small portion of gold or silver from a coin before passing it on. Consequently, before the milled coin of the Romans, money was weighed by those who wished to be sure they were getting full value.

Even in our own country, money can tell us a lot about the history of a given period. One complaint of the colonists against the mother country was that the mother country would not permit the colonists to coin their own money, so in order to supplement an inadequate supply of British coins, tobacco was used for money in Virginia and beads and wampum in Massachusetts.

Mr. President, on last Saturday, the Smithsonian Institution opened to the public its new Hall of Monetary History and put on public display the most extensive and most historic display of ancient and modern coins and paper money the world has ever known. Not only is this exhibit of the greatest interest to those interested in numismatics, but it should be of interest to every citizen in our country, because whether we love money or not a certain amount of it is a necessity in our modern way of living. Indeed, if we seek the secluded happiness of the desert, boldly proclaimed by Omar Khayyam, we still must have the money with which to buy the loaf of bread and the jug of wine to be taken with us into our desert retreat.

In order that my Senate colleagues and all who read the CONGRESSIONAL RECORD may have a better understanding of the numismatic collection now on display at the Smithsonian Institution, I ask unanimous consent to publish in the CONGRESSIONAL RECORD a brief description of the principal displays prepared for me by Dr. Vladimir Clain-Stefanelli, Curator of Numismatics of the Smithsonian Institution.

There being no objection, the description was ordered to be printed in the RECORD, as follows:

The Smithsonian Institution's new Hall of Monetary History and Medallic Art opened to the public on Saturday, March 18, 1961, in the Arts and Industries Building.

The main display in the new hall is dedicated to monetary history and illustrates in a sequence of 19 specially designed cases the major aspects of the development of the units used in economic systems employing money from the beginning of primitive barter to the establishment of our modern monetary systems. The exhibits have been arranged to show the evolution of money as related to a sequence of significant historical events, and thus as an integral part of the cultural development of human society. The development of the various forms of currencies in colonial North America is traced and especial emphasis is given to the evolution of U.S. coins and paper money.

This new exhibit illustrating monetary history forms an important step in the Smithsonian's long-range program of exhibition modernization. Displays of coins, tokens, and paper currencies have been arranged in their historical and cultural contexts, rather than by conventional classifications. These exhibits are thus intended to give a new dimension to the visual record of history on display at the Smithsonian.

Several topical displays complete the basic monetary history exhibit. The themes of these displays are: "The Origin of Coin Names," "The Reformation," "Confederate Currencies," and "State Bank Notes." A reconstruction of a coin stamper designed by the renowned Italian artist and inventor Leonardo da Vinci—1452–1519—is also on view. It marks the introduction of mechanization in coining techniques.

"The New World" is the title of a special panel, recalling the first coins struck in the Western Hemisphere, in the Mexico City Mint at the beginning of the reign of Charles and Johanna of Spain—1536–56. It is followed by a display of the monetary history of North America which starts with "Barter on the Frontier," an illustration of the trade of the primitive Indians and the hardships of the white man on the advancing frontier, when only a few hundred years ago Dentalium and Mercenaria shells, wampum, skins of animals and many other articles were used in lieu of money.

"Colonial Money, 1607–1754" is an exhibit showing examples of English, Dutch, and French coins brought by the early settlers, and the first coins struck in Massachusetts in 1652 as well as early paper currency issues.

Other displays show paper bills issued by the States and by the Continental Congress, coins of the States struck after the Declaration of Independence, and the first national currency in relation to the organization of the national banks.

"Economic Adjustments, 1812–60" is the title of an exhibit reflecting a period marked by a series of financial crises and the institution of various banking systems intended to guarantee financial stability. The gold discoveries in Georgia, North Carolina and California resulting in a variety of private gold issues are also featured.

Another is "War and Reconstruction, 1860–73," depicting the different currencies and monetary intermediates, from cardboard money and encased postage stamps to the first U.S. greenbacks, as well as some of the Confederate issues of this troubled period.

A significant section of the hall is dedicated to the U.S. mint collection. This exhibit is of unusual importance since it represents the oldest collection of coins owned by the Government. In fact, it had its inception in 1792 at the U.S. mint in Philadelphia. That year and during the rest of his career the chief coiner, Adam Eckfeldt, set aside a specimen of each type and date of coin minted. The mint's collection was increased systematically through purchases made possible by Congress since 1839. This original collection was transferred to the Smithsonian after World War I and is known for the unique or extremely rare pieces it contains. One of its sections is devoted to the pattern or experimental pieces which were made at the mint as early as 1792 and continued until fairly recent years. Many of these designs were never adopted, but they served a useful purpose in helping our coin engravers arrive at designs that would be attractive as well as resistant to wear. The artistic merit of some of these patterns is indeed unusual. Others are notable for their historical import, particularly the $50 gold pieces dated 1877, designed by William Barber, and the so-called metric issues of 1879 and 1880.

The hall features also the world's largest collection of gold coins on public display, given to the Smithsonian by the late Paul A. Straub. It is a "type" collection consisting of 1850 gold coins of Europe and the Americas. Almost 4,000 silver coins of the world complete this series. Remarkable, among others, is the group of oversize multiple talers of the Brunswick duchies issued mainly during the 17th century. A study of the elaborately detailed mining landscapes on some of these coins led to new contributions to the knowledge of early mine-pumping devices.

On view also are outstanding specimens from the Willis H. du Pont donation of Russian coins and medals. It is an authoritative collection paralleled only by that of the Hermitage in Leningrad. The selections are displayed in two cases; one of them illustrates coinages issued between 1700 and 1740 by the Czars Peter the Great, Peter II, and Anna; the other one depicts the life and political aims of Peter the Great as shown on medals.

Another outstanding exhibit is the collection of rare Japanese gold coins presented in 1880 to General Grant, by the Japanese Government, on the occasion when a thoroughbred stallion was given by the General to the Emperor.

The completion of this hall would not have been possible without the assistance of many public and private institutions and organizations as well as most generous gifts from numerous private citizens of the United States. Notable contributors have been: The American Antiquarian Society, Mrs. Frederick C. C. Boyd, Mrs. Catherine E. Bullowa-Moore, Philip H. Chase, Willis H.

du Pont, Eric P. Newman Numismatic Education Society, First New Haven Bank, Mrs. Ulysses S. Grant, International Business Machines Corp., Hon. and Mrs. R. Henry Norweb, Mrs. Wayte L. Raymond, Joseph B. Stack, Morton Stack, Paul A. Straub, U.S. mint, William H. Vanderbilt, and many others.

The Curator of the Division of Numismatics, Dr. Vladimir Clain-Stefanelli of the Smithsonian, reports that the total number of coins, medals, and paper currencies has nearly doubled since 1957 and amounts today to approximately 120,000 cataloged items, not a few of which are unique.

Address by Hon. Jessica McC. Weis, of New York, Before the Federation of Citizens Associations of the District of Columbia

EXTENSION OF REMARKS
OF
HON. CARROLL D. KEARNS
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. KEARNS. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following speech of the Honorable JESSICA McC. WEIS, of New York, before the annual dinner of the Federation of Citizens Associations of the District of Columbia, Saturday, March 11, 1961, at the Mayflower Hotel:

TEXT OF SPEECH OF HON. JESSICA McC. WEIS, OF NEW YORK, A MEMBER OF THE HOUSE DISTRICT OF COLUMBIA COMMITTEE, BEFORE THE ANNUAL DINNER OF THE FEDERATION OF CITIZENS ASSOCIATIONS OF THE DISTRICT OF COLUMBIA, SATURDAY, MARCH 11, MAYFLOWER HOTEL

The District of Columbia is today confronted with a large variety of serious problems, some typical of all major metropolitan areas and some quite unique. These problems have been aired and studied and analyzed by House and Senate District committees, joint committees, congressional hearings, advisory committees, private study groups, car pool riders, businessmen at lunch, women at bridge parties—everybody discusses the District's problems, but it sometimes seems as Mark Twain once observed about the weather, "Everybody talks about it but nobody does anything about it."

In thinking about the District, I have found it useful to think in terms of the problems which are common to all large metropolitan areas in this country on the one hand, and those which seem unique to the District on the other. It is easy to forget, sometimes, that other areas are suffering the same stresses and strains with which we ourselves are confronted, but I can assure you that many of your civic vexations here are also being experienced and grappled with in my own home city of Rochester, N.Y., as well as in every urban center in the United States. Among these I would list at least the following:

The shift in population, which has produced a decline in total population within the District and an even greater relative decline in the productive, wage-earning portion of the population between ages 21 and 64. This has produced in the District the seeming paradox of declining population and rising welfare costs.

The increase in juvenile delinquency and in crimes of almost every kind. Washington has increased the size of its police force regularly—a force recognized for its dedication and efficiency—and still the crime rate moves upward at an alarming rate.

Then there is the traffic problem—enough to try the patience of a saint which I certainly am not as I fight my way back and forth to work every day. The crush of traffic has become insupportable, and I am convinced that the longer we wait the more it is going to cost to solve this Chinese puzzle. Some form of rapid transit, be it monorail, subway, freeway, or a combination of all of them would seem to be an absolute must. You are all familiar with the transit survey which was undertaken jointly by the National Capital Planning Commission and the National Capital Regional Planning Commission. In some ways the survey is startling, both in its scope and in its projected cost. Largely this is true because in recent decades not a single solitary step has been taken toward development of a mass transportation system for the metropolitan area, and as a result, the problem has become acute. No doubt the costs will be high, no one denies this, but the alternatives are equally unpleasant to contemplate. In my opinion, either we manage to pay the cost or we resign ourselves to further decay of many portions of the central city and the complete strangulation of traffic throughout the entire area.

Likewise common to metropolitan areas everywhere are the slum areas, the question of urban renewal, pollution control, which in Washington with the historic Potomac has esthetic as well as sanitary implications. Also, the problem of education, of adequate school facilities, of competent administrators and of adequately paid teachers. These matters are in the papers daily. We know the problems and in many cases we know the answers. Further than that, I am convinced that real progress is being made in some areas. These are among the metropolitan difficulties shared by all our cities. But, as I mentioned earlier, Washington has some unique situations which are extremely serious. At least three matters come to mind which fall into this category: the race question, the difficulties of dealing with an extremely unwieldy governmental structure, and the problem of a wholly inadequate tax base from which to generate the revenues needed to keep the city going. One could easily devote a doctor's thesis to any one of these, but tonight I can only comment on each of them briefly.

The race question in the District is one of serious proportion and its ramifications, both direct and indirect, are numerous. The white population has dropped 20 percent in 10 years, and while I am the first to admit that I am no expert on this subject, I do not believe it would be in the national interest, or in the best interests of the residents of the District, of whatever race or nationality they may be, for this trend to continue. In this connection, I might say that the adjacent neighborhoods and communities in the suburbs of Maryland and Virginia have an obligation to welcome Negro citizens and provide opportunities for housing and education comparable to those in the District, for the great bulk of the Negro population of the Washington metropolitan area is, in effect, now quarantined within the boundaries of the District. This is not, I know, a subject which it is popular to discuss, but it is with us and it must be not only discussed, but solved.

Another situation which I find extremely disturbing is that of the hopelessly confusing assortment of local governmental agencies through which the affairs of the District are handled. After 2 full years on the District Committee, I have yet to solve the mysteries of the labyrinth known collectively as the District Government. Four separate congressional committees exercise jurisdiction over District matters, a situation which is tailor-made to produce snafus and bottlenecks of all types, and if the organization of the Congress for dealing with District matters is less than desirable, and ineffective, the structure within the District Government is equally bad. Ever since 1874 the District has been administered by Commissioners, but their administrative function is often questioned and interfered with by the Congress—the result being that over the years a patchwork of legislation has created about 20 Federal agencies and local boards to operate independently of the Commissioners. Regardless of one's position on the question of complete home rule, surely the present situation could stand considerable improvement.

An incidental matter which concerns me is the fact that a high percentage of top jobs in the District government are held, not by District residents, but by residents of nearby States. This raises the question of whether their interest in the District is as great as actual residents might be presumed to have. I have not checked recently, but in March of 1959 all three assistants to the engineer commissioner were from outside the District, as were the chiefs of the Employment and Training Division and the Classification and Wage Administration Division in the Personnel Office. Other high ratios were noted in the Fire Department, in which only 9 of 20 battalion chiefs were local residents, the Department of Licenses and Inspections, with only 6 of 19 executives living in the District and the Motor Vehicles Department, in which 1 officer in 8 was a District resident. Is it too much to ask, I wonder, that high-ranking District employees make their homes in the District?

Finally, there is the toughest one of all—an inadequate tax base from which to generate the revenues to do the things which need to be done in the District. With 52 percent of the real estate in the District off the tax rolls, and with productive, income tax paying citizens migrating to the suburbs in increasing numbers, the burden is constantly being shifted to that property and those people who do remain. It is only a question of time before demand for tax dollars completely outdistances the sources of revenue available. The competition of neighboring jurisdiction places an economic ceiling on tax measures, and as a result District budget planners have found themselves virtually impaled on the horns of this dilemma of rising costs and dwindling revenue—and may I add that to date the Congress has contented itself on many occasions with watching them bleed.

But it's time to leave the wailing wall. Washington is a beautiful city and we all love it. But it seems to be the fashion to bemoan the plight of the District and to criticize the effort—or lack of it—which has been made to lift the District to a new plateau. I have perhaps been guilty myself, for it is extremely easy to be critical, but if so I want to balance the scales by referring to the encouraging trends which are clearly visible within the District, for certainly substantial progress has been made in the face of heavy odds.

And let me say, in this connection, that the activities of the citizens associations and the civic associations within the District have made a real contribution to finding solutions to the District's problems. In its magnitude and enthusiasm, the citizens movement in the District is to my knowledge absolutely unique. I am certain that there must be more citizens associations per square mile in the District than in any other place in the world and this is good. Your citizens associations meetings resemble the town meetings of our forefathers, at which residents of the community came together periodically to consider, discuss and make decisions on a tremendous variety of local problems. The citizens association movement presents an attempt to make democ-

racy work at the lowest grassroots level, and I commend you for what you have done and wish for you a long period of even greater service in the years ahead. I hope and trust that you will continue to maintain effective liaison with all civic-minded associations, and that all groups can work closely together in effecting solutions to all of the many problems of mutual concern to white and Negro alike, for it would be a great loss if the two groups served to drive a wedge between the two races rather than to build a bridge between them.

With reference to specific improvements which I have observed in the District, I am convinced that substantial progress is being made with the District school system, despite what some of my colleagues may say to the contrary, most of which is for home consumption. The important teacher-pupil ratio has been decreased, and Washington ranks with any of the major cities in this respect. Building of new schools is keeping pace with demand and slowly overcoming the schoolroom shortage. Salaries have achieved comparability with other metropolitan areas—though they are all a bit low. Advances are being made in scholastic attainment among children in the public schools, even though median achievements are still below national norms.

In the area of slum clearance and urban renewal, much remains to be done, but I made an extensive visit through the southwest redevelopment area on Thursday of this week and I was much impressed with what I could see there now and what I was assured would be there in the years immediately ahead. Solid progress has been made there, and I share with you the hope that the entire project can go forward to completion as quickly as possible. I can see the distinct possibility that completion of the southwest redevelopment could trigger off and serve as a magnet for a return from the suburbs, which is something that is drastically needed.

Despite its promise, however, I am distressed by the plight of some of the people whose homes have been literally torn out from under them in the southwest and for whom apparently inadequate provisions have been made elsewhere. Individual cases which have been discussed with me are nothing short of tragic, and I hope that every effort will be made to correct all of the injustices which exist in this regard.

Other accomplishments of potentially major significance are the establishment of the Washington Metropolitan Regional Conference, and the activities of local businessmen, typified by the organizations such as Downtown Progress, Inc., to revitalize the downtown shopping area.

The Washington Metropolitan Regional Conference, envisioning as it does close cooperation among an assortment of governmental units in the metropolitan area—including two States, six counties, two independent cities, and several Federal agencies—gives promise of developing into a most effective vehicle for coordinated multijurisdictional action. Downtown Progress, Inc., in a like manner gives promise of serving as a most productive self-help organization for attracting more trade to the downtown area.

I have discussed the problems of the District and some of the efforts which are being made to solve them. Let me look now for just a few minutes at what still needs to be done, and let me preface these final remarks by saying that adequate solutions to the District's problems are going to take the combined efforts—and the best efforts—of everyone concerned, including the citizens of the District themselves, the District Government and the Federal Government, both the Congress and the executive. To make the District what it should be, and could be—we are going to have to roll up our sleeves and do the job ourselves, and it will require a maximum amount of patience, tolerance, good will and plain hard work—and, I might add, a great deal of money—for rebuilding and breathing new life into a city cannot be done on a shoestring.

There are two items which seem of particular importance to me. One of these is the need for a concerted program to retain the well-educated productive citizens who still make their homes in the District, as well as a program specifically designed to bring similar type people back from the suburbs or into the District for the first time. Such a program will serve two important purposes: It will broaden the tax base, and it will provide the District with a valuable reservoir of new talent with which to cope with future problems. In the same way, more should be done to promote the location in Washington of the national headquarters of more of our trade associations, more stimulus for research and engineering firms to locate here, more encouragement for industry to set up offices in Washington. All of these things could be done without changing the character of the District appreciably, and all would, in my opinion, add to the economic vitality of the District.

A second item, which I have also touched on lightly, is the need for enlightened cooperation between Negroes and whites in the District. For many of us, and I do not exclude myself, the roots of racial prejudice are difficult to weed out. Many of you can remember a time when Washington was, at least as race relations go, a part of the Deep South, and memories linger long, but we have come to a different age, and unless we develop the tolerance and good sense to deal with this problem realistically, it will surely defeat us.

Finally, I come to what some of you will call the main course, those things which I think the Congress should be doing for the District, and may I say that not only as a Member of Congress, but as an American citizen with a deep and abiding interest in the American Government and in the Capital City in which that Government is situated, I am deeply concerned with the obligation of Congress to provide for the needs of the District of Columbia. I am only one Member among a very large number, but it seems to me that this responsibility is so clear and so plain that no reasonable and well-intentioned person could deny it.

Because Washington is our Capital City, it draws people here on business and also brings vast numbers of tourists as well, not only from this country, but from all over the world. It is, in a sense, a showcase of America for all the world to see. As such, it should be a model city, employing all the knowledge and professional skills of our civilization to make it beautiful, attractive, clean, and safe. This is important, not only to you and me who live here and work here, but to all Americans now and for all the years to come. And because it is the Nation's Capital, established specifically and solely for that purpose, and because the Constitution contains a specific mandate to the Congress to provide for its needs, it seems to me that the responsibility of the Congress is inescapable. Inescapable, too, is the fact that the Congress has not effectively discharged this responsibility to the District.

What is past is finished, but for the immediate future, it is my belief that the Congress must do at least the following things:

First, it should bear a more realistic portion of the costs of operating the District. A larger Federal payment can be justified on several grounds. It is my belief that the Congress has a responsibility to provide financial support over and above the moneys that can be collected from taxes comparable to those of surrounding communities, in the amount necessary to care adequately for the District's needs. For many years the Federal payment was 50 percent of District needs; today it is little over 10 percent and if the authorized payment were raised to $36 million, as requested by the Commissioners, the Federal Government would be contributing less than 15 percent of the estimated needs for 1962. An authorized Federal payment of $50 million would still be less than 20 percent of the District's overall budget for next year. With a total budget of $290 million, $50 million does not seem to me to be an unreasonable amount for the Federal Government to make available to the Nation's Capital when I consider the amounts which are being spent on other items.

Secondly, I think we should move quickly to provide the two additional juvenile court judges who are so desperately needed. The juvenile court is now 2,200 cases behind and the backlog is growing daily, while in the meantime the delinquency rate grows steadily worse. There is no excuse for this situation to continue.

Finally, I would hope that the new administration will take a long look at its responsibilities and that the President will move to exercise the positive leadership which he has talked so much about. His interest in District affairs might go a long way toward getting more sympathetic action in the Congress. With his Democratic Party in control of both the Congress and the White House, the responsibility for action is clear cut—and I might add that blame for lack of action is equally easy to assess. I sincerely hope and pray that the President will take an active interest in the District and that we can move ahead now with the steps which must be taken if we are to make of the District the splendid and beautiful central city of the Nation that it ought to be.

I pledge to you that as one member of the Congress, I shall do all that I can by my vote and through whatever influence I may possess, to see that this great national objective, so close to the minds and hearts of all of you, is realized.

Washington Report

EXTENSION OF REMARKS

OF

HON. BRUCE ALGER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1961

Mr. ALGER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

WASHINGTON REPORT

(By Congressman BRUCE ALGER, Fifth District, Texas)

MARCH 18, 1961.

Committee work exceeded House floor action this week. Legislation moves through committee hearings, executive sessions, amendment, and redrafting before going to the Rules Committee for a place on the House Calendar.

A resolution was steamrollered through by a voice vote (Members not desiring a record vote) to increase each Member's staff by one person and the base pay of $3,000 per year (equals approximately $6,700). This should enable each Member to do a more thorough job. Here is tangible evidence of the growth of the Federal Government, and as it grows, so grows the workload of the Members of Congress. The office of the Fifth District of Texas (Dallas County) this week received 2,000 letters from within the district and more than twice that from other areas of Texas. One thousand to one thousand five

hundred letters per week involve "casework," that is, Federal problems confronting citizens who then appeal to their Congressman. These require special attention and Government agency help before response. All letters must be answered. This workload is the nonpolitical daily effort, mostly unknown to the general public in appraising congressional routine. Of course, the inaction of Texas in the past to redistrict doubles the Fifth District's volume of work.

Federal highways are in trouble again. The problem—not enough money to finish the program by 1972 as planned and $200 million more needed per year. How to solve this problem is the current subject of hearings by the Ways and Means Committee. At this time, the issue is in doubt. Possible solutions include: (1) stretch out the time period for completion of the 41,000-mile Interstate Highway System; (2) cut back various building programs; (3) raise the Federal gasoline tax; (4) raise the truckers' tax 75 percent; (5) take the money from the General Treasury (thus cutting the money available for other Federal Government costs).

Here's a bird's-eye view of the testimony thus far: President Kennedy:

"Our Federal pay-as-you-go highway program is in peril. It is a peril that justifies a special message because of the vital contribution this program makes to our security, our safety, and our economic growth. Revised cost estimates require additional authorization of $11.56 billion or $900 million per year. I am wholly opposed to either stretching out or cutting back our highway program." The President then outlined two alternatives through the year 1972 of (1) a 1½-cent per gallon Federal gas tax on all motorists (adding one-half cent to the extension of the 1 cent due to expire July 1, making the total Federal taxes 4½ cents per gallon instead of 3 cents); or (2) continuation of the additional 1-cent gas tax plus an increase of the tax on trucks by upping diesel fuel 4 to 7 cents per gallon, trucks over 26,000 pounds use tax raised $1.50 per 1,000 pounds to $5, tires 8 to 10 cents per pound, inner tubes 9 to 10 cents per pound, retread rubber 3 to 10 cents per pound. Commerce Secretary Hodges, Treasury Department Head Dillon, and Budget Bureau Chief Bell then testified in support of the second alternative, which is President Kennedy's preference.

The American Association of State Highway Officials (AASHO) emphasized the need for the highways, but said, "we will not attempt to tell you how you should raise highway money at the Federal level." The diesel truck industry was strongly defended by Congressman WILSON of Indiana against the tax increase as an unequal distribution of the tax, putting diesels in an unfair competitive position; in short, a penalty on efficiency. The strongest protests came from the trucking industry as witness after witness vowed that such tax increase would force him out of business. At the least, employees would be laid off and reduced business produce less tax revenue to the Government. Further, that this cost could not be absorbed or passed on in higher prices but that other forms of transportation (railroads) would get the business. The Teamsters Union joined with management solidly to denounce the taxes as unfair and a death blow to the trucking industry.

So the outcome is still in doubt. Further hearings, executive sessions, and redrafting of compromises must be accomplished. Problems troubling me include: (1) Why was there a $12 billion increase in highway cost, culminating in our present lack of revenue to finish the job? (2) Why do we not await the findings of the Illinois road tests before seeking a permanent solution? (3) Should we live beyond our means in Government spending? (4) Do the people want taxes raised on all motorists, either 1 cent or 1½ cents per gallon of gas, to finish the program by 1972? (5) How much of the expense should come from the General Treasury as a defense measure? (6) Hasn't "pay as we go" for motorists and truckers actually become "pay before we go" since taxes are in effect well before the highways are built? These and others, * * * one thing is sure, we're a long way from the answer.

Other important legislation pending in committees or waiting action in the Senate, or House includes a proposed increase in the minimum wage and extension of coverage of the act; a depressed areas bill, new farm legislation, Federal aid to education, establishing a Peace Corps, plus the regular appropriation bills. All of which points up the importance of my questionnaire this year. It is now being prepared and will be in the mail early next month. I hope you will make a special effort this session to let me know your thinking on the questions on which I am seeking your advice.

A Tribute to Ireland and the Irish People

EXTENSION OF REMARKS

OF

HON. EDNA F. KELLY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1961

Mrs. KELLY. Mr. Speaker, to those who admire the characteristics of faith, of home, and of courage, the story of Ireland shall forever stand among the fascinating sagas of history. Never have a people been known to fight so long and so heroically in the name of freedom, for themselves and for the sake of the principle, itself.

Beginning with the Norse invasions of the eighth century A.D., the Irish revealed a fiery spirit against which the invader was powerless to triumph. This was the era of the Vikings, then the most powerful warlike force in the Western World, accustomed to sweeping the enemy aside at a single thrust. They came in fleets, sometimes large, sometimes small, landed suddenly in a bay or creek, despoiled the countryside and retired with booty to the safety of their ships. So long as that remained the pattern, the Irish were virtually powerless to resist. But in the year A.D. 837 the Norsemen sought permanent settlement on Irish soil and in so doing, sealed their own fate. Aroused to action, the Irish determined to resist the invader and waged relentless war against him, building up an army that in time would alter Irish history. In the end, so strong did the army become that it not only subdued the foreigners, but also secured for its commander the kingship of the Irish State of Munster. The hero of the occasion was Brian Boramha, who, in the Battle of Clontarf, in the year A.D. 1014, smashed the Norse army and drove it from the field. The victory, won at the cost of Brian's life, was the first of many in which the Irish were to show their determination to live in freedom, or die in the attempt. The Battle of Clontarf broke forever the power of the Norsemen in Ireland. In the next century, those who remained were to accept the Christian faith and submit to Irish laws.

Yet so inviting a prize was Ireland, so small her population and so greedy her neighbors, that the people no sooner overcame one enemy than another inevitably appeared.

In the 12th century it was the Norman knights, clad in armor from head to foot, armed with lances, mounted on horseback, and aided by rank upon rank of archers. Incomparably superior to the Irish in the matter of military might, the Normans swept to victory in a clattering wave of steel, and settled down to live as permanent lords of the land. But by the year 1300 their power had passed its peak and Irish recovery had begun. At the battle of Dundalk, in 1318, the Irish were again defeated in the field. But so fierce was their assault that from that point forward, the Norman power was to wane and in short order would disappear entirely.

Next, it was England with whom the Irish had to cope; the same England that was to extend her power to every corner of the earth and rise to dominance in every continent but one. Yet while all this was going on, the Irish were putting up a battle for independence wholly out of keeping with their political strength, and winning the admiration of the world.

From that day to this, the Irish have persistently fought for the right to self-government, in the fact of awe-inspiring odds. Nor has their struggle been limited to their own shores. In 1776, the American patriot cause was promoted by many an Irish immigrant, to the benefit of every American alive today. And as recently as the past decade, Irish volunteers could be found in the ranks of the gallant little army of Israel, fighting, as always, for the right of smaller nations to determine their own destinies.

The battle for Irish freedom is not yet over, and shall not be until the day when Ireland—all of Ireland—is free to rule itself in the manner of free men everywhere.

But even then, I doubt that the battle will be entirely over. For the Irish spirit requires, and the Irish conscience demands, that freedom encompass every inhabitable portion of the earth. And until that goal is reached, there will be no rest for the Irish.

Temporary Unemployment Compensation

EXTENSION OF REMARKS

OF

HON. JAMES B. UTT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1961

Mr. UTT. Mr. Speaker, H.R. 4806 is a bill to provide a temporary program of extended unemployment compensation and to increase the Federal unemployment taxes imposed on the employers in the respective States to finance that program. At the time this legislation was before the House of Representatives I opposed its passage and

joined in minority views to that effect. These minority views expressed opposition on the grounds that the bill first, did violence to the insurance principle of unemployment compensation; second, purported to impose $1 billion in additional taxes to meet a problem that had not been adequately defined; and, third, posed a threat to economic recovery by imposing higher costs on employment. These views pointed out how this legislation represented a backdoor approach to the imposition of Federal standards on the States and threatened the experience rating system which operates so successfully in the States to encourage employers to stability in employment opportunities.

Mr. Speaker, since expressing those views the legislation has passed the House of Representatives and has received approval in the other body. It now comes back to the House improved in some minor respects but still containing the basic defects that I criticized in the House version with respect to financing.

It is in regard to the financing features that I would like to comment further at this time.

In 1958 when the Eisenhower administration and the Congress considered that the economic situation required the enactment of a temporary unemployment compensation extension, legislation was then approved dealing with the situation. That legislation provided for a system of repayable advances to the States on a voluntary basis with the borrowing States having responsibility for the repayment of their respective advances.

The bill before the Congress today is markedly different. The benefit payments are voluntary with the States, but the Federal tax increase imposed on the employers in the States is mandatory and will be assessed against the employers in a particular State regardless of whether or not benefits are made available to the unemployed in the State. The anticipated consequence is that all States will make benefits available even though the responsible State officials may not consider that the economic situation in a particular State makes such an extended benefit program necessary. But the mere fact that benefit payments are to be made available in every State does not mean that the benefit payments in the State will equal tax collections in a State; it does not mean that the employers in a particular State will be taxed only to the extent that benefits are paid in the State. On this point we said the following in our minority views on this legislation:

> Those States that have responsibly administered their unemployment compensation programs today have the financial ability to deal effectively with existing unemployment conditions. However, the approach set forth in H.R. 4806 would tax the employers in those States to pay for the benefit needs in other States where perhaps less satisfactory administration of unemployment compensation programs has occurred.

Mr. Speaker, the Senate Finance Committee report contains a table setting forth on a State-by-State basis the estimated additional tax collections and the estimated benefit payments under H.R. 4806. I will include that table as a part of my remarks and urge my colleagues to examine this table for the purpose of ascertaining the patent inequity in the financing arrangement of this proposal.

Estimated additional tax collections compared with expected benefit payments by States under H.R. 4806

[Amounts in millions]

State	Tax collections	Benefit payments[1]
Total	$984.0	$928.2
Alabama	12.2	10.0
Alaska	1.2	2.2
Arizona	5.7	2.1
Arkansas	5.3	4.7
California	99.4	80.0
Colorado	8.3	2.0
Connecticut	18.5	18.2
Delaware	3.2	2.0
District of Columbia	5.5	2.2
Florida	21.4	9.5
Georgia	16.7	12.0
Hawaii	3.1	.7
Idaho	2.5	1.6
Illinois	68.6	40.0
Indiana	28.0	26.0
Iowa	10.8	3.5
Kansas	8.5	3.5
Kentucky	10.6	15.0
Louisiana	13.1	12.9
Maine	4.5	2.0
Maryland	13.8	10.0
Massachusetts	34.2	30.0
Michigan	46.6	93.0
Minnesota	16.0	14.4
Mississippi	5.7	2.2
Missouri	23.6	11.0
Montana	2.6	1.1
Nebraska	5.2	.5
Nevada	2.0	2.0
New Hampshire	3.4	.4
New Jersey	30.7	51.2
New Mexico	3.9	2.3
New York	119.9	170.0
North Carolina	19.9	7.9
North Dakota	1.6	.9
Ohio	62.4	85.0
Oklahoma	8.9	5.8
Oregon	9.6	10.6
Pennsylvania	70.7	82.0
Puerto Rico	3.2	3.2
Rhode Island	5.5	5.5
South Carolina	9.1	7.3
South Dakota	1.6	.2
Tennessee	15.0	8.0
Texas	42.1	30.0
Utah	4.1	2.0
Vermont	1.7	.6
Virginia	16.1	5.5
Washington	15.4	8.9
West Virginia	8.4	9.5
Wisconsin	21.5	16.0
Wyoming	1.5	1.1

[1] Includes about $100,000,000 in benefit payments in excess of 26 weeks made under State law, and excludes payments to Federal civilian employees and ex-servicemen.

Source: Estimates of tax collections furnished by Department of Labor and estimates of benefit payments furnished by State employment security agencies.

Mr. Speaker, that table reveals that there are 40 surplus States with tax collections exceeding benefit payments, 3 break-even States with the tax collection and benefit payments equal, and 9 deficit States in which the tax collections in the respective States will not equal their estimated benefit payments. A table showing a recapitulation of the three categories of States follows:

[Figures in millions of dollars]

	Tax collections	Benefit payments	Surplus or deficit
Surplus States (40)	604.2	399.0	+205.2
Break-even States (3)	10.7	10.7	
Deficit States (9)	369.1	518.5	−149.4
Total	984.0	928.2	+55.8

The employers in the 40 surplus States would pay in taxes $205.2 million more than would be paid in benefits in their respective States. The 9 deficit States would have $149.4 million more in benefit payments than the employers in these States paid in increased unemployment compensation taxes. There would be a net surplus of tax collections over benefit payments for all 52 States under this temporary program amounting to $55.8 million, and I will comment on the disposition of that surplus later.

Five of the deficit States—Michigan, New Jersey, New York, Ohio, and Pennsylvania—would account for $141.9 million of the $149.4 million total deficit incurred by the 9 deficit States. Mr. Speaker, this fact raises the obvious question: Are the employers in Michigan, New Jersey, New York, Ohio, and Pennsylvania so impoverished that they are unable to pay their respective State's own way in regard to their State unemployment compensation programs? And the second question follows: Are the employers in the other States so wealthy that they can afford to pay their State program costs and contribute to paying the way of the deficit States?

Now, Mr. Speaker, I would like to comment on the disposition of the $55.8 million surplus under the bill. The formula for distributing this surplus under the legislation provides that it should be allocated to each State in proportion to the taxable wages as defined under State law. This means that the deficit States would be participating in the distribution of this surplus and it is inevitable that the five States contributing the most in the way of deficits will be among the leaders in the amount of the surplus they will receive. In other words Michigan, New Jersey, New York, Ohio, and Pennsylvania, which created the lion's share of the deficit-State-total, will have a lion's share of the surplus created by the surplus States.

Mr. Speaker, I believe that if unemployment compensation is to be a State responsibility, it should be kept exactly that. I believe that the States have demonstrated their ability to manage their unemployment compensation programs responsibly and adequately. Therefore, I am opposed to this legislation.

Some of my colleagues who want to preserve State preeminence in regard to unemployment compensation do believe that a temporary program of extended unemployment compensation is necessary in view of the present economic conditions. I respect their viewpoint; however, I cannot understand how anyone can support the method of financing provided in this bill. Even those individuals who come from deficit States should be concerned that this financing pattern contains a strong inducement to loose administration which threatens the future of the unemployment compensation program. Those individuals who come from surplus States must determine whether or not the employers in their respective States should

be called on to pay for an unemployment compensation program in other States where the employers have no vote and no influence as to the character of the program in those other States.

Mr. Speaker, this legislation in its present form should not proceed one step further in the legislative process. If legislation is necessary, then we should start all over again to develop legislation that is equitable and proper in its conception and which does not endanger the continued existence of our State unemployment compensation programs.

Our People Are Looking to Congress To Carry Out the Promises Echoed by Fervent Candidates for Office Within Those Valleys of Depressed Economy Only a Few Short Months Ago

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. VAN ZANDT. Mr. Speaker, over the past 5 years volumes of evidence have been presented to Congress and relevant committees thereof on the need for depressed area legislation. Any long explanation of conditions in a specific surplus labor region would be superfluous. Time and again I have outlined the problem and its implications with respect to Pennsylvania's 20th District.

I need only assert at this time that conditions are worse than they were when a Senate subcommittee visited Pennsylvania several years ago; they are worse than when I reported to the House in subsequent years; they are worse than they were when spokesmen for the present administration were promising quick action in the windup of the general election campaigns.

Congress is a deliberate body which should and usually does study carefully all matters of consequence before setting the finishing legislative machinery into operation. For this reason it is on rare occasions that bills of major significance are finalized on short notice.

While the new Congress has been in session for less than 3 months, it would seem that there is a sufficient accumulation of testimony and statistics on the matter before us today to permit passage without further procrastination. Data assimilated and distributed by the Department of Labor provides ample substantiation of the need for expeditious action. Many thousands of residents of surplus labor areas have been subjected to the many misfortunes that walk with unemployment since the early 1950's. Our people are looking to this legislative body to carry out the promises echoed by fervent candidates for office within those valleys of depressed economy only a few short months ago.

I have introduced legislation to provide an avenue of quick relief to communities of chronic unemployment. I have indicated my willingness to support other measures which have not concurred precisely with my own ideas as respects the method of approach, the size of appropriations necessary on the part of the Federal Government, and the administration of the legislative product. I was highly optimistic about prospects in the 85th Congress. Failure of the 86th Congress to enact responsible legislation was even more alarming. Now the new Congress is faced with a dual responsibility. While we cannot compensate for what amounts to nothing less than a delinquency of responsibility that occurred during preceding sessions, we must nevertheless act promptly not only to make it possible for those citizens long deprived of employment opportunities to get back to work; we must preclude additional hardships that would come with further delay.

Unemployment nurtures unemployment. Families without income cannot purchase commodities whose sales provide work for other segments of the population. The incidence of poverty increases daily in a recessed economy. In my particular constituency, and I know that I speak for members of both parties from coal-producing States in the Appalachian range, a further impediment to recovery was cast here in Washington earlier this month with the remolding of the concept of the residual oil import control program. The revision added emphasis to the urgency for enactment of a distressed area bill.

Mr. Speaker, our district has experienced mine closings—one after another—since the tide of residual oil imports began to take its toll of coal markets on the east coast more than 10 years ago. Mine workers waited anxiously for Congress or the executive branch to correct what they assumed would be only a temporary situation. As American citizens, they felt confident that the Federal Government would not permit their sources of livelihood to be destroyed through the contemptuous machinations of an international business entente.

As shipments of bituminous coal to seaboard industry declined, railroad workers took their place alongside displaced miners seeking new jobs. General economic inertia set in. In ensuing years, those affected areas have been given top billing on the Department of Labor's listing of areas of chronic unemployment.

The recent order by the Department of Interior was another cruel blow. The administration has succumbed to the pressures of shipping companies determined to unload their surplus product anywhere, at any price, without regard to the welfare of America's citizenry. The impact of the increase in residual oil import quotas will be felt simultaneously with delivery of the alien product. Mines whose product will be preempted by that increase will be forced to cut work days accordingly. There will be less money for our mine workers and our railroaders. The mine workers' welfare fund will suffer proportionately.

To give precedence to the international oil crowd over our own working men is shortsighted and costly. I hope that the Department of Interior will reconsider its hasty decision and revise its order in keeping with the principle of the purposes of the program. Meanwhile we must be realistic. The economy of coal and railroad communities is faced with a turn for the worse. Distressed area legislation becomes even more necessary than it has been throughout the years of suffering to which our people have been subjected. I appeal to my colleagues to act quickly.

The Honorable Victor L. Anfuso, Member of Congress from New York, Chairman of the American Honorary Committee for the Italian Centennial

EXTENSION OF REMARKS
OF
HON. WILLIAM FITTS RYAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. RYAN. Mr. Speaker, last Thursday, March 16, it was my pleasure to be present at a very impressive and significant ceremony at the Department of State on the occasion of the centennial celebration of the unification of Italy. An important part of the proceedings was the opening address by my respected colleague from New York [Mr. ANFUSO]. In his eloquent remarks he took note of the strong and lasting bonds of friendship between the people of Italy and the people of the United States.

Under leave to extend my remarks, I include the text of his address:

REMARKS BY HON. VICTOR L. ANFUSO, ITALIAN CENTENNIAL CELEBRATION, MARCH 16, 1961

It is a great honor for me to have been singled out by my colleagues on the American Honorary Committee to be the chairman of this historic event. It is my pleasure to welcome you.

It is of particular significance for me, since I came to this country as an immigrant from Italy at the tender age of 9. Little did I dream then that someday this immigrant boy would preside at a celebration of this sort in Washington, where the President and other great leaders of this Nation would gather to pay tribute to my ancestral homeland on the centennial anniversary of its unification as a single strong nation.

I am deeply grateful this morning, as never before, to this wonderful country of ours for the unlimited opportunities which I and millions of other Americans of Italian extraction have received. This is a feeling which only immigrants and the children of immigrants can fully appreciate.

The President of the United States has played a significant role in these celebrations. I have had the honor and the privilege to know the President ever since I first came to Congress in January 1951, when I served with him in the House of Representatives. I remember the kindly guidance he gave me then—and I shall never forget his encouraging assistance on several projects which I proposed to the Congress in those days.

This association continued also after he had moved over to the U.S. Senate, and it is best exemplified by the fact that after I had

introduced the resolution on the centennial observance of Italian unification and brought it to the attention of Mr. Kennedy, he immediately introduced it in the Senate. May I quote just a brief remark by Mr. Kennedy at the time he introduced the resolution on July 13, 1959, when he said:

"The concurrent resolution expresses our pleasure in receiving the invitation (to participate in the observance) and testifies to our admiration for the contributions this great Nation has made to our common ideals of freedom and independence. It is fitting and proper that we recognize in this fashion the progress and achievements of the people of Italy during the past century."

During this entire decade that I have been privileged to know Mr. Kennedy, I have always found him to be an admirer of Italy and of its achievements in the annals of culture and civilization. Likewise, he has a keen appreciation of the contributions of Americans of Italian descent toward the upbuilding of America and its way of life.

It is to a certain extent an irony of history that, as Italy was reborn as a united nation, the United States was on the threshhold of facing its greatest test for survival. As the guns were stilled in Italy, and Garibaldi was going back to his beloved island of Caprera with a bag of bean seeds on his shoulder, the guns of Fort Sumter on this side of the Atlantic were rumbling. Italy's Risorgimento, which means rebirth as a nation, was being accomplished.

And speaking of Garibaldi, I take particular pleasure in greeting here this morning the grandson of that great patriot, General Ezio Garibaldi, and also his granddaughter, Mrs. Giuseppina Ziluca. May I ask them to take a bow.

Today there exist strong bonds of friendship between the United States and Italy. The bonds joining our two nations are, in my estimation, stronger and deeper than those resulting from a military pact or an economic program. They are the bonds of faith and confidence in one another, of mutual respect and understanding between two great peoples, of genuine friendship and reciprocal contributions.

The bridge of understanding between the people of the United States and the people of Italy was not constructed overnight. It is a process which is at least as old as the United States, and in fact goes back to our earliest days when small but significant numbers of Italians joined the waves of early explorers and settlers who came to these shores. They and succeeding generations of Italian immigrants, who settled in this land, have made lasting contributions to our American heritage over the long centuries. The imprint of their contributions on American life and civilization is visible all around us.

We live in a crucial time in the annals of human affairs which requires utmost unity in the ranks of the free nations. The future survival of democratic America and of the whole free world depends, in large measure, on reinforcing our bonds of cooperation with nations like Italy, and on the creation of working partnerships with such nations in every endeavor which could serve the best interests of mankind.

It is not for me to spell out in detail how this partnership between our two nations is to be created, nor is this the time and the place to do so. Suffice it merely to indicate that we have the beginnings of it in several ways: the fact that Italy has been willing to give as much as she receives; the fact that Italy has made available to us areas for the establishment of military bases; Italy's significant role in NATO; Italy's strategic position in the Mediterranean in relation to Europe, Africa, and the Middle East; and Italy's ancestral ties in Latin America.

Our partnership can be extended and deepened in other ways through many new ideas and bold action. Instead of working alone in certain areas, where our help has been misunderstood, let us invite the participation of partnership—nations like Italy—if such participation will bring about better understanding and more fruitful results. The possibilities are unlimited. This, too, may in time prove to be a New Frontier in our international relations.

It is, therefore, only fitting and proper that we choose this occasion to rededicate ourselves to the same ideals which triumphed over a hundred years ago. In this era of the New Frontier, let us, in the words of our beloved President, pray that the future years will prove to be the years when the tide came in—when America, together with a strong and united Italy and a free world, moved forward again.

Taxing Freedom of Expression

EXTENSION OF REMARKS
OF

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1961

Mr. PELLY. Mr. Speaker, I have recently introduced a bill (H.R. 5573) in which I join many of my colleagues in the House, which proposes a much-needed clarification of congressional policy on the right of freedom of expression without undue tax restraints. These tax restraints have arisen as a result of arbitrary administrative rulings interpreting our tax laws so as to impose a prior restraint on the right of our constituents to present their views on legislative matters at any level of the Government. The administrative interpretations to which I refer are embodied in Internal Revenue Service regulations which attempt to deny a tax deduction for lawful business expenditures which relate to lobbying, the promotion or defeat of legislation, or "propaganda relating thereto."

These sweeping terms are not defined in these administrative rules which places business taxpayers in the position of proceeding at their peril in exercising their right of petition to their Government and in determining whether or not their expenditures for activities on expressing their views may not be deemed proper deductions for Federal income tax purposes. This rule applies even though the legislation to which the business taxpayer may express his views and reactions can have a substantial economic impact on his business or his right to stay in business.

The Supreme Court of the United States, in my opinion, has compounded the confusion in this area in a series of cases in which the Court contends that in denying tax deductions to a taxpayer for expressing his views on matters which would have seriously affected or destroyed his business are not allowable as a tax deduction because of a sharply defined national policy against such deductions. However, upon reading the cases which set forth this purported rule of law one finds that the basis for this so-called national policy is predicated upon administrative interpretations rather than upon duly considered congressional enactments. In my opinion, Mr. Speaker, this is a highly questionable rule of law which is predicated upon an erroneous concept of what our national policy is and should be with respect to the tax status of business expenses for full expression of views on matters of vital economic importance.

To further demonstrate the confusion that exists in this area we find that for tax purposes there is a sharply defined national policy against the deduction for business purposes of such expenses. However, in a case decided by the U.S. Supreme Court just last month in connection with a determination of a violation of the Sherman Act, the Supreme Court noted:

> The right of petition is one of the freedoms protected by the Bill of Rights, and we cannot, of course, lightly impute to Congress an intent to invade these freedoms.

With this statement I would heartily concur and I would believe that my colleagues in the House would also heartily concur. The Supreme Court also noted in this same decision:

> The right of the people to inform their representatives in government of their desires with respect to the passage or enforcement of laws cannot properly be made to depend upon their intent in doing so. It is neither unusual nor illegal for people to seek action on law in the hope that they may bring about an advantage to themselves and a disadvantage to their competitors.

Thus our Supreme Court has created what to my mind is a double standard. For tax purposes the right of petition and presentation of views on matters governmental is restricted and impaired because of a purported sharply defined national policy. Yet the same Supreme Court with respect to an alleged violation of a punitive statute expressing the antitrust policy of the United States considers it the preservation of a basic freedom that under our system of government there is a right of the people to inform their representatives of their views on matters governmental. I cannot reconcile this double standard. I would doubt that my colleagues in the Congress of the United States could justify or reconcile such a double standard.

This then is the nature of the problem. The law demands an immediate clarification and the burden—the duty of clarification—is one of those responsibilities we accepted upon undertaking the solemn duty of representing those who chose to elect us to the high offices we now hold.

The bill which I have sponsored and which has been referred to the Committee on Ways and Means is an effective, realistic solution to the difficult legal dilemma now facing our taxpayers. I have no pride of authorship in this proposed legislation. I only heartily subscribe to the principles embodied in this bill. Who are the authors of this proposed legislation? Mr. Speaker, this bill to which I have put my name is very similar to the bill which was favorably reported and recommended by my distinguished colleagues on the Committee on Ways and Means during the second session of the last Congress, House

Report 2077. At the time the Committee on Ways and Means favorably reported on this legislation during the last session of the Congress, the committee noted:

It seemed to your committee that if an expenditure is ordinary and necessary to the conduct of a taxpayer's trade or business and is lawful, it is unfair for the deduction to be disallowed just because the expense is incurred to influence legislation.

Mr. Speaker, I believe that taxing the freedom of expression is to effectively impair one of the tenets of our form of government. With the ever-expanding scope of government—at all levels of government—it is more important than ever that we reconcile the effective impediments created by this legal situation and that we forthwith undertake to pass remedial legislation.

As I previously indicated, there are several proposals on this subject which have been introduced by many of my colleagues in the House from both sides of the aisle. This is not a partisan issue; it is a nonpartisan problem of fundamental importance and I urge that we undertake an immediate disposition. I earnestly solicit the support and cooperation of other Members of the House of Representatives and respectfully request that my colleagues on the Committee on Ways and Means immediately schedule this problem for discussion.

Mr. Speaker, an editorial which appeared in Advertising Age on March 6, 1961, points up the important issues involved in clarification by Congress of proper business expense for tax purposes. Under unanimous consent I include the editorial at this point:

AN IMPORTANT DECISION

The reversal by the U.S. Supreme Court of the judgments against Carl Byoir & Associates and 24 eastern railroads in the Pennsylvania trucking case is of major importance, not only to the public relations segment of business, but to advertising people as well.

The Court reached its decision unanimously, and as Advertising Age's reporter said, it wrapped lobbying in a "public interest" cloak of unprecedented grandeur, even though it sharply criticized the ethics of public relations operators on both sides of the railroad-truckers dispute.

The important point for our purposes is that the Court advanced in the strongest terms the opinion that representative government can't operate unless citizens can express their views freely, and that the Sherman Antitrust Act cannot be so construed as to act as a brake upon that freedom of expression.

Among other things, the Court's decision said:

"The right of the people to inform their representatives in government of their desires with respect to the passage or enforcement of laws cannot properly be made to depend upon their intent in doing so. It is neither unusual nor illegal for people to seek action on laws in the hope that they may bring about an advantage to themselves and a disadvantage to their competitors."

In the light of this and other language of the decision, it would appear difficult for the Internal Revenue Service or others to argue about the legality of advertising devoted to public interest messages, even though the point at issue in the recent advertising cases has not been action under the antitrust laws but in terms of allowances for taxes, determination of utility rates, etc. When the Supreme Court ruled on advertising cases not too long ago, it held that lobbying was not to be encouraged; now it seems to have changed its mind.

It is narrow legalism to argue that lobbying and discussing public issues are essential to the operation of our kind of society, and then, to restrain or hobble such discussion by penalizing it in terms of tax reprisals.

Farm Bureau's Golden Anniversary

EXTENSION OF REMARKS
OF
HON. HOWARD W. ROBISON
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. ROBISON. Mr. Speaker, due to the unfortunate death of my distinguished and respected colleague, the Honorable B. CARROLL REECE, of Tennessee, it has been necessary to cancel a special order that I had for today for the purpose of bringing to the attention of this body the fact that today, March 20, 1961, marks the 50th anniversary of the founding of the American Farm Bureau Federation. Under leave to extend my remarks, I herewith include the address that I had prepared to mark this occasion:

This is a momentous day in the history of agriculture in the United States.

On this day, 50 years ago, in Broome County, N.Y.—one of the four counties in the district I have the honor to represent—the idea that brought forth the great American Farm Bureau Federation was conceived.

Not a single Member of this Chamber today is unaware of the activities of this vast organization, the largest and the only nationwide federation of farmers in the United States. Its membership today is more than 1,600,000 farm families in all States of the Union except Alaska and, in addition, in Puerto Rico.

A half a century ago today, on March 20, 1911, a pioneer, John H. Barron, one of the first county agents in northern United States, went to work in Binghamton in Broome County to open an office for what then was the farm bureau of the Binghamton Chamber of Commerce. The word "bureau" had its inception in the fact that the Binghamton Chamber of Commerce had other bureaus—a traffic bureau, a manufacturers bureau, and several other subdivisions similarly named. Thus, the farm bureau.

Back of this activity by the Binghamton Chamber of Commerce was the interest of its secretary of that day, Byers H. Gitchell, who had become convinced his organization should have a department or division devoted to the promotion of the interests of agriculture in surrounding areas.

Mr. Gitchell was motivated by a belief that farming is basic and very closely interrelated with urban and suburban areas. His vision and his agitation bore fruit.

He was joined by, among others, George A. Cullen, who then was traffic manager and industrial agent for the Delaware, Lackawanna & Western Railroad, now the Erie Railroad.

The original operation of the farm bureau was sponsored jointly by the chamber, the railroad, and the U.S. Department of Agriculture. At the time the New York State College of Agriculture was unable to contribute financially, but gave freely of advice and encouragement.

These were the horse-and-buggy days and Mr. Barron wheeled up and down the muddy roads of his district, acquainting himself with problems of farmers, helping, coordinating their interests and activities, giving farm demonstrations. When farmers began coming to his office, he appointed community leaders who then organized meetings in local farming communities. He organized study clubs.

From this sprung the largest farm organization in the Nation—representing three out of four organized farmers in the country.

Not long after Broome County became organized, other counties followed. Five more farm bureaus were organized in New York State in 1912. Thirteen more followed in 1913. Growth continued. By 1918, a total of 55 New York counties had farm bureaus.

Meanwhile, other areas of the country had become active. In middle 1912, Pettis County, Mo., organized a county group of farmers that was the forerunner there of the Missouri Farm Bureau Federation. In Illinois, the De Kalb County Soil Improvement Association was formed at about the same time.

By 1913, the Broome County Farm Improvement Association had been formed, taking over all of the farm activities previously centered within the chamber of commerce. The new organization took on the working name of the Broome County Farm Bureau. Friendly relations with the chamber continued, but henceforth farmers took over complete control of their affairs.

This pattern of greater local farm responsibility spread rapidly. The emergency of World War I, with its message of "Food Will Win the War" echoed throughout the land, and agriculture took on a renewed importance. The farm bureaus of the day responded magnificently.

As the county farm bureau evolved, the question of control received much thought and attention. So long as State and Federal funds made up a large portion of financial support, there remained a question of control by the State college of agriculture.

The aim was to advance farm bureau to the point that county appropriations and farm bureau membership dues would make up a larger and larger share of the expenses involved.

It is a tribute to the men and women of a half a century ago that they had the vision, the spirit of freedom and the will to recognize that only an organization free from government could indeed be a true representative of the farmer.

It is interesting to note that by 1917—only 6 short years after an idea had been born in Broome County—a State federation of farm bureaus was born in New York State. By 1918, the State Federation of the New York Farm Bureau had four standing committees—one on legislation, one on organization, another on education, and a fourth on markets and transportation. Problems of that year were the sale of wool, labor, power ditchers, the shipment of wheat, and liberty loans.

In 1919 the New York State Farm Bureau Federation took the initiative and called together farm bureau representatives of 12 States to meet at Ithaca, the home of Cornell University. The purpose of that conference was to advance a proposal that a National Farm Bureau Federation be organized.

The stated purpose of that first 12-State meeting is interesting:

"1. To provide the Nation with a strong farm bureau organization thoroughly representative of agriculture which might speak for the farmers of the entire country.

"(2) To develop and carry forward a program which would reach the entire country and which would bring into action the strongest farmers of the country."

An outgrowth of that Ithaca meeting was the appointment of a committee of five to push forward the idea of a national federation.

On November 13 and 14, in 1919, at Chicago, representatives of 31 States formed a temporary American Federation of Farm Bureaus. The original problems of a nationwide federation were obvious. Never before had all of the diverse elements of agriculture attempted to unite under one mantle.

Very properly, questions were deep and searching, but overshadowing all else was the real possibility of creating a great, new national farmers' organization on a basis different from anything which had been before. Here in their grasp delegates saw a degree of strength and solidarity never before possible. Here was a sleeping giant that might be awakened.

There were about 500 delegates at that first meeting in the red room of the La Salle Hotel in Chicago. The atmosphere was tense, expectant.

After much discussion and not little argument, the delegates decided to form a nationwide organization to be called the American Farm Bureau Federation. The first president was James R. Howard, of Marshall County, Iowa, a tall, angular man who knew well the problems of agriculture. He had been born on the same farm he then operated.

Nothing better illustrates the vision of American farm families than the membership report of the first annual meeting of the American Farm Bureau Federation at Indianapolis in 1920. At that meeting, the secretary reported a paid-up, voluntary membership of more than 800,000.

Since those early days, there has been a tremendous growth in this great federation, all of it under the leadership of the illustrious presidents who followed Mr. Howard: Oscar E. Bradfute, of Ohio; Sam H. Thompson, of Illinois; Ed. O'Neal, of Alabama; Allan B. Kline, of Iowa; and the current president, the sixth president, Charles B. Shuman, of Illinois.

All of these men played vigorous roles in leading agriculture, in giving it a voice that must be heard even as the number of farmers declines.

Along the line there have been many outstanding State farm bureau presidents, among them the present president of my own New York State Farm Bureau, Donald F. Green, fruitgrower of Chazy, N.Y. Much of the progress of the entire farm bureau effort can be traced to State leaders like Mr. Green. I am sure other Members of this Chamber can point with equal pride to their own State farm bureau presidents as men who represent the good and the solid in agriculture of these United States.

Over the last half century, a great organization has come to life and has developed as an independent, voluntary—and I stress the word "voluntary"—federation of farm and ranch families associated to safeguard and promote their enlightened self-interest in a manner consistent with the general welfare.

It is an organization that is typically American. Members join and pay dues voluntarily to finance the farm bureau program. Members develop the policies and program through democratic process and majority decisions. Members have equal rights to make proposals, discuss, debate, and vote on issues. Members elect leaders from their own group.

Farm bureau is local, national, and international in its scope and influence, and is nonpartisan, nonsectarian, and nonsecret in character. Its main offices are in Chicago and it has a Washington office. In addition, a foreign trade office has been opened in Rotterdam, the Netherlands, to promote the sale of American farm products overseas. This office is totally supported by membership dues.

Recently, the American Farm Bureau Federation has organized the Farm Bureau Trade Development Corp. to strengthen its private trade efforts. The farm bureau also has recently organized the American Agricultural Marketing Association, an organization designed to help farmers market their products.

Most of us here are familiar, I am sure, with the booklet of annual farm bureau policy resolutions. This booklet is the work of thousands upon thousands of farm families from nearly 2,700 counties in this Nation. Annually, these farm families start policy development at the county level. From there it moves up to the respective States and, finally, to the annual meeting in December of the American Farm Bureau Federation which regularly attracts more than 5,000 farm men, women, and young people. At this convention, the delegates, elected by farmers of their own States, thrash out issues, argue, give and take, much as we do here.

Finally, the policies emerge, hammered out in the most democratic way.

Perhaps the most succinct statement of the farm bureau position can be stated in the words of Mr. Shuman, the Illinois farmer who now heads this great organization:

"Our goal," he says, "is to serve the best interests of agriculture from an overall standpoint and to do so on a basis consistent with the national interest.

"A major objective of Farm Bureau policy is to create conditions which will make it possible for farmers to earn and get high per family real incomes in a manner which will preserve freedom."

If we listen carefully to Mr. Shuman's words we easily will see that he doesn't mean to try to make farmers prosperous by the use of tax money. He believes, and strongly, that the way to real prosperity for agriculture is not the control route, but the avenue of decisions freely made in a free atmosphere without the shackles and chains of a Federal bureaucracy.

I have, with pride, traced the history of a great organization whose birth was in Broome County, N.Y. It was a noble idea. It is being well executed.

During next November, the New York State Farm Bureau will observe the 50th anniversary year by holding its annual meeting in Binghamton, in Broome County. This will bring together many farm leaders to observe a half century of solid progress. It is an event to which I am looking forward with great pleasure and pride.

Immigration Quotas

EXTENSION OF REMARKS
OF
HON. JOHN E. FOGARTY
OF RHODE ISLAND
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. FOGARTY. Mr. Speaker, the bill I have introduced today has a twofold purpose. It is designed to facilitate the reunion of separated families and, at the same time, to benefit a considerable number of skilled immigrants whose services have been determined by the Attorney General to be urgently needed in the United States, but who cannot be issued a first preference visa solely because a quota number is unavailable. In recent years the Congress has attacked the problem of backlogged immigration quotas by enacting special legislation which afforded only nominal relief and provided no real remedy for the problem. Quotas of many countries continue to be heavily oversubscribed, while other countries, notably Great Britain, and Ireland, fail to use their allotted quotas year after year to a very substantial degree. It is estimated that approximately one-third of all authorized quota numbers remain unused at the end of each fiscal year, and are consequently discarded. One of the underlying principles of our immigration laws is the preservation of the family unit. The instant bill is intended to give meaning and reality to that principle.

The problem of backlogged quotas is attributable in large part to the great disparity between the size of quotas proclaimed for certain northern European countries and the size of quotas proclaimed for all other countries throughout the world. For example, three countries of northern Europe are assigned 70 percent of the overall annual quota of 155,000 and the other quota countries, about 100 in number, variously divide the remaining 30 percent of the overall quota. These quotas were computed under the national origins formula which Congress wrote into the Immigration Act of 1924 and carried forward in the Immigration and Nationality Act of 1952. They range from the minimum quota of 100 per annum to the maximum quota of 65,361 proclaimed for Great Britain and Northern Islands.

In addition to bringing families together and hastening the entry of hundreds of skilled aliens, this bill will tend to alleviate the hopeless predicament which faces many prospective immigrants whose chances of ever being reached on the waiting list are extremely remote, particularly the nonpreference immigrant. To the extent that the quota numbers now unused are made available for the issuance of visas to aliens within the preference classes, more numbers will become available for the issuance of visas to aliens in the nonpreference class. The vast majority of refugees fall in the nonpreference category.

The redistribution of unused quota numbers on a regional basis is not a new idea. It was first broached by President Eisenhower in his message of February 8, 1956, to the Congress and repeated on other occasions. This proposal does not increase the overall quota of 155,000 established for all quota countries nor does it relax in the slightest degree any of the substantive conditions which every alien must meet before he is issued an immigrant visa and admitted into the United States. The bill simply authorizes the use of the present quotas to the fullest extent possible within the framework of existing law except for the national origins concept.

Specifically, this bill authorizes the Secretary of State to create four regional quotas representing Europe, Africa, Asia, and Oceania, and to assign quota numbers unused at the end of each fiscal year to the appropriate regional quota. For example, unused numbers attributable to the quota for Great Britain and Northern Ireland would be assigned to the regional quota for Europe,

while unused numbers attributable to the quota of Vietnam would be assigned to the regional quota for Asia. The Secretary of State would then make these numbers available for the issuance of immigrant visas to qualified immigrants to whom a first, second, third or fourth preference status had been granted on the basis of a petition approved by the Attorney General. The first preference class consists of skilled aliens so classified because of their high education, technical training, specialized experience or exceptional ability, and because of the urgent need for their services in the United States. The second-preference class consists of the parents and the unmarried sons or daughters of citizens of the United States. The third-preference class consists of the spouses and the unmarried sons or daughters of aliens admitted to the United States for permanent residence. The fourth-preference class consists of the brothers, sisters, and married sons or daughters of U.S. citizens, including their accompanying spouses and children. The assigned numbers in each regional quota would be made available for the issuance of visas to these preference immigrants who were born within the respective region, regardless of their country of birth, and in the same chronological order in which quota numbers are now allotted and charged against the national quotas. Any regional quota not fully used within the period specified for allotment of quota numbers would expire automatically at the end of such period.

The Jewish Memorial Hospital and Its New Development Program

EXTENSION OF REMARKS
OF
HON. HERBERT ZELENKO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 20, 1961

Mr. ZELENKO. Mr. Speaker, in the district which I have the honor to represent is located the Jewish Memorial Hospital. This great institution dedicated to healing has never turned away anyone who has been ill or injured. It is a voluntary hospital supported by devoted humanitarians.

A long-treasured Jewish Memorial Hospital dream was brought several steps nearer to realization when Jesse H. Barkin, president of the hospital's board of trustees, released a public announcement on January 23, 1961, that Milton S. Heller has been named general chairman of a new development fund program that is already in action. The public announcement released to the press and to community, professional, and hospital publications and circularized to the medical staff, read as follows: Milton S. Heller, a director of the McCrory Corp. and Landers, Frary & Clark Co., and a partner in Heller Bros., has been named chairman of a $2 million development fund campaign to expand the bed facilities and other services of Jewish Memorial Hospital, a nonsectarian, voluntarily supported institution located at Broadway and 196th Street. Announcement of this appointment was made by Jesse H. Barkin, president of the hospital's board of trustees.

Mr. Heller, a trustee and vice president of the hospital, heads up a development fund campaign committee consisting of David Schwartz, chairman of the board of Jonathan Logan; Henry Kalman, of the R. & K. Dress Co.; Henry L. Schenk, president of the Trade Bank & Trust Co.; Marvin Kratter, of the Kratter Corp.; David Dawn, of Alice Stuart; and Drs. Walter Levy and Harry Wallerstein, of the hospital's medical board. Julius Israel, of Regal Knitwear Co., is chairman of special gifts.

Behind this announcement is the story of the earnest efforts by the board of trustees, the medical board, and the administration to evolve the ways and means that would enable the hospital, which has by now grown to the point where additional building is absolutely essential, to provide still more services and facilities for the use of the community. The founders of the hospital, back in 1905, and even those who later planned and brought to realization the present building, understandably could not foresee the growth of the institution that they had established. Nor could they forecast accurately the enormous expansion of the population of the areas that Jewish Memorial Hospital serves: Washington Heights, Inwood, Riverdale, and the Bronx. In terms of numbers, the estimated population of these communities totals approximately 300,000 people.

The result of this growth has been such that the hospital has for years had the recurring problem of how to enlarge its facilities to provide the necessary services called for by its growing importance in the community. After the research laboratory building was completed and other structural modifications made to keep up with the growing needs, there still remained the increasing need for more beds, more facilities, more hospital services.

For years, the board of trustees have been studying this problem. One plan after another was evolved, with each having to yield either because the requirements continued to grow or the costs seemed prohibitive. With every major step, approval was needed from city and State agencies. Consultations were held with architects and builders.

As a background to all of this effort, there was the ever-present phenomenon of steadily rising building and maintenance costs. In past years, a portion of the funds raised from the annual dinner and from the souvenir dinner journal could be set aside to be applied at a later date toward new construction. Today the steeply rising costs are such that the moneys now raised by the hospital barely cover the annual maintenance deficit.

During 1960 the board of trustees took the serious step of approving a building program that would take care of the hospital needs for the reasonable foreseeable future. Present plans, while not complete or definite, are designed to provide for 48 additional beds, 4 major operating rooms, anesthesia induction rooms, plaster and fracture operating room, cystoscopic X-ray operating suite, central supply and sterilization unit, new medical library and conference room, and an entire new integrated maternity unit. Also, 4 new nursery suites of 10 basinets each, a new suspect nursery, a 4-bed isolation nursery, a new formula preparation room, and a new circumcision room.

In addition there will be two patient-guest lounges, a doctor's rest and locker room, a doctor's conference lounge, two nurses' rest and locker rooms, and three new treatment and examining rooms. The plans provide for new and enlarged clinics in rehabilitation medicine and mental health. Also included is an obstetrician's lounge and sleeping quarters and many other auxiliary service units.

The cost of these additions is now estimated to be in the $2 million range.

To raise these funds, the board thought it desirable to approach first its own trustees and medical staff. From these sources there was pledged a total of close to $300,000. However, the anticipated costs are such that it now becomes absolutely indispensable to go beyond the confines of the Jewish Memorial Hospital family. It becomes imperative to appeal to the communities for their philanthropic support.

The development fund will be used to increase the inpatient facilities of the hospital by 45 beds, enlarge and integrate its maternity unit, add operating rooms, expand the rehabilitation department, provide additional library space, and increase the hospital's community and outpatient services particularly in its growing mental health and geriatric departments.

The development fund campaign is enlisting the community leadership of Washington Heights, Inwood, Riverdale, and the Bronx. These, among the most rapidly growing areas of New York City, are all served by Jewish Memorial Hospital as a community hospital.

Louis Miller is the hospital director. Seymour Ardam, formerly with the Albert Einstein College of Medicine, Yeshiva University, has been named as coordinator of the development fund campaign.

With this in mind, the development fund committee under the leadership of Milton S. Heller engaged a fundraiser and program coordinator. Seymour Ardam, the man selected for this important post, brings with him many years of experience with the Federation of Jewish Philanthropies, The United Jewish Appeal, and the Albert Einstein College of Medicine of Yeshiva University.

Along with the development fund committee of the board of trustees, a medical staff division of the development fund committee has been set up under the chairmanship of Drs. Harry Wallerstein and Walter Levy. Drs. Herman Cohen and Meyer Karsh, of Riverdale; Drs. Milton Klein and Sol Schifrin, of the Bronx; and Dr. Herbert Zerner, of Washington Heights, will

serve as cochairmen of their respective communities.

Also a general community division is being organized under the chairmanship of C. William Borchers, president of the North Side Savings Bank. Functional committees are now being set up in the Bronx, Riverdale, and Washington Heights. Through the efforts of Mr. Borchers, chairmen for these communities have been appointed. They are: for the Bronx, District Attorney Isidore Dollinger; for Riverdale, Commissioner Francis J. Bloustein, vice chairman of the New York City Planning Commission; and for Washington Heights, Floyd Cramer, president of the Washington Heights Savings & Federal Loan Association.

Many prominent civic and industrial leaders have indicated their interest and support of the program by enlisting as members of the development fund committee. The manner in which these civic-minded leaders have responded to Mr. Borchers' request indicates that the public realizes the need for the development and growth of the hospital as an absolute necessity. The campaign promises to be hard and demanding, but its goals are also challenging and inspiring.

Life Tenure of the Judges of the Court of Military Appeals

EXTENSION OF REMARKS
OF

HON. JOHN E. FOGARTY

OF RHODE ISLAND
IN THE HOUSE OF REPRESENTATIVES

Monday, March 20, 1961

Mr. FOGARTY. Mr. Speaker, the grant of life tenure to the judges of the Court of Military Appeals will accord that tribunal the judicial position demanded by its important functions and its many and heavy responsibilities.

When the Uniform Code of Military Justice was approved by the House of Representatives in 1950, section 67 thereof provided that the judges of the Court of Military Appeals should hold office during good behavior. As it originally passed the House, the bill also contained a further provision to the effect that the court's judges were entitled to enjoy the same powers, privileges, and rights of retirement possessed by the judges of the several U.S. Courts of Appeals. By subsequent action of the Senate, the House's life tenure provision was removed and a term of 15 years was substituted therefor. This term scheme, originating in the Senate, ultimately found its way into the legislation signed by the President.
